Hanger prosthetic expert Kevin Carroll featured in TIME Magazine

March 28, 2008
In the March 31st issue of TIME Magazine, an article titled “Innovators: Building a Better Athlete” introduces six expert craftsmen and scientists who have developed mechanisms and methods that improve athletic performance, from prosthetic solutions and genetic identification to baseball bats and bicycles. The talent, success, and visionary contributions of Hanger's Vice President of Prosthetics Kevin Carroll, CP, FAAOP are recognized in the article that identifies him as “a go-to guy for disabled athletes who want to take artificial limbs to the extreme.”

Hanger patients Cameron Clapp and Warren MacDonald were also recognized in the article for their impressive athletic accomplishments.
