NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

   A. Accounting Practices:

   United States Fidelity and Guaranty Company (the Company) prepares its statutory financial statements in conformity with the accounting practices prescribed or permitted by the State of Connecticut Insurance Department. Insurance companies domiciled in Connecticut are required to prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners (NAIC) *Accounting Practices and Procedures Manual*, subject to any deviations prescribed or permitted by the Connecticut Insurance Commissioner. The Company does not apply any statutory accounting practices that would be considered a permitted practice in its financial statements.

   No significant change.

   B. Debt Restructuring:

   No significant change.

   C. Reverse Mortgages:

   No significant change.

   D. Asset-Backed Securities:

   1. The Company applies the retrospective method of revaluing asset-backed securities. The Company's asset-backed securities are revalued quarterly using the constant effective yield method which includes an adjustment for estimated principal prepayments, if any. The effective yield used to determine amortization for these securities is recalculated and adjusted periodically based upon actual historical and/or projected future cash flows. The Company changes from the retrospective to prospective method for valuing the securities when an other-than-temporary impairment has been recorded.

      For collateralized mortgage obligations, asset-backed securities and pass-through certificates prepayment assumptions are adjusted periodically.

      Fair value amounts disclosed are generally provided by the Securities Valuation Office (SVO) or, if not available from the SVO, by third party pricing services.

   2. The Company had no asset-backed or structured securities with other-than-temporary impairments recognized in 2025.

NOTES TO FINANCIAL STATEMENTS

3. Not applicable.

4. The gross unrealized investment losses and related fair value for impaired securities for which an other-than-temporary impairment has not been recognized as a realized loss were as follows:

   a. The aggregate amount of unrealized losses:

1. Less than 12 Months	$	2,270,982
2. 12 Months or Longer	$	8,802,377

   b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	$	114,001,048
2. 12 Months or Longer	$	85,597,878

5. The Company determines an other-than-temporary impairment by utilizing discounted cash flow modeling to determine the present value of the security and comparing the present value with the amortized cost of the security. If the amortized cost is greater than the present value of the expected cash flows, the difference is considered a credit loss and recognized in net realized capital gains (losses). The Company estimates the present value of the security by projecting future cash flows of the assets underlying the securitization, allocating the flows to the various tranches based on the structure of the securitization, and determining the present value of the cash flows using the effective yield of the security at the date of acquisition (or the most recent implied rate used to accrete the security if the implied rate has changed as a result of changes in expected cash flows). The Company incorporates levels of delinquencies, defaults and severities as well as credit attributes of the remaining assets in the securitization, along with other economic data, to arrive at its best estimate of the parameters applied to the assets underlying the securitization.

20. FAIR VALUE MEASUREMENTS

The Company's estimates of fair value for financial assets and financial liabilities are based on the framework established in the fair value accounting guidance. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets, and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the fair value accounting guidance hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest priority is given to unadjusted quoted prices in active markets and the lowest priority to unobservable inputs that reflect the Company's significant market assumptions. The level in the fair value hierarchy within which the fair value measurement is reported is based on the lowest level input that is significant to the measurement in its entirety. The three levels of the hierarchy are as follows:

- Level 1 - Unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.
- Level 3 - Valuations based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use.

A. The Company does not hold any securities measured and reported at fair value as of June 30, 2025.

B. Not applicable.

C. The following tables provide the aggregate fair value and reported aggregate admitted asset value by type of financial instrument; and the hierarchy level in which the fair values fall:

25. CHANGES IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES

In 2025, the prior year-end total loss and LAE reserves developed favorably by $24,186,000, resulting from better than expected loss and defense and cost containment experience across multiple Schedule P lines, primarily homeowners, private passenger auto liability and workers' compensation lines of business. This favorable development was partially offset by worse than expected loss experience in other liability – occurrence.

The improvement in workers' compensation was driven primarily by better than expected loss experience in multiple accident years. Lower estimates for adjusting and other expenses also contributed to the workers' compensation improvement. The improvements in private passenger auto liability and homeowners were driven primarily by better than expected loss experience in recent accident years.

The deterioration in other liability – occurrence was driven primarily by higher than expected loss experience as well as adjusting and other expenses in multiple accident years.

The remaining changes are generally the result of ongoing analyses of recent loss data and trends. A portion of the change from the prior year effects relates to retrospectively rated policies which are subject to premium adjustments.
