

The AES Corporation
Second Quarter 2017 Financial Review

August 8, 2017

AES
we are the energy

Safe Harbor Disclosure

Certain statements in the following presentation regarding AES' business operations may constitute "forward-looking statements." Such forward-looking statements include, but are not limited to, those related to future earnings growth and financial and operating performance. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute AES' current expectations based on reasonable assumptions. Forecasted financial information is based on certain material assumptions. These assumptions include, but are not limited to, accurate projections of future interest rates, commodity prices and foreign currency pricing, continued normal or better levels of operating performance and electricity demand at our distribution companies and operational performance at our generation businesses consistent with historical levels, as well as achievements of planned productivity improvements and incremental growth from investments at investment levels and rates of return consistent with prior experience. For additional assumptions see Slide 55 and the Appendix to this presentation. Actual results could differ materially from those projected in our forward-looking statements due to risks, uncertainties and other factors. Important factors that could affect actual results are discussed in AES' filings with the Securities and Exchange Commission including but not limited to the risks discussed under Item 1A "Risk Factors" and Item 7: "Management's Discussion & Analysis" in AES' 2016 Annual Report on Form 10-K, as well as our other SEC filings. AES undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Reconciliation to U.S. GAAP Financial Information

The following presentation includes certain "non-GAAP financial measures" as defined in Regulation G under the Securities Exchange Act of 1934, as amended. Schedules are included herein that reconcile the non-GAAP financial measures included in the following presentation to the most directly comparable financial measures calculated and presented in accordance with U.S. GAAP.

Q2 2017 Financial Review Call

- Adjusted EPS[1] of $0.25, an increase of $0.08, largely driven by higher availability and capital allocation decisions
- Reaffirming 2017 guidance and expectations through 2020
- Evaluating path forward for Alto Maipo hydro project under construction in Chile
- Successfully completed the expansion of our DPP gas-fired plant in the Dominican Republic
- Secured $2 billion in non-recourse financing on favorable terms and broke ground on our 1.4 GW Southland re-powering project in California
- With the exception of Alto Maipo, our 4.7 GW under construction are progressing well and remain on track to be completed through 2020
- Closed acquisition of sPower, the largest independent solar developer in the United States, to increase our long-term contracted, U.S. Dollar-denominated, renewable portfolio
- To take advantage of our leadership position in energy storage, we announced a 50/50 joint venture with Siemens to create a global energy storage technology and services company
- On track to achieve our $400 million per year cost reduction and revenue enhancement program

1. A non-GAAP financial measure. See Appendix for definition.

Alto Maipo in Chile

- As disclosed in May, construction difficulties resulted in projected cost overruns of up to 22% ($460 million) of total project cost
- Slower than anticipated productivity by construction contractors since last call
  - Alto Maipo terminated one of the project's contractors for performance reasons
- In discussion with potential replacement construction contractors and non-recourse lenders
  - Alto Maipo looking for modified construction contracts and financial flexibility
- AES' total exposure to the project is approximately $415 million, 87% of which has already been invested
- Will be disciplined when it comes to evaluating any incremental investment from AES Gener into Alto Maipo
- Do not expect any material impact on our 2017 guidance and expectations through 2020

DPP in the Dominican Republic

122 MW CCGT Expansion

- Recently completed 122 MW expansion of existing DPP plant, for total capacity of 358 MW
- One of the lowest cost generators in the Dominican Republic
- New capacity contracted under a long-term, U.S. Dollar-denominated PPA
- Completed on budget for total capex of $260 million, funded through debt capacity at AES Dominicana

Eagle Valley in Indiana

671 MW CCGT, COD[1]: 1H 2018

- Remain confident that the project will achieve COD[1] in 1H 2018
- EPC contractor, CBI[2], has created positive momentum by subcontracting some critical work in an effort to achieve substantial completion by year-end 2017
  - Approximately 1,000 workers on-site

1. Commercial Operations Date.
2. Chicago Bridge and Iron Company.

Southland Repowering in California

1,384 MW Gas and Energy Storage, COD[1]: 1H 2020 (Gas) and 1H 2021 (Energy Storage)

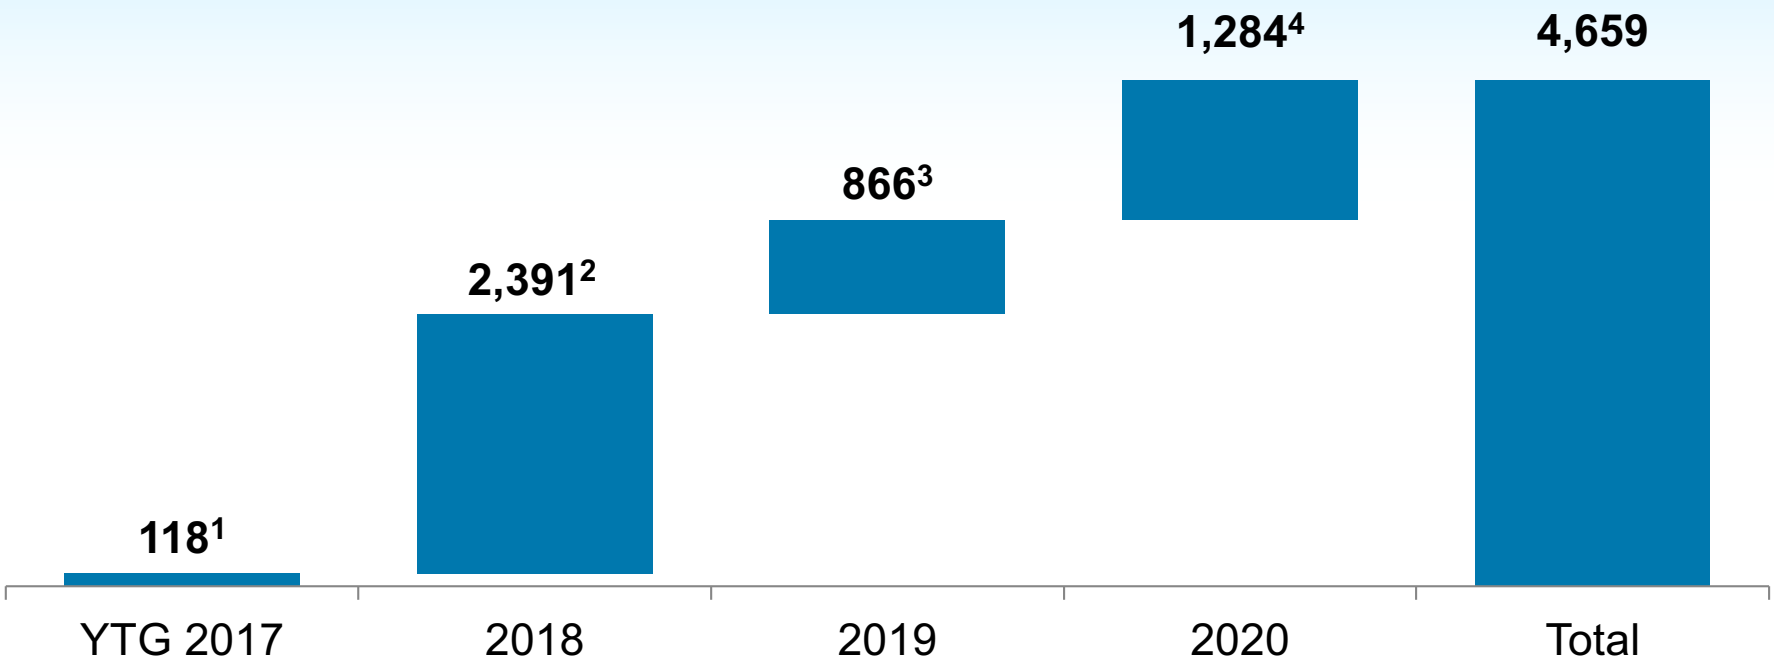

- Closed $2 billion in long-term, non-recourse financing at 4.5%
  - Demonstrates strength of the project, which has 20-year PPAs with Southern California Edison
  - Largest non-recourse financing including a battery-based energy storage project
- Gas-fired capacity will be constructed by Kiewit
  - One of North America's largest engineering and construction contractors
  - Successful track record of completing similar CCGT projects in California

1. Commercial Operations Date.

On Track to Complete Projects Under Construction

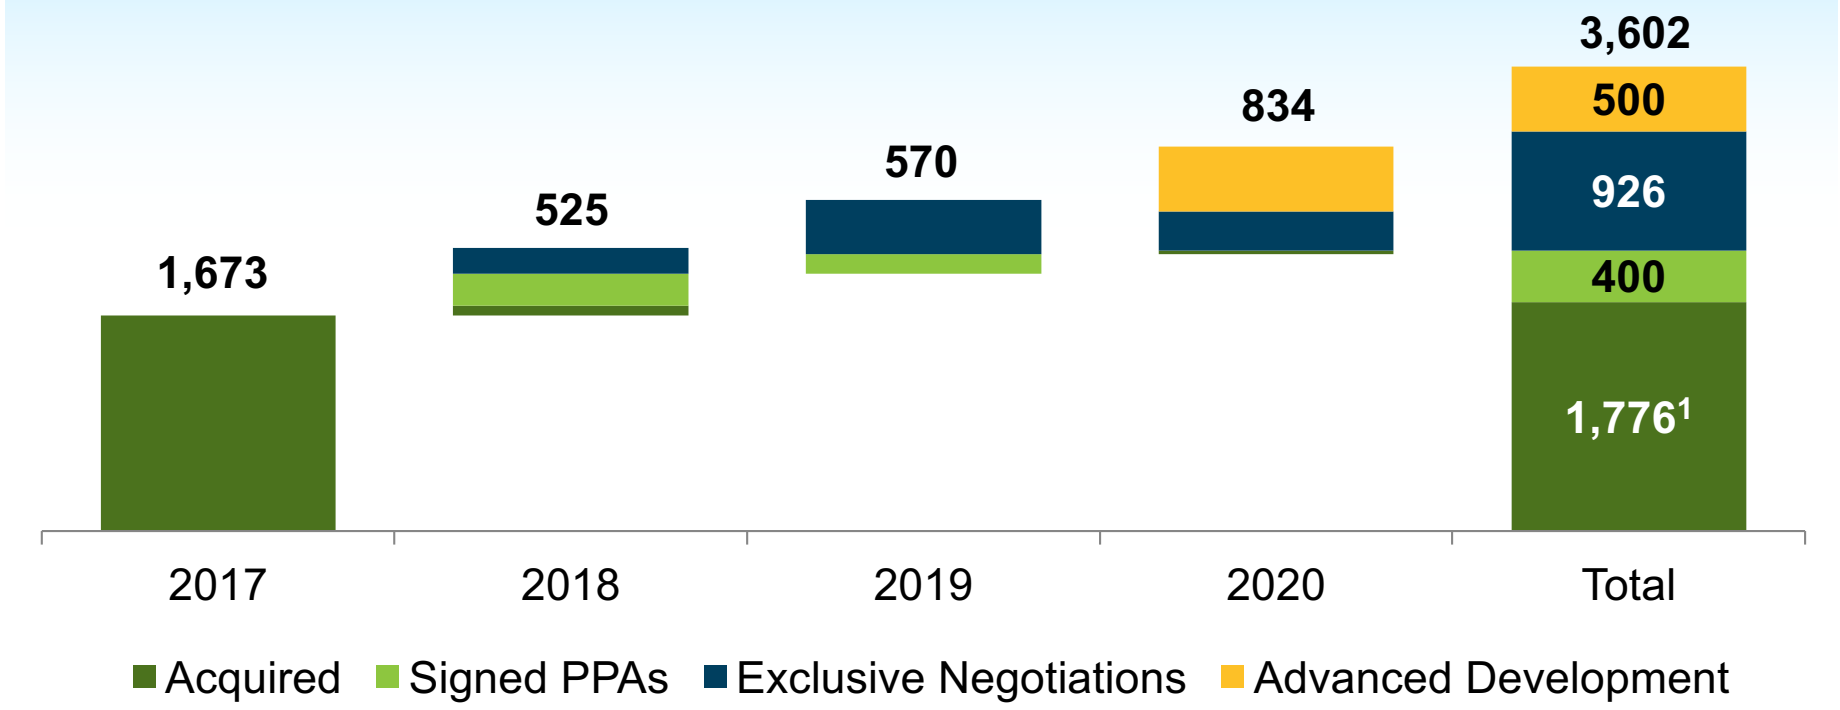

4,659 MW Currently Under Construction Coming On-Line Through 2020

1. Includes: 79 MW sPower (US-CA), 20 MW Dominican Energy Storage (Dominican Republic) and 19 MW Distributed Energy (US).
2. Includes: 1,320 MW OPGC 2 (India), 671 MW Eagle Valley CCGT (US), 380 MW Colón (Panama) and 20 MW Distributed Energy (US).
3. Includes: 531 MW Alto Maipo (Chile) and 335 MW Masinloc 2 (Philippines).
4. Includes: 1,284 MW Southland Re-Powering (US-CA).

Significant Progress Toward Repositioning Our Portfolio

Wind and Solar: Acquired 1.8 GW and Potential to Add at Least 1.5 GW Through 2020

Note: Solar capacity shown in DC and wind capacity shown in AC.

1. Includes: 1,287 MW sPower (solar, US-CA), 386 MW Alto Sertão (wind, Brazil), 75 MW Boa Hora (solar, Brazil) and 28 MW Na Pua Makani (wind, Hawaii).

Joining Forces with Siemens to Create Fluence

New Global Energy Storage Technology and Services Company

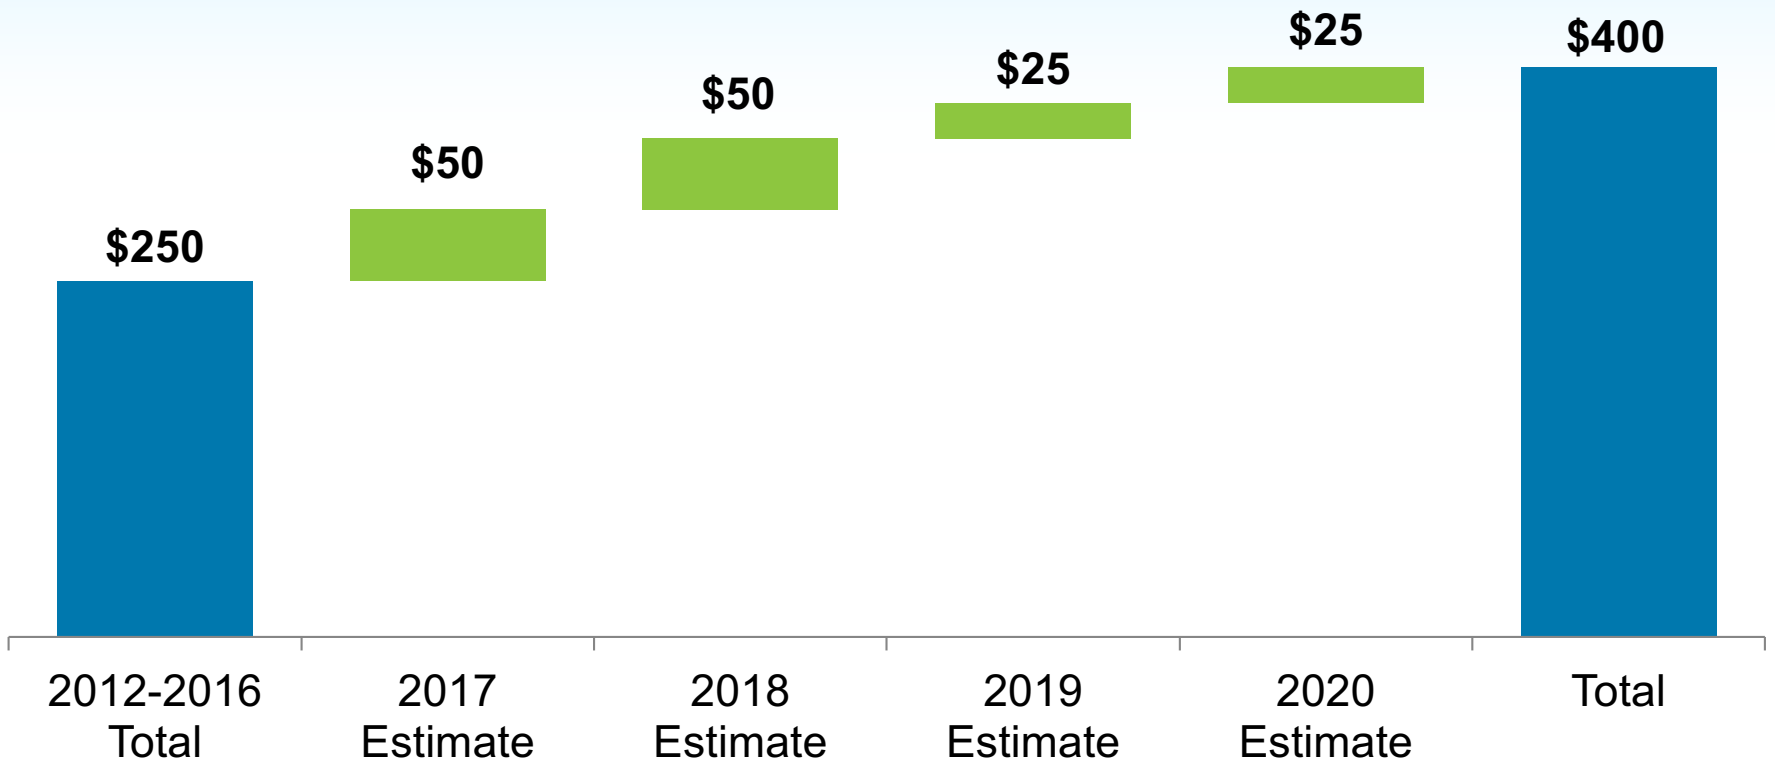

FLUENCE
A Siemens and AES Company

- Worldwide installed base for energy storage projected to grow to 28 GW over next five years
  - Well-positioned to take advantage and see it as an upside to our outlook
- New 50/50 joint venture unites scale, experience and resources of AES and Siemens, to develop new storage solutions and services, reaching customers in more than 160 countries
  - Expected to close in the fourth quarter of this year, following regulatory approvals

Performance Excellence[1]

$ in Millions

On Track to Achieve $400 Run Rate through 2020

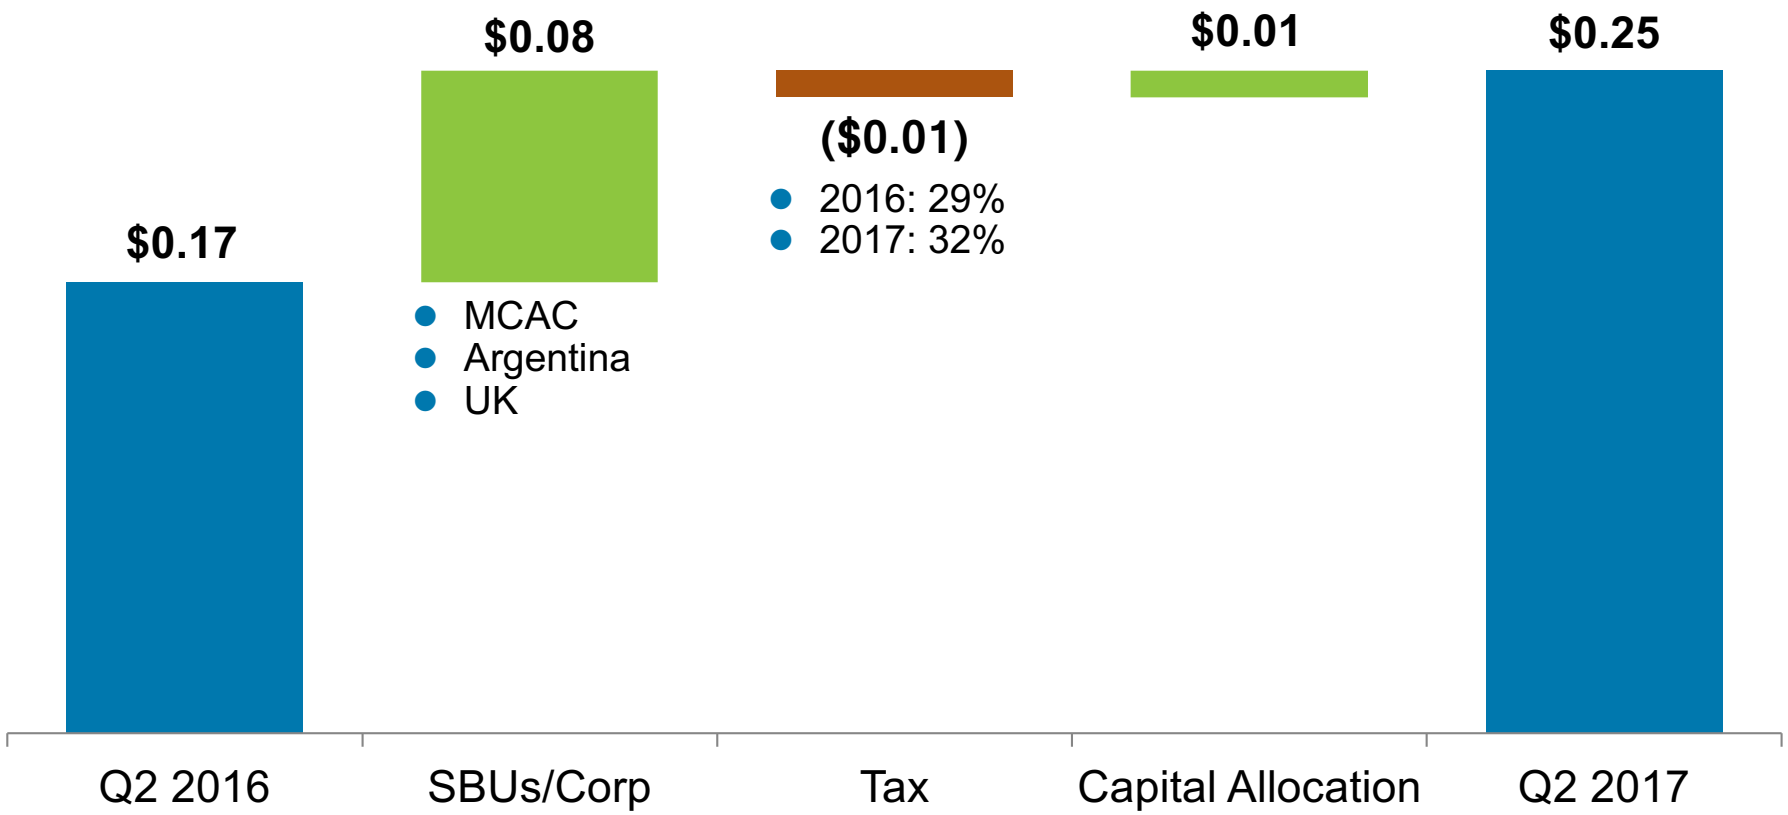

1. Cost reductions reflected in General and Administrative Expense (G&A), as well as Cost of Sales. Some of the previously reported 2012 and 2013 G&A Expense related to administrative costs at our SBUs has been reclassified to Cost of Sales.

Q2 2017 Financial Review

- Q2 2017 results
  - Adjusted EPS[1]
  - Consolidated Free Cash Flow[1] and Adjusted PTC[1] by Strategic Business Unit (SBU)
- 2017 Parent capital allocation plan
- 2017 Guidance and 2018-2020 expectations

1. A non-GAAP financial measure. See Appendix for definition.

Q2 2017 Adjusted EPS[1] Increased $0.08

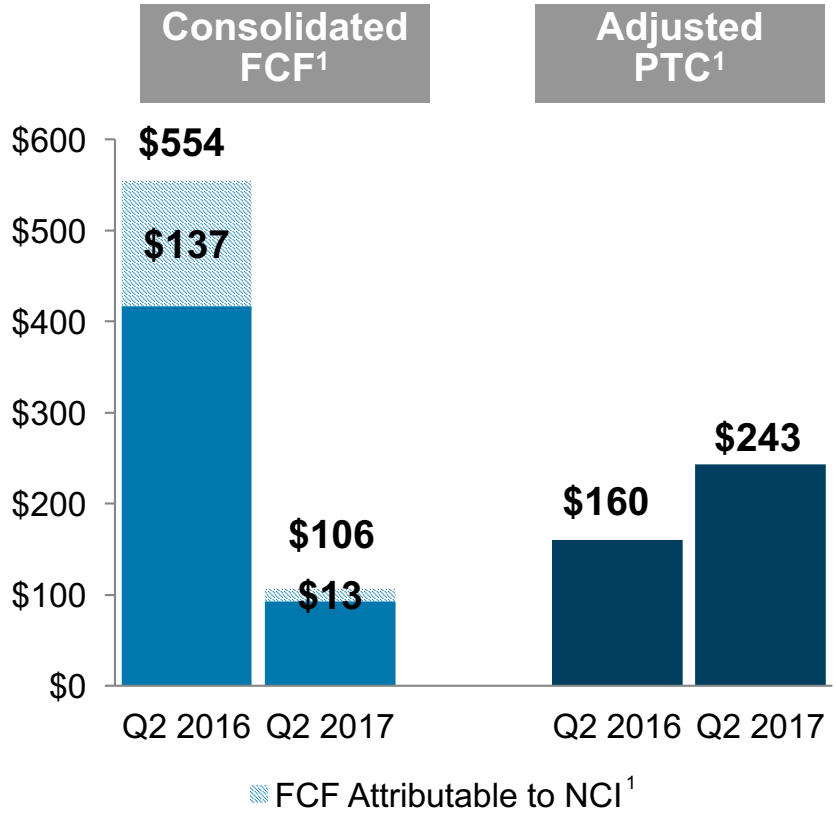

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results

$ in Millions

Consolidated FCF[1] Decreased $448; Adjusted PTC[1] Increased $83

- Margins improved primarily due to higher availability in MCAC and Argentina
- Adjusted PTC[1] also reflects lower Parent interest expense
- Lower Consolidated FCF[1] also reflects the collection of overdue receivables at Maritza in Bulgaria in 2016, and higher working capital requirements in Brazil

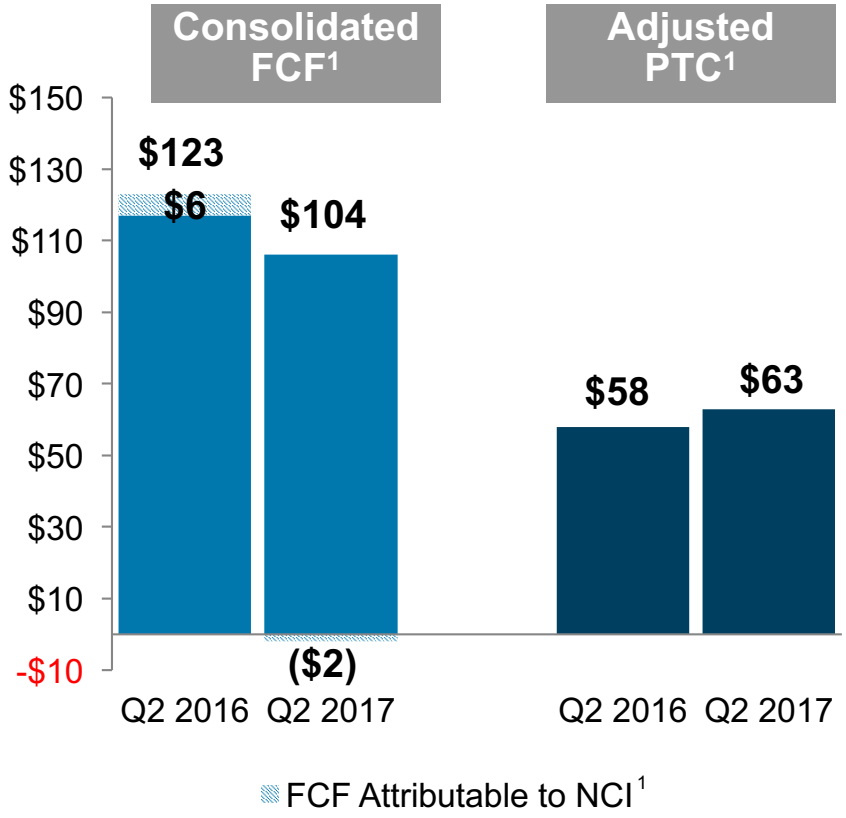

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: US SBU

$ in Millions

Consolidated FCF[1] Decreased $19; Adjusted PTC[1] Increased $5

- Margins declined primarily due to an accrual associated with the 2016 rate order at IPL in Indiana and a reversion to prior ESP rates at DPL in Ohio
- Higher Adjusted PTC[1] also reflects growth in distributed energy business
- Lower Consolidated FCF[1] also reflects higher working capital requirements at DPL

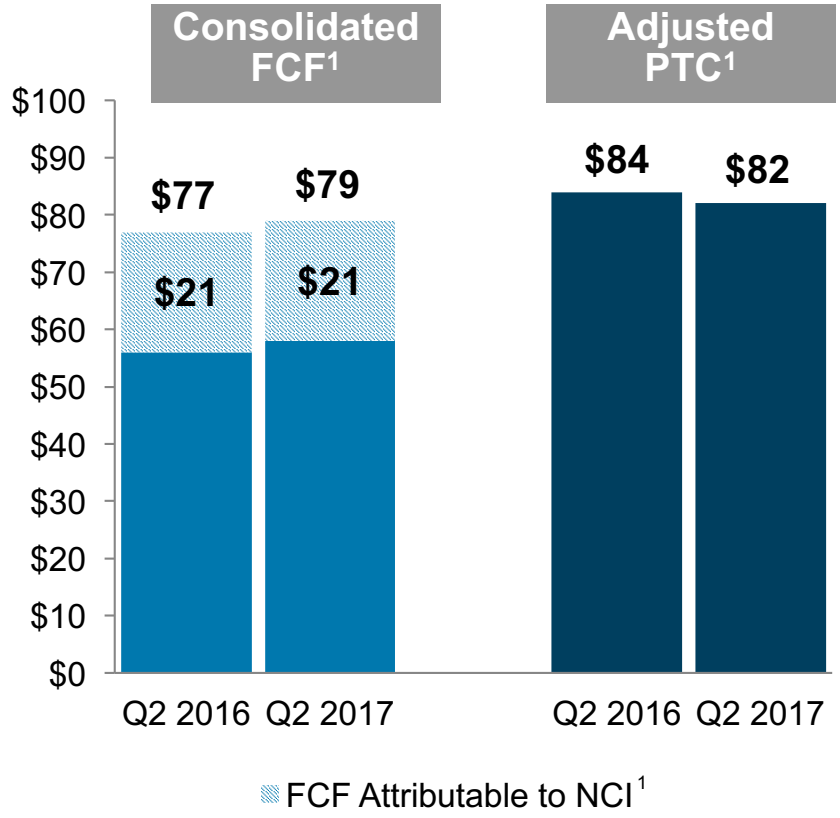

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: Andes SBU

$ in Millions

Consolidated FCF[1] Increased $2; Adjusted PTC[1] Decreased $2

- Margins improved primarily due to improved availability in Argentina
- Lower Adjusted PTC[1] also reflects lower capitalized interest expense on completed construction projects in Chile and lower interest income in Argentina
- Higher Consolidated FCF[1] also reflects lower tax payments at Chivor in Colombia, offset by lower VAT refunds and higher tax payments at Gener in Chile

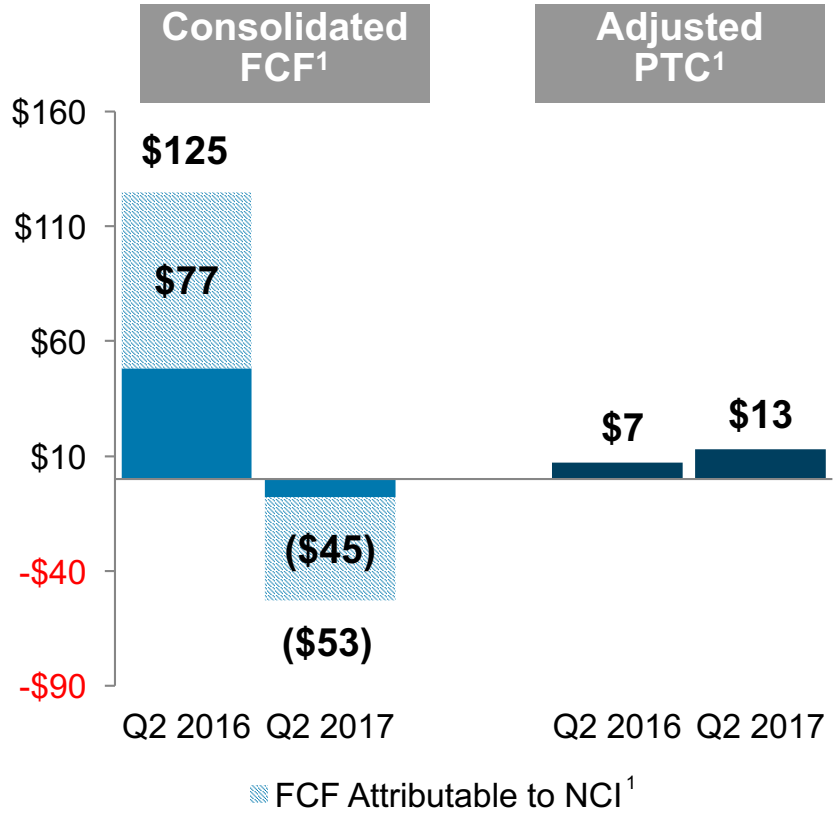

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: Brazil SBU

$ in Millions

Consolidated FCF[1] Decreased $178; Adjusted PTC[1] Increased $6

- Margins were flat
- Lower Consolidated FCF[1] reflects the impact from the recovery of high purchased power costs in 2016 at Eletropaulo, and the sale of Sul

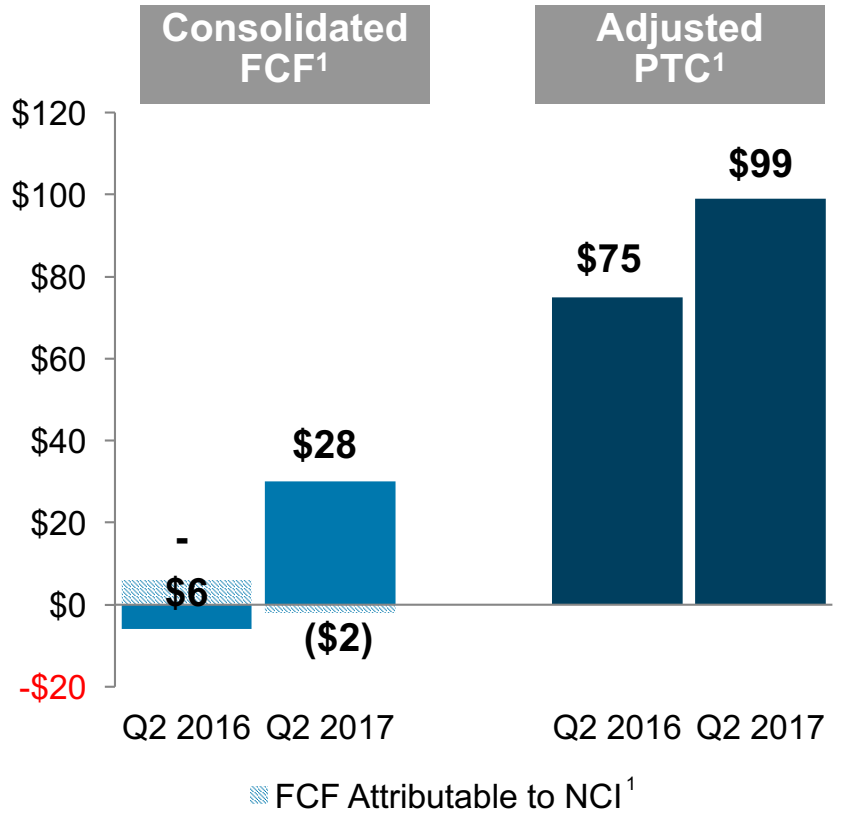

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: MCAC SBU

$ in Millions

Consolidated FCF[1] Increased $28; Adjusted PTC[1] Increased $24

- Margins improved primarily due to higher availability in the Dominican Republic, Mexico and Puerto Rico

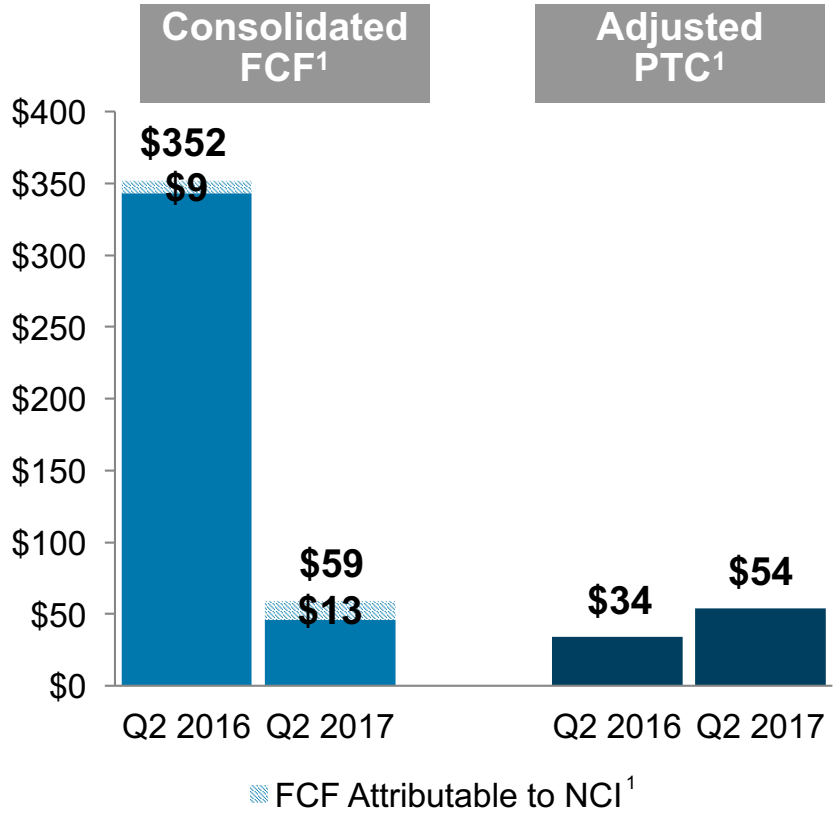

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: Europe SBU

$ in Millions

Consolidated FCF[1] Decreased $293; Adjusted PTC[1] Increased $20

- Margins improved primarily due to higher capacity margins in the United Kingdom
- Lower Consolidated FCF[1] also reflects the collection of overdue receivables in 2016 at Maritza in Bulgaria

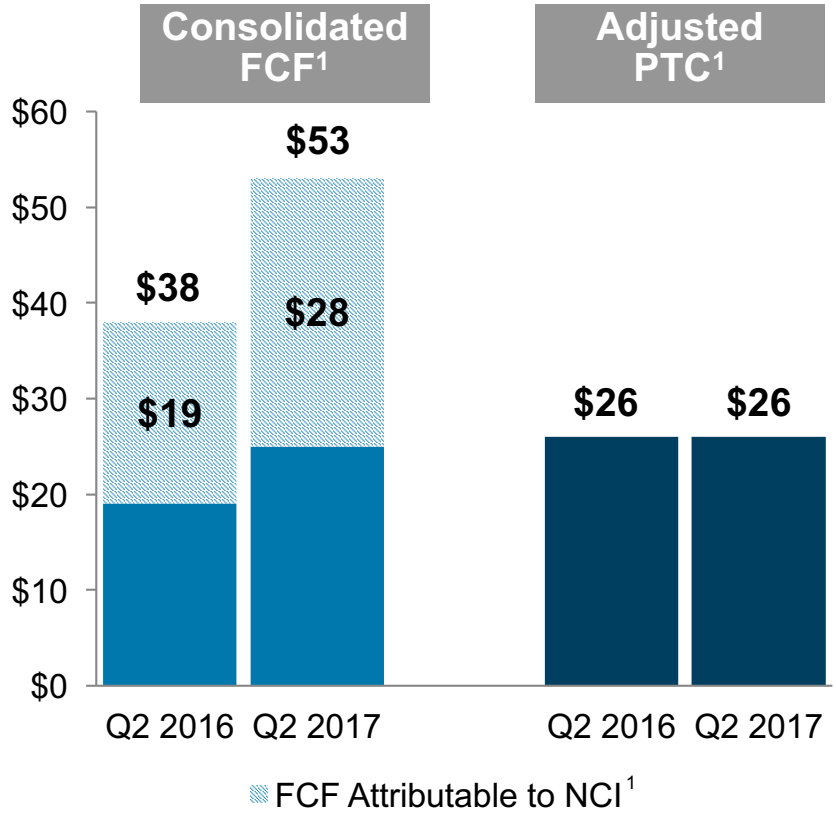

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q2 Financial Results: Asia SBU

$ in Millions

Consolidated FCF[1] Increased $15; Adjusted PTC[1] Flat

- Margins were flat
- Higher Consolidated FCF[1] reflects the timing of fuel payments at Masinloc in the Philippines

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

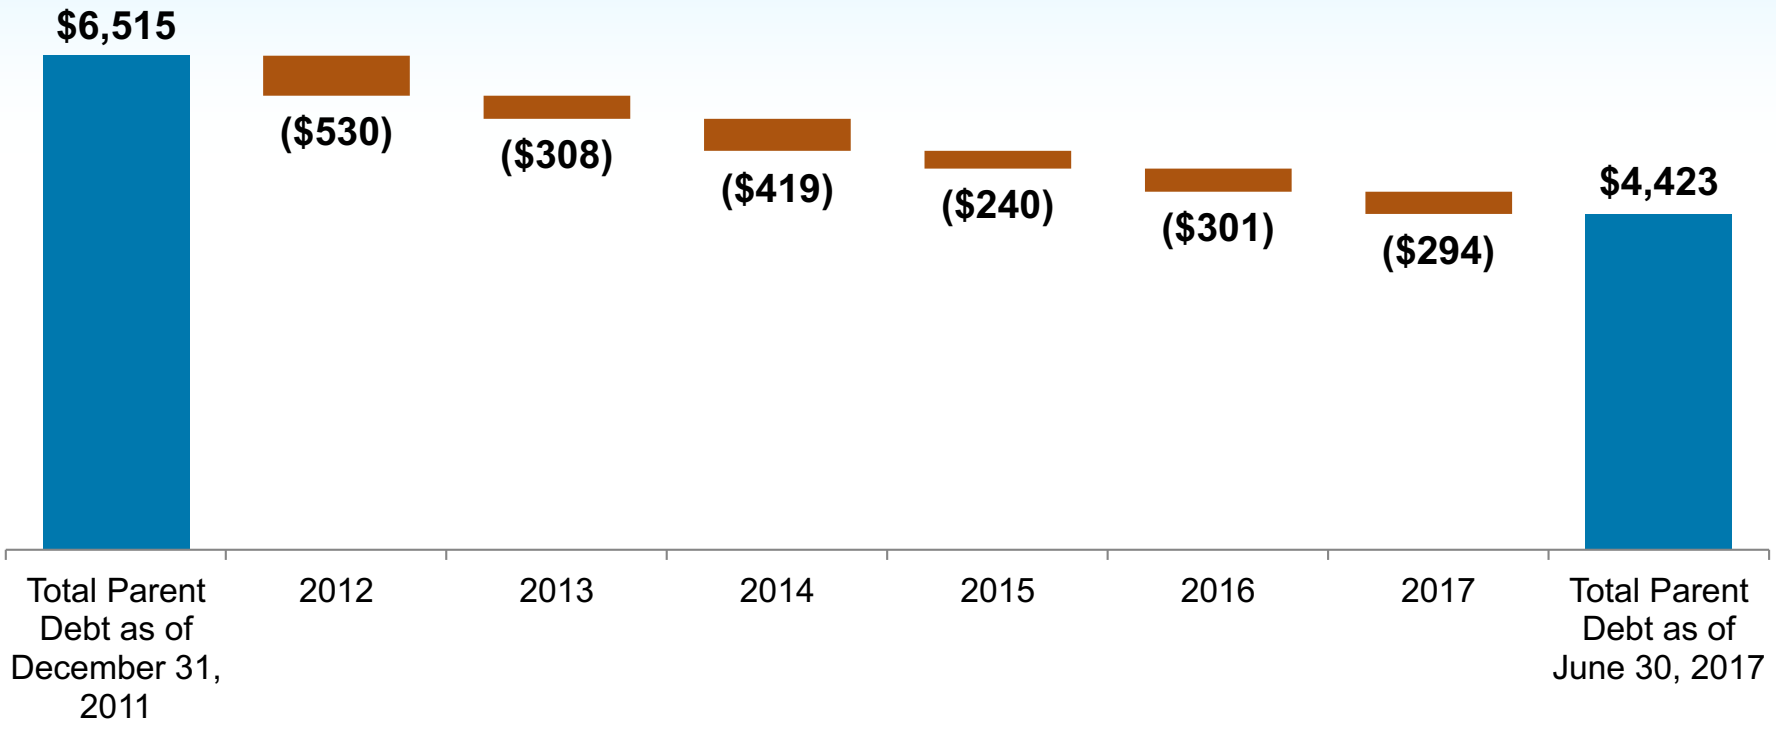

Regulatory Developments in Ohio – Dayton Power & Light (DP&L)

- In March, reached settlement agreement with PUCO Staff and various intervenors on Electric Security Plan (ESP)
  - Distribution Modernization Rider of $105 million/year over three years with potential for two-year extension
  - Commenced sale process for Miami Fort, Zimmer and Conesville (1 GW)
- Post-hearing brief concluded May 15, 2017
- PUCO approval expected Q3 2017
- Committed to:
  - Exiting 100% of coal capacity by June 2018 (2.1 GW)
  - Exploring strategic options for remaining generation (1 GW peakers)
  - Reducing debt

Taking Active Steps Towards DPL Becoming a Stable and Growing T&D Business

Improving Our Debt Profile

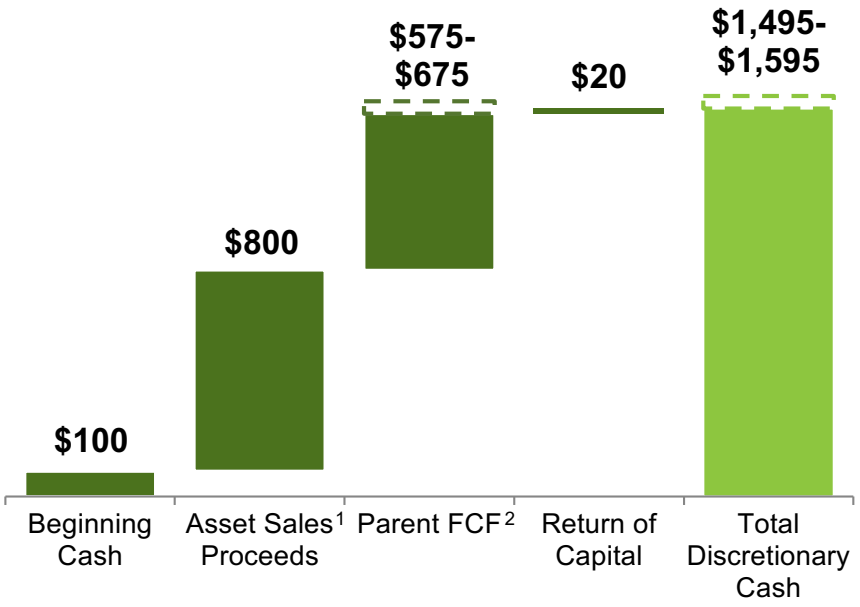

Since 2011, Reduced Parent Debt by 32% or $2.1 Billion ($ in Millions)

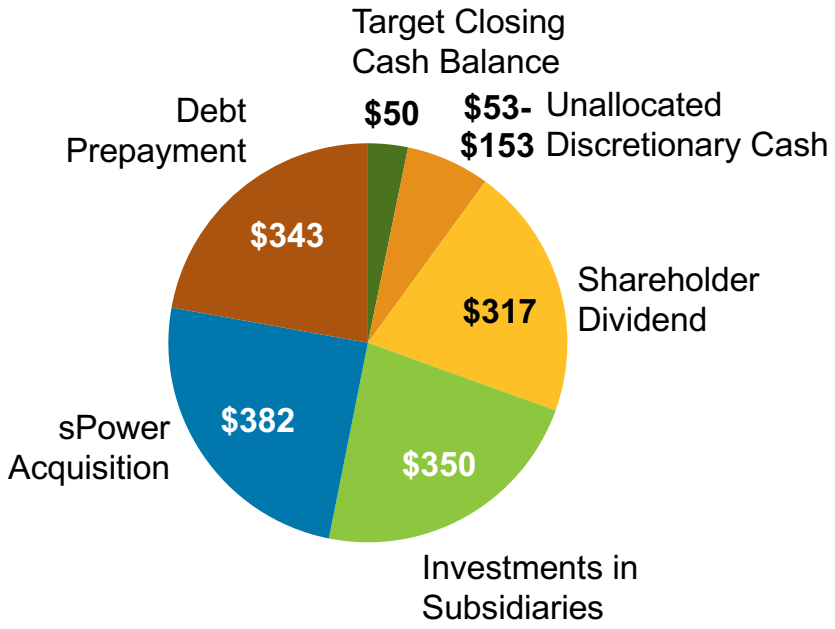

2017 Parent Capital Allocation Plan

$ in Millions

Discretionary Cash – Sources ($1,495-$1,595)

Discretionary Cash – Uses ($1,495-$1,595)

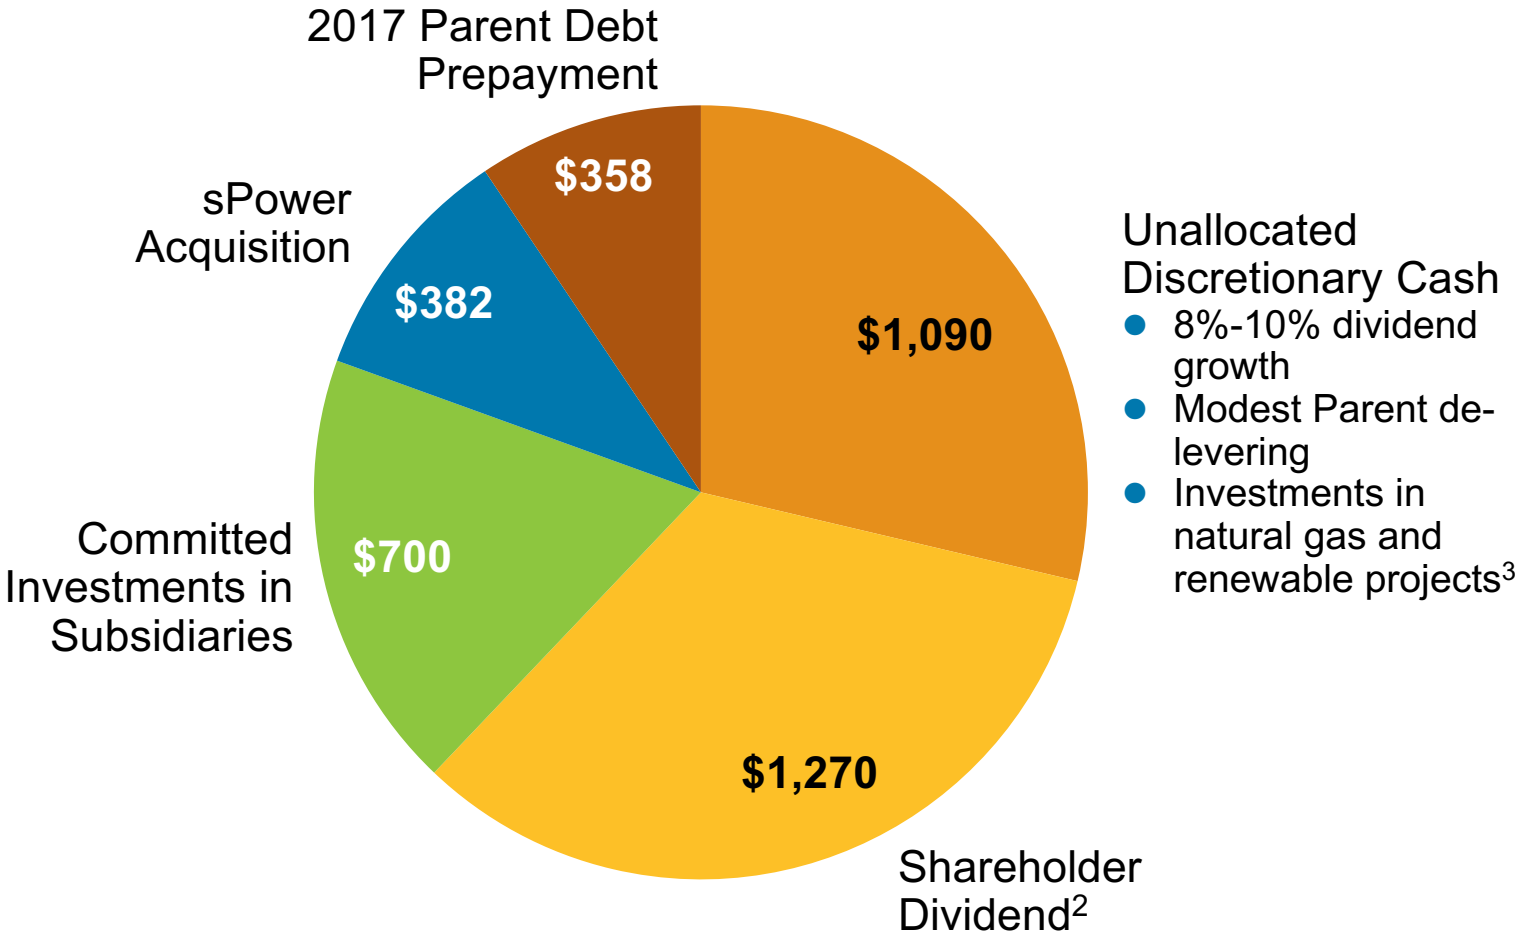

Maximizing Discretionary Cash to Increase Risk-Adjusted Returns for Shareholders

1. Includes: completed $300 million (Sul, Brazil) and $500 million asset sale proceeds target.
2. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Allocating $3.8 Billion[1] Discretionary Cash Through 2020 to Maximize Risk-Adjusted Returns

2017-2020; $ in Millions

1. Includes: $100 million beginning cash; $800 million asset sale proceeds; and Parent Free Cash Flow of $2,900 million, which is based on the mid-point of 2017 guidance of $625 million, growing at the mid-point of our 8%-10% average annual growth rate through 2020. Does not include additional asset sale proceeds.
2. Assumes constant payment of $0.12 per share each quarter on 662 million shares outstanding.
3. Includes investments in renewable development projects in 2018-2020 shown on Slide 9.

Reaffirming Expectations Through 2020

$ in Millions, Except Per Share Amounts

	FY 2016 Guidance & Expectations	FY 2017 Guidance	2020 Expectations
Adjusted EPS[1]	$0.95-$1.05	$1.00-$1.10	8%-10% growth off mid-point of 2016 guidance
Consolidated Net Cash Provided by Operating Activities	$2,000-$2,900	$2,000-$2,800	N/A
Consolidated Free Cash Flow[1]	$1,300-$2,200	$1,400-$2,000	8%-10% growth off mid-point of 2016 guidance

- 2017 guidance based on foreign currency and commodity forward curves as of June 30, 2017

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Conclusion

- Year-to-date results in line with expectations
- Resolution of Alto Maipo expected before year-end
- To deliver attractive growth, on track to complete remaining construction projects, as well as revenue enhancement and cost reduction initiatives
- Repositioning our portfolio by adding renewables and natural gas with long-term, U.S. Dollar-denominated contracts
- Continuing to reduce leverage to achieve investment grade metrics by 2020

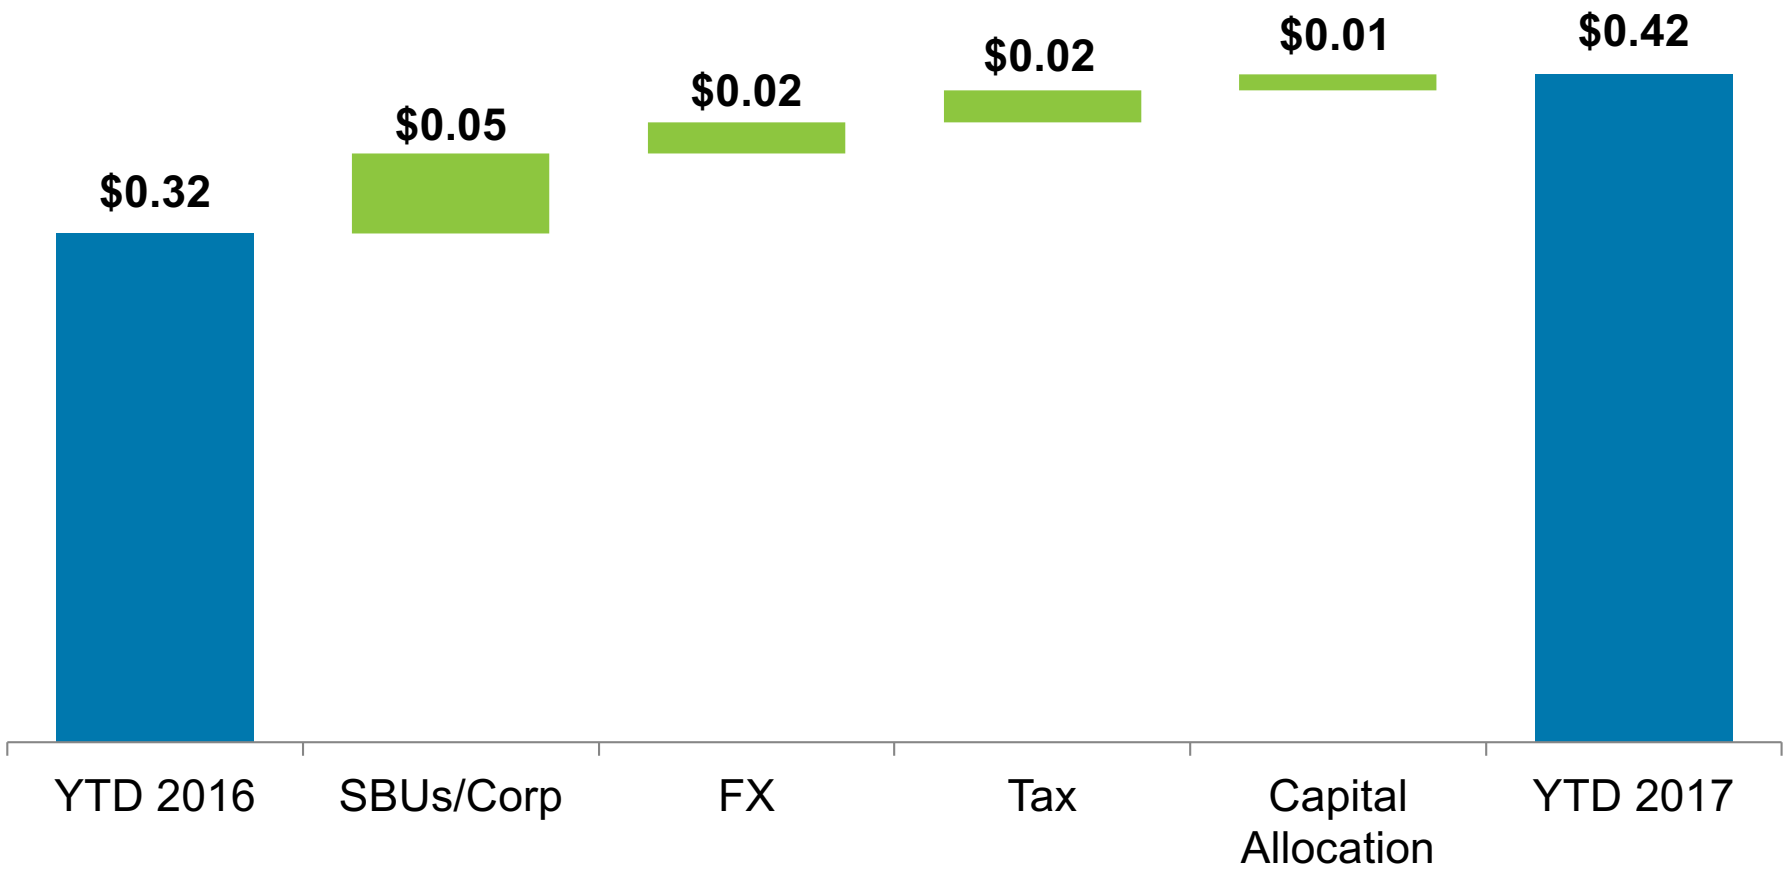

Reaffirming 8%-10% Average Annual Growth in all Key Financial Metrics Through 2020

- Assumptions & Definitions — Slides 55-56

1. A non-GAAP financial measure.

YTD 2017 Adjusted EPS[1] Increased $0.10

1. A non-GAAP financial measure. See Slide 52 for reconciliation to the nearest GAAP measure and "definitions".

Q2 and YTD 2017 Adjusted EPS[1] Roll-Up

$ in Millions, Except Per Share Amounts

	Q2 2017	Q2 2016	Variance	YTD 2017	YTD 2016	Variance
Adjusted PTC[1]						
US	$63	$58	$5	$111	$143	($32)
Andes	$82	$84	($2)	$170	$145	$25
Brazil	$13	$7	$6	$52	$12	$40
MCAC	$99	$75	$24	$158	$123	$35
Europe	$54	$34	$20	$109	$103	$6
Asia	$26	$26	-	$48	$48	-
Total SBUs	**$337**	**$284**	**$53**	**$648**	**$574**	**$74**
Corp/Other	($94)	($124)	$30	($215)	($229)	$14
Total AES Adjusted PTC[1,2]	**$243**	**$160**	**$83**	**$433**	**$345**	**$88**
Adjusted Effective Tax Rate	32%	29%		36%	39%	
Diluted Share Count		662			662	
ADJUSTED EPS[1]	**$0.25**	**$0.17**	**$0.08**	**$0.42**	**$0.32**	**$0.10**

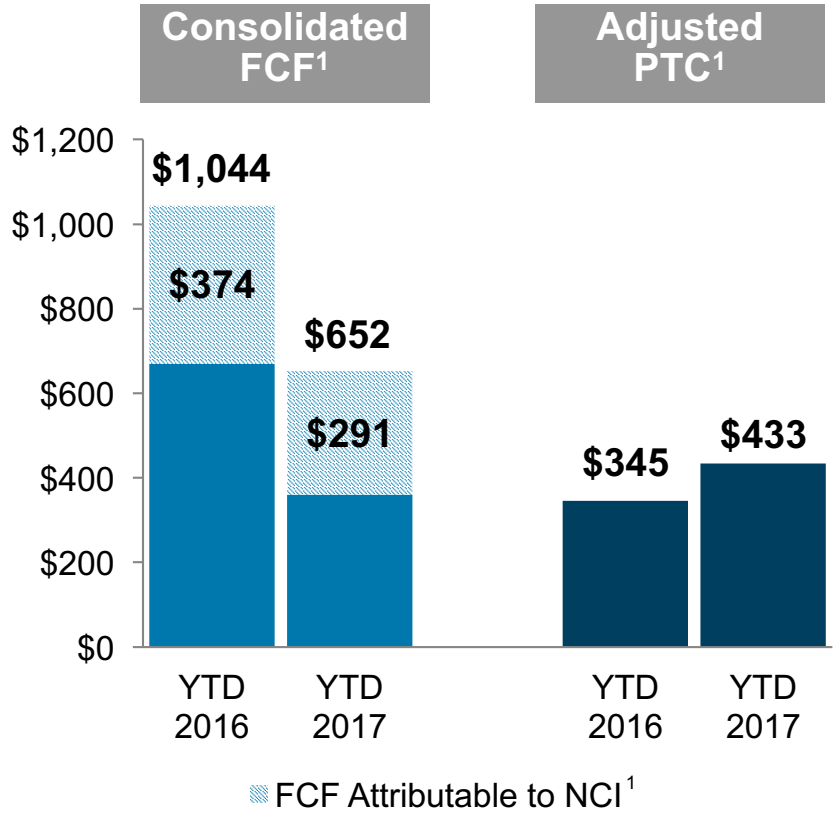

1. A non-GAAP financial measure. See Slides 51 and 52 for reconciliation to the nearest GAAP measure and “definitions”.
2. Includes $6 million and $8 million of after-tax equity in earnings for Q2 2017 and Q2 2016, respectively, and $12 million and $14 million for YTD 2017 and YTD 2016, respectively.

YTD Financial Results

$ in Millions

Consolidated FCF[1] Decreased $392; Adjusted PTC[1] Increased $88

- Margins improved primarily in MCAC, Andes and Brazil
- Higher Adjusted PTC[1] also reflects the successful settlement of a legal dispute in Brazil
- Lower Consolidated FCF[1] also reflects the receipt of overdue receivables at Maritza in Bulgaria in 2016, and higher working capital requirements in Brazil

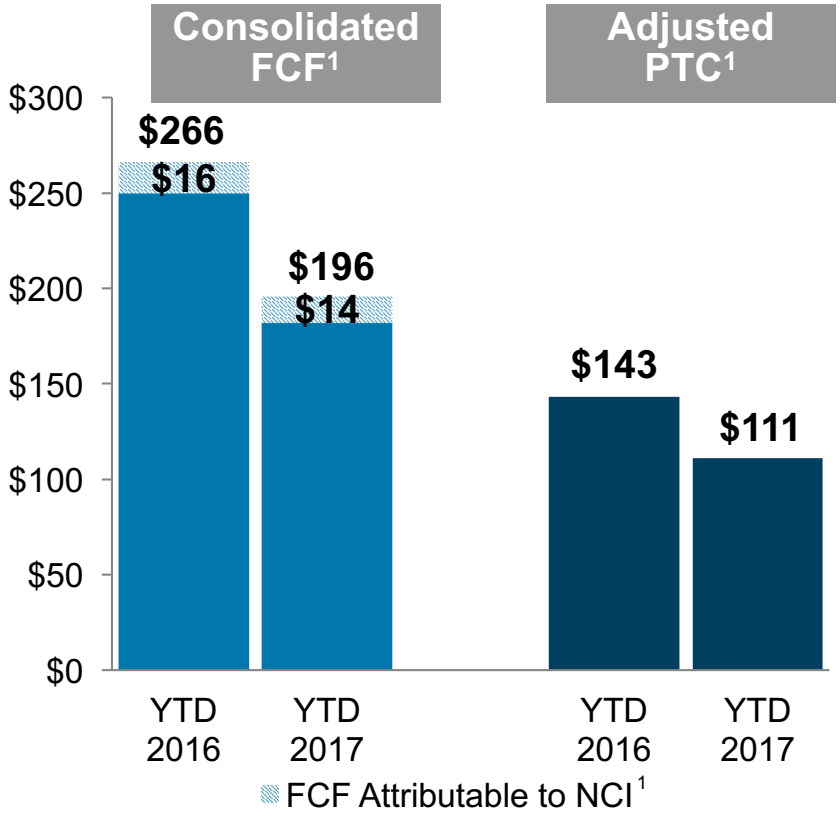

1. A non-GAAP financial measure. See Slides 50 and 52 for reconciliation to the nearest GAAP measure and "definitions".

YTD Financial Results: US SBU

$ in Millions

Consolidated FCF[1] Decreased $70; Adjusted PTC[1] Decreased $32

- Margins declined primarily due to an accrual associated with the 2016 rate order at IPL and reversion to prior ESP rates at DPL in Ohio
- Lower Adjusted PTC[1] also reflects as a result of a contract termination in 2016, related to DPL's competitive retail business
- Lower Consolidated FCF[1] also reflects higher purchased power and fuel costs at DPL

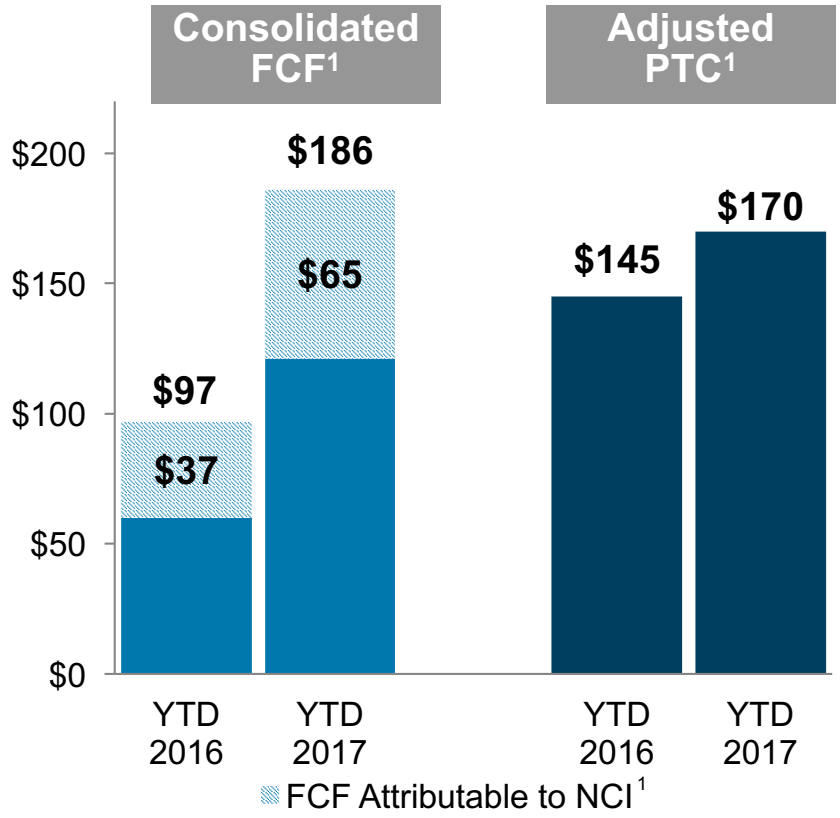

1. A non-GAAP financial measure. See "definitions".

YTD Financial Results: Andes SBU

$ in Millions

Consolidated FCF[1] Increased $89; Adjusted PTC[1] Increased $25

- Margins improved due to higher availability in Argentina and higher reservoir levels and generation in Colombia
- Higher Consolidated FCF[1] also reflects the non-cash impact on margins from environmental tax accruals and higher depreciation in Chile

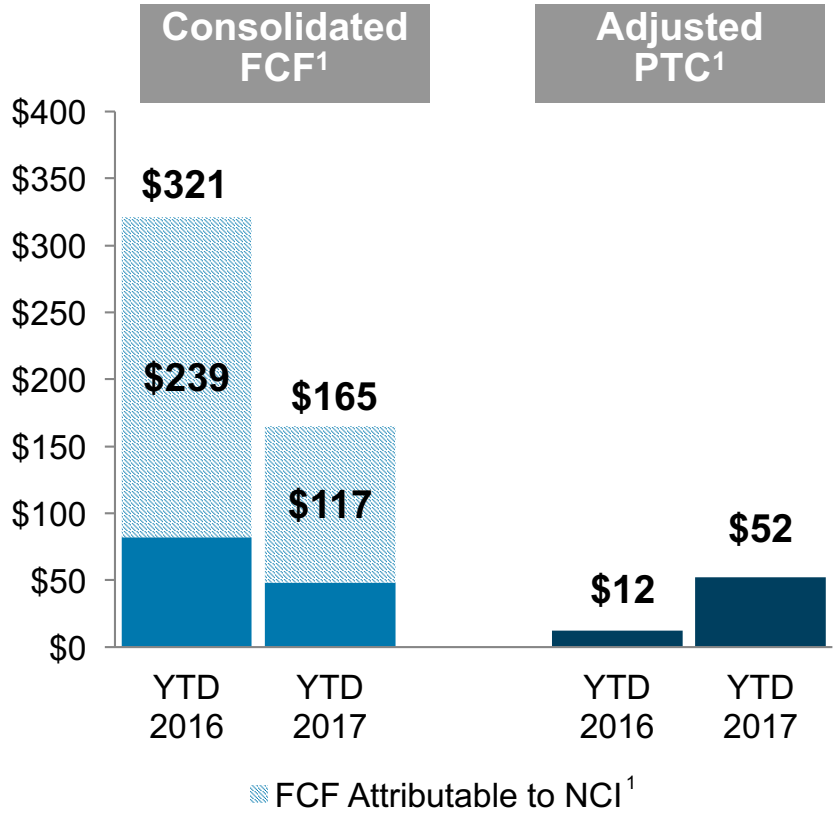

1. A non-GAAP financial measure. See “definitions”.

YTD Financial Results: Brazil SBU

$ in Millions

Consolidated FCF[1] Decreased $156; Adjusted PTC[1] Increased $40

- Margins improved due to higher spot sales at Tietê, and higher tariffs at Eletropaulo
- Higher Adjusted PTC[1] also reflects the successful settlement of a legal dispute at Uruguaiana
- Lower Consolidated FCF[1] also reflects the impact from the recovery of high purchased power costs in 2016 at Eletropaulo

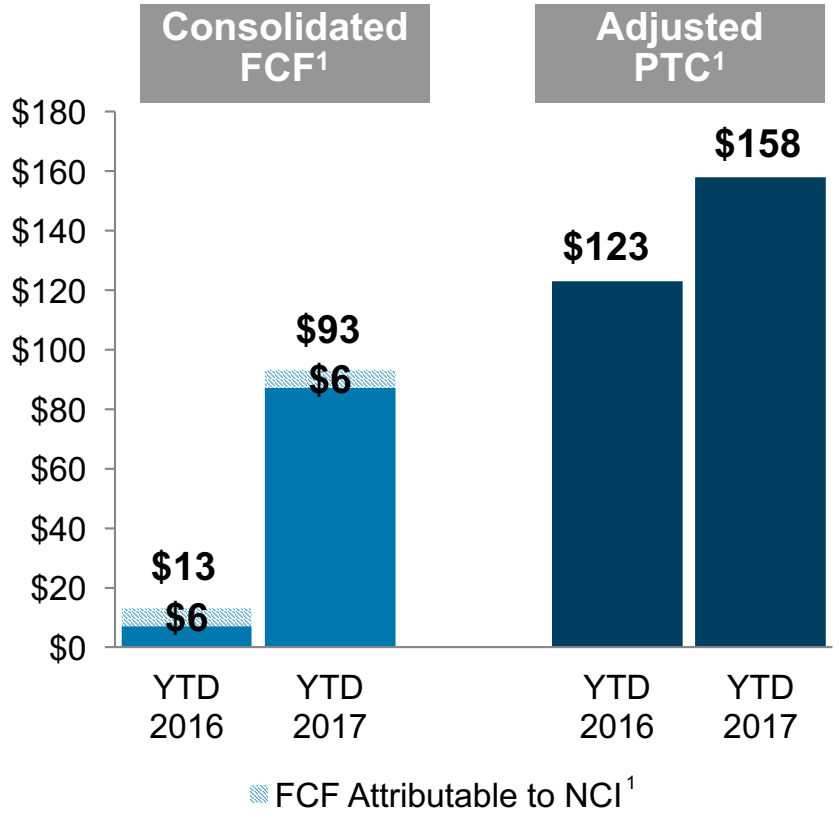

1. A non-GAAP financial measure. See “definitions”.

YTD Financial Results: MCAC SBU

$ in Millions

Consolidated FCF[1] Increased $80; Adjusted PTC[1] Increased $35

- Margins improved primarily due to higher availability in Mexico and higher energy sales in the Dominican Republic
- Higher Consolidated FCF[1] also reflects lower working capital requirements in the Dominican Republic and Puerto Rico, primarily related to the timing of collections and fuel payments

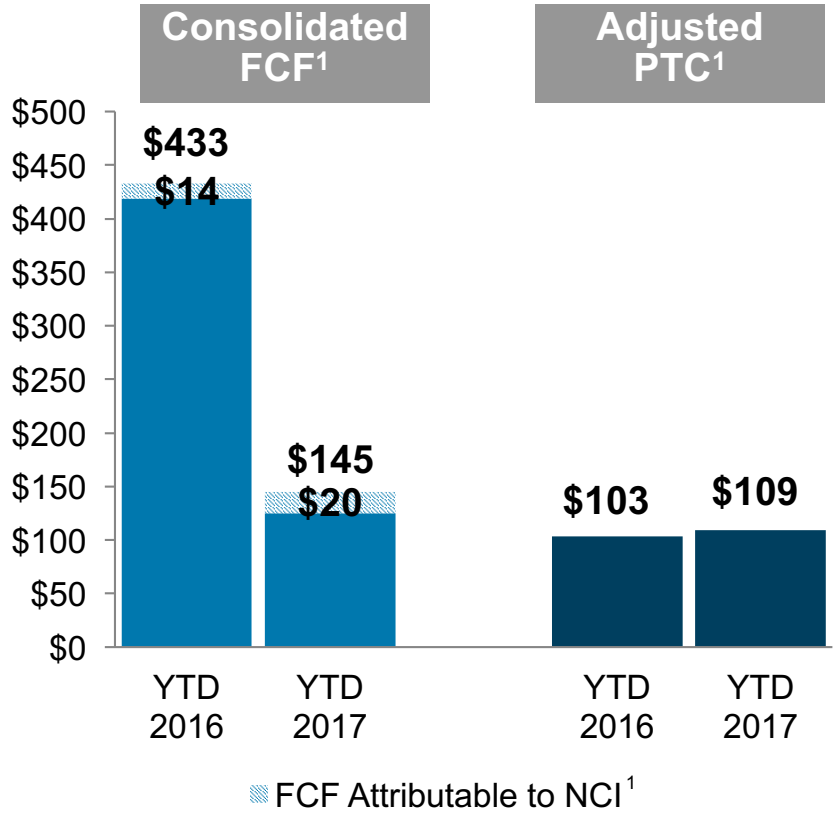

1. A non-GAAP financial measure. See “definitions”.

YTD Financial Results: Europe SBU

$ in Millions

Consolidated FCF[1] Decreased $288; Adjusted PTC[1] Increased $6

- Margins improved primarily due to higher capacity margins in the United Kingdom
- Lower Consolidated FCF[1] also reflects the collection of overdue receivables at Maritza in Bulgaria in 2016

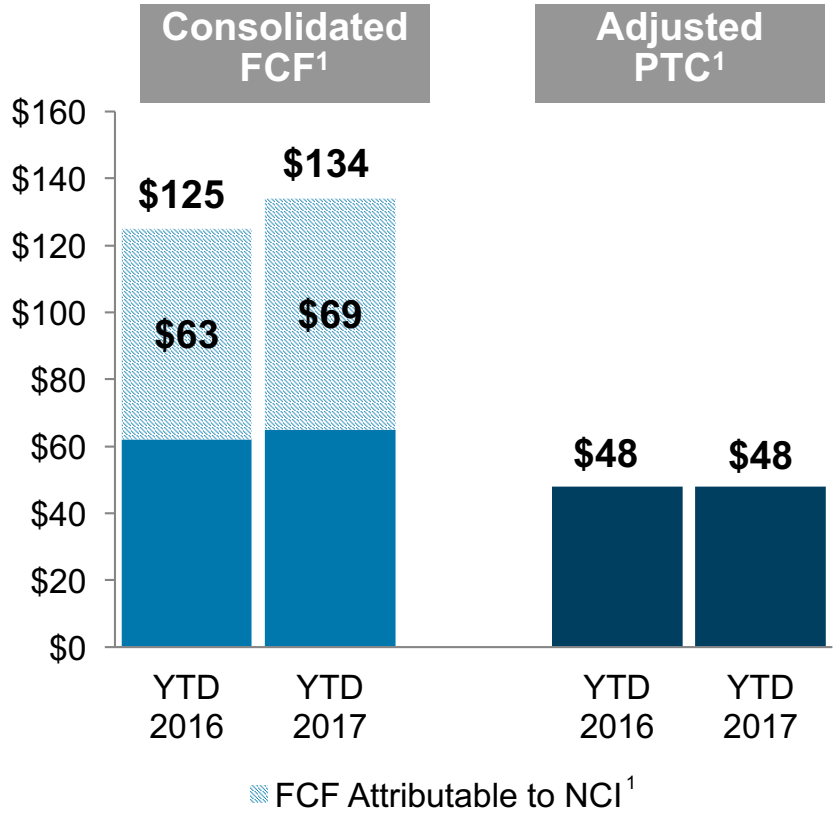

1. A non-GAAP financial measure. See “definitions”.

YTD Financial Results: Asia SBU

$ in Millions

Consolidated FCF[1] Increased $9; Adjusted PTC[1] Flat

- Margins were flat
- Higher Consolidated FCF[1] reflects lower working capital requirements at Masinloc in the Philippines due to the timing of fuel payments

1. A non-GAAP financial measure. See “definitions”.

Q2 2017 Adjusted PTC[1]: Reconciliation to Public Financials of Listed Subsidiaries & Public Filers

This table provides financial data of those operating subsidiaries of AES that are publicly listed or have publicly filed financial information on a stand-alone basis. The table provides a reconciliation of the subsidiary's Adjusted PTC as it is included in AES consolidated Adjusted PTC with the subsidiary's income/(loss) from continuing operations under US GAAP and the subsidiary's locally IFRS reported net income, if applicable. Readers should consult the subsidiary's publicly filed reports for further details of such subsidiary's results of operations.

AES SBU/Reporting Country	US				Andes/Chile		Brazil

Income Tax Benefit/(Expenses)	($11)	($14)	($8)	$87	($25)	($38)	($5)	$3	($14)	($15)
US GAAP Income/(Loss) from Continuing Operations[4]	**$24**	**$30**	**$1**	**($136)**	**$41**	**$74**	**$8**	**($8)**	**$33**	**$32**
Adjustment to Depreciation & Amortization[5]					($10)	($10)	($7)	($7)	($3)	($3)
Adjustment to Regulatory Liabilities & Assets					-	-	-	-	-	-
Adjustment to Taxes[6]					($3)	$8	($2)	($5)	-	$1
Other Adjustments					$16	($6)	$10	$22	($2)	($1)
IFRS Net Income					**$44**	**$66**	**$9**	**$2**	**$28**	**$29**
BRL-USD Implied Exchange Rate							3.3012	1.8735	3.2104	3.5316

1. A non-GAAP financial measure. Reconciliation provided above. See "definitions" for descriptions of adjustments.
2. The listed subsidiary is a public filer in its home country and reports its financial results locally under IFRS. Accordingly certain adjustments presented under IFRS Reconciliation are required to account for differences between US GAAP and local IFRS standards.
3. Total Adjusted PTC, US GAAP Income from continuing operations and intervening adjustments are calculated before the elimination of inter-segment transactions such as revenue and expenses related to the transfer of electricity from AES generation plants to AES utilities within Brazil.
4. Represents the income/(loss) from continuing operations of the subsidiary included in the consolidated operating results of AES under US GAAP.
5. Adjustment to depreciation and amortization expense represents additional expense required due primarily to basis differences of long-lived and intangible assets under IFRS for each reporting period.
6. Adjustment to taxes represents mainly differences relating to the goodwill tax benefit resulting from the restructuring of Brazilian subsidiaries that increased tax basis in long-term assets (Eletropaulo) and depreciation for the difference in cost basis of PP&E (Eletropaulo and Tietê).

2017 Guidance Estimated Sensitivities

Interest Rates[1]

- 100 bps move in interest rates over year-to-go 2017 is forecasted to have a change in EPS of approximately $0.015

Currencies

10% appreciation in USD against the following key currencies is forecasted to have the following negative EPS impacts:	Balance of Year 2017	
	Average Rate	Sensitivity
Brazilian Real (BRL)	3.38	Less than $0.005
Colombian Peso (COP)	3,089	Less than $0.005
Euro (EUR)	1.15	Less than $0.005
Great British Pound (GBP)	1.31	Less than $0.005
Kazakhstan Tenge (KZT)	341	Less than $0.005

Commodity Sensitivity

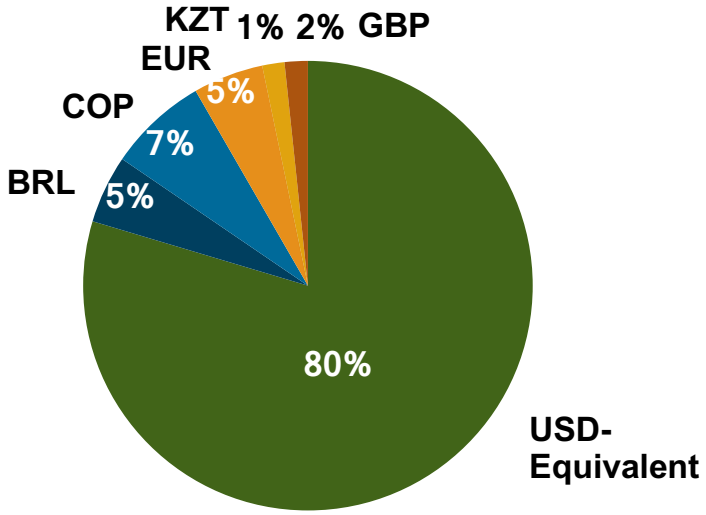

10% increase in commodity prices is forecasted to have the following EPS impacts:	Balance of Year 2017	
	Average Rate	Sensitivity
Illinois Basin Coal	$34/ton	Less than $0.005, negative correlation
Rotterdam Coal (API 2)	$78/ton	
NYMEX WTI Crude Oil	$46/bbl	Less than $0.005, positive correlation
IPE Brent Crude Oil	$49/bbl	
NYMEX Henry Hub Natural Gas	$3.1/mmbtu	Less than $0.005, negative correlation
UK National Balancing Point Natural Gas	£0.4/therm	
US Power (DPL) – PJM AD Hub	$ 29/MWh	$0.005, positive correlation

Note: Guidance provided on August 8, 2017. Sensitivities are provided on a standalone basis, assuming no change in the other factors, to illustrate the magnitude and direction of changing market factors on AES' results. Estimates show the impact on year-to-go 2017 Adjusted EPS. Actual results may differ from the sensitivities provided due to execution of risk management strategies, local market dynamics and operational factors. Full year 2017 guidance is based on currency and commodity forward curves and forecasts as of June 30, 2017. There are inherent uncertainties in the forecasting process and actual results may differ from projections. The Company undertakes no obligation to update the guidance presented. Please see Item 1 of the Form 10-Q for a more complete discussion of this topic. AES has exposure to multiple coal, oil, and natural gas, and power indices; forward curves are provided for representative liquid markets. Sensitivities are rounded to the nearest $0.005 cent per share.

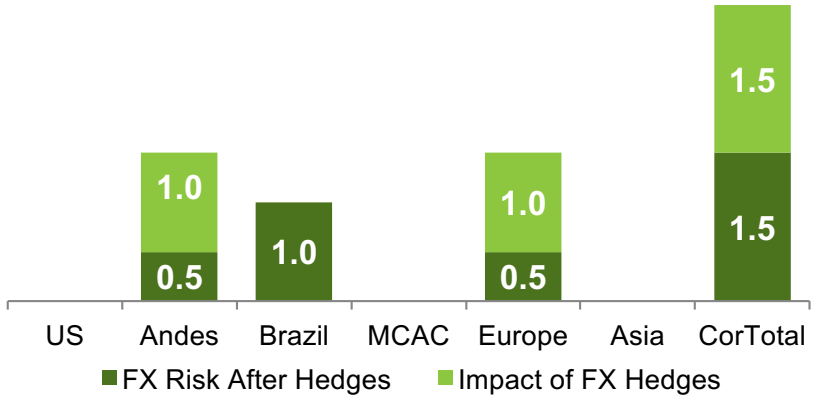

1. The move is applied to the floating interest rate portfolio balances as of June 30, 2017.

2017 Foreign Exchange (FX) Risk Mitigated Through Structuring of Our Businesses and Active Hedging

2017 Adjusted PTC[1] by Currency Exposure

2017 Full Year FX Sensitivity[2,3] by SBU (Cents Per Share)

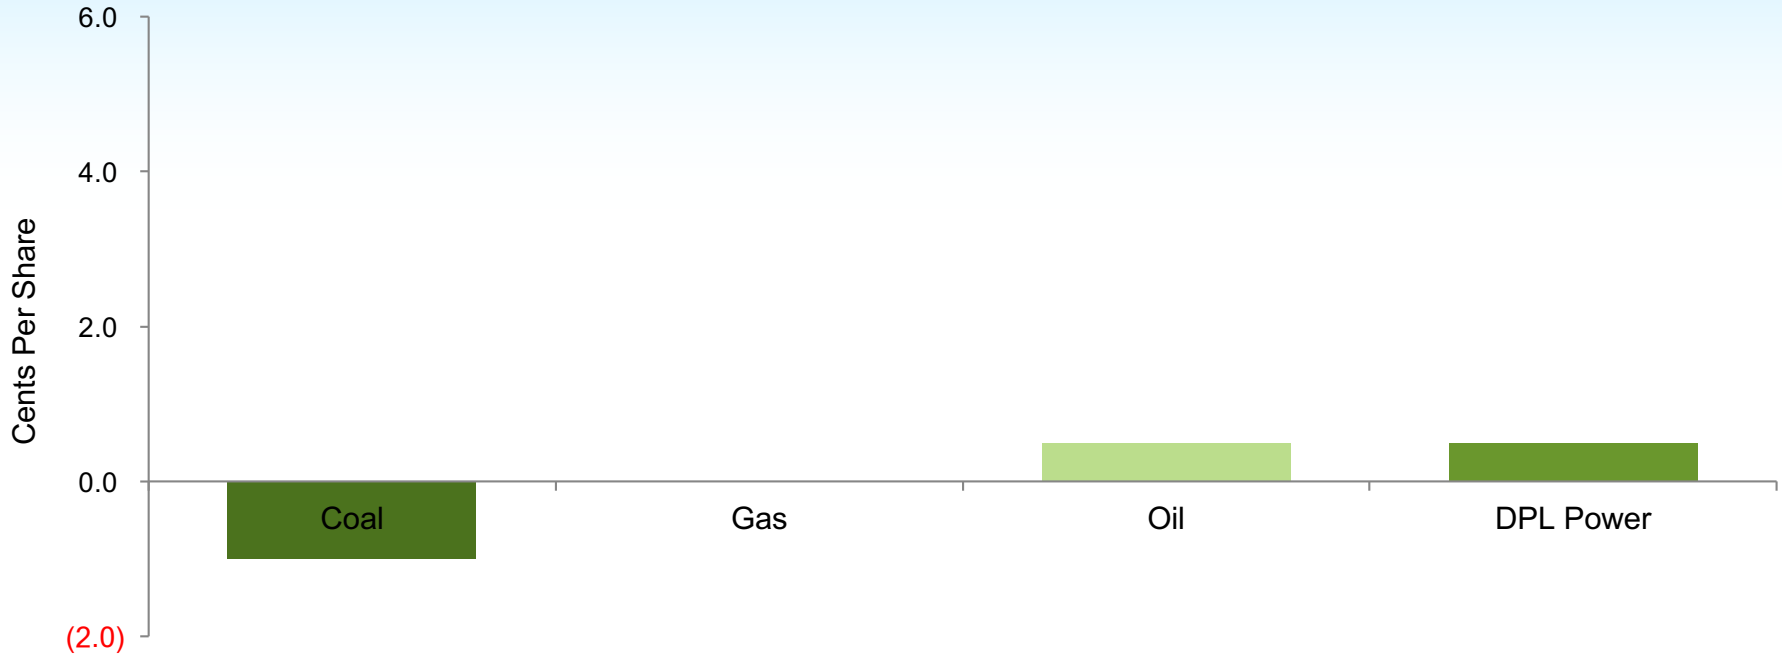

- 2017 correlated FX risk after hedges is $0.015 for 10% USD appreciation
- 80% of 2017 earnings effectively USD
  - USD-based economies (i.e. U.S., Panama)
  - Structuring of our contracts
- FX risk mitigated on a rolling basis by shorter-term active FX hedging programs

1. Before Corporate Charges. A non-GAAP financial measure. See “definitions”.
2. Sensitivity represents full year 2017 exposure to a 10% appreciation of USD relative to foreign currency as of December 31, 2016.
3. Andes includes Argentina and Colombia businesses only due to limited translational impact of USD appreciation to Chilean businesses.

Commodity Exposure is Mostly Hedged in the Medium- to Long-Term

Full Year 2019 Adjusted EPS[1] Commodity Sensitivity[2] for 10% Change in Commodity Prices

1. A non-GAAP financial measure. See “definitions”.
2. Domestic and International sensitivities are combined and assumes each fuel category moves 10%. Adjusted EPS is negatively correlated to coal price movement, and positively correlated to gas, oil and power price movements.

1. Non-GAAP financial measures. See “definitions”.
2. NCI is defined as Noncontrolling Interests.
3. Amount primarily relates to loss on sale of Kazakhstan CHPs of $48 million, or $0.07 per share, realized derivative losses associated with the sale of Sul of $38 million, or $0.06 per share; costs associated with early plant closure of DPL of $20 million, or $0.03 per share.
4. Amount primarily relates to asset impairment at Kazakhstan hydroelectric plants of $90 million, or $0.14 per share, at Kazakhstan CHPs of $94 million, or $0.14 per share, and DPL of $66 million, or $0.10 per share.
5. Amount primarily relates to asset impairment at DPL of $235 million, or $0.36 per share; and Buffalo Gap II of $159 million ($49 million, or $0.07 per share, net of NCI).
6. Amount primarily relates to the gain on early retirement of debt at Alicura of $65 million, or $0.10 per share, partially offset by the loss on early retirement of debt at the Parent Company of $53 million, or $0.08 per share.
7. Amount primarily relates to the income tax benefit associated with asset impairment losses of $81 million, or $0.12 per share and $122 million, or $0.18 per share in the six months ended June 30, 2017 and 2016, respectively.

Reconciliation of 2016 Guidance

$ in Millions, Except Per Share Amounts

2016 Guidance	
Consolidated Net Cash Provided by Operating Activities	$2,000-$2,900
Adjusted EPS[1,2]	$0.95-$1.05

Reconciliation	
Consolidated Net Cash Provided by Operating Activities (a)	$2,000-$2,900
Maintenance & Environmental Capital Expenditures (b)	$600-$800
Consolidated Free Cash Flow[1] (a - b)	$1,300-$2,200

- Commodity and foreign currency exchange rates and forward curves as of September 30, 2016

1. A non-GAAP financial measure. See “definitions”.
2. Actual 2017 Adjusted EPS was $0.98. The above range is provided as a base for future growth rates. Reconciliation of Adjusted EPS may be found in the Company’s 2016 Form 10-K.

Reconciliation of 2017 Guidance

$ in Millions, Except Per Share Amounts

2017 Guidance	
Consolidated Net Cash Provided by Operating Activities	$2,000-$2,800
Consolidated Free Cash Flow[1]	$1,400-$2,000
Adjusted EPS[1, 2]	$1.00-$1.10

Reconciliation	
Consolidated Net Cash Provided by Operating Activities (a)	$2,000-$2,800
Maintenance & Environmental Capital Expenditures (b)	$600-$800
Consolidated Free Cash Flow[1] (a - b)	$1,400-$2,000

- Commodity and foreign currency exchange rates and forward curves as of June 30, 2017

1. A non-GAAP financial measure. See “definitions”.
2. The Company is not able to provide a corresponding GAAP equivalent for its Adjusted EPS guidance. In providing its full year 2017 Adjusted EPS guidance, the Company notes that there could be differences between expected reported earnings and estimated operating earnings, including the items listed below. Therefore, management is not able to estimate the aggregate impact, if any, of these items on reported earnings. As of June 30, 2017, the impact of these items was as follows: (a) unrealized gains or losses related to derivative transactions represent a loss of $1 million, (b) unrealized foreign currency gains or losses represent a gain of $17 million, (c) gains or losses and associated benefits and costs due to dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds represent a loss of $87 million, (d) losses due to impairments of $181 million and (e) gains, losses and costs due to the early retirement of debt represent a gain of $3 million.

Assumptions

Forecasted financial information is based on certain material assumptions. Such assumptions include, but are not limited to: (a) no unforeseen external events such as wars, depressions, or economic or political disruptions occur; (b) businesses continue to operate in a manner consistent with or better than prior operating performance, including achievement of planned productivity improvements including benefits of global sourcing, and in accordance with the provisions of their relevant contracts or concessions; (c) new business opportunities are available to AES in sufficient quantity to achieve its growth objectives; (d) no material disruptions or discontinuities occur in the Gross Domestic Product (GDP), foreign exchange rates, inflation or interest rates during the forecast period; and (e) material business-specific risks as described in the Company's SEC filings do not occur individually or cumulatively. In addition, benefits from global sourcing include avoided costs, reduction in capital project costs versus budgetary estimates, and projected savings based on assumed spend volume which may or may not actually be achieved. Also, improvement in certain Key Performance Indicators (KPIs) such as equivalent forced outage rate and commercial availability may not improve financial performance at all facilities based on commercial terms and conditions. These benefits will not be fully reflected in the Company's consolidated financial results.

The cash held at qualified holding companies ("QHCs") represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries had no contractual restrictions on their ability to send cash to AES, the Parent Company, however, cash held at qualified holding companies does not reflect the impact of any tax liabilities that may result from any such cash being repatriated to the Parent Company in the U.S. Cash at those subsidiaries was used for investment and related activities outside of the U.S. These investments included equity investments and loans to other foreign subsidiaries as well as development and general costs and expenses incurred outside the U.S. Since the cash held by these QHCs is available to the Parent, AES uses the combined measure of subsidiary distributions to Parent and QHCs as a useful measure of cash available to the Parent to meet its international liquidity needs. AES believes that unconsolidated parent company liquidity is important to the liquidity position of AES as a parent company because of the non-recourse nature of most of AES' indebtedness.

Definitions

- **Adjusted Earnings Per Share** (a non-GAAP financial measure) is defined as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses related to derivative transactions, (b) unrealized foreign currency gains or losses, (c) gains or losses and associated benefits and costs due to dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, (d) losses due to impairments, and (e) gains, losses and costs due to the early retirement of debt. The GAAP measure most comparable to adjusted EPS is diluted earnings per share from continuing operations. We believe that adjusted EPS better reflect the underlying business performance of the Company and are considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses related to derivative transactions, unrealized foreign currency gains or losses, losses due to impairments and strategic decisions to dispose of or acquire business interests or retire debt, which affect results in a given period or periods. Adjusted EPS should not be construed as alternatives to income from continuing operations attributable to AES and diluted earnings per share from continuing operations, which are determined in accordance with GAAP. Beginning in the first quarter of 2017, the definition was revised to exclude associated benefits and costs due to acquisitions, dispositions and early plant closures, including the tax impact of decisions made at the time of sale to repatriate proceeds.
- **Adjusted Pre-Tax Contribution** (a non-GAAP financial measure) is defined as pre-tax income from continuing operations attributable to AES excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses related to derivative transactions, (b) unrealized foreign currency gains or losses, (c) gains or losses and associated benefits and costs due to dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds, (d) losses due to impairments, and (e) gains, losses and costs due to the early retirement of debt. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities. The GAAP measure most comparable to adjusted PTC is income from continuing operations attributable to AES. We believe that adjusted PTC better reflect the underlying business performance of the Company and are considered in the Company's internal evaluation of financial performance. Factors in this determination include the variability due to unrealized gains or losses related to derivative transactions, unrealized foreign currency gains or losses, losses due to impairments and strategic decisions to dispose of or acquire business interests or retire debt, which affect results in a given period or periods. In addition, for adjusted PTC, earnings before tax represents the business performance of the Company before the application of statutory income tax rates and tax adjustments, including the effects of tax planning, corresponding to the various jurisdictions in which the Company operates. Adjusted PTC should not be construed as alternatives to income from continuing operations attributable to AES and diluted earnings per share from continuing operations, which are determined in accordance with GAAP. Beginning in the first quarter of 2017, the definition was revised to exclude associated benefits and costs due to acquisitions, dispositions and early plant closures, including the tax impact of decisions made at the time of sale to repatriate proceeds.
- **Free Cash Flow** (a non-GAAP financial measure) is defined as net cash from operating activities (adjusted for service concession asset capital expenditures) less maintenance capital expenditures (including non-recoverable environmental capital expenditures), net of reinsurance proceeds from third parties. AES believes that free cash flow is a useful measure for evaluating our financial condition because it represents the amount of cash generated by the business after the funding of maintenance capital expenditures that may be available for investing in growth opportunities or for repaying debt. Free cash flow should not be construed as an alternative to net cash from operating activities, which is determined in accordance with GAAP.
- **Parent Company Liquidity** (a non-GAAP financial measure) is defined as cash at the Parent Company plus availability under corporate credit facilities plus cash at qualified holding companies ("QHCs"). AES believes that unconsolidated Parent Company liquidity is important to the liquidity position of AES as a Parent Company because of the non-recourse nature of most of AES' indebtedness.
- **Parent Free Cash Flow** (a non-GAAP financial measure) should not be construed as an alternative to Net Cash Provided by Operating Activities which is determined in accordance with GAAP. Parent Free Cash Flow is equal to Subsidiary Distributions less cash used for interest costs, development, general and administrative activities, and tax payments by the Parent Company. Parent Free Cash Flow is used for dividends, share repurchases, growth investments, recourse debt repayments, and other uses by the Parent Company.
- **Subsidiary Liquidity** (a non-GAAP financial measure) is defined as cash and cash equivalents and bank lines of credit at various subsidiaries.
- **Subsidiary Distributions** should not be construed as an alternative to Net Cash Provided by Operating Activities which is determined in accordance with GAAP. Subsidiary Distributions are important to the Parent Company because the Parent Company is a holding company that does not derive any significant direct revenues from its own activities but instead relies on its subsidiaries' business activities and the resultant distributions to fund the debt service, investment and other cash needs of the holding company. The reconciliation of the difference between the Subsidiary Distributions and Net Cash Provided by Operating Activities consists of cash generated from operating activities that is retained at the subsidiaries for a variety of reasons which are both discretionary and non-discretionary in nature. These factors include, but are not limited to, retention of cash to fund capital expenditures at the subsidiary, cash retention associated with non-recourse debt covenant restrictions and related debt service requirements at the subsidiaries, retention of cash related to sufficiency of local GAAP statutory retained earnings at the subsidiaries, retention of cash for working capital needs at the subsidiaries, and other similar timing differences between when the cash is generated at the subsidiaries and when it reaches the Parent Company and related holding companies.
