Fiscal 2010 Sales

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as ‘at constant exchange rates’ throughout this presentation and constitutes a “non GAAP financial measure”. The Group considers this to be a useful measure for analysing and explaining changes and trends in the Group’s results. The impact of the re-calculation of sales at constant exchange rates, including a reconciliation to the Group’s GAAP results, is analysed below.
