Second Quarter 2023 Highlights

Comparisons are to the first quarter of 2023 unless otherwise stated

- Seacoast successfully completed the Professional Bank conversion, wrapping up a significant period of M&A activity that has moved Seacoast beyond the \$10 billion asset hurdle and definitively positioned Seacoast as Florida's Bank.
- Net income increased \$19.4 million, or 164%, to \$31.2 million and adjusted net income¹ increased \$20.0 million, or 68%, to \$49.2 million.
- Return on average tangible common equity increased to 12.08%, and on an adjusted basis¹ increased to 16.08%.
- Strong capital, with ratio of tangible common equity to tangible assets increasing to 8.53%. Adjusting all HTM securities to fair value, the tangible common equity to tangible assets ratio remains at a peer-leading 7.87%. Holding changes in AOCI constant, we expect this ratio to continue to grow in the coming periods.
- Total deposits stable at \$12.3 billion.
- Maintained lending discipline and ended the period with 82% loan to deposit ratio.
- Asset quality remains excellent with charge-offs, non-accruals, and criticized assets at historically low levels.
- Robust liquidity position, representing 184% of uninsured and uncollateralized deposits.
- In late July, as we continue our focus on efficiency and streamlining operations, we executed a reduction in the Company's workforce by approximately 5%.

- Net interest margin contracted 45 basis points to 3.86% and, excluding the effect of accretion on acquired loans, net interest margin contracted 35 basis points to 3.43%. The decline in the net interest margin from prior quarter was the result of a decline of \$1.8 million in the accretion for acquired loans, and the impact of rising deposit rates.
- Securities yields expanded 28 basis points to 3.13%, including approximately 12 basis points of benefit from interest rate swaps initiated in the current quarter.
- Loan yields increased three basis points from the prior quarter. Excluding the effect of accretion on acquired loans, yields increased 16 basis points to 5.33%.
- The cost of deposits increased 61 basis points to 1.38%, primarily the result of higher short term interest rates, and an increasingly competitive deposit market.
