

University of California Grants "A-G" Approval of 95 Fuel Education Courses

September 18, 2014

HERNDON, Virginia, September 18, 2014 – Personalized learning solutions provider [Fuel Education](#)™ today announced that the University of California "a-g" review board approved 95 of its online and blended courses, more approved courses than those of any other online and blended provider.

Through its ["a-g" requirements](#), the University of California verifies that enrolling students have an appropriate experience of 15 college-preparatory courses in history/social science, English, math, a lab science, a language other than English, the visual and performing arts, and a college-preparatory elective. California students who take Fuel Education courses are assured that they are certified by the University of California as meeting the subject requirement for enrollment.

For online courses, the University of California "aims to ensure that students have access to a broad range of high-quality online courses that maintain the 'human touch' and integrity of assessment." All courses are reviewed by one of the university's subject area analysts to verify that the content meets the university's standards for college-preparatory coursework.

The University's rigorous policy on online learning accommodates synchronous, asynchronous and blended online courses while simultaneously addressing specific features that the UC faculty consider necessary for a quality online learning experience. Before an online course can receive the "a-g" approval, it must be assessed against the International Association for K-12 Online Learning (iNACOL) quality standards for online courses in the areas of content, instructional design, student assessment, technology, and course evaluation and support.

Eighteen of the 95 Fuel Education courses that are approved through May of 2016 are Advanced Placement (AP®) courses. In the required subject areas, the University of California approved:

- 11 social studies courses;
- 15 English courses;
- 19 math courses;
- 11 science courses;
- 17 world language courses, including Chinese, French, German, Latin, and Spanish; and
- 22 elective courses.
