
**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2019

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from

_____ to _____

Commission File Number 001-37532

IBERIABANK Corporation

(Exact name of registrant as specified in its charter)

Louisiana
(State or other jurisdiction of
incorporation or organization)

72-1280718
(I.R.S. Employer
Identification Number)

200 West Congress Street
Lafayette, Louisiana
(Address of principal executive office)

70501
(Zip Code)

(337) 521-4003
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer
 Non-accelerated Filer Smaller Reporting Company
 Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Stock (par value \$1.00 per share)	IBKC	The NASDAQ Stock Market, LLC
Depository Shares, Each Representing a 1/400th Interest in a Share of 6.625% Perpetual Preferred Stock, Series B	IBKCP	The NASDAQ Stock Market, LLC
Depository Shares, Each Representing a 1/400th Interest in a Share of 6.60% Perpetual Preferred Stock, Series C	IBKCO	The NASDAQ Stock Market, LLC
Depository Shares, Each Representing a 1/400th Interest a Share of 6.100% Perpetual Preferred Stock, Series D	IBKCN	The NASDAQ Stock Market, LLC

At July 31, 2019, the Registrant had 52,656,199 shares of common stock, \$1.00 par value, which were issued and outstanding.

IBERIABANK CORPORATION AND SUBSIDIARIES
Notes to Consolidated Financial Statements

NOTE 1 - BASIS OF PRESENTATION

IBERIABANK Corporation is a financial holding company based in Lafayette, Louisiana. The accompanying unaudited consolidated financial statements include the accounts of IBERIABANK Corporation and its consolidated subsidiaries (the "Company"). Through its subsidiaries, the Company provides a full range of commercial and consumer banking services, including private banking, small business, wealth and trust management, retail brokerage, mortgage, commercial leasing and equipment financing, and title insurance services through locations in Louisiana, Arkansas, Tennessee, Alabama, Texas, Florida, Georgia, South Carolina, North Carolina, Mississippi, Missouri, and New York.

The accompanying unaudited consolidated financial statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all information and notes necessary for complete financial statements in accordance with GAAP. In the opinion of management, the accompanying unaudited consolidated financial statements contain all the significant adjustments, consisting of normal and recurring items, considered necessary for fair presentation. These interim financial statements should be read in conjunction with the Company's audited consolidated financial statements and notes in the Annual Report on Form 10-K for the year ended December 31, 2018. Operating results for the interim period are not necessarily indicative of the results that may be expected for the full year.

All significant intercompany balances and transactions have been eliminated in consolidation. Certain amounts reported in prior periods have been reclassified to conform to the current period presentation. See the Glossary of Defined Terms included in this Report for terms used herein.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Pronouncements adopted during the six months ended June 30, 2019:

ASU No. 2016-02, ASU No. 2018-11, ASU No. 2018-20, and ASU 2019-01

In February 2016, the FASB issued ASU No. 2016-02, *Leases (ASC 842)* which requires lessees to recognize ROU assets and lease liabilities on the balance sheet for most leases, including operating leases. The lessor accounting model was relatively unchanged by this ASU. Additional quantitative and qualitative disclosures are also required. During 2018 and early 2019, the FASB issued ASU No. 2018-11, *Targeted Improvements*, ASU No. 2018-20, *Narrow-Scope Improvements for Lessors*, and ASU No. 2019-01, *Codification Improvements*, which clarified certain implementation issues, provided an additional optional transition method and clarified the disclosure requirements during the period of adopting ASC 842, among others.

The Company adopted ASU No. 2016-02 and the related ASUs discussed above effective January 1, 2019 using the optional transition method. The Company elected the package of practical expedients that does not require the reassessment of whether expired or existing contracts contain leases, the reassessment of the lease classification for any expired or existing leases, or the reassessment of initial direct costs for existing leases. Additionally, the Company did not elect the hindsight practical expedient.

The Company conducted a review of all existing lease contracts and service contracts which might contain embedded leases. Some of the Company's leases contain variable lease payments, the majority of which depend on an index or rate, such as the Consumer Price Index. At transition, the present value of variable payments was based on the index or rate as of January 1, 2019. To determine the present value of lease payments at transition, the Company applied a portfolio approach utilizing an FHLB Advance rate based on the weighted average remaining term of the Company's existing leases as of January 1, 2019. As a result of adopting ASC 842, the Company established an ROU asset and a lease liability as of January 1, 2019 of \$94.2 million and \$118.9 million, respectively. Additionally, as part of the adoption of ASC 842, \$24.7 million in pre-existing liabilities were reclassified to the ROU asset on January 1, 2019. This resulted in a gross-up of the balance sheet of \$94.2 million as a result of recognizing lease liabilities and corresponding right-of-use assets for operating leases. The adoption of ASC 842 also required the recognition of previously deferred gains on sale-leaseback transactions which resulted in an insignificant increase to retained earnings on January 1, 2019. The related impact on the Company's regulatory capital ratios was not significant. The Company does not expect material changes to the recognition of lease expense in future periods as a result of the adoption of ASC 842. See Note 8, Leases, for additional disclosures required by ASC 842.

ASU No. 2018-16

In October 2018, the FASB released ASU No. 2018-16, *Derivatives and Hedging (ASC 815): Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting Purposes*, which permits the use of the OIS rate based on SOFR as a U.S. benchmark interest rate for hedge accounting purposes under ASC 815 in addition to the interest rates on direct Treasury obligations of the UST, the LIBOR swap rate, the OIS Rate based on the Fed Funds Effective Rate, and the SIFMA Municipal Swap Rate.

The required effective date of this ASU was dependent upon when an entity adopted the provisions of ASU No. 2017-12. The Company adopted ASU No. 2018-16 effective January 1, 2019 on a prospective basis for qualifying new or redesignated hedging relations as ASU No. 2017-12 had previously been adopted on January 1, 2018. The implementation of this ASU did not have a significant impact on the Company's consolidated financial statements.

ASU No. 2017-08

In March 2017, the FASB issued ASU No. 2017-08, *Receivables-Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities*, which shortens the amortization period for callable debt securities held at a premium to the earliest call date instead of the maturity date. The amendments do not require an accounting change for securities held at a discount, which will continue to be amortized to the maturity date.

The Company adopted ASU No. 2017-08 effective January 1, 2019. The adoption of the ASU did not have a material impact to the Company's consolidated financial statements.

Pronouncements issued but not yet adopted:

ASU No. 2016-13, ASU No. 2019-04 (portion related to ASC 326), and ASU No. 2019-05

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses (ASC 326): Measurement of Credit Losses on Financial Instruments*. The guidance introduces an impairment model that is based on expected credit losses (ECL), rather than incurred losses, to estimate credit losses on certain types of financial instruments such as loans and held-to-maturity securities, including certain off-balance sheet financial instruments such as loan commitments. The measurement of ECL should consider historical information, current information, and reasonable and supportable forecasts, including estimates of prepayments, over the contractual term. Financial instruments with similar risk characteristics must be grouped together when estimating ECL. The ASU also expands credit quality disclosures.

Additionally, ASU No. 2016-13 amends the current AFS security impairment model for debt securities. The new model will require an estimate of ECL when the fair value is below the amortized cost of the asset. The credit-related impairment (and subsequent recoveries) are recognized as an allowance on the balance sheet with a corresponding adjustment to the income statement. Non-credit related losses will continue to be recognized through OCI.

In addition, ASU No. 2016-13 provides for a simplified accounting model for purchased financial assets with a more-than-insignificant amount of credit deterioration since their origination. The initial estimate of expected credit losses would be recognized through an ALLL with an offset (i.e., increase) to the cost basis of the related financial asset at acquisition.

ASU No. 2016-13 will be effective for fiscal years beginning after December 15, 2019, including interim periods. This ASU will be applied through a modified-retrospective approach, resulting in a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. A prospective transition approach is required for debt securities for which OTTI had been recognized before the effective date. Amounts previously recognized in AOCI as of the date of adoption that relate to improvements in cash flows expected to be collected should continue to be accreted into income over the remaining life of the asset. Recoveries of amounts previously written off relating to improvements in cash flows after the date of adoption should be recorded in earnings when received.

During 2019, the FASB issued ASU No. 2019-04, *Codification Improvements to Financial Instruments-Credit Losses (ASC 326), Derivatives and Hedging (ASC 815), and Financial Instruments (ASC 825)*, which clarified the scope of ASU No. 2016-13 and addressed various issues, including accrued interest receivable balances, recoveries, variable interest rates and prepayments, and ASU No. 2019-05, *Financial Instruments-Credit Losses (Topic 326): Targeted Transition Relief*, which clarified certain implementation issues. The effective date for the portion of ASU No. 2019-04 related to credit losses and ASU No. 2019-05 are the same as ASU No. 2016-13.

The Company has established a cross-function implementation team and engaged third-party consultants who have jointly developed a project plan to provide implementation oversight. Implementation efforts are underway, including model development, fulfillment of additional data needs for new disclosure and reporting requirements, and drafting of accounting policies. Substantial progress has been made in model development. Model validation commenced in the second quarter of 2019. User acceptance testing and parallel runs are scheduled to begin in the third quarter of 2019. The Company expects that these ASUs will result in an increase to ACL as of January 1, 2020 given the requirement to estimate lifetime expected credit losses for the loan portfolio, although the extent of the increase to ACL is not yet known. The transition adjustment to increase ACL is expected to result in a decrease to shareholders' equity and to a lesser extent, discounts on acquired loans. While these ASUs are expected to increase ACL, they do not change the overall credit risk in the Company's loan and lease portfolios or the ultimate losses therein. The ultimate impact of the adoption of these ASUs will depend on the composition of the loan, lease and securities portfolios, finalization of credit loss models, macroeconomic conditions and forecasts at the adoption date.

ASU No. 2018-13

In August 2018, the FASB released ASU No. 2018-13, *Fair Value Measurement (ASC 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*, which eliminates, adds and modifies certain disclosure requirements for fair value measurements. The ASU will be effective for fiscal years beginning after December 15, 2019, including interim periods, with early adoption permitted.

The Company is currently evaluating the impact of the ASU. While adoption of this ASU will result in changes to existing disclosures, it will not have an impact on the Company's financial position or results of operations.

ASU No. 2018-17

In October 2018, the FASB released ASU No. 2018-17, *Consolidation (ASC 810): Targeted Improvements to Related Party Guidance for Variable Interest Entities*, which improves the consistency of the application of the variable interest entity (VIE) related party guidance for common control arrangements. This ASU requires reporting entities to consider indirect interests held through related parties under common control on a proportional basis rather than as the equivalent of a direct interest in its entirety (as currently required in GAAP) when determining whether a decision-making fee is a variable interest. ASU No. 2018-17 will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, and early adoption is permitted. The guidance will be applied retrospectively with a cumulative-effect adjustment to retained earnings at the beginning of the earliest period presented.

The Company is currently evaluating the impact of the ASU on the Company's consolidated financial statements.

ASU No. 2019-04

In April 2019, the FASB released ASU No. 2019-04, *Codification Improvements to Financial Instruments-Credit Losses (ASC 326), Derivatives and Hedging (ASC 815), and Financial Instruments (ASC 825)*. The amendments in the ASU improve the Codification by eliminating inconsistencies and providing clarifications. The amendments related to the credit losses standard are discussed above under ASU 2016-13.

With respect to hedge accounting, the ASU addresses partial-term fair value hedges, fair value hedge basis adjustments, and certain transition requirements, among other things. For recognizing and measuring financial instruments, the ASU addresses the scope of the guidance, the requirement for re-measurement under ASC 820 when using the measurement alternative, certain disclosure requirements and which equity securities have to be re-measured at historical exchange rates.

Since the Company early adopted the guidance in ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* in 2018, the amended hedge accounting guidance in ASU No. 2019-04 will be effective as of the beginning of the first annual reporting period beginning after April 25, 2019 with early adoption permitted on any date after the issuance of this ASU.

The Company is currently evaluating the impact of the ASU on the Company's consolidated financial statements.

NOTE 3 – INVESTMENT SECURITIES

The amortized cost and fair values of investment securities, with gross unrealized gains and losses, consist of the following:

(in thousands)	June 30, 2019			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Securities available for sale:				
U.S. Government-sponsored enterprise obligations	\$ 39,859	\$ 341	\$ —	\$ 40,200
Obligations of state and political subdivisions	172,160	6,698	—	178,858
Mortgage-backed securities:

The Company held certain investment securities where amortized cost exceeded fair value, resulting in unrealized loss positions, as shown in the tables above. Management evaluates securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Impairment is considered to be other-than-temporary if the Company (1) intends to sell the security, (2) more likely than not will be required to sell the security before recovering its cost, or (3) does not expect to recover the security's entire amortized cost basis. As of June 30, 2019, the Company did not intend to sell any of these securities, did not expect to be required to sell these securities, and expected to recover the entire amortized cost of all these securities.

At June 30, 2019, 189 debt securities had unrealized losses of 0.67% of the securities' amortized cost basis. At December 31, 2018, 488 debt securities had unrealized losses of 2.38% of the securities' amortized cost basis. The unrealized losses for each of the securities related to market interest rate changes and not credit concerns of the issuers. Additional information on securities that were in a continuous loss position for over twelve months at June 30, 2019 and December 31, 2018 is presented in the following table.

(in thousands)	June 30, 2019	December 31, 2018
Number of securities		
Mortgage-backed securities:		
Residential agency	159	302
Commercial agency	26	72
Obligations of state and political subdivisions	—	60
Other securities	4	7
	189	441
Amortized Cost Basis		
Mortgage-backed securities:		
Residential agency	\$ 1,049,840	\$ 2,268,608
Commercial agency	123,557	498,321
Obligations of state and political subdivisions	—	185,175
Other securities	5,107	33,270
	\$ 1,178,504	\$ 2,985,374
Unrealized Loss		
Mortgage-backed securities:		
Residential agency	\$ 6,706	\$ 57,268
Commercial agency	1,107	14,756
Obligations of state and political subdivisions	—	3,208
Other securities	92	693
	\$ 7,905	\$ 75,925

The amortized cost and estimated fair value of investment securities by maturity at June 30, 2019 are presented in the following table. Securities are classified according to their contractual maturities without consideration of principal amortization, potential prepayments or call options. Accordingly, actual maturities may differ from contractual maturities. Weighted average yields are calculated on the basis of the yield to maturity based on the amortized cost of each security.

(in thousands)	Securities Available for Sale			Securities Held to Maturity		
	Weighted Average Yield	Amortized Cost	Estimated Fair Value	Weighted Average Yield	Amortized Cost	Estimated Fair Value
Within one year or less	3.67%	\$ 1,554	\$ 1,558	2.34%	\$ 952	\$ 955
One through five years	2.66	112,248	113,915	2.63	4,484	4,524
After five through ten years	2.72	769,216	789,351	2.43	45,338	46,508
Over ten years	2.84	3,518,983	3,550,484	2.60	142,143	146,025
	2.82%	\$ 4,402,001	\$ 4,455,308	2.56%	\$ 192,917	\$ 198,012

The following is a summary of realized gains and losses from the sale of securities classified as available for sale. Gains or losses on securities sold are recorded on the trade date, using the specific identification method.

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Realized gains	\$ 1,297	\$ 30	\$ 1,297	\$ 39
Realized losses	(2,311)	(27)	(2,311)	(95)
	<u>\$ (1,014)</u>	<u>\$ 3</u>	<u>\$ (1,014)</u>	<u>\$ (56)</u>

In addition to the gains above, the Company realized certain gains on calls of securities held to maturity that were not significant to the consolidated financial statements.

Other Equity Securities

The Company accounts for the following securities at cost less impairment plus or minus any observable price changes, which approximates fair value, with the exception of CRA and Community Development Investment Funds, which are recorded at fair value. Other equity securities, which are presented in other assets on the consolidated balance sheets, were as follows:

(in thousands)	June 30, 2019	December 31, 2018
Federal Home Loan Bank stock	\$ 108,396	\$ 95,213
Federal Reserve Bank stock	85,630	85,630
CRA and Community Development Investment Funds	2,192	1,884
Other investments	15,319	9,709
	<u>\$ 211,537</u>	<u>\$ 192,436</u>

NOTE 4 – LOANS AND LEASES

Loans and leases by portfolio segment and class consist of the following for the periods indicated:

(in thousands)	June 30, 2019	December 31, 2018
Commercial loans and leases:		
Real estate - construction	\$ 1,342,984	\$ 1,196,366
Real estate - owner-occupied	2,373,143	2,395,822
Real estate - non-owner-occupied	6,102,143	5,796,117
Commercial and industrial ⁽¹⁾	6,161,759	5,737,017
Total commercial loans and leases	15,980,029	15,125,322
Residential mortgage loans	4,538,194	4,359,156
Consumer and other loans:		
Home equity	2,147,897	2,304,694
Other	689,191	730,643
Total consumer and other loans	2,837,088	3,035,337
Total loans and leases	\$ 23,355,311	\$ 22,519,815

⁽¹⁾ Includes equipment financing leases

Net deferred loan origination fees were \$30.1 million and \$30.2 million at June 30, 2019 and December 31, 2018, respectively. Total net discount on the Company's loans was \$114.3 million and \$136.8 million at June 30, 2019 and December 31, 2018, respectively, of which \$71.6 million and \$81.6 million was related to non-impaired loans.

In addition to loans issued in the normal course of business, the Company considers overdrafts on customer deposit accounts to be loans and reclassifies these overdrafts as loans in its consolidated balance sheets. At June 30, 2019 and December 31, 2018, overdrafts of \$5.6 million and \$9.2 million, respectively, had been reclassified to loans.

Loans with carrying values of \$8.0 billion and \$7.6 billion were pledged as collateral for borrowings at June 30, 2019 and December 31, 2018, respectively.

Aging Analysis

The following tables provide an analysis of the aging of loans and leases as of June 30, 2019 and December 31, 2018. Past due and non-accrual loan amounts exclude acquired impaired loans, even if contractually past due or if the Company does not expect to receive payment in full, as the Company is currently accruing interest income over the expected life of the loans. For additional information on the determination of past due status and the Company's policies for recording payments received, placing loans and leases on non-accrual status, and the resumption of interest accrual on non-accruing loans and leases, see Note 1, Summary of Significant Accounting Policies, in the 2018 10-K.

June 30, 2019								
(in thousands)	Accruing				Total Past Due	Non-accrual ⁽¹⁾	Acquired Impaired	Total
	Current or Less Than 30 days Past Due	30-59 days	60-89 days	> 90 days				
Real estate- construction	\$ 1,322,728	\$ 207	\$ —	\$ —	\$ 207	\$ 1,188	\$ 18,861	\$ 1,342,984
Real estate- owner-occupied	2,285,316	7,274	—	—	7,274	15,789	64,764	2,373,143

⁽¹⁾ Of the total non-accrual loans at December 31, 2018, \$7.0 million were past due 30-59 days, \$3.7 million were past due 60-89 days, and \$66.9 million were past due more than 90 days.

Acquired Loans

The Company acquired certain loans from Sabadell United to customers with addresses outside of the United States. Foreign loans, denominated in U.S. dollars, totaled \$200.9 million and \$202.6 million at June 30, 2019 and December 31, 2018, respectively.

The following is a summary of changes in the accretable difference for all loans accounted for under ASC 310-30 during the six months ended June 30:

(in thousands)	2019	2018
Balance at beginning of period	\$ 133,342	\$ 152,623
Additions	—	2,371
Transfers from non-accretable difference to accretable yield	(2,563)	(467)
Accretion	(19,580)	(25,140)
Changes in expected cash flows not affecting non-accretable differences ⁽¹⁾	(4,341)	7,597
Balance at end of period	\$ 106,858	\$ 136,984

⁽¹⁾ Includes changes in cash flows expected to be collected due to the impact of changes in actual or expected timing of liquidation events, modifications, changes in interest rates and changes in prepayment assumptions.

Troubled Debt Restructurings

Information about the Company's TDRs at June 30, 2019 and 2018 is presented in the following tables. Modifications of loans that are accounted for within a pool under ASC Topic 310-30 are excluded as TDRs. Accordingly, such modifications do not result in the removal of those loans from the pool, even if the modification of those loans would otherwise be considered a TDR. As a result, all such acquired loans that would otherwise meet the criteria for classification as a TDR are excluded from the tables below.

TDRs totaling \$37.4 million and \$46.7 million occurred during the six months ended June 30, 2019 and 2018, respectively, through modification of the original loan terms.

The following table provides information on how the TDRs were modified during the periods indicated:

(in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Extended maturities	\$ 7,633	\$ 1,790	\$ 11,175	\$ 7,193
Maturity and interest rate adjustment	224	—	617	102
Movement to or extension of interest-rate only payments	1,771	1,316	1,783	1,364
Interest rate adjustment	74	—	74	103
Forbearance	—	1,405	5,742	13,936
Other concession(s) ⁽¹⁾	10,950	15,597	18,018	23,993
Total	\$ 20,652	\$ 20,108	\$ 37,409	\$ 46,691

⁽¹⁾ Other concessions may include covenant waivers, forgiveness of principal or interest associated with a customer bankruptcy, or a combination of any of the above concessions.

Of the \$37.4 million of TDRs occurring during the six months ended June 30, 2019, \$13.9 million were on accrual status and \$23.5 million were on non-accrual status. Of the \$46.7 million of TDRs occurring during the six months ended June 30, 2018, \$20.6 million were on accrual status and \$26.1 million were on non-accrual status. The following table presents the end of period balance for loans modified in a TDR during the periods indicated:

Three Months Ended June 30,

Portfolio Segment Risk Factors

Commercial real estate loans include loans to commercial customers for long-term financing of land and buildings or for land development or construction of a building. These loans are repaid through revenues from operations of the businesses, rents of properties, sales of properties and refinances. Commercial and industrial loans and leases represent loans to commercial customers to finance general working capital needs, equipment purchases and leases and other projects where repayment is derived from cash flows resulting from business operations. The Company originates commercial business loans on a secured and, to a lesser extent, unsecured basis.

Residential mortgage loans consist of loans to consumers to finance a primary residence. The vast majority of the residential mortgage loan portfolio is comprised of non-conforming 1-4 family mortgage loans secured by properties located in the Company's market areas and originated under terms and documentation that permit their sale in a secondary market.

Consumer loans are offered by the Company in order to provide a full range of retail financial services to its customers and include home equity, credit card and other direct consumer installment loans. The Company originates substantially all of its consumer loans in its primary market areas. Loans in the consumer segment are sensitive to unemployment and other key consumer economic measures.

Credit Quality Indicators

For commercial loans and leases, the Company utilizes regulatory classification ratings to monitor credit quality. Loans with a "pass" rating are those that the Company believes will be fully repaid in accordance with the contractual loan terms. Commercial loans and leases that are "criticized" are those that have some weakness or potential weakness that indicate an increased probability of future loss. "Criticized" loans are grouped into three categories: "special mention", "substandard", and "doubtful". Special mention loans have potential weaknesses that, if left uncorrected, may result in deterioration of the Company's credit position at some future date.

Substandard commercial loans have well-defined weaknesses and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Doubtful commercial loans have the same weaknesses as substandard loans with the added characteristics that the probability of loss is high and collection of the full amount is improbable. Substandard and doubtful loans are collectively referred to as "classified" loans. For residential mortgage loans and consumer loans, the Company primarily uses the loan's payment and delinquency status to monitor credit quality. These credit quality indicators are continually updated and monitored.

The recorded investment in loans and leases by credit quality indicator is presented in the following tables. Asset risk classifications for commercial loans and leases reflect the classification as of June 30, 2019 and December 31, 2018. Credit quality information in the tables below includes total loans acquired (including acquired impaired loans) at the net loan balance, after the application of premiums and discounts. Loan premiums and discounts represent the adjustment of acquired loans to fair value at the acquisition date, as adjusted for income accretion and changes in cash flow estimates in subsequent periods.

As of June 30, 2019 and December 31, 2018, the Company was not committed to lend a material amount of additional funds to any customer whose loan was classified as impaired or as a TDR.

NOTE 6 – GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

Changes to the carrying amount of goodwill by reporting unit for the six months ended June 30, 2019, and the year ended December 31, 2018 are provided in the following table:

(in thousands)	IBERIABANK	Mortgage	LTC	Total
Balance, December 31, 2017	\$ 1,160,559	\$ 23,178	\$ 5,165	\$ 1,188,902
Goodwill acquired and adjustments during the year	43,251	—	3,380	46,631
Balance, December 31, 2018	\$ 1,203,810	\$ 23,178	\$ 8,545	\$ 1,235,533
Goodwill acquired and adjustments during the year	—	—	—	—
Balance, June 30, 2019	\$ 1,203,810	\$ 23,178	\$ 8,545	\$ 1,235,533

The goodwill acquired and adjustments made during 2018 were the result of the Sabadell United, Gibraltar, and SolomonParks acquisitions. There were no changes to goodwill during the six months ended June 30, 2019.

The Company performed the required annual goodwill impairment test as of October 1, 2018. The Company's annual impairment test did not indicate impairment in any of the Company's reporting units as of the testing date. Following the testing date, management evaluated the events and changes that could indicate that goodwill might be impaired and concluded that a subsequent interim test was not necessary.

Mortgage Servicing Rights

Mortgage servicing rights are recorded at the lower of cost or market value in other intangible assets on the Company's consolidated balance sheets and amortized over the remaining servicing life of the loans, with consideration given to prepayment assumptions. Mortgage servicing rights had the following carrying values as of the periods indicated:

(in thousands)	June 30, 2019			December 31, 2018		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Mortgage servicing rights	\$ 16,885	\$ (5,486)	\$ 11,399	\$ 13,612	\$ (4,806)	\$ 8,806

Title Plant

The Company held title plant assets recorded in other intangible assets on the Company's consolidated balance sheets totaling \$6.8 million at both June 30, 2019 and December 31, 2018. No events or changes in circumstances occurred during the six months ended June 30, 2019 to suggest the carrying value of the title plant was not recoverable.

Intangible assets subject to amortization

Definite-lived intangible assets had the following carrying values included in other intangible assets on the Company's consolidated balance sheets as of the periods indicated:

(in thousands)	June 30, 2019			December 31, 2018		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core deposit intangible assets	\$ 136,183	\$ (72,870)	\$ 63,313	\$ 136,183	\$ (63,213)	\$ 72,970
Customer relationship intangible asset	1,385	(1,354)	31	1,385	(1,323)	62
Non-compete agreement	206	(94)	112	206	(72)	134
Total	\$ 137,774	\$ (74,318)	\$ 63,456	\$ 137,774	\$ (64,608)	\$ 73,166

NOTE 7 – DERIVATIVE INSTRUMENTS AND OTHER HEDGING ACTIVITIES

The Company enters into derivative financial instruments to manage interest rate risk, exposures related to liquidity and credit risk, and to facilitate customer transactions. The primary types of derivatives utilized by the Company for its risk management strategies include interest rate swap agreements, interest rate collars, interest rate floors, foreign exchange contracts, interest rate lock commitments, forward sales commitments, written and purchased options, and credit derivatives. All derivative instruments are recognized on the consolidated balance sheets as other assets or other liabilities at fair value, regardless of whether a right of offset exists.

Cash flow hedge relationships mitigate exposure to the variability of future cash flows or other forecasted transactions. The Company enters into interest rate swap agreements in a cash flow hedge to convert forecasted variable interest payments to a fixed rate on its junior subordinated debt. In addition, the Company has entered into interest rate collars and interest rate floors and designated the instruments as cash flow hedges of the risk of fluctuations in interest rates, thereby reducing the Company's exposure to variability in cash flows from variable-rate loans.

For cash flow hedges, the effective and ineffective portions of the gain or loss related to the derivative instrument is initially reported as a component of other comprehensive income and subsequently reclassified into earnings when the forecasted transaction affects earnings or when the hedge is terminated. In applying hedge accounting for derivatives, the Company establishes and documents a method for assessing the effectiveness of the hedging derivative and a measurement approach for determining the ineffective aspect of the hedge upon the inception of the hedge.

For derivative instruments that are not designated as hedging instruments, changes in the fair value of the derivatives are recognized in earnings immediately.

Information pertaining to outstanding derivative instruments is as follows:

(in thousands)	Derivative Assets - Fair Value		Derivative Liabilities - Fair Value

Total	\$ 3,513,310	\$ 2,311,612	\$ 2,883,353	\$ 1,991,559

The Company has entered into risk participation agreements with counterparties to transfer or assume credit exposures related to interest rate derivatives. The notional amounts of risk participation agreements sold were \$113.4 million and \$85.6 million at June 30, 2019 and December 31, 2018, respectively. Assuming all underlying third party customers referenced in the swap contracts defaulted at June 30, 2019 and December 31, 2018, the exposure from these agreements would not be material based on the fair value of the underlying swaps.

The Company is party to collateral agreements with certain derivative counterparties. Such agreements require that the Company maintain collateral based on the fair values of individual derivative transactions. In the event of default by the Company, the counterparty would be entitled to the collateral.

At June 30, 2019 and December 31, 2018, the Company was not required to post collateral due to the Company's derivative position at the balance sheet date. At June 30, 2019 and December 31, 2018, the Company was required to post \$78.4 million and \$35.8 million, respectively, in variation margin payments for its derivative transactions, which is required to be netted against the fair value of the derivatives in other assets or other liabilities on the consolidated balance sheets. The Company does not anticipate additional assets will be required to be posted as collateral, nor does it believe additional assets would be required to settle its derivative instruments immediately if contingent features were triggered at June 30, 2019. The Company's master netting agreements represent written, legally enforceable bilateral agreements that (1) create a single legal obligation for all individual transactions covered by the master agreement and (2) in the event of default, provide the non-defaulting counterparty the right to accelerate, terminate, and close-out on a net basis all transactions under the agreement and to promptly liquidate or set-off collateral posted by the defaulting counterparty. As permitted by GAAP, the Company does not offset fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral against recognized fair value amounts of derivatives executed with the same counterparty under a master netting agreement.

The following table reconciles the gross amounts presented in the consolidated balance sheets to the net amounts that would result in the event of offset.

(in thousands)	June 30, 2019			
	Gross Amounts Presented in the Balance Sheet	Gross Amounts Not Offset in the Balance Sheet		Net

During the three and six months ended June 30, 2019 and 2018, the Company did not reclassify into earnings any gain or loss as a result of the discontinuance of cash flow hedges because it was probable the original forecasted transaction would not occur by the end of the originally specified term.

At June 30, 2019, the Company did not expect to reclassify a material amount from accumulated other comprehensive income into interest income over the next twelve months for derivatives that will be settled.

At June 30, 2019 and 2018, and for the three and six months then ended, information pertaining to the effect of the hedging instruments on the consolidated financial statements was as follows:

	Amount of Gain (Loss) Recognized in OCI, net of taxes			Location of Gain (Loss) Reclassified from AOCI into Income	Amount of Gain (Loss) Reclassified from AOCI into Income, net of taxes			Location of Gain (Loss) Recognized in Income on Derivatives (Amount Excluded from Effectiveness Testing)	Amount of Gain (Loss) Recognized in Income on Derivatives (Amount Excluded from Effectiveness Testing)

NOTE 8 – LEASES

IBERIABANK as Lessee

The Company leases certain branch and corporate offices, land and ATM facilities through operating leases with terms ranging from less than one year to 45 years. The Company has no financing leases (formerly capital leases). As discussed in Note 2, Recent Accounting Pronouncements, the Company adopted new guidance for leases on January 1, 2019 which requires that leases, whether classified as operating leases or financing leases, to be accounted for as the acquisition of a right-of-use asset (ROU asset) and a related lease liability recorded at the present value of the lease payments less any lease incentives. The ROU asset represents the Company's right to use an underlying asset for the lease term and is included in other assets on the Company's consolidated balance sheets. The lease liability represents the Company's obligation to make lease payments and is included in other liabilities in the Company's consolidated balance sheets. The cost of the lease is recognized on a straight-line basis over the lease term as lease expense. Prior to January 1, 2019, operating leases were not recorded on the balance sheet. See Note 2, Recent Accounting Pronouncements, for further discussion of the adoption of this new guidance.

Subsequent to the adoption of ASC 842 on January 1, 2019, the Company reviews new lease and service contracts to determine if the contracts contain an embedded lease. For leases that do not provide an implicit rate, the Company uses the corresponding FHLB Advance rate based on the lease term at commencement in determining the present value of lease payments. For leases with variable lease payments, the present value will be determined using the index at the lease commencement date. Changes in variable rent payments due to subsequent changes in the index or rate do not result in a re-measurement of the ROU asset or lease liability, but are recognized as expense in the period in which they occur. Certain of the Company's leases contain options to either renew, extend or terminate the lease. As of June 30, 2019, no material extensions or terminations were considered reasonably certain, and as such, were not included in the measurement of the lease liability and ROU asset. The Company also has lease agreements with lease and non-lease components, which are generally accounted for separately. Non-lease components, which primarily consist of common area maintenance, utilities, and janitorial services, are based on the stand-alone price of the services and expensed as incurred.

Operating lease expense for the three and six months ended June 30, 2019 totaled \$6.9 million and \$13.6 million, respectively. During the three and six months ended June 30, 2019, the Company paid \$7.7 million and \$14.4 million, respectively, for amounts included in the measurement of lease liabilities and \$8.0 million and \$13.2 million, respectively, to obtain ROU assets.

The following summarizes the ROU asset and lease liabilities as of June 30, 2019:

(in thousands)	June 30, 2019	
Right-of-use assets	\$	98,723
Lease liabilities		119,463
Weighted average remaining lease term		7.9 years
Weighted average discount rate		3.3%

Maturities of operating lease liabilities as of June 30, 2019 were as follows:

(in thousands)		
2019	\$	13,345
2020		25,055
2021		21,221
2022		18,154
2023		13,522
2024 and thereafter		45,371
Total operating lease payments	\$	136,668
Less: Imputed interest		17,205
Total lease liabilities	\$	<u>119,463</u>

As of June 30, 2019, the Company had not entered into any material leases that had not yet commenced.

IBERIABANK as Lessor

As a lessor, the Company engages in the leasing of equipment to commercial customers primarily through direct financing and sales-type leases. Direct financing and sales-type leases are similar to other forms of installment lending in that lessors generally do not retain benefits and risks incidental to ownership of the property subject to leases. Such arrangements are essentially financing transactions that permit lessees to acquire and use property. The new guidance on leases discussed above did not have a significant impact on the lessor model of accounting. As lessor, the sum of all minimum lease payments over the lease term and the estimated residual value, less unearned interest income, is recorded as the net investment in the lease on the commencement date and is included in loans and leases, net of unearned income in the consolidated balance sheet. Interest income is accrued as earned over the term of the lease based on the net investment in leases. Fees incurred to originate the lease are deferred on the commencement date and recognized as an adjustment of the yield on the lease.

The Company's portfolio of direct financing and sales-type leases contains terms of 4 to 20 years. Some of these leases contain options to extend the leases for up to 12 months and/or to terminate the lease within one year. These direct financing and sales-type leases typically include a payment structure set at lease inception and do not provide any additional services. Expenses associated with the leased equipment, such as maintenance and insurance, are paid by the lessee directly to third parties. The lease agreement typically contains an option for the purchase of the leased property by the lessee at the end of the lease term at either the property's residual value or a specified price. In all cases, the Company expects to sell or re-lease the equipment at the end of the lease term. Due to the nature and structure of the Company's direct financing and sales-type leases, there is no selling profit or loss on these transactions.

At a lease's inception, the Company determines the expected residual value of the leased property at the end of the lease term based on the type of equipment leased, location and usage, as well as the contractual return provisions in the lease agreement. Additionally, the Company utilizes multiple market sources of data to establish equipment values and in many cases engages certified appraisers to provide valuation analyses. In order to manage the risk associated with the residual value of its leased assets, lease agreements typically include various provisions designed to protect the value of the leased property, such as contractual equipment maintenance, use and return provisions; remarketing agreements; and lessee guarantees. In a few cases, the Company also obtains third-party guarantees to further manage residual risk in the portfolio. On an annual basis, leased properties with material residual values are reviewed for impairment.

The components of the Company's net investment in leases were as follows:

(in thousands)	June 30, 2019	
Lease payment receivable	\$	259,103
Unguaranteed residual assets		28,903
Total net investment in leases	\$	288,006

For the three and six months ended June 30, 2019, interest income for direct financing or sales-type leases totaled \$2.3 million and \$4.3 million. During the three and six months ended June 30, 2019, there was no profit or loss recognized at the commencement date for direct financing or sales-type leases.

Maturities of the Company's lease receivables as of June 30, 2019 were as follows:

(in thousands)		
2019	\$	21,556
2020		42,696
2021		42,619
2022		37,866
2023		30,344
2024 and thereafter		93,482
Total future minimum lease payments	\$	268,563
Less: Imputed interest		9,460
Lease receivables	\$	259,103

NOTE 9 – SHAREHOLDERS' EQUITY, CAPITAL RATIOS AND OTHER REGULATORY MATTERS

Preferred Stock

On April 4, 2019, the Company issued and sold an aggregate of 4,000,000 depository shares (the “Series D Depository Shares”), each representing a 1/400th ownership interest in a share of the Company’s 6.100% Fixed-to-Floating Non-Cumulative Perpetual Preferred Stock, Series D, par value \$1.00 per share, (“Series D Preferred Stock”), with a liquidation preference of \$10,000 per share of Series D Preferred Stock (equivalent to \$25 per depository share), which represents \$100 million in aggregate liquidation preference.

Dividends will accrue and be payable on the Series D Preferred Stock, if declared by the Company's Board of Directors, and will be paid semi-annually on May 1 and November 1, in arrears, at an annual rate equal to (i) 6.100% for each period from the issuance date to May 1, 2024 and (ii) three-month LIBOR plus 3.859% for each period on or after August 1, 2024. The Company may redeem the Series D Preferred Stock at its option, subject to regulatory approval, as described in the Company’s Registration Statement on Form 8-A, filed with the Securities and Exchange Commission on April 4, 2019.

The following table presents a summary of the Company's non-cumulative perpetual preferred stock:

	Issuance Date	Earliest Redemption Date	Annual Dividend Rate	Liquidation Amount	June 30, 2019	December 31, 2018
					Carrying Amount	Carrying Amount
(in thousands)						
Series B Preferred Stock	8/5/2015	8/1/2025	6.625%	\$ 80,000	\$ 76,812	\$ 76,812
Series C Preferred Stock	5/9/2016	5/1/2026	6.600%	57,500	55,285	55,285
Series D Preferred Stock	4/4/2019	5/1/2024	6.100%	100,000	96,388	—
				<u>\$ 237,500</u>	<u>\$ 228,485</u>	<u>\$ 132,097</u>

Common Stock

In 2018, the Company's Board of Directors authorized the repurchase of up to 2,765,000 shares of IBERIABANK Corporation's outstanding common stock.

During the second quarter of 2019, the Company repurchased 1,759,849 common shares for approximately \$134.8 million at a weighted average cost of \$76.59 per share. For the six months ended June 30, 2019, the Company repurchased 2,147,770 common shares for approximately \$164.7 million at a weighted average cost of \$76.70 per share. During the six months ended June 30 2018, the Company repurchased 400,000 common shares for approximately \$30.7 million at a weighted average cost of \$76.67 per share. At June 30, 2019, the remaining common shares that could be repurchased under the plan approved by the Board in 2018 was 117,230 shares.

Subsequent to quarter-end, the Company repurchased the remaining shares available and announced in July 2019 a new Board-approved share repurchase program for up to 1,600,000 shares, or approximately 3% of total common shares outstanding at June 30, 2019. Stock repurchases under this program will be made from time to time, on the open market or in privately negotiated transactions. The timing of these repurchases will depend on market conditions and other requirements. The share repurchase program does not obligate the Company to repurchase any dollar amount or number of shares, and expires during the third quarter of 2021. The program may be extended, modified, suspended, or discontinued at any time. Subsequent to quarter-end and through August 6, 2019, the Company repurchased 307,230 common shares for approximately \$23.0 million.

Regulatory Capital

The Company and IBERIABANK are subject to various regulatory capital requirements administered by the federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company’s consolidated financial statements. Under capital adequacy regulations and the regulatory framework for prompt corrective action, the Company and IBERIABANK, as applicable, must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

As of June 30, 2019, the Company and IBERIABANK met all capital adequacy requirements to which they are subject.

As of June 30, 2019, the most recent notification from the FRB categorized IBERIABANK as well-capitalized under the regulatory framework for prompt corrective action (the prompt corrective action requirements are not applicable to the Company). To be categorized as well-capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since the notification that management believes have changed that categorization.

The Company's and IBERIABANK's actual capital amounts and ratios as of June 30, 2019 and December 31, 2018 are presented in the following tables:

(in thousands)	June 30, 2019					
	Minimum		Well-Capitalized		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Tier 1 Leverage						
Consolidated	\$ 1,199,612	4.00%	N/A	N/A	\$ 2,913,362	9.71%
IBERIABANK	1,196,979	4.00	1,496,224	5.00	2,857,238	9.55
Common Equity Tier 1 (CET1)						
Consolidated	\$ 1,164,678	4.50%	N/A	N/A	\$ 2,684,877	10.38%
IBERIABANK	1,161,409	4.50	1,677,591	6.50	2,857,238	11.07
Tier 1 Risk-Based Capital						
Consolidated	\$ 1,552,904	6.00%	N/A	N/A	\$ 2,913,362	11.26%
IBERIABANK	1,548,546	6.00	2,064,728	8.00	2,857,238	11.07
Total Risk-Based Capital						
Consolidated	\$ 2,070,539	8.00%	N/A	N/A	\$ 3,191,529	12.33%
IBERIABANK	2,064,728	8.00	2,580,910	10.00	3,018,905	11.70
December 31, 2018						
	Minimum		Well-Capitalized		Actual	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Tier 1 Leverage						
Consolidated	\$ 1,168,343	4.00%	N/A	N/A	\$ 2,812,863	9.63%
IBERIABANK	1,165,537	4.00	1,456,921	5.00	2,733,099	9.38
Common Equity Tier 1 (CET1)						
Consolidated	\$ 1,125,405	4.50%	N/A	N/A	\$ 2,680,766	10.72%
IBERIABANK	1,122,712	4.50	1,621,695	6.50	2,733,099	10.95
Tier 1 Risk-Based Capital						
Consolidated	\$ 1,500,540	6.00%	N/A	N/A	\$ 2,812,863	11.25%
IBERIABANK	1,496,949	6.00	1,995,932	8.00	2,733,099	10.95
Total Risk-Based Capital						
Consolidated	\$ 2,000,720	8.00%	N/A	N/A	\$ 3,084,764	12.33%
IBERIABANK	1,995,932	8.00	2,494,915	10.00	2,888,500	11.58

Minimum capital ratios are subject to a capital conservation buffer. In order to avoid limitations on distributions, including dividend payments, and certain discretionary bonus payments to executive officers, an institution must hold a capital conservation buffer above its minimum risk-based capital requirements. This capital conservation buffer is calculated as the lowest of the differences between the actual CET1 ratio, Tier 1 Risk-Based Capital Ratio, and Total Risk-Based Capital ratio and the corresponding minimum ratios. At June 30, 2019, the required minimum capital conservation buffer was 2.50%. At June 30, 2019, the capital conservation buffers of the Company and IBERIABANK were 4.33% and 3.70%, respectively.

NOTE 10 – EARNINGS PER SHARE

The computations of basic and diluted earnings per share were as follows:

(in thousands, except per share data)	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Earnings Per Common Share - Basic:				
Net income	\$ 101,598	\$ 75,124	\$ 201,729	\$ 138,745
Less: Preferred stock dividends	949	949	4,547	4,547
Less: Dividends and undistributed earnings allocated to unvested restricted shares	999	767	1,931	1,409
Earnings allocated to common shareholders - basic	<u>\$ 99,650</u>	<u>\$ 73,408</u>	<u>\$ 195,251</u>	<u>\$ 132,789</u>
Weighted average common shares outstanding	53,345	55,931	53,758	54,780
Earnings per common share - basic	\$ 1.87	\$ 1.31	\$ 3.63	\$ 2.42
Earnings Per Common Share - Diluted:				
Earnings allocated to common shareholders - basic	\$ 99,650	\$ 73,408	\$ 195,251	\$ 132,789
Adjustment for undistributed earnings allocated to unvested restricted shares	24	(7)	(21)	(26)
Earnings allocated to common shareholders - diluted	<u>\$ 99,674</u>	<u>\$ 73,401</u>	<u>\$ 195,230</u>	<u>\$ 132,763</u>
Weighted average common shares outstanding	53,345	55,931	53,758	54,780
Dilutive potential common shares	328	356	346	353
Weighted average common shares outstanding - diluted	53,674	56,287	54,104	55,133
Earnings per common share - diluted	\$ 1.86	\$ 1.30	\$ 3.61	\$ 2.41

For the three months ended June 30, 2019 and 2018, the calculations for basic shares outstanding excluded weighted average shares owned by the RRP of 521,591 and 595,856, respectively. For the six months ended June 30 2019 and 2018, the calculations for basic shares outstanding excluded weighted average shares owned by the RRP of 542,769 and 601,018, respectively.

The effects from the assumed exercises of 154,780 and 156,988 stock options were not included in the computation of diluted earnings per share for the three months ended June 30, 2019 and 2018, respectively, because they were antidilutive. For the six months ended June 30, 2019 and 2018, the effects from the assumed exercises of 154,780 and 156,988 stock options, respectively, were not included in the computation of diluted earnings per share because they were antidilutive.

NOTE 11 – SHARE-BASED COMPENSATION

The Company has various types of share-based compensation plans that permit the granting of awards in the form of stock options, restricted stock, restricted share units and phantom stock. These plans are administered by the Compensation Committee of the Board of Directors, which selects persons eligible to receive awards and determines the terms, conditions and other provisions of the awards. At June 30, 2019, awards of 3,448,650 shares could be made under approved incentive compensation plans. The Company issues shares to fulfill stock option exercises and restricted share units and restricted stock awards vesting from available authorized common shares. At June 30, 2019, the Company believes there are adequate authorized shares to satisfy anticipated stock option exercises and restricted share unit and restricted stock award vesting.

Stock option awards

The Company issues stock options under various plans to directors, officers and other key employees. The option exercise price cannot be less than the fair value of the underlying common stock as of the date of the option grant and the maximum option term cannot exceed ten years.

The following table represents the activity related to stock options during the periods indicated:

	Number of Shares	Weighted Average Exercise Price
Outstanding options, December 31, 2017	686,366	\$ 58.24
Granted	96,507	81.99
Exercised	(34,745)	53.48
Forfeited or expired	(22,524)	66.80
Outstanding options, June 30, 2018	725,604	\$ 61.36
Exercisable options, June 30, 2018	505,477	\$ 56.55
Outstanding options, December 31, 2018	714,420	\$ 61.41
Granted	127,090	70.34
Exercised	(21,575)	53.98
Forfeited or expired	(8,787)	70.80
Outstanding options, June 30, 2019	811,148	\$ 62.90
Exercisable options, June 30, 2019	561,789	\$ 58.26

The Company uses the Black-Scholes option pricing model to estimate the fair value of stock option awards. The following weighted-average assumptions were used for option awards issued during the following periods:

	For the Six Months Ended June 30,	
	2019	2018
Expected dividends	2.3%	1.8%
Expected volatility	24.5%	24.3%
Risk-free interest rate	2.5%	2.7%
Expected term (in years)	5.7	5.8
Weighted-average grant-date fair value	\$ 14.44	\$ 18.44

The assumptions above are based on multiple factors, including historical stock option exercise patterns and post-vesting employment termination behaviors, expected future exercise patterns and the expected volatility of the Company's stock price.

The following table represents the compensation expense that is included in non-interest expense and related income tax benefits in the accompanying consolidated statements of comprehensive income related to stock options for the following periods:

(in thousands)	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2019	2018	2019	2018
Compensation expense related to stock options	\$ 336	\$ 319	\$ 685	\$ 631
Income tax benefit related to stock options	24	23	50	46

At June 30, 2019, there was \$2.7 million of unrecognized compensation expense related to stock options that is expected to be recognized over a weighted-average period of 2.9 years.

Restricted stock awards

The Company issues restricted stock under various plans for certain officers and directors. The restricted stock awards may not be sold or otherwise transferred until certain restrictions have lapsed. The holders of the restricted stock receive dividends and have the right to vote the shares. The compensation expense for these awards is determined based on the market price of the Company's common stock at the date of grant applied to the total number of shares granted and is recognized over the vesting period (generally three to five years). As of June 30, 2019 and 2018, unrecognized share-based compensation expense associated with these awards totaled \$28.1 million and \$35.5 million, respectively. The unrecognized compensation expense related to restricted stock awards at June 30, 2019 is expected to be recognized over a weighted-average period of 1.4 years.

Restricted share units

The Company issues restricted share units to certain of its executive officers. Restricted share units vest after the end of a three year performance period, based on satisfaction of the market and performance conditions set forth in the restricted share unit agreements. Recipients do not possess voting or investment power over the common stock underlying such units until vesting. The grant date fair value of these restricted share units is the same as the value of the corresponding number of shares of common stock, adjusted for assumptions surrounding the market-based conditions contained in the respective agreements. See Note 1, Summary of Significant Accounting Policies, in the 2018 Annual Report on Form 10-K for the year ended December 31, 2018, for further discussion of restricted share units with market or performance conditions.

The following table represents the compensation expense that was included in non-interest expense and related income tax benefits in the accompanying consolidated statements of comprehensive income related to restricted stock awards and restricted share units for the periods indicated:

(in thousands)	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2019	2018	2019	2018
Compensation expense related to restricted stock awards and restricted share units	\$ 5,931	\$ 4,927	\$ 11,154	\$ 9,349
Income tax benefit related to restricted stock awards and restricted share units	1,245	1,035	2,342	1,963

The following table represents unvested restricted stock award and restricted share unit activity for the following periods:

	For the Six Months Ended June 30,	
	2019	2018
Number of shares at beginning of period	700,628	738,187
Granted	212,038	224,170
Forfeited	(15,199)	(56,653)
Vested	(199,156)	(138,952)
Number of shares at end of period	698,311	766,752

Phantom stock awards

The Company issues phantom stock awards to certain key officers and employees. The awards are subject to a vesting period of five years and are paid out in cash upon vesting. The amount paid per vesting period is calculated as the number of vested “share equivalents” multiplied by the closing market price of a share of the Company’s common stock on the vesting date. Share equivalents are calculated on the date of grant as the total award’s dollar value divided by the closing market price of a share of the Company’s common stock on the grant date.

The following table represents compensation expense recorded for phantom stock based on the number of share equivalents vested at June 30 of the periods indicated and the current market price of the Company’s stock at that time:

(in thousands)	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2019	2018	2019	2018
Compensation expense related to phantom stock	\$ 2,451	\$ 2,017	\$ 5,645	\$ 5,013

The following table represents phantom stock award activity during the periods indicated:

(in thousands)	Number of share equivalents ⁽¹⁾	Value of share equivalents ⁽²⁾
Balance, December 31, 2017	393,844	\$ 30,523
Granted	140,804	10,673
Forfeited share equivalents	(45,821)	3,473
Vested share equivalents	(126,019)	10,519
Balance, June 30, 2018	362,808	\$ 27,501
Balance, December 31, 2018	353,407	\$ 22,717
Granted	174,991	13,273
Forfeited share equivalents	(20,407)	1,548
Vested share equivalents	(101,318)	7,647
Balance, June 30, 2019	406,673	\$ 30,846

⁽¹⁾ Number of share equivalents includes all reinvested dividend equivalents for the periods indicated.

⁽²⁾ Except for share equivalents at the beginning of each period, which are based on the value at that time, and vested share payments, which are based on the cash paid at the time of vesting, the value of share equivalents is calculated based on the market price of the Company’s stock at the end of the respective periods. The market price of the Company’s stock was \$75.85 and \$75.80 on June 30, 2019, and 2018, respectively.

NOTE 12 – FAIR VALUE MEASUREMENTS

Recurring fair value measurements

The following table presents information about the Company's assets and liabilities that are measured at fair value on a recurring basis as of June 30, 2019 and December 31, 2018 and their classification within the fair value hierarchy. See Note 1, Summary of Significant Accounting Policies, in the Annual Report on Form 10-K for the year ended December 31, 2018, for a description of how fair value measurements are determined.

(in thousands)	June 30, 2019			
	Level 1	Level 2	Level 3	Total
Assets				
Securities available for sale	\$ —	\$ 4,455,308	\$ —	\$ 4,455,308
Mortgage loans held for sale	—	187,987	—	187,987
Mortgage loans held for investment, at fair value option	—	—	1,945	1,945
Derivative instruments	—	107,747	—	107,747
Total	\$ —	\$ 4,751,042	\$ 1,945	\$ 4,752,987
Liabilities				
Derivative instruments	\$ —	\$ 12,599	\$ —	\$ 12,599
Total	\$ —	\$ 12,599	\$ —	\$ 12,599
December 31, 2018				
	Level 1	Level 2	Level 3	Total
Assets				
Securities available for sale	\$ —	\$ 4,783,579	\$ —	\$ 4,783,579
Mortgage loans held for sale	—	107,734	—	107,734
Mortgage loans held for investment, at fair value option	—	—	3,143	3,143
Derivative instruments	—	27,048	—	27,048
Total	\$ —	\$ 4,918,361	\$ 3,143	\$ 4,921,504
Liabilities				
Derivative instruments	\$ —	\$ 22,124	\$ —	\$ 22,124
Total	\$ —	\$ 22,124	\$ —	\$ 22,124

During the six months ended June 30, 2019, there were no transfers between the Level 1 and Level 2 fair value categories.

Non-recurring fair value measurements

The Company holds certain assets that are measured at fair value, but only in certain circumstances, such as impairment. The following table presents information about the Company's assets that are measured at fair value and still held as of June 30, 2019 and December 31, 2018 for which a non-recurring fair value adjustment was recorded during the periods then ended. See Note 1, Summary of Significant Accounting Policies, in the Annual Report on Form 10-K for the year ended December 31, 2018, for a description of how fair value measurements are determined.

(in thousands)	June 30, 2019			
	Level 1	Level 2	Level 3	Total
Assets				
Impaired loans	\$ —	\$ —	\$ 73,003	\$ 73,003
OREO, net	—	—	5,076	5,076
Total	\$ —	\$ —	\$ 78,079	\$ 78,079

(in thousands)	December 31, 2018			
	Level 1	Level 2	Level 3	Total
Assets				
Impaired loans	\$ —	\$ —	\$ 65,914	\$ 65,914
OREO, net	—	—	6,433	6,433
Total	\$ —	\$ —	\$ 72,347	\$ 72,347

The tables above exclude the initial measurement of assets and liabilities that were acquired as part of business combinations. These assets and liabilities were recorded at their fair value upon acquisition in accordance with GAAP and were not re-measured during the periods presented unless specifically required by GAAP. Acquisition date fair values represent either Level 2 fair value measurements (investment securities, deposits, and premises and equipment) or Level 3 fair value measurements (loans, core deposit intangible assets, and debt). Refer to Note 3, Acquisition Activity, in the Annual Report on Form 10-K for the year ended December 31, 2018, for further detail.

The Company did not record any liabilities at fair value for which measurement of the fair value was made on a non-recurring basis as of June 30, 2019 and December 31, 2018.

Fair value option

The Company has elected the fair value option for originated residential mortgage loans held for sale, which allows for a more effective offset of the changes in fair values of the loans and the derivative instruments used to hedge them without the burden of complying with the requirements for hedge accounting. The Company also has a portion of mortgage loans held for investment for which the fair value option was elected upon origination and which continue to be accounted for at fair value at June 30, 2019 and December 31, 2018, respectively.

The following table summarizes the difference between the aggregate fair value and the aggregate unpaid principal balance for mortgage loans held for sale and mortgage loans held for investment measured at fair value:

(in thousands)	June 30, 2019			December 31, 2018		
	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Unpaid Principal	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Unpaid Principal
Mortgage loans held for sale, at fair value	\$ 187,987	\$ 181,067	\$ 6,920	\$ 107,734	\$ 104,345	\$ 3,389
Mortgage loans held for investment, at fair value	1,945	2,099	(154)	3,143	3,595	(452)

Interest income on mortgage loans held for sale and mortgage loans held for investment at fair value option is recognized based on contractual rates and is reflected in interest income on loans held for sale in the consolidated statements of comprehensive income. The following table details net gains (losses) resulting from the change in fair value of loans that were recorded in mortgage income in the consolidated statements of comprehensive income for the three and six months ended June 30, 2019 and 2018. The changes in fair value are mostly offset by economic hedging activities, with an insignificant portion of these changes attributable to changes in instrument-specific credit risk.

(in thousands)	Net Gains (Losses) Resulting From Changes in Fair Value			
	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2019	2018	2019	2018
Fair value option				
Mortgage loans held for sale, at fair value	\$ 2,879	\$ (331)	\$ 3,531	\$ (1,472)
Mortgage loans held for investment, at fair value	(104)	(172)	87	(921)

NOTE 13 – FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. ASC Topic 825, *Financial Instruments*, excludes certain financial instruments and all non-financial instruments from its disclosure requirements. Consequently, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The carrying amount and estimated fair values of the Company's financial instruments, as well as the level within the fair value hierarchy, are included in the tables below. See Note 1, Summary of Significant Accounting Policies, and Note 2, Recent Accounting Pronouncements, in the Annual Report on Form 10-K for the year ended December 31, 2018, for a description of how fair value measurements are determined.

(in thousands)	June 30, 2019				
	Carrying Amount	Fair Value	Level 1	Level 2	Level 3

The fair value estimates presented herein are based upon pertinent information available to management as of June 30, 2019 and December 31, 2018. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since these dates and, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

NOTE 14 – BUSINESS SEGMENTS

Each of the Company’s reportable operating segments serves the specific needs of the Company’s customers based on the products and services it offers. The reportable segments are based upon those revenue-producing components for which separate financial information is produced internally and primarily reflect the manner in which resources are allocated and performance is assessed. Further, the reportable operating segments are also determined based on the quantitative thresholds prescribed within ASC Topic 280, *Segment Reporting*, and consideration of the usefulness of the information to the users of the consolidated financial statements.

The Company reports the results of its operations through three reportable segments: IBERIABANK, Mortgage, and LTC. The IBERIABANK segment represents the Company’s commercial and retail banking functions, including its lending, investment, and deposit activities. IBERIABANK also includes the Company’s wealth management, capital markets, and other corporate functions. The Mortgage segment represents the Company’s origination, funding, and subsequent sale of one-to-four family residential mortgage loans. The LTC segment represents the Company’s title insurance and loan closing services.

Certain expenses not directly attributable to a specific reportable segment are allocated to segments based on pre-determined methods that reflect utilization. Also within IBERIABANK are certain reconciling items that translate reportable segment results into consolidated results. The following tables present certain information regarding operations by reportable segment, including a reconciliation of segment results to reported consolidated results for the periods presented. Reconciling items between segment results and reported results include:

- Elimination of interest income and interest expense representing interest earned by IBERIABANK on interest-bearing checking accounts held by related companies, as well as the elimination of the related deposit balances at the IBERIABANK segment;
- Elimination of investment in subsidiary balances on certain operating segments included in total and average segment assets; and
- Elimination of intercompany due to and due from balances on certain operating segments that are included in total and average segment assets.

NOTE 15 – COMMITMENTS AND CONTINGENCIES

Off-balance sheet commitments

In the normal course of business, to meet the financing needs of its customers, the Company is a party to credit-related financial instruments, with risk not reflected in the consolidated financial statements. These financial instruments include commitments to extend credit, standby letters of credit, and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The credit policies used for these commitments are consistent with those used for on-balance sheet instruments. The Company's exposure to credit loss in the event of non-performance by its customers under such commitments or letters of credit represents the contractual amount of the financial instruments as indicated in the table below. At June 30, 2019 and December 31, 2018, the fair value of guarantees under commercial and standby letters of credit was \$2.4 million. This fair value will decrease as the existing commercial and standby letters of credit approach their expiration dates.

At June 30, 2019 and December 31, 2018, respectively, the Company had the following financial instruments outstanding and related reserves, whose contract amounts represent credit risk:

(in thousands)	June 30, 2019	December 31, 2018
Commitments to extend credit	\$ 690,267	\$ 642,162
Unfunded commitments under lines of credit	7,149,479	6,883,963
Commercial and standby letters of credit	246,622	240,436
Reserve for unfunded lending commitments	15,281	14,830

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee by the borrower. Since many of the commitments are expected to be drawn upon, the total commitment amounts generally represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral, if any, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines, and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. Many of these types of commitments do not contain a specified maturity date and may not be drawn upon to the total extent to which the Company is committed. See Note 5, Allowance for Credit Losses and Credit Quality, for additional information related to the Company's reserve for unfunded lending commitments.

Commercial and standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper issuance, bond financing, and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. When necessary they are collateralized, generally in the form of marketable securities and cash equivalents.

Legal proceedings

The nature of the business of the Company's banking and other subsidiaries ordinarily results in a certain amount of claims, litigation, investigations, and legal and administrative cases and proceedings, which are considered incidental to the normal conduct of business. Some of these claims are against entities or assets of which the Company is a successor or acquired in business acquisitions. The Company has asserted defenses to these claims and, with respect to such legal proceedings, intends to continue to defend itself vigorously, litigating or settling cases according to management's judgment as to what is in the best interest of the Company and its shareholders.

In July of 2016, the Company received a subpoena from the Office of Inspector General of the U.S. Department of Housing and Urban Development (“HUD”) requesting information on certain previously originated loans insured by the Federal Housing Administration (“FHA”) as well as other documents regarding the Company’s FHA-related policies and practices. After the Company complied with the subpoena, attorneys from the Department of Justice (“DOJ”) informed the Company in late March of 2017 that a civil *qui tam* suit had been filed against the Company in federal court involving the subject matter of the HUD subpoena. The HUD lawsuit was settled on December 11, 2017 in the amount of \$11.7 million. On February 2, 2018, IBERIABANK filed a lawsuit in the United States District Court for the Eastern District of Louisiana (New Orleans) against Illinois Union Insurance Company and Travelers Casualty and Surety Company of America in an effort to recover the \$11.7 million it paid to settle the HUD matter. IBERIABANK filed that lawsuit to recover the insurance proceeds to which it claims to be entitled under certain Bankers’ Professional Liability insurance policies issued by defendants Illinois Union and Travelers. More specifically, IBERIABANK alleges that the insurers have failed to honor their obligations under the policies to pay IBERIABANK’s losses in connection with the \$11.7 million settlement of disputed allegations relating to IBERIABANK’s professional services in connection with certain mortgage loans insured by the FHA. The judge in the federal lawsuit granted motion for summary judgment thereby dismissing the case. The Company has appealed that decision to the United States Court of Appeals for the Fifth Circuit. The appeal seeks reversal of the summary judgment such that the case can be remanded to the district court in an effort to recover the \$11.7 million the Company is suing to recover.

The Company assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. Where it is probable that the Company will incur a loss and the amount of the loss can be reasonably estimated, the Company records a liability in its consolidated financial statements. These legal reserves may be increased or decreased to reflect any relevant developments on a quarterly basis. Where a loss is not probable or the amount of loss is not estimable, the Company does not accrue legal reserves. While the outcome of legal proceedings is inherently uncertain, based on information currently available and available insurance coverage, the Company’s management believes that it has established appropriate legal reserves. Any incremental liabilities arising from pending legal proceedings are not expected to have a material adverse effect on the Company’s consolidated financial position, consolidated results of operations, or consolidated cash flows. However, it is possible that the ultimate resolution of these matters, if unfavorable, may be material to the Company’s consolidated financial position, consolidated results of operations, or consolidated cash flows.

As of the date of this filing, the Company believes the amount of losses associated with legal proceedings that it is reasonably possible to incur above amounts already accrued and reported as of June 30, 2019 is not material.

NOTE 16 – RELATED PARTY TRANSACTIONS

In the ordinary course of business, the Company may execute transactions with various related parties. Examples of such transactions may include lending or deposit arrangements, transfers of financial assets, services for administrative support, and other miscellaneous items.

The Company has granted loans to executive officers and directors and their affiliates. These loans, including the related principal additions, principal payments, and unfunded commitments are not material to the consolidated financial statements at June 30, 2019 and December 31, 2018. There were no outstanding loans to such related parties classified as non-accrual, past due, or troubled debt restructurings at June 30, 2019.

Deposits from related parties held by the Company were not material at June 30, 2019 and December 31, 2018.

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to assist readers in understanding the consolidated financial condition and results of operations of IBERIABANK Corporation and its wholly-owned subsidiaries (collectively, the “Company”) as of and for the period ended June 30, 2019, and updates the Annual Report on Form 10-K for the year ended December 31, 2018. This discussion should be read in conjunction with the unaudited consolidated financial statements, accompanying footnotes and supplemental financial data included herein. The emphasis of this discussion will be amounts as of June 30, 2019 compared to December 31, 2018 for the balance sheets and the three and six months ended June 30, 2019 compared to June 30, 2018 for the statements of comprehensive income. Certain amounts in prior year presentations have been reclassified to conform to the current year presentation.

When we refer to the “Company,” “we,” “our” or “us” in this Report, we mean IBERIABANK Corporation and subsidiaries (consolidated). When we refer to the “Parent,” we mean IBERIABANK Corporation. See the Glossary of Defined Terms at the end of this Report for terms used throughout this Report.

CAUTION ABOUT FORWARD-LOOKING STATEMENTS

To the extent that statements in this Report relate to future plans, objectives, financial results or performance of the Company, these statements are deemed to be “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements, which are based on management’s current information, estimates and assumptions and the current economic environment, are generally identified by use of the words “may,” “plan,” “believe,” “expect,” “intend,” “will,” “should,” “continue,” “potential,” “anticipate,” “estimate,” “predict,” “project” or similar expressions, or the negative of these terms or other comparable terminology. The Company’s actual strategies and results in future periods may differ materially from those currently expected due to various risks and uncertainties.

Forward-looking statements represent management’s beliefs, based upon information available at the time the statements are made, with regard to the matters addressed; they are not guarantees of future performance. Forward-looking statements are subject to numerous assumptions, risks and uncertainties that change over time and could cause actual results or financial condition to differ materially from those expressed in or implied by such statements. Factors that could cause or contribute to such differences include, but are not limited to: the level of market volatility, our ability to execute our growth strategy, including the availability of future bank acquisition opportunities, our ability to execute on our revenue and efficiency improvement initiatives, unanticipated delays, losses, business disruptions and diversion of management time related to the completion and integration of mergers and acquisitions, refinements to purchase accounting adjustments for acquired businesses and assets and assumed liabilities in these transactions, adjustments of fair values of acquired assets and assumed liabilities and of deferred taxes in acquisitions, actual results deviating from the Company’s current estimates and assumptions of timing and amounts of cash flows, credit risk of our customers, effects of low energy and commodity prices, effects of residential real estate prices and levels of home sales, our ability to satisfy capital and liquidity standards, sufficiency of our allowance for credit losses, changes in interest rates, access to funding sources, reliance on the services of executive management, competition for loans, deposits and investment dollars, competition from competitors with greater financial resources than the Company, threats of fintech innovation, reputational risks and social factors, changes in government regulations and legislation, increases in FDIC insurance assessments, geographic concentration of our markets, economic or business conditions in our markets or nationally, rapid changes in the financial services industry, significant litigation, cyber-security risks including dependence on our operational, technological, and organizational systems and infrastructure and those of third party providers of those services, hurricanes and other adverse weather events, and valuation of intangible assets.

Factors that may cause actual results to differ materially from these forward-looking statements are discussed in the Company’s Annual Report on Form 10-K and other filings with the Securities and Exchange Commission (the “SEC”), available at the SEC’s website, www.sec.gov, and the Company’s website, www.iberiabank.com, under the heading “Investor Relations” and then “Financial Information.” All information is as of the date of this Report unless otherwise noted. Except to the extent required by applicable law or regulation, the Company undertakes no obligation to revise or update publicly any forward-looking statement for any reason.

EXECUTIVE SUMMARY

Corporate Profile

IBERIABANK Corporation is a financial holding company based in Lafayette, Louisiana. Through its subsidiaries, the Company provides a full range of commercial and consumer banking services, including private banking, small business, wealth and trust management, retail brokerage, mortgage, commercial leasing and equipment financing, and title insurance services through locations in Louisiana, Arkansas, Tennessee, Alabama, Texas, Florida, Georgia, South Carolina, North Carolina, Mississippi, Missouri, and New York.

Quarterly Financial Performance Summary:

- Net income available to common shareholders for the quarter ended June 30, 2019 totaled \$100.6 million, or \$1.86 diluted EPS, compared to \$74.2 million, or \$1.30 diluted EPS, for the same period of 2018. Non-GAAP core EPS, which excludes merger-related costs and other items disclosed in Table 17 - Non-GAAP measures, was \$1.87 for the second quarter of 2019 compared to \$1.71 for the same period of 2018.
- Net interest income was \$255.3 million for the second quarter of 2019, a \$0.8 million, or 0.3%, decrease compared to the same quarter of 2018. Net interest margin on a tax-equivalent basis decreased 19 basis points to 3.57% from 3.76%, primarily attributable to a higher cost of funds in the second quarter of 2019.
- The Company recorded a provision for credit losses of \$10.8 million for the quarter ended June 30, 2019, a \$3.1 million increase from the provision recorded for the same period of 2018, primarily driven by loan growth when comparing the periods.
- Non-interest income increased \$4.9 million, or 9%, to \$58.8 million during the quarter ended June 30, 2019. This increase was primarily driven by higher mortgage income when comparing the periods.
- Non-interest expense for the second quarter of 2019 decreased \$27.2 million, or 14%, to \$169.6 million compared to the same period of 2018. This decrease was primarily the result of a decrease in impairment of long-lived assets and other losses due to branch consolidations and closures that took place during the second quarter of 2018 and a decline in salaries and employee benefits expense.
- The Company recorded income tax expense of \$32.2 million and \$30.5 million, respectively, for the quarters ended June 30, 2019 and 2018, which resulted in an effective income tax rate of 24.1% and 28.8%, respectively.

Year-to-Date Financial Performance Summary:

- Net income available to common shareholders for the six months ended June 30, 2019 totaled \$197.2 million, or \$3.61 diluted EPS, compared to \$134.2 million, or \$2.41 diluted EPS, for the same period of 2018. Non-GAAP core EPS, which excludes merger-related costs and other items disclosed in Table 17 - Non-GAAP measures, was \$3.59 in the first half of 2019 compared to \$3.09 for the same period of 2018.
- Net interest income was \$505.8 million for the first half of 2019, a \$16.8 million, or 3%, increase compared to the same period of 2018. Net interest margin on a tax-equivalent basis decreased 14 basis points to 3.58% from 3.72%, primarily attributable to a higher cost of funds in 2019.
- The Company recorded a provision for credit losses of \$24.5 million for the first half of 2019, an \$8.6 million increase from the provision recorded for the same period of 2018, primarily driven by loan growth when comparing the periods.
- Non-interest income increased \$12.8 million, or 13%, to \$111.3 million during the six months ended June 30, 2019. This increase was primarily driven by higher mortgage income and customer swap commissions income.
- Non-interest expense for the first six months of 2019 decreased \$56.5 million, or 15%, to \$328.4 million compared to the same period of 2018. This decrease was primarily attributable to a decrease in impairment of long-lived assets and other losses due to branch consolidations and closures that took place during the first six months of 2018 and lower salaries and employee benefits expense due to merger-related costs in 2018.
- The Company recorded income tax expense of \$62.5 million and \$48.0 million, respectively, for the six months ended June 30, 2019 and 2018, which resulted in an effective income tax rate of 23.7% and 25.7%, respectively.

Financial Condition Summary:

- Total assets at June 30, 2019 were \$31.4 billion, up \$613.5 million, or 2%, from December 31, 2018.
- Loans increased \$835.5 million, or 4%, from December 31, 2018, driven by strong growth in the Energy and Corporate Asset Finance Groups and the Dallas and Atlanta markets.
- Total deposits increased \$531.9 million, or 2%, from December 31, 2018.
- Credit quality remained strong and stable. Non-performing assets to total assets were 0.60% at June 30, 2019 compared to 0.55% at December 31, 2018. Net charge-offs to average loans and leases, on an annualized basis, decreased one basis point to 0.14% for the six months ended June 30, 2019 compared to 0.15% for the comparable 2018 period.
- Shareholders' equity increased \$181.7 million, or 4%, from year-end 2018. On April 4, 2019, the Company issued and sold 4.0 million depository shares of non-cumulative perpetual preferred stock for \$96.4 million in net proceeds.
- During the second quarter of 2019, the Company repurchased 1.8 million common shares for \$134.8 million at a weighted average price of \$76.59 per common share. For the six months ended June 30, 2019, the Company repurchased 2.1 million common shares for \$164.7 million at a weighted average cost of \$76.70 per share.

FINANCIAL OVERVIEW

The following table sets forth selected financial ratios and other relevant data used by management to analyze the Company's performance.

TABLE 1—SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA

	As of and For the Three Months Ended June 30,	
	2019	2018
Key Ratios ⁽¹⁾		
Return on average assets	1.30%	1.01%
Core return on average assets (Non-GAAP) ⁽²⁾	1.31	1.32
Return on average common equity	10.05	7.87
Core return on average tangible common equity (Non-GAAP) ⁽²⁾⁽³⁾	15.58	16.70
Equity to assets at end of period	13.48	12.99
Earning assets to interest-bearing liabilities at end of period	142.78	145.38
Interest rate spread ⁽⁴⁾	3.09	3.44
Net interest margin (TE) ⁽⁴⁾⁽⁵⁾	3.57	3.76
Non-interest expense to average assets (annualized)	2.18	2.65
Efficiency ratio ⁽⁶⁾	54.0	63.5
Core tangible efficiency ratio (TE) (Non-GAAP) ⁽²⁾⁽³⁾⁽⁵⁾⁽⁶⁾	52.0	54.3
Common stock dividend payout ratio	22.6	28.9
Asset Quality Data		
Non-performing assets to total assets at end of period ⁽⁷⁾	0.60%	0.54%
Allowance for credit losses to non-performing loans at end of period ⁽⁷⁾	101.14	107.50
Allowance for credit losses to total loans at end of period	0.69	0.68
Consolidated Capital Ratios		
Tier 1 leverage ratio	9.71%	9.54%
Common equity tier 1 (CET1)	10.38	10.72
Tier 1 risk-based capital ratio	11.26	11.27
Total risk-based capital ratio	12.33	12.37

⁽¹⁾ With the exception of end-of-period ratios, all ratios are based on average daily balances during the respective periods.

⁽²⁾ See Table 17 for GAAP to Non-GAAP reconciliations.

⁽³⁾ Tangible calculations eliminate the effect of goodwill and acquisition-related intangible assets and the corresponding amortization expense on a tax-effected basis where applicable.

⁽⁴⁾ Interest rate spread represents the difference between the weighted average yield on earning assets and the weighted average cost of interest-bearing liabilities. Net interest margin represents net interest income as a percentage of average earning assets.

⁽⁵⁾ Fully taxable equivalent ("TE") calculations include the tax benefit associated with related income sources that are tax-exempt using a rate of 21%.

⁽⁶⁾ The efficiency ratio represents non-interest expense as a percentage of total revenues. Total revenues are the sum of net interest income and non-interest income.

⁽⁷⁾ Non-performing loans consist of non-accruing loans and accruing loans 90 days or more past due. Non-performing assets consist of non-performing loans and other real estate owned, including repossessed assets.

ANALYSIS OF RESULTS OF OPERATIONS

Net Interest Income/Net Interest margin

Net interest income is the difference between interest realized on earning assets and interest accrued on interest-bearing liabilities and is also the largest driver of earnings. As such, it is subject to constant scrutiny by management. The rate of return and relative risk associated with earning assets are weighed to determine the appropriateness and mix of earning assets. Additionally, the need for lower cost funding sources is weighed against relationships with clients and future growth opportunities. The Company's net interest spread, which is the difference between the yields earned on average earning assets and the rates paid on average interest-bearing liabilities, was 3.09% and 3.44%, during the three months ended June 30, 2019 and 2018, respectively, and 3.12% and 3.42% for the six months ended June 30, 2019 and 2018, respectively. The Company's net interest margin on a taxable equivalent basis, which is net interest income as a percentage of average earning assets, was 3.57% and 3.76%, respectively, for the three months ended June 30, 2019 and 2018, and 3.58% and 3.72%, respectively, for the six months ended June 30, 2019 and 2018.

The following table sets forth information regarding (i) the total dollar amount of interest income from earning assets and the resultant average yields; (ii) the total dollar amount of interest expense on interest-bearing liabilities and the resultant average rates; (iii) net interest income; (iv) net interest spread; and (v) net interest margin. Information is based on average daily balances during the indicated periods. Investment security market value adjustments and trade-date accounting adjustments are not considered to be earning assets and, as such, the net effect of these adjustments is included in non-earning assets.

TABLE 2—QUARTERLY AVERAGE BALANCES, NET INTEREST INCOME AND INTEREST YIELDS / RATES

(in thousands)	Three Months Ended June 30,					
	2019			2018		
	Average Balance	Interest Income/Expense ⁽¹⁾	Yield/ Rate (TE) ⁽²⁾	Average Balance	Interest Income/Expense ⁽¹⁾	Yield/ Rate (TE) ⁽²⁾
Earning Assets:						
Loans and leases:						
Commercial loans and leases	\$ 15,766,423	\$ 205,093	5.24%	\$ 14,631,985	\$ 178,830	4.92%
Residential mortgage loans	4,482,150	49,388	4.41%	4,041,259	47,215	4.67%

Net interest income (TE) / Net interest margin (TE) ⁽¹⁾		\$ 508,502	3.58%		\$ 491,912	3.72%

(1) Interest income includes loan fees of \$1.8 million and \$1.6 million for the six-month periods ended June 30, 2019 and 2018, respectively.

(2) Fully taxable equivalent (TE) calculations include the tax benefit associated with related income sources that are tax-exempt using a rate of 21%.

(3) Balances exclude unrealized gains or losses on securities available for sale and the impact of trade date accounting.

(4) Total deposit costs for the six months ended June 30, 2019 and 2018 were 1.06% and 0.58%, respectively.

Net interest income decreased \$0.8 million to \$255.3 million in the second quarter of 2019 when compared to the same quarter of 2018. Net interest margin on a tax-equivalent basis decreased 19 basis points to 3.57% from 3.76% when comparing the periods. Net interest income increased \$16.8 million, or 3%, to \$505.8 million in the first half of 2019 when compared to the same period of 2018. Net interest margin on a tax-equivalent basis decreased 14 basis points to 3.58% from 3.72% when comparing the year-to-date periods. Earning asset yields and funding costs were impacted by four FOMC interest rate increases of 25 basis points each from March 2018 through June 2019.

Interest income increased \$32.1 million in the second quarter of 2019 when compared to the same quarter of 2018. Rate changes contributed to 58% of this increase, as the yield on average earning assets rose 24 basis points to 4.70% from 4.46% when comparing the periods. The remaining 42% of the increase was volume-driven from a \$1.3 billion, or 5%, increase in average earning assets. Total interest income increased \$87.7 million in the first six months of 2019 when compared to the same period of 2018. Rate changes contributed to 54% of this increase, as the yield on average earning assets rose 33 basis points to 4.69% from 4.36% when comparing the periods. The remaining 46% of the increase was volume-driven from a \$1.9 billion, or 7%, increase in average earning assets. The drivers of the increases in earning asset yields for both the three and six months ended June 30, 2019 included the repricing of variable rate legacy loans and origination coupons above existing portfolio rates.

Average loans and leases made up 80% of average earning assets for the second quarters of 2019 and 2018, and 80% and 79% for the first six months of 2019 and 2018, respectively. Loan interest income increased \$26.2 million, as average loans and leases increased \$1.3 billion, or 6%, when comparing the second quarters of 2019 and 2018. On a year-to-date basis, loan interest income increased \$73.0 million, as average loans and leases increased \$1.9 billion, or 9%. The increases when comparing the quarterly and year-to-date periods were driven by both organic and acquired loan growth. Average loan yields increased 18 basis points when comparing the second quarters of 2019 and 2018 and increased 25 basis points when comparing the year-to-date periods. The increase in loan yields was primarily driven by higher recoveries in the acquired loan portfolio as well as rate increases on variable rate loans.

Average investment securities were 17% and 18% of average earning assets during the three and six months ended June 30, 2019 and 2018, respectively. Interest income from investments increased \$4.5 million when comparing the second quarters of 2019 and 2018, and increased \$12.5 million when comparing the year-to-date periods.

Interest expense increased \$32.9 million when comparing the second quarters of 2019 and 2018, primarily due to a \$29.7 million increase in interest expense on deposits. Interest expense increased \$70.9 million when comparing the first half of 2019 and 2018, primarily due to a \$61.7 million increase in interest expense on deposits. The increases in interest expense were primarily a result of a 61 basis point increase in the rate paid on deposits when comparing the second quarters of 2019 and 2018 and a 63 basis point increase when comparing the year-to-date periods. Deposit costs were driven upward by the repricing of deposits as well as higher rates paid on promotional deposit offerings as a result of market competition. Deposit costs also increased from the impact of acquired Gibraltar deposits, which tended to be higher relative to the Company's legacy business. The Company realized growth of \$1.3 billion when compared to the same quarter of 2018 and \$1.6 billion when compared to the first half of 2018 in the average balance of interest-bearing deposits, primarily due to time deposit issuances, market growth, and the aforementioned Gibraltar acquired accounts.

Interest expense on the Company's borrowings increased \$3.2 million when comparing the second quarters of 2019 and 2018, and \$9.2 million when comparing the first half of 2019 and 2018. The increases were a result of both an increase in average borrowings and basis point increases in the cost of average interest-bearing borrowings when comparing the periods.

The following table displays the dollar amount of changes in interest income and interest expense for major components of earning assets and interest-bearing liabilities. The table distinguishes between (i) changes attributable to volume (changes in average volume between periods times the average yield/rate for the two periods), (ii) changes attributable to rate (changes in average rate between periods times the average volume for the two periods), and (iii) total increase (decrease). Changes attributable to both volume and rate are allocated ratably between the volume and rate categories.

TABLE 4 - SUMMARY OF CHANGES IN NET INTEREST INCOME

Provision for Credit Losses

The provision for credit losses represents the expense necessary to maintain the ACL at a level that in management's judgment is appropriate to absorb probable losses inherent in the portfolio at the balance sheet date.

The provision for credit losses totaled \$10.8 million for the second quarter of 2019, a \$3.1 million, or 40%, increase compared to the same period in 2018. For the six months ended June 30 2019, the provision for credit losses of \$24.5 million was an \$8.6 million increase from the comparable 2018 period. The increase in the provision for credit losses was largely due to non-acquisition related loan growth when comparing the periods.

The Company's provision for loan and lease losses covered 156% of net charge-offs in the first six months of 2019 compared to 98% coverage for the same period of 2018.

Refer to the "Asset Quality" section for further discussion on past due loans, non-performing assets, troubled debt restructurings and the allowance for credit losses.

Non-interest Income

The Company's operating results for the three months ended June 30, 2019 included non-interest income of \$58.8 million compared to \$53.9 million for the same period of 2018, a \$4.9 million, or 9%, increase. The increase was primarily attributable to a \$4.7 million increase in mortgage income, driven by both an increase in sales volume and favorable fair value adjustments during the second quarter of 2019. Additionally, commission income increased \$1.0 million due to an increase in customer swap income. These increases were partially offset by \$1.0 million in losses on sales of available-for-sale securities.

On a year-to-date basis, non-interest income totaled \$111.3 million compared to \$98.5 million for the same period of 2018, a \$12.8 million, or 13%, increase. The increase was primarily driven by a \$7.0 million increase in mortgage income, the result of both higher margins on the sale of mortgage loans and favorable fair value adjustments. Additionally, commission income increased \$4.1 million due to an increase in customer swap income of \$4.2 million and an increase in income from bank owned life insurance which increased \$1.0 million as a result of additional policies purchased in the third quarter of 2018. These increases were partially offset by \$1.0 million in losses on sales of available-for-sale securities.

Non-interest Expense

The Company's operating results for the second quarter of 2019 included non-interest expense of \$169.6 million, a decrease of \$27.2 million, or 14%, when compared to the same period of 2018. For the quarter, the Company's efficiency ratio was 54.0%, compared to 63.5% in the second quarter of 2018.

Impairment of long-lived assets and other losses decreased \$15.2 million, primarily due to branch consolidations and closures that took place in the second quarter of 2018.

In addition, salaries and employee benefits decreased \$4.1 million in the second quarter of 2019 when compared to the same period of 2018, as full-time equivalent employees decreased by 125 from efficiency initiatives. Severance, retention, and other merger-related compensation expenses decreased \$5.9 million, driven by the Gibraltar acquisition in 2018 and efficiency initiatives. These decreases were offset by merit raises and off-cycle pay increases, higher annual bonus accruals, and higher share-based compensation expense from current period grants.

Other significant decreases in non-interest expense when comparing the second quarter of 2019 to the second quarter of 2018 included:

- \$2.7 million in insurance expense, driven by the removal of a large bank surcharge assessment by the FDIC and a lower assessment rate in 2019;
- \$1.5 million in marketing and business development expense, primarily driven by a decrease in CRA expenses; and
- \$1.3 million in the amortization of acquisition intangibles.

Non-interest expense for the first six months of 2019 totaled \$328.4 million, a decrease of \$56.5 million, or 15%, from the same period of 2018. On a year-to-date basis, the Company's efficiency ratio decreased from 65.5% in 2018 to 53.2% in 2019.

Impairment of long-lived assets and other losses decreased \$22.9 million due to the branch consolidations and closures in 2018.

Salaries and employee benefits decreased \$10.4 million in the first half of 2019 when compared to the same period of 2018 as severance, retention, and other merger-related compensation expenses decreased \$10.6 million. Additionally, in 2018, the Company awarded certain associates a one-time cash bonus of \$2.3 million following the enactment of tax reform legislation. These decreases were offset by higher annual bonus accruals and higher share-based compensation expense.

Insurance expense decreased \$5.6 million, driven by the removal of a large bank surcharge assessment by the FDIC and a lower assessment rate in 2019. Decreases of \$3.9 million in professional services, \$3.2 million in computer services expense, and \$2.4 million in net occupancy and equipment expense were the result of system conversion and other merger-related expenses in 2018. Credit and other loan-related expense decreased \$2.5 million primarily from lower loan collection expenses, lower mortgage loan servicing fees, and lower credit bureau expenses.

Income Taxes

For the three months ended June 30, 2019 and 2018, the Company recorded income tax expense of \$32.2 million and \$30.5 million, respectively, which resulted in an effective income tax rate of 24.1% and 28.8%, respectively. For the six months ended June 30, 2019 and 2018, the Company recorded income tax expense of \$62.5 million and \$48.0 million, respectively, which resulted in an effective income tax rate of 23.7% for the first half of 2019 and 25.7% for the same period of 2018. The decrease in the effective income tax rate was primarily related to the discrete item of \$6.6 million in income tax expense recorded during the second quarter of 2018, due to the write-down of deferred tax assets associated with the finalization of purchase accounting for the Sabadell United acquisition and the related impact of the Tax Act on those adjustments.

The difference between the Company's effective tax rate for the three and six months ended June 30, 2019 and 2018 and the U.S. statutory tax rates of 21% primarily relates to tax-exempt income, non-deductible expenses, state income taxes (net of federal income tax benefit), and the recognition of tax credits. The effective tax rate may vary significantly due to fluctuations in the amount and source of pretax income, changes in amounts of non-deductible expenses, and timing of the recognition of tax credits.

The Company is currently under audit by the Internal Revenue Service for the years 2014 to 2017.

ANALYSIS OF FINANCIAL CONDITION

Loans and Leases

The Company had total loans and leases of \$23.4 billion at June 30, 2019, an increase of \$835.5 million, or 4%, from December 31, 2018. The increase was a result of legacy loan growth of \$1.4 billion, or 8%, offset by pay-downs and pay-offs on loans, primarily from prior period acquisitions.

Loans and leases outstanding at June 30, 2019 and December 31, 2018 are presented in the following table.

TABLE 5—SUMMARY OF LOANS

(in thousands)	June 30, 2019		December 31, 2018		\$ Change	% Change
	Balance	Mix	Balance	Mix		
Commercial loans and leases:

(1) Includes equipment financing leases

Loan Portfolio Segments

The Company believes its loan portfolio is diversified by product and geography throughout its footprint. Loan growth thus far in 2019 was strongest in the Energy Group (primarily reserve-based and midstream lending), Corporate Asset Finance Group (equipment financing and leasing business), and the Dallas and Atlanta markets. Loans in the Energy Group increased \$284.0 million, or 31% since December 31, 2018. The Corporate Asset Finance Group grew loans and leases \$178.0 million, or 35%, thus far in 2019. The Dallas market had loan growth of \$99.2 million, or 15%, and the Atlanta market had growth of \$95.6 million, or 7%, in the first six months of 2019.

The Company's loan to deposit ratio was 96% at June 30, 2019 and 95% at December 31, 2018. The percentage of fixed-rate loans to total loans was 37% at June 30, 2019 compared to 39% at the end of 2018.

In order to assess the risk characteristics of the loan portfolio, the Company considers the current U.S. economic environment and that of its primary market areas. See Note 5, Allowance for Credit Losses, to the unaudited consolidated financial statements for credit quality factors by loan portfolio segment.

Commercial Loans and Leases

Total commercial loans and leases increased \$854.7 million, or 6%, from December 31, 2018. Commercial loans and leases increased to 68% of the total portfolio at June 30, 2019 compared to 67% at December 31, 2018. Unfunded commitments on commercial loans including approved loan commitments not yet funded were \$6.3 billion at June 30, 2019, an increase of \$266.7 million, or 4%, when compared to the end of the prior year.

Commercial real estate loans include loans to commercial customers for medium-term financing of land and buildings or for land development or construction of a building. These loans are repaid from revenues through operations of the businesses, rents of properties, sales of properties and refinances. The Company's underwriting standards generally provide for loan terms of three to seven years, with amortization schedules of generally no more than twenty-five years. Low loan-to-value ratios are generally maintained and usually limited to no more than 80% at the time of origination. The commercial real estate portfolio is comprised of approximately 14% construction loans, 24% owner-occupied loans, and 62% non-owner-occupied loans as of June 30, 2019, relatively consistent with 13%, 25%, and 62%, respectively, at December 31, 2018. Commercial real estate loans increased \$430.0 million, or 5%, during the first six months of 2019, from loan growth across multiple markets, primarily in the Atlanta, Dallas, South Florida, Naples, and New Orleans markets.

Commercial and industrial ("C&I") loans and leases represent loans to commercial customers to finance general working capital needs, equipment purchases and leases and other projects where repayment is derived from cash flows resulting from business operations. The Company originates C&I loans and leases on a secured and, to a lesser extent, unsecured basis. C&I loans may be term loans or revolving lines of credit. Term loans are generally structured with terms of no more than three to seven years, with amortization schedules of generally no more than fifteen years. C&I term loans and leases are generally secured by equipment, machinery, or other corporate assets. Revolving lines of credit are generally structured as advances upon perfected security interests in accounts receivable and inventory and generally have annual maturities.

As of June 30, 2019, commercial and industrial loans and leases totaled \$6.2 billion, a \$424.7 million, or 7%, increase from December 31, 2018, driven by growth in the Company's Energy and Corporate Assets Finance Groups. Commercial and industrial loans and leases comprised 26% of the total portfolio at June 30, 2019 and 25% at December 31, 2018.

The following table details the Company's commercial loans and leases by state.

TABLE 6—COMMERCIAL LOANS AND LEASES BY STATE OF ORIGINATION

(in thousands)	June 30, 2019	December 31, 2018	\$ Change	% Change
Louisiana	\$ 3,539,355	\$ 3,521,596	17,759	1
Florida	4,806,650	4,756,957	49,693	1
Alabama	1,354,424	1,289,146	65,278	5
Texas ⁽¹⁾	2,666,869	2,310,642	356,227	15
Georgia	1,139,602	1,078,983	60,619	6
Arkansas	773,333	711,484	61,849	9
Tennessee	548,361	584,119	(35,758)	(6)
New York	51,003	44,026	6,977	16
South Carolina and North Carolina	136,458	92,800	43,658	47
Other ⁽²⁾	963,974	735,569	228,405	31
Total	\$ 15,980,029	\$ 15,125,322	854,707	6

⁽¹⁾ Texas loans include \$1.2 billion and \$911.5 million in Energy Group loans at June 30, 2019 and December 31, 2018, respectively.

⁽²⁾ Other loans include primarily equipment financing and corporate asset financing leases, which the Company does not classify by state.

Residential Mortgage Loans

Residential mortgage loans consist of loans to consumers to finance a primary residence. The residential mortgage loan portfolio is comprised of non-conforming 1-4 family mortgage loans secured by properties located in the Company's market areas. The residential mortgage loan portfolio is originated under terms and documentation that permit their sale in a secondary market. The larger mortgage loans of current and prospective private banking clients are generally retained to enhance relationships, but also tend to be more profitable due to the expected shorter durations and relatively lower servicing costs associated with loans of this size. The Company does not originate or hold negative amortization, option ARM, or other exotic mortgage loans in its portfolio. The Company makes insignificant investments in loans that would be considered sub-prime (e.g., loans with a credit score of less than 620) in order to facilitate compliance with relevant Community Reinvestment Act regulations.

Total residential mortgage loans increased \$179.0 million, or 4%, compared to December 31, 2018, primarily the result of growth in the Houston, New Orleans, Atlanta, and Tampa markets.

Consumer and Other Loans

The Company offers consumer loans in order to provide a full range of retail financial services to customers in the communities in which it operates. The Company originates substantially all of its consumer loans in its primary market areas. At June 30, 2019, \$2.8 billion, or 12%, of the total loan and lease portfolio was comprised of consumer loans, compared to \$3.0 billion, or 14%, at the end of 2018.

The majority of the consumer loan portfolio is comprised of home equity loans, which allow customers to borrow against the equity in their home and are secured by a first or second mortgage on the borrower's residence. Home equity loans were \$2.1 billion at June 30, 2019, a decrease of \$156.8 million from December 31, 2018. Unfunded commitments related to home equity loans and lines were \$1.1 billion at June 30, 2019, an increase of \$37.5 million, or 4%, from the end of 2018.

All other consumer loans, which consist of credit card loans, automobile loans and other personal loans, decreased \$41.5 million, or 6%, from December 31, 2018, primarily from decreases in other personal loans and indirect automobile loans, a product that is no longer offered.

Additional information on the Company's consumer loan portfolio is presented in the following tables. For the purposes of Table 8, unscorable consumer loans have been included with loans with credit scores below 660. Credit scores reflect the most recent information available as of the dates indicated.

TABLE 7—CONSUMER LOANS BY STATE OF ORIGINATION

(in thousands)	June 30, 2019	December 31, 2018	\$ Change	% Change

(in thousands)	June 30, 2019	December 31, 2018
Above 720	\$ 1,638,048	\$ 1,708,417
660-720	599,563	666,132
Below 660	599,477	660,788
Total consumer loans	\$ 2,837,088	\$ 3,035,337

Mortgage Loans Held for Sale

Mortgage loans held for sale totaled \$188.0 million at June 30, 2019, an increase of \$80.3 million, or 74%, from \$107.7 million at year-end 2018, as originations have outpaced sales activity during the first two quarters of 2019. The Company continues to sell the majority of conforming mortgage loan originations in the secondary market rather than assume the interest rate risk associated with these longer term assets. Upon the sale, the Company retains servicing on a limited portion of these loans. Loans held for sale have primarily been fixed-rate single-family residential mortgage loans under contracts to be sold in the secondary market. In most cases, loans in this category are sold within thirty days of closing. Buyers generally have recourse to return a purchased loan to the Company under limited circumstances.

See Note 1, Summary of Significant Accounting Policies, in the Annual Report on Form 10-K for the year ended December 31, 2018, for further discussion.

Investment Securities

Investment securities decreased \$342.8 million, or 7%, since December 31, 2018 to \$4.6 billion at June 30, 2019, primarily due to sales of available-for-sale securities, partially offset by favorable fair value adjustments. Approximately 96% of the Company's investment portfolio is in available-for-sale securities, which experience unrealized gains when interest rates fall. Investment securities approximated 15% and 16% of total assets at June 30, 2019 and December 31, 2018, respectively.

All of the Company's mortgage-backed securities were issued by government-sponsored enterprises at June 30, 2019 and December 31, 2018. The Company does not hold any Fannie Mae or Freddie Mac preferred stock, corporate equity, collateralized debt obligations, collateralized loan obligations, or structured investment vehicles, nor does it hold any private label collateralized mortgage obligations, subprime, Alt-A, sovereign debt, or second lien elements in its investment portfolio. At June 30, 2019 and December 31, 2018, the Company's investment portfolio did not contain any securities that are directly backed by subprime or Alt-A mortgages.

Funds generated as a result of sales and prepayments of investment securities are used to fund loan growth and purchase other securities. The Company continues to monitor market conditions and take advantage of market opportunities with appropriate risk and return elements.

Asset Quality

The lending activities of the Company are governed by underwriting policies established by management and approved by the Board Risk Committee of the Board of Directors. For additional information on loan underwriting, loan origination, monitoring of loan payment performance, loan review, and the determination of past due and non-accrual status, as well as the Company's policies for recording payments received, placing loans and leases on non-accrual status, and the resumption of interest accrual on non-accruing loans and leases, see Note 1, Summary of Significant Accounting Policies, and the "Asset Quality" section of MD&A in the Annual Report on Form 10-K for the year ended December 31, 2018.

For commercial loans and leases, the Company utilizes regulatory classification ratings to monitor credit quality. For further discussion of regulatory classification ratings, see Note 5, Allowance for Credit Losses, to the unaudited consolidated financial statements. For residential mortgage loans and consumer loans, the Company primarily uses the loan's payment and delinquency status to monitor credit quality. These credit quality indicators are continually updated and monitored.

Real estate acquired by the Company through foreclosure or by deed-in-lieu of foreclosure is classified as OREO, and is recorded at the lesser of the related loan balance (the pro-rata carrying value for acquired loans) or estimated fair value less costs to sell. Closed bank branches are also classified as OREO and recorded at the lower of cost or market value.

Under GAAP, certain loan modifications or restructurings are designated as TDRs. In general, the modification or restructuring of a debt constitutes a TDR if the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that the Company would not otherwise consider under current market conditions. See Note 1, Summary of Significant Accounting Policies, in the 2018 10-K for further details.

Non-performing Assets and Troubled Debt Restructurings

The Company defines non-performing assets as non-accrual loans, accruing loans more than 90 days past due, OREO, and foreclosed property. Management continuously monitors and transfers loans to non-accrual status when warranted.

The Company accounts for loans formerly covered by loss sharing agreements with the FDIC, other loans acquired with deteriorated credit quality, as well as all loans acquired with significant discounts that did not exhibit deteriorated credit quality at acquisition, in accordance with ASC Topic 310-30. Collectively, all loans accounted for under ASC 310-30 are referred to as "acquired impaired loans." Application of ASC Topic 310-30 results in significant accounting differences, compared to loans originated or acquired by the Company that are not accounted for under ASC 310-30. See Note 1, Summary of Significant Accounting Policies, in the 2018 10-K for further details.

Due to the significant difference in accounting for acquired impaired loans, the Company believes inclusion of these loans in certain asset quality ratios that reflect non-performing assets in the numerator or denominator (or both) results in significant distortion to these ratios, as the inclusion of these loans could result in a lack of comparability across quarters or years, and could impact comparability with other portfolios that were not impacted by acquired impaired loan accounting. The Company believes that the presentation of certain asset quality measures excluding acquired impaired loans, as indicated below, and related amounts from both the numerator and denominator provides better perspective into underlying trends related to the quality of its loan portfolio. Accordingly, the asset quality measures in the tables below present asset quality information excluding acquired impaired loans, as indicated within each table, and related amounts.

The following table sets forth the composition of the Company's non-performing assets and TDRs for the periods indicated.

TABLE 9—NON-PERFORMING ASSETS AND TROUBLED DEBT RESTRUCTURINGS

(in thousands)	June 30, 2019	December 31, 2018	\$ Change	% Change
Non-accrual loans and leases:				
Commercial	\$ 87,752	\$ 85,112	2,640	3
Mortgage	50,046	30,396	19,650	65
Consumer and other	21,194	21,676	(482)	(2)
Total non-accrual loans and leases	158,992	137,184	21,808	16
Accruing loans and leases 90 days or more past due	851	2,128	(1,277)	(60)
Total non-performing loans and leases ^{(2) (3)}	159,843	139,312	20,531	15
OREO and foreclosed property ⁽¹⁾	28,106	30,394	(2,288)	(8)
Total non-performing assets	187,949	169,706	18,243	11
Performing troubled debt restructurings	75,614	80,807	(5,193)	(6)
Total non-performing assets and performing troubled debt restructurings	\$ 263,563	\$ 250,513	13,050	5
Non-performing loans and leases to total loans and leases ⁽³⁾	0.68%	0.62%		
Non-performing assets to total assets	0.60%	0.55%		
Non-performing assets and performing troubled debt restructurings to total assets ⁽¹⁾	0.84%	0.81%		
Allowance for credit losses to non-performing loans and leases	101.14%	111.55%		
Allowance for credit losses to total loans and leases	0.69%	0.69%		

⁽¹⁾ OREO and foreclosed property at June 30, 2019 and December 31, 2018 include \$4.4 million and \$9.0 million, respectively, of former bank properties held for development or resale.

⁽²⁾ Total non-performing loans and leases for June 30, 2019 and December 31, 2018 include \$57.9 million and \$61.5 million, respectively, of non-performing troubled debt restructurings.

⁽³⁾ Non-performing loans exclude acquired impaired loans, even if contractually past due or if the Company does not expect to receive payment in full, as the Company is currently accreting interest income over the expected life of the loans.

Total non-performing assets increased \$18.2 million, or 11%, compared to December 31, 2018, as non-performing loans and leases increased \$20.5 million and OREO and foreclosed property decreased \$2.3 million. Non-performing loans and leases increased 15% primarily driven by an increase in non-accrual mortgage loans, as a small number of mortgage loans moved to non-accrual in 2019.

Non-performing loans and leases were 0.68% of the total portfolio at June 30, 2019, 6 basis points higher than at December 31, 2018. Total non-performing assets were 0.60% of total assets at June 30, 2019, 5 basis points higher than at December 31, 2018.

The Company's classified commercial loans totaled \$182.4 million, or 0.58% of assets and 1.14% of total commercial loans. At December 31, 2018, classified commercial loans totaled \$182.1 million, or 0.59% of assets and 1.20% of total commercial loans.

In addition to the problem loans described above, there were \$138.8 million of commercial loans classified as special mention at June 30, 2019, which in management's opinion were subject to potential future rating downgrades. Special mention loans have potential weaknesses that, if left uncorrected, may result in deterioration of the Company's credit position at some future date. Special mention loans decreased \$18.5 million, or 12%, from year end 2019, and were 0.87% of total commercial loans at June 30, 2019 and 1.04% at December 31, 2018.

Past Due and Non-accrual Loans

Past due status is based on the contractual terms of loans. Total past due and non-accrual loans were 0.87% of total loans and leases at June 30, 2019 compared to 0.87% at December 31, 2018. Additional information on past due loans and leases is presented in the following table.

TABLE 10—PAST DUE AND NON-ACCRUAL LOAN SEGREGATION ⁽¹⁾

(in thousands)	June 30, 2019		December 31, 2018		\$ Change	% Change
	Amount	% of Outstanding Balance	Amount	% of Outstanding Balance		
Accruing loans and leases						
30-59 days past due	\$ 27,981	0.12	\$ 38,579	0.17	(10,598)	(27)
60-89 days past due	15,040	0.07	18,753	0.08	(3,713)	(20)
90-119 days past due	851	0.00	2,128	0.01	(1,277)	(60)
120 days past due or more	—	—	—	—	—	—
	43,872	0.19	59,460	0.26	(15,588)	(26)
Non-accrual loans and leases	158,992	0.68	137,184	0.61	21,808	16
Total past due and non-accrual loans and leases	\$ 202,864	0.87	\$ 196,644	0.87	6,220	3

⁽¹⁾ Past due and non-accrual loan amounts exclude acquired impaired loans, even if contractually past due or if the Company does not expect to receive payment in full, as the Company is currently accreting interest income over the expected life of the loans.

Total past due and non-accrual loans and leases increased \$6.2 million from December 31, 2018 to \$202.9 million at June 30, 2019. The change was due to an increase of \$21.8 million in non-accrual loans, primarily from mortgage loans, largely offset by a \$15.6 million decrease in accruing past due loans. The decrease in accruing past due loans was primarily a result of payments on loans 30-59 days past due. Of the total accruing past due loans, 64% were past due less than 60 days compared to 65% at December 31, 2018, and 98% were past due less than 90 days compared to 96% at year-end 2018.

Allowance for Credit Losses

The allowance for credit losses represents management's best estimate of probable credit losses inherent at the balance sheet date. Determination of the allowance for credit losses involves a high degree of complexity and requires significant judgment. Several factors are taken into consideration in the determination of the overall allowance for credit losses. Based on facts and circumstances available, management of the Company believes that the allowance for credit losses was appropriate at June 30, 2019 to cover probable losses in the Company's loan portfolio. However, future adjustments to the allowance may be necessary, and the results of operations could be adversely affected, if circumstances differ substantially from the assumptions used by management in determining the allowance for credit losses. See "Application of Critical Accounting Policies and Estimates" included in MD&A and Note 1, Summary of Significant Accounting Policies, in the Annual Report on Form 10-K for the year ended December 31, 2018 for more information.

The following table sets forth the activity in the Company's allowance for credit losses for the six-month periods ended June 30, 2019 and 2018.

TABLE 11—SUMMARY OF ACTIVITY IN THE ALLOWANCE FOR CREDIT LOSSES

(in thousands)	June 30, 2019	June 30, 2018
Allowance for loan and lease losses at beginning of period	\$ 140,571	\$ 140,891
Provision for loan and lease losses	24,067	15,581
Transfer of balance to OREO and other	(2,863)	(3,943)
Charge-offs	(19,194)	(22,734)
Recoveries	3,805	6,781
Allowance for loan and lease losses at end of period	<u>146,386</u>	<u>136,576</u>
Reserve for unfunded commitments at beginning of period	14,830	13,208
Balance created in acquisition accounting	—	900
Provision for unfunded lending commitments	451	325
Reserve for unfunded lending commitments at end of period	<u>15,281</u>	<u>14,433</u>
Allowance for credit losses at end of period	<u>\$ 161,667</u>	<u>\$ 151,009</u>

The allowance for credit losses totaled \$161.7 million at June 30, 2019 compared to \$155.4 million at December 31, 2018. The allowance for credit losses was 0.69% of total loans and leases at both June 30, 2019 and December 31, 2018. The increase in the allowance for credit losses was primarily the result of organic loan growth during the current period.

Net charge-offs during the six months ended June 30, 2019 were \$15.4 million, a decrease of \$0.6 million from the comparable 2018 period. Net charge-offs were 0.14% of average loans and leases on an annualized basis for the six months ended June 30, 2019 compared to 0.15% for the comparable 2018 period. The provision for loan and lease losses covered 156% and 98% of net charge-offs for the first six months of 2019 and 2018, respectively.

At June 30, 2019 and December 31, 2018, the ALLL covered 92% and 101% of total non-performing loans and leases, respectively.

FUNDING SOURCES

Deposits, both those obtained from clients in its primary market areas and those acquired, are the Company's principal source of funds for use in lending and other business purposes. The Company attracts local deposit accounts by offering a wide variety of products, competitive interest rates and convenient branch office locations and service hours, as well as on-line banking services at www.iberiabank.com and www.virtualbank.com. Increasing core deposits is a continuing focus of the Company and has been accomplished through the development of client relationships and acquisitions. Short-term and long-term borrowings are also important funding sources for the Company. Other funding sources include subordinated debt and shareholders' equity. Refer to the "Liquidity and Other Off-Balance Sheet Activities" section below for further discussion of the Company's sources and uses of funding. The following discussion highlights the major changes in the mix of deposits and other funding sources during the first six months of 2019.

Deposits

Total deposits increased \$531.9 million, or 2%, to \$24.3 billion at June 30, 2019, from \$23.8 billion at December 31, 2018, primarily driven by a \$581.1 million increase in brokered and reciprocal deposits.

The following table sets forth the composition of the Company's deposits as of the dates indicated.

TABLE 12—DEPOSIT COMPOSITION BY PRODUCT

(in thousands)	June 30, 2019		December 31, 2018		\$ Change	% Change
	Ending Balance	Mix	Ending Balance	Mix		
Non-interest-bearing deposits	\$ 6,474,394	26%	\$ 6,542,490	28%	(68,096)	(1)
NOW accounts	4,610,577	19	4,514,113	19	96,464	2
Money market accounts	8,192,752	34	8,237,291	35	(44,539)	(1)
Savings accounts	702,711	3	828,914	3	(126,203)	(15)
Time deposits	4,314,897	18	3,640,623	15	674,274	19
Total deposits	\$ 24,295,331	100%	\$ 23,763,431	100%	531,900	2

Short-term Borrowings

The Company may obtain advances from the FHLB of Dallas based upon its ownership of FHLB stock and certain pledges of its real estate loans and investment securities, provided certain standards related to the Company's creditworthiness have been met. These advances are made pursuant to several credit programs, each of which has its own interest rate and range of maturities. The level of short-term borrowings can fluctuate significantly on a daily basis depending on funding needs and the source of funds chosen to satisfy those needs.

The Company also enters into repurchase agreements to facilitate customer transactions that are accounted for as secured borrowings. These transactions typically involve the receipt of deposits from customers that the Company collateralizes with its investment portfolio and had an average rate of 42.4 basis points as of June 30, 2019.

Total short-term borrowings decreased \$485.4 million, or 33%, from December 31, 2018, to \$1.0 billion at June 30, 2019, primarily due to net advance repayments on short-term FHLB advances. On a period-end basis, short-term borrowings were 4% of total liabilities and 42% of total borrowings at June 30, 2019 compared to 6% and 56%, respectively, at December 31, 2018.

On a quarter-to-date average basis, short-term borrowings decreased \$40.9 million, or 4%, from the second quarter of 2018. On a quarter-to-date average basis, short-term borrowings were 4% of total liabilities and 40% of total borrowings in the second quarter of 2019, compared to 4% and 43%, respectively, during the same period of 2018.

Long-term Debt

Long-term debt increased \$208.6 million, or 18%, from December 31, 2018, to \$1.4 billion at June 30, 2019, primarily due to additional long-term FHLB advances made in the first quarter of 2019. On a period-end basis, long-term debt was 5% and 4% of total liabilities at June 30, 2019 and December 31, 2018, respectively.

On a quarter-to-date average basis, long-term debt increased to \$1.5 billion in the second quarter of 2019, \$84.1 million, or 6%, higher than the second quarter of 2018, mainly due to higher levels of long-term FHLB advances held by the Company in the first half of 2019. Average long-term debt was 5% of average total liabilities during the second quarter of both 2019 and 2018.

Long-term debt at June 30, 2019 included \$1.2 billion in fixed-rate advances from the FHLB of Dallas that cannot be prepaid without incurring substantial penalties. The remaining debt consisted of \$120.1 million of the Company's junior subordinated debt and \$60.0 million in notes payable on investments in new market tax credit entities.

CAPITAL RESOURCES

Shareholders' Equity

Shareholders' equity increased \$181.7 million, or 4%, during the first half of 2019. Shareholders' equity at June 30, 2019 includes undistributed income to common shareholders of \$151.0 million during the period. In addition, during the second quarter of 2019, the Company issued and sold an aggregate of 4,000,000 depository shares, each representing a 1/400th ownership interest in a share of the Company's 6.100% Fixed-to-Floating Non-Cumulative Perpetual Preferred Stock, Series D, par value \$1.00 per share, for \$96.4 million in net proceeds. See Note 9, Shareholders' Equity, Capital Ratios, and Other Regulatory Matters, to the unaudited consolidated financial statements for more information. Shareholders' equity also increased during the period from an increase in accumulated other comprehensive income of \$89.8 million, primarily resulting from unrealized gains on the Company's available-for-sale securities portfolio.

In 2018, the Company's Board of Directors authorized a share repurchase program of up to 2,765,000 shares of IBERIABANK Corporation common stock. During the first six months of 2019, the Company repurchased 2,147,770 common shares for \$164.7 million at a weighted average cost of \$76.70 per share. At June 30, 2019, the remaining common shares that could be repurchased under the current Board-approved plan was 117,230 shares. Subsequent to June 30, 2019, the Company repurchased the remaining shares available and announced in July 2019 a new Board-approved share repurchase program for up to 1,600,000 shares, or approximately 3% of total common shares outstanding at June 30, 2019.

The Company's quarterly dividend to common shareholders was \$0.43 per common share in the second quarter of 2019 compared to \$0.38 in the second quarter of 2018. For the six months ended June 30, 2019, the Company's dividend of \$0.86 per common share was an increase of \$0.10 compared to \$0.76 for the comparable six-month period of 2018, which equated to a dividend payout ratio of 23.4% for the current year, down from 32.0% in 2018.

Regulatory Capital

Federal regulations impose minimum regulatory capital requirements on all institutions with deposits insured by the FDIC. The FRB imposes similar capital regulations on bank holding companies. Compliance with bank and bank holding company regulatory capital requirements, which include leverage and risk-based capital guidelines, are monitored by the Company on an ongoing basis. Under the risk-based capital method, a risk weight is assigned to balance sheet and off-balance sheet items based on regulatory guidelines.

At June 30, 2019 and December 31, 2018, the Company exceeded all required regulatory capital ratios, and the regulatory capital ratios of IBERIABANK were in excess of the levels established for "well-capitalized" institutions, as shown in the following table.

TABLE 13—REGULATORY CAPITAL RATIOS

Ratio	Entity	Well- Capitalized Minimums	June 30, 2019	December 31, 2018
			Actual	Actual
Tier 1 Leverage	IBERIABANK Corporation	N/A	9.71%	9.63%
	IBERIABANK	5.00%	9.55	9.38
Common Equity Tier 1 (CET1)	IBERIABANK Corporation	N/A	10.38	10.72
	IBERIABANK	6.50%	11.07	10.95
Tier 1 Risk-Based Capital	IBERIABANK Corporation	N/A	11.26	11.25
	IBERIABANK	8.00%	11.07	10.95
Total Risk-Based Capital	IBERIABANK Corporation	N/A	12.33	12.33
	IBERIABANK	10.00%	11.70	11.58

Minimum capital ratios are subject to a capital conservation buffer. In order to avoid limitations on distributions, including dividend payments, and certain discretionary bonus payments to executive officers, an institution must hold a capital conservation buffer above its minimum risk-based capital requirements. This capital conservation buffer is calculated as the lowest of the differences between the actual CET1 ratio, Tier 1 Risk-Based Capital Ratio, and Total Risk-Based Capital ratio and the corresponding minimum ratios. At June 30, 2019, the required minimum capital conservation buffer was 2.50%. At June 30, 2019, the capital conservation buffers of the Company and IBERIABANK were 4.33% and 3.70%, respectively.

LIQUIDITY AND OTHER OFF-BALANCE SHEET ACTIVITIES

Liquidity refers to the Company's ability to generate sufficient cash flows to support its operations and to meet its obligations, including the withdrawal of deposits by customers, commitments to originate loans, and its ability to repay its borrowings and other liabilities. Liquidity risk is the risk to earnings or capital resulting from the Company's inability to fulfill its obligations as they become due. Liquidity risk also develops from the Company's failure to timely recognize or address changes in market conditions that affect the ability to liquidate assets in a timely manner or to obtain adequate funding to continue to operate on a profitable basis.

The primary sources of funds for the Company are deposits and borrowings. Other sources of funds include repayments and maturities of loans and investment securities, securities sold under agreements to repurchase, and, to a lesser extent, off-balance sheet borrowing availability. Time deposits scheduled to mature in one year or less at June 30, 2019 totaled \$3.6 billion. Based on past experience, management believes that a significant portion of maturing deposits will remain with the Company. Additionally, the majority of the investment securities portfolio is classified as available for sale, which provides the ability to liquidate unencumbered securities as needed. Of the \$4.6 billion in the investment securities portfolio, \$2.4 billion is unencumbered and \$2.2 billion has been pledged to support repurchase transactions, public funds deposits and certain long-term borrowings. Due to the relatively short implied duration of the investment securities portfolio, the Company has historically experienced consistent cash inflows on a regular basis. Securities cash flows are highly dependent on prepayment speeds and could change materially as economic or market conditions change.

Scheduled cash flows from the amortization and maturities of loans and securities are relatively predictable sources of funds. Conversely, deposit flows, prepayments of loan and investment securities, and draws on customer letters and lines of credit are greatly influenced by general interest rates, economic conditions, competition, and customer demand. The FHLB of Dallas provides an additional source of liquidity to make funds available for general requirements and also to assist with the variability of less predictable funding sources. At June 30, 2019, the Company had \$2.0 billion of outstanding FHLB advances, \$813.0 million of which was short-term and \$1.2 billion that was long-term. Additional FHLB borrowing capacity available at June 30, 2019 amounted to \$7.5 billion. At June 30, 2019, the Company also had various funding arrangements with the Federal Reserve discount window and commercial banks providing up to \$334.1 million in the form of federal funds and other lines of credit. At June 30, 2019, there were no balances outstanding on these lines and all of the funding was available to the Company.

Liquidity management is both a daily and long-term function of business management. The Company manages its liquidity with the objective of maintaining sufficient funds to respond to the predicted needs of depositors and borrowers and to take advantage of investments in earning assets and other earnings enhancement opportunities. Excess liquidity is generally invested in short-term investments such as overnight deposits. On a longer-term basis, the Company maintains a strategy of investing in various lending and investment security products. The Company uses its sources of funds primarily to fund loan commitments and meet its ongoing commitments associated with its operations. Based on its available cash at June 30, 2019 and current deposit modeling, the Company believes it has adequate liquidity to fund ongoing operations. The Company has adequate availability of funds from deposits, borrowings, repayments and maturities of loans and investment securities to provide the Company additional working capital if needed.

In the normal course of business, the Company is a party to a number of activities that contain credit, market and operational risk that are not reflected in whole or in part in the Company's consolidated financial statements. Such activities include traditional off-balance sheet credit-related financial instruments. The Company provides customers with off-balance sheet credit support through loan commitments, lines of credit, and standby letters of credit. Many of the commitments are expected to expire unused or be only partially used; therefore, the total amount of commitments does not necessarily represent future cash requirements. Based on its available liquidity and available borrowing capacity, the Company anticipates it will continue to have sufficient funds to meet its current commitments.

ASSET/LIABILITY MANAGEMENT, MARKET RISK AND COUNTERPARTY CREDIT RISK

The principal objective of the Company's asset and liability management function is to evaluate the Company's interest rate risk included in certain balance sheet accounts, determine the appropriate level of risk given the Company's business focus, operating environment, capital and liquidity requirements, and performance objectives, establish prudent asset concentration guidelines and manage the risk consistent with Board approved guidelines. Through such management, the Company seeks to reduce the vulnerability of its operations to changes in interest rates. The Company's actions in this regard are taken under the guidance of the Asset and Liability Committee. The Asset and Liability Committee reviews, among other things, the sensitivity of the Company's assets and liabilities to interest rate changes, local and national market conditions, and interest rates. In connection therewith, the Asset and Liability Committee generally reviews the Company's liquidity, cash flow needs, composition of investments, deposits, borrowings, and capital position.

The objective of interest rate risk management is to control the effects that interest rate fluctuations have on net interest income and on the net present value of the Company's earning assets and interest-bearing liabilities. Management and the Board are responsible for managing interest rate risk and employing risk management policies that monitor and limit this exposure. Interest rate risk is measured using net interest income simulation and asset/liability net present value sensitivity analyses. The Company uses financial modeling to measure the impact of changes in interest rates on the net interest margin and to predict market risk. Estimates are based upon numerous assumptions including the nature and timing of interest rate levels including yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment/replacement of asset and liability cash flows, and others. These analyses provide a range of potential impacts on net interest income and portfolio equity caused by interest rate movements.

Included in the modeling are instantaneous parallel rate shift scenarios, which are utilized to establish exposure limits. These scenarios are known as "rate shocks" because all rates are modeled to change instantaneously by the indicated shock amount, rather than a gradual rate shift over a period of time.

The Company's interest rate risk model indicates that the Company is asset sensitive in terms of interest rate sensitivity. Based on the Company's interest rate risk model at June 30, 2019, the table below illustrates the impact of an immediate and sustained 100 and 200 basis points parallel increase or decrease in interest rates on net interest income over the next twelve months.

TABLE 14—INTEREST RATE SENSITIVITY

Shift in Interest Rates (in bps)	% Change in Projected Net Interest Income
+200	+3.4%
+100	+2.3%
-100	-5.4%
-200	-12.2%

The influence of using the forward curve as of June 30, 2019 as a basis for projecting the interest rate environment would approximate a 0.9% decrease in net interest income over the next 12 months. The computations of interest rate risk shown above are performed on a static balance sheet and do not necessarily include certain actions that management may undertake to manage this risk in response to unanticipated changes in interest rates and other factors to include shifts in deposit behavior.

The short-term interest rate environment is primarily a function of the monetary policy of the FRB. The principal tools of the FRB for implementing monetary policy are open market operations, or the purchases and sales of U.S. Treasury and Federal agency securities, as well as the establishment of a short-term target rate. The FRB's objective for open market operations has varied over the years, but the focus has gradually shifted toward attaining a specified level of the Federal funds rate to achieve the long-run goals of price stability and sustainable economic growth. The Federal funds rate is the basis for overnight funding and drives the short end of the yield curve. Longer maturities are influenced by the market's expectations for economic growth and inflation, but can also be influenced by FRB purchases and sales and expectations of monetary policy going forward.

The FOMC of the FRB, in an attempt to stimulate the overall economy, has, among other things, kept interest rates low through its targeted federal funds rate. In December 2016, the FOMC voted to raise the target federal funds rate for only the second time since 2006. The FOMC voted to raise the target federal funds rate multiple times in both 2017 and 2018. The FOMC has now raised rates by two-and-a-quarter percentage points since the financial crisis in 2008, a sign of its increased confidence in the health of the economy. While the FOMC continues to observe sustained economic activity, strong labor market conditions, and stable inflation, it has signaled a pause in its recent efforts to increase the federal funds rate. As a result, the potential for additional gradual increases in the federal funds rate in 2019 is uncertain, and recent FOMC rhetoric has pointed to lowering the federal funds rate given low inflation measures and overall global economic headwinds. Additional increases in the federal funds rate and the unwinding of its balance sheet could cause overall interest rates to rise, which may negatively impact the U.S. real estate markets and affect deposit growth and pricing. In addition, deflationary pressures, while possibly lowering our operating costs, could have a significant negative effect on our borrowers, especially our business borrowers, and the values of collateral securing loans, which could negatively affect our financial performance. Decreases in the federal funds rate could cause overall interest rates to fall, which may negatively impact financial performance from greater borrower refinancing incentives.

The Company's commercial loan portfolio is also impacted by fluctuations in the level of one-month LIBOR, as a large portion of this portfolio reprices based on this index, and to a lesser extent Prime. Net interest income may be reduced if more interest-bearing liabilities than interest-earning assets reprice or mature during a period when interest rates are rising, or if more interest-earning assets than interest-bearing liabilities reprice or mature during a period when interest rates are declining.

In July 2017, the Financial Conduct Authority (the authority that regulates LIBOR) announced it intends to stop compelling banks to submit rates for the calculation of LIBOR after 2021. ARRC has proposed that SOFR is the rate that represents best practice as the alternative to LIBOR for use in derivatives and other financial contracts that are currently indexed to LIBOR. ARRC has proposed a paced market transition plan to SOFR from LIBOR and organizations are currently working on industry-wide and company-specific transition plans as it relates to derivatives and cash markets exposed to LIBOR. The Company has material contracts that are indexed to LIBOR and is monitoring this activity and evaluating the related risks.

The table below presents the Company's anticipated repricing of loans and investment securities over the next four quarters.

TABLE 15—REPRICING OF CERTAIN EARNING ASSETS ⁽¹⁾

(in thousands)	3Q 2019	4Q 2019	1Q 2020	2Q 2020	Total less than one year
Investment securities	\$ 433,879	\$ 300,857	\$ 269,431	\$ 279,333	\$ 1,283,500
Fixed rate loans	981,459	696,787	662,529	635,315	2,976,090
Variable rate loans	11,170,297	483,461	368,408	345,343	12,367,509
Total fixed and variable rate loans	12,151,756	1,180,248	1,030,937	980,658	15,343,599
	\$ 12,585,635	\$ 1,481,105	\$ 1,300,368	\$ 1,259,991	\$ 16,627,099

⁽¹⁾ Amounts include expected maturities, scheduled paydowns, expected prepayments, and loans subject to caps and floors and exclude the repricing of assets from prior periods, as well as non-accrual loans and market value adjustments.

As part of its asset/liability management strategy, the Company has seen greater levels of loan originations with adjustable or variable rates of interest in commercial and consumer loan products, which typically have shorter terms than residential mortgage loans. The majority of fixed-rate, long-term, agency-conforming residential loans are sold in the secondary market to avoid bearing the interest rate risk associated with longer duration assets in the current rate environment. However, the Sabadell and Gibraltar acquisitions brought a considerable amount of jumbo, non-agency-conforming residential mortgage loan exposure onto the balance sheet, both fixed rate and variable rate in nature, which increased the overall duration of the portfolio. Considering all of this, as of June 30, 2019, \$14.6 billion, or 63%, of the Company's total loan portfolio had variable interest rates, of which \$2.7 billion, or 12%, had an expected repricing date beyond the next four quarters. The Company had no significant concentration to any single borrower or industry segment at June 30, 2019.

The Company's strategy with respect to liabilities in recent periods has been to emphasize transaction accounts, particularly non-interest or low interest-bearing transaction accounts, which are significantly less sensitive to changes in interest rates. At June 30, 2019, 82% of the Company's deposits were in transaction and limited-transaction accounts, compared to 85% at December 31, 2018. Non-interest-bearing transaction accounts were 27% of total deposits at June 30, 2019 compared to 28% at December 31, 2018.

The behavior of non-interest-bearing deposits and other types of demand deposits is one of the most important assumptions used in determining the interest rate and liquidity risk positions. A loss of these deposits in the future would reduce the asset sensitivity of the Company's balance sheet as interest-bearing funds would most likely be increased to offset the loss of this favorable funding source.

The table below presents the Company's anticipated repricing of liabilities over the next four quarters.

TABLE 16—REPRICING OF LIABILITIES ⁽¹⁾

(in thousands)	3Q 2019	4Q 2019	1Q 2020	2Q 2020	Total less than one year
Time deposits	\$ 811,131	\$ 951,196	\$ 1,026,345	\$ 815,474	\$ 3,604,146
Short-term borrowings	872,507	125,000	—	—	997,507
Long-term debt	437,391	63,958	55,620	120,391	677,360
	<u>\$ 2,121,029</u>	<u>\$ 1,140,154</u>	<u>\$ 1,081,965</u>	<u>\$ 935,865</u>	<u>\$ 5,279,013</u>

⁽¹⁾ Amounts exclude the repricing of liabilities from prior periods.

As part of an overall interest rate risk management strategy, derivative instruments may also be used as an efficient way to modify the repricing or maturity characteristics of on-balance sheet assets and liabilities. Management may from time to time engage in such derivative instruments to effectively manage interest rate risk. These derivative instruments of the Company would modify net interest sensitivity to levels deemed appropriate.

IMPACT OF INFLATION OR DEFLATION AND CHANGING PRICES

The unaudited consolidated financial statements and related financial data presented herein have been prepared in accordance with GAAP, which generally require the measurement of financial position and operating results in terms of historical dollars, without considering changes in relative purchasing power over time due to inflation. Unlike most industrial companies, the majority of the Company's assets and liabilities are monetary in nature. As a result, interest rates generally have a more significant impact on the Company's performance than does the effect of inflation. Although fluctuations in interest rates are neither completely predictable nor controllable, the Company regularly monitors its interest rate position and oversees its financial risk management by establishing policies and operating limits. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services, since such prices are affected by inflation to a larger extent than interest rates. Although not as critical to the banking industry as to other industries, inflationary factors may have some impact on the Company's growth, earnings, total assets and capital levels. Management does not expect inflation to be a significant factor in 2019.

Conversely, a period of deflation could affect our business, as well as all financial institutions and other industries. Deflation could lead to lower profits, higher unemployment, lower production and deterioration in overall economic conditions. In addition, deflation could depress economic activity, including loan demand and the ability of borrowers to repay loans, and consequently impair earnings through increasing the value of debt while decreasing the value of collateral for loans.

Management believes the most significant potential impact of deflation on financial results relates to the Company's ability to maintain a sufficient amount of capital to cushion against future losses. However, the Company could employ certain risk management tools to maintain its balance sheet strength in the event a deflationary scenario were to develop.

Non-GAAP Measures

This discussion and analysis contains financial information determined by methods other than in accordance with GAAP. The Company's management uses these non-GAAP financial measures in their analysis of the Company's performance. Non-GAAP measures include, but are not limited to, descriptions such as core, tangible, and pre-tax pre-provision. These measures typically adjust GAAP performance measures to exclude the effects of the amortization of intangibles and include the tax benefit associated with revenue items that are tax-exempt, as well as adjust income available to common shareholders for certain significant activities or transactions that, in management's opinion, can distort period-to-period comparisons of the Company's performance. Transactions that are typically excluded from non-GAAP performance measures include realized and unrealized gains/losses on former bank owned real estate, realized gains/losses on securities, income tax gains/losses, merger related charges and recoveries, litigation charges and recoveries, and debt repayment penalties. Management believes presentations of these non-GAAP financial measures provide useful supplemental information that is essential to a proper understanding of the operating results of the Company's core businesses. These non-GAAP disclosures should not be viewed as a substitute for operating results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Reconciliations of GAAP to non-GAAP disclosures are presented in Table 17, with the exception of forward-looking information. The Company is unable to estimate GAAP EPS guidance without unreasonable efforts due to the nature of one-time or unusual items that cannot be predicted, and therefore has not provided this information under Regulation S-K Item 10(e)(1)(i)(B).

TABLE 17—RECONCILIATIONS OF NON-GAAP FINANCIAL MEASURES

(in thousands, except per share amounts)	Three Months Ended					
	June 30, 2019			June 30, 2018

SEC	Securities and Exchange Commission
SIFMA	Securities Industry and Financial Markets Association
SOFR	Secured Overnight Financing Rate
SolomonParks	SolomonParks Title & Escrow, LLC
TE	Fully taxable equivalent
Tax Act	Tax Cuts and Jobs Act
TDR	Troubled debt restructuring
U.S.	United States of America

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and qualitative disclosures about market risk are presented at December 31, 2018 in Part II, Item 7A of the 2018 10-K, filed with the Securities and Exchange Commission on February 22, 2019. Additional information at June 30, 2019 is included herein under Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”.

Item 4. Controls and Procedures

An evaluation of the effectiveness of the Company’s disclosure controls and procedures as of June 30, 2019 was carried out under the supervision, and with the participation of, the Chief Executive Officer (CEO) and Chief Financial Officer (CFO). Based on that evaluation, the CEO and CFO have concluded that the Company’s disclosure controls and procedures are effective in alerting them in a timely manner to material information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 (the “Exchange Act”).

Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed by the Company under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to the Company’s management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosures. Disclosure controls include review of internal controls that are designed to provide reasonable assurance that transactions are properly authorized, assets are safeguarded against unauthorized or improper use and transactions are properly recorded and reported. There was no significant change in the Company’s internal controls over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the internal control over financial reporting.

Any control system, no matter how well conceived and operated, can provide only reasonable assurance that its objectives are achieved. The design of a control system inherently has limitations, including the controls’ cost relative to their benefits. Additionally, controls can be circumvented. No cost-effective control system can provide absolute assurance that all control issues and instances of fraud, if any, will be detected.

Part II. Other Information

Item 1. Legal Proceedings

See the "Legal Proceedings" section of "Note 15 – Commitments and Contingencies" of the Notes to the Unaudited Consolidated Financial Statements, incorporated herein by reference.

Item 1A. Risk Factors

For information regarding risk factors that could affect the Company's results of operations, financial condition and liquidity, see the risk factors disclosed in the "Risk Factors" section of the Company's 2018 10-K, filed with the Securities and Exchange Commission on February 22, 2019.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Information concerning IBERIABANK Corporation's repurchases of its outstanding common stock during the three-month period ended June 30, 2019, is included in the following table:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽¹⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1-30, 2019	130,749	79.83	130,000	1,747,079
May 1-31, 2019	923,480	77.80	923,200	823,879
June 1-30, 2019	706,842	74.39	706,649	117,230
Total	1,761,071	76.58	1,759,849	117,230

⁽¹⁾ Includes shares of the Company's common stock acquired by the Company in connection with satisfaction of tax withholding obligations on vested restricted stock.

During the second quarter of 2019, the Company repurchased 1,759,849 common shares, at a weighted average price of \$76.59 per common share. At June 30, 2019, the Company had approximately 117,230 remaining shares to be repurchased under the Board-approved plan. Additionally, the Company repurchased 1,222 at \$73.69 per common share with satisfaction of tax withholding obligations on vested restricted stock.

The Company's recently completed share repurchase program was announced on November 5, 2018 and completed on July 12, 2019. During that time, the Company purchased 2,765,000 shares of its common stock at a weighted average price of \$75.52 per share.

On July 17, 2019, the Board of Directors authorized a new repurchase plan of up to 1,600,000 shares of the Company's common stock. This repurchase authorization equated to approximately 3% of total common shares outstanding. Stock repurchases under this program will be made from time to time, on the open market or in privately negotiated transactions at the discretion of the management of the Company. The timing of these repurchases will depend on market conditions and other requirements. The Company currently anticipates the share repurchase program will extend over a two-year period, or earlier if the shares have been repurchased.

Subsequent to quarter-end and through August 6, 2019, the Company repurchased 307,230 common shares for approximately \$23.0 million.

Restrictions on Dividends and Repurchase of Stock

Holders of the Company's common stock are only entitled to receive dividends if, as, and when the Company's Board of Directors may declare out of funds legally available for such payments.

IBERIABANK Corporation understands the importance of returning capital to shareholders. Management will continue to execute the capital planning process, including evaluation of the amount of the common stock dividend, with the Board of Directors and in conjunction with the regulators, subject to the Company's results of operations. Also, IBERIABANK Corporation is a bank holding company, and its ability to declare and pay dividends is dependent on certain federal regulatory considerations, including the guidelines of the Federal Reserve regarding capital adequacy and dividends.

On April 4, 2019, the Company issued and sold an aggregate of 4,000,000 depositary shares (the "Series D Depositary Shares"), each representing a 1/400th ownership interest in a share of the Company's 6.100% Fixed-to-Floating Non-Cumulative Perpetual Preferred Stock, Series D, par value \$1.00 per share, ("Series D Preferred Stock"), with a liquidation preference of \$10,000 per share of Series D Preferred Stock (equivalent to \$25 per depositary share), which represents \$100 million in aggregate liquidation preference.

Dividends will accrue and be payable on the Series D Preferred Stock, if declared by the Company's Board of Directors, and will be paid semi-annually on May 1 and November 1, in arrears, at an annual rate equal to (i) 6.100% for each period from the issuance date to May 1, 2024 and (ii) three-month LIBOR plus 3.859% for each period on or after August 1, 2024. The Company may redeem the Series D Preferred Stock at its option, subject to regulatory approval, as described in the Company's Registration Statement on Form 8-A, filed with the Securities and Exchange Commission on April 4, 2019.

Holders of the common stock are subject to the prior dividend rights of any holders of the Company's preferred stock then outstanding. There were 23,750 shares of preferred stock outstanding at June 30, 2019. In addition, the terms of the Company's outstanding junior subordinated debt securities prohibit it from declaring or paying any dividends or distributions on outstanding capital stock, or purchasing, acquiring, or making a liquidation payment on such stock, if the Company has elected to defer interest payments on such debt.

For additional information, see Note 9, Shareholders' Equity, Capital Ratios and Other Regulatory Matters.

Item 3. Defaults Upon Senior Securities

Not Applicable.

Item 4. Mine Safety Disclosures

Not Applicable.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibit No. 31.1	<u>Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.</u>

CERTIFICATIONS

SECTION 302 CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER

I, Daryl G. Byrd, President and Chief Executive Officer of IBERIABANK Corporation, certify that:

1. I have reviewed this quarterly report on Form 10-Q of IBERIABANK Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of the annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
