Curtiss-Wright Announces Successful Completion Of $200 Million Debt Offering

ROSELAND, N.J., Sept. 25 /PRNewswire-FirstCall/ -- Curtiss-Wright Corporation (NYSE: CW; CW.B), a diversified global provider of highly engineered products and services to the motion control, flow control and metal treatment industries, announced today the successful completion of an offering of $200 million of senior notes (the "Notes"), consisting of $125 million 5.74% senior notes due 2013 and $75 million 5.13% senior notes due 2010, in an offering exempt from the registration requirements of the Securities Act of 1933.

Curtiss-Wright intends to use the net proceeds of the offering to reduce outstanding indebtedness under the Company’s revolving credit facilities, to fund its ongoing strategic growth plan and for other general corporate purposes. The fixed interest cost of the Notes is greater than the current variable rate revolving credit facilities, and thus will initially result in higher interest expense, which will negatively impact earnings. However, by locking in long-term fixed interest rates that are at historical lows, the Company expects to reduce its exposure to variable short-term rates which may rise significantly over time. This offering is in line with the Company’s belief that the potential risk of increased interest rates far exceeds the potential for further interest rate declines.

The Notes were offered and sold to institutional accredited investors in a private placement that qualified for exemption from registration under the Securities Act of 1933, as amended (the "Securities Act"). The Notes will not be registered for resale under the Securities Act and may not be offered or sold absent such registration or an applicable exemption from the registration requirements of the Securities Act and applicable state securities laws.

Martin R. Benante, Chairman and CEO of Curtiss-Wright, stated "We are very pleased with the tremendous response we received for this Note offering and our opportunity to take advantage of interest rates that are at the lowest level in forty years. Due to exceptionally strong demand for Curtiss-Wright's offering it was increased to $200 million from $150 million originally sought. This offering expanded our Company's access to alternative capital markets and significantly increased our overall debt capacity, allowing us to continue to pursue our corporate growth strategies. Although the Notes will result in higher interest cost in the short term, we believe that this issuance will benefit our stockholders over the long term and more closely align our capital structure with our overall corporate strategy."

This press release does not constitute an offer to sell or the solicitation of an offer to buy the Notes, nor shall there be any sale of the Notes in any state in which any such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such state, and is issued pursuant to Rule 135c under the Securities Act.

About Curtiss-Wright

About the Centennial Celebration of Flight

On December 17, 1903, amid the sand dunes of Kitty Hawk, North Carolina, man's quest for powered flight became a reality when a small fabric and wood craft know as the Wright Flyer ushered in the aviation age. The team behind this legendary event, Orville and Wilbur Wright, along with aircraft designer Glenn Curtiss, gave birth to a new industry and founded Curtiss-Wright Corporation, today a multinational provider of metal treatment, motion control and flow control systems for the aerospace and defense industries.
