CURTISS-WRIGHT ACQUIRES NU-TORQUE
Provides Opportunity to Expand in Domestic and International Defense Markets

ROSELAND, N.J. – January 19, 2009 – Curtiss-Wright Corporation (NYSE: CW) announced today that it has acquired substantially all of the assets of Nu-Torque, a designer and manufacturer of electric and hydraulic valve actuation and control devices primarily for U.S. Navy ships. The business will become part of Curtiss-Wright's Flow Control segment.

"The acquisition of Nu-Torque is a significant addition to our existing portfolio of highly engineered valves, controls and actuators," said Curtiss-Wright Chairman and CEO Martin R. Benante. "Nu-Torque also provides the opportunity to expand our presence in the U.S. Navy market, strengthens our system integration capability and enhances the expansion into international niche markets."

Nu-Torque was founded in 1980 and acquired in 2002 by Tyco Flow Control, a unit of Tyco International Ltd. With annual sales of approximately $8 million, typical applications for the Nu-Torque products are for valve automation of shipboard fluid systems, such as fire main, ballast and various safety systems on numerous categories of Navy combatant ships. Nu-Torque is located in Redmond, WA and has 37 employees.

About Curtiss-Wright

This press release contains forward-looking statements made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995 that are based on management's beliefs and assumptions. Such statements, including statements relating to Curtiss-Wright Corporation's expectations for the future performance of Nu-Torque, the future opportunities associated with the acquisition, and the success of the Company integrating Nu-Torque into its Valve Systems segment of its Flow Control group, are not considered historical facts and are considered forward-looking statements under the federal securities laws. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Such risks and uncertainties include, but are not limited to: a reduction in anticipated orders; an economic downturn; changes in competitive marketplace and/or customer requirements; a change in US and Foreign government spending; an inability to perform customer contracts at anticipated cost levels; and other factors that generally affect the business of aerospace, defense contracting, marine, electronics and industrial companies. Please refer to the Company's current SEC filings under the Securities Exchange Act of 1934, as amended, for further information.
