KNOXVILLE, TN – April 25, 2022 - SmartFinancial, Inc. ("SmartFinancial" or the "Company"; NASDAQ: SMBK), today announced net income of \$8.3 million, or \$0.49 per diluted common share, for the first quarter of 2022, compared to net income of \$9.8 million, or \$0.65 per diluted common share, for the first quarter of 2021, and compared to prior quarter net income of \$6.7 million, or \$0.40 per diluted common share. Operating earnings¹, which excludes securities gains, merger related and restructuring expenses and non-operating items, totaled \$8.6 million, or \$0.51 per diluted common share, in the first quarter of 2022, compared to \$9.8 million, or \$0.65 per diluted common share, in the first quarter of 2021, and compared to \$8.7 million, or \$0.52 per diluted common share, in the fourth quarter of 2021.

Billy Carroll, President & CEO, stated: "I am extremely pleased with our results for the first quarter. Both loans and deposits grew at an outstanding pace, as our sales team executed our organic growth strategy. Our wealth platform, insurance platform and equipment finance group all also had strong performance. Earnings performance was on target and while keeping an eye on inflationary pressure in our economy, we remain bullish on the company's 2022 outlook."

SmartFinancial's Chairman, Miller Welborn, concluded: "2022 has certainly started on a good note for us. Just as we projected and forecasted our plan is on track. The execution at all levels shows our commitment and discipline to be a top performing bank".

Net Interest Income and Net Interest Margin

Net interest income was \$30.1 million for the first quarter of 2022, compared to \$29.9 million for the prior quarter. Average earning assets totaled \$4.22 billion, an increase of \$139.1 million. The growth in average earnings assets was primarily driven by an increase in average securities of \$276.1 million and average loans and leases of \$54.3 million, offset by a decrease in average interest-earning cash of \$190.1 million, primarily from the purchase of securities. Average interest-bearing liabilities increased \$121.8 million, related to continued core deposit growth.

The tax equivalent net interest margin was 2.91% for the first quarter of 2022, compared to 2.92% for the prior quarter. The tax equivalent net interest margin was positively impacted by several factors, mainly the continued deployment of excess cash and cash equivalents into loans and securities. However, the deployment of total cash and cash equivalents was partially offset by a quarter-over-quarter deposit increase of over \$169.4 million. Additionally, the yield on interest-earning assets was negatively impacted due to a decrease quarter-over-quarter in loan discount and Payroll Protection Program ("PPP") fee accretion of \$727 thousand.

The yield on interest-bearing liabilities decreased to 0.36% for the first quarter of 2022 compared to 0.39% for the prior quarter. The cost of average interest-bearing deposits was 0.27% for the first quarter of 2022 compared to 0.29% for the prior quarter, a decrease of 2 basis points. The lower cost of average deposits was attributable to the growth of non-time deposits and the continued maturation and repricing of time deposits. The cost of total deposits for the first quarter of 2022 was 0.20% compared to 0.22% in the prior quarter.

Non-GAAP Financial Measures

Statements included in this earnings release include measures not recognized under U.S. generally accepted accounting principles ("GAAP") and therefore are considered non-GAAP financial measures and should be read along with the accompanying tables, which provide a reconciliation of Non-GAAP financial measures to GAAP financial measures. SmartFinancial management uses several Non-GAAP financial measures, including: (i) operating earnings, (ii) operating return on average assets, (iii) operating pre-tax preprovision return on average assets, (iv) operating return on average shareholders' equity, (v) return on average tangible common equity, (vi) operating return on average tangible common equity, (vii) operating efficiency ratio, (viii) operating noninterest income, (ix) operating pre-tax pre-provision earnings (x) operating noninterest expense, (xi) tangible common equity, (xii) average tangible common equity, (xiii) tangible book value; (xiv) tangible assets; and ratios derived therefrom, in its analysis of the company's performance. Operating return on average shareholders' equity is the annualized operating earnings (Non-GAAP) divided by average equity. Return on average tangible common equity is the annualized net income divided by average tangible common equity (Non-GAAP). Management believes that Non-GAAP financial measures provide additional useful information that allows investors to evaluate the ongoing performance of the company and provide meaningful comparisons to its peers. Management believes these Non-GAAP financial measures also enhance investors' ability to compare period-to-period financial results and allow investors and company management to view our operating results excluding the impact of items that are not reflective of the underlying operating performance. Non-GAAP financial measures should not be considered as an alternative to any measure of performance or financial condition as promulgated under GAAP, and investors should consider SmartFinancial's performance and financial condition as reported under GAAP and all other relevant information when assessing the performance or financial condition of the company. Non-GAAP financial measures have limitations as analytical tools, and investors should not consider them in isolation or as a substitute for analysis of the results or financial condition as reported under GAAP.
