NET INVESTMENT INCOME

(\$ in millions, after-tax)

Third Quarter 2026 vs. Prior Year Quarter Commentary

- Net investment income (NII) from the long-term fixed income portfolio increased due to a higher average yield and growth in average invested assets
- NII from the short-term fixed income portfolio decreased due to a lower average yield
- NII from the non-fixed income portfolio decreased slightly primarily due to lower private equity and partnership returns (non-fixed income returns are generally reported on a one-quarter lagged basis)

¹ 2024 and 2025 data represent quarterly average.

² Excludes investment expenses.

EXPLANATORY NOTE

This presentation contains, and management may make, certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. Words such as “may,” “will,” “should,” “likely,” “probably,” “anticipates,” “expects,” “intends,” “plans,” “projects,” “believes,” “views,” “ensures,” “estimates” and similar expressions are used to identify these forward-looking statements. These statements include, among other things, the Company’s statements about:

- the Company’s outlook, the impact of trends on its business and its future results of operations and financial condition;
- the impact of legislative or regulatory actions or court decisions;
- share repurchase plans;
- future pension plan contributions;
- the sufficiency of the Company’s reserves, including asbestos;
- the impact of emerging claims issues as well as other insurance and non-insurance litigation;
- the cost and availability of reinsurance coverage;
- catastrophe losses and modeling;
- the impact of investment, economic and underwriting market conditions, including interest rates, tariffs and inflation;
- the Company’s approach to managing its investment portfolio;
- the impact of changing climate conditions;
- strategic and operational initiatives to improve growth, profitability and competitiveness;
- the Company’s competitive advantages and innovation agenda, including executing on that agenda with respect to artificial intelligence;
- the Company’s cybersecurity policies and practices;
- new product offerings;
- the impact of developments in the tort environment; and
- the impact of developments in the geopolitical environment, including the war with Iran.

The Company cautions investors that such statements are subject to risks and uncertainties, many of which are difficult to predict and generally beyond the Company’s control, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. Some of the factors that could cause actual results to differ include, but are not limited to, the following:

Insurance-Related Risks

- high levels of catastrophe losses;
- actual claims may exceed the Company’s claims and claim adjustment expense reserves, the estimated level of claims and claim adjustment expense reserves may increase, or increases in loss costs may not be offset with sufficient price increases, including as a result of, among other things, changes in the legal/tort, regulatory and economic environments, including increased inflation and the impact of tariffs;
- the Company’s continued exposure to asbestos claims and related litigation;
- the Company is exposed to, and may face adverse developments involving, mass tort claims; and
- the effects of emerging claim and coverage issues on the Company’s business are uncertain, and court decisions or legislative changes that take place after the Company issues its policies can result in an unexpected increase in the number of claims.

Financial, Economic and Credit Risks

- a period of financial market disruption or an economic downturn;
- the Company’s investment portfolio is subject to credit and interest rate risk, and may suffer reduced or low returns or material realized or unrealized losses;
- the Company is exposed to credit risk related to reinsurance and structured settlements, and reinsurance coverage may not be available to the Company;
- the Company is exposed to credit risk in certain of its insurance operations and with respect to certain guarantee or indemnification arrangements that it has with third parties;
- a downgrade in the Company’s claims-paying and financial strength ratings; and
- the Company’s insurance subsidiaries may be unable to pay dividends to the Company’s holding company in sufficient amounts.

Business and Operational Risks

- the intense competition that the Company faces, including with respect to attracting and retaining employees, and the impact of innovation, technological change, including with respect to artificial intelligence, and changing customer preferences on the insurance industry and the markets in which it operates;
- disruptions to the Company’s relationships with its independent agents and brokers or the Company’s inability to manage effectively a changing distribution landscape;
- the Company’s efforts to develop new products or services, expand in targeted markets, improve business processes and workflows or pursue acquisitions or dispositions may not be successful and may create enhanced risks;
- the Company’s pricing and capital models may provide materially different indications than actual results;
- loss of or significant restrictions on the use of particular types of underwriting criteria, such as credit scoring, or other data or methodologies, in the pricing and underwriting of the Company’s products;
- the Company is subject to additional risks associated with its business outside the United States; and
- future pandemics.

Technology and Intellectual Property Risks

- as a result of cyber attacks (the risk of which could be exacerbated by geopolitical tensions, including the war with Iran) or otherwise, the Company may experience difficulties with technology, data and network security or outsourcing relationships;
- the Company’s dependence on effective information technology systems and on continuing to develop and implement improvements in technology, including with respect to artificial intelligence; and
- the Company may be unable to protect and enforce its own intellectual property or may be subject to claims for infringing the intellectual property of others.

Regulatory and Compliance Risks

- changes in regulation, including changes in tax laws; and
- the Company’s compliance controls may not be effective.

In addition, the Company’s share repurchase plans depend on a variety of factors, including the Company’s financial position, earnings, share price, catastrophe losses, maintaining appropriate capital levels for the Company’s business operations, changes in the levels of written premiums, funding of the Company’s qualified pension plan, regulatory capital requirements of the Company’s operating subsidiaries, legal requirements, regulatory constraints, other investment opportunities (including mergers and acquisitions and related financings), market conditions, changes in tax laws and other factors.
