TOTAL

Second Quarter 2025 vs. Prior Year Quarter Commentary

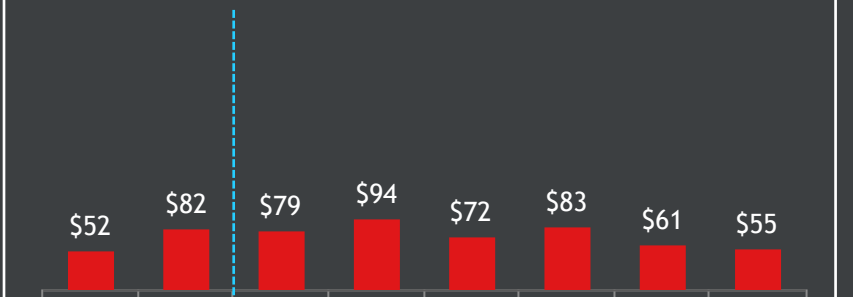

- Net investment income (NII) from the long-term fixed income portfolio increased due to growth in average invested assets and a higher average yield
- NII from the short-term fixed income portfolio decreased due to a lower average yield
- NII from the non-fixed income portfolio decreased from the prior year quarter, primarily due to lower private equity partnership returns (non-fixed income returns are generally reported on a one-quarter lagged basis)

Some of the factors that could cause actual results to differ include, but are not limited to, the following:

Insurance-Related Risks

- high levels of catastrophe losses;
- actual claims may exceed the Company's claims and claim adjustment expense reserves, the estimated level of claims and claim adjustment expense reserves may increase, or increases in loss costs may not be offset with sufficient price increases, including as a result of, among other things, changes in the legal/tort, regulatory and economic environments, including increased inflation and the impact of tariffs;
- the Company's continued exposure to asbestos and environmental claims and related litigation;
- the Company is exposed to, and may face adverse developments involving, mass tort claims; and
- the effects of emerging claim and coverage issues on the Company's business are uncertain, and court decisions or legislative changes that take place after the Company issues its policies can result in an unexpected increase in the number of claims.

Financial, Economic and Credit Risks

- a period of financial market disruption or an economic downturn;
- the Company's investment portfolio is subject to credit and interest rate risk, and may suffer reduced or low returns or material realized or unrealized losses;
- the Company is exposed to credit risk related to reinsurance and structured settlements, and reinsurance coverage may not be available to the Company;
- the Company is exposed to credit risk in certain of its insurance operations and with respect to certain guarantee or indemnification arrangements that it has with third parties;
- a downgrade in the Company's claims-paying and financial strength ratings; and
- the Company's insurance subsidiaries may be unable to pay dividends to the Company's holding company in sufficient amounts.

Business and Operational Risks

- the intense competition that the Company faces, including with respect to attracting and retaining employees, and the impact of innovation, technological change and changing customer preferences on the insurance industry and the markets in which it operates;
- disruptions to the Company's relationships with its independent agents and brokers or the Company's inability to manage effectively a changing distribution landscape;
- the Company's efforts to develop new products or services, expand in targeted markets, improve business processes and workflows or make acquisitions may not be successful and may create enhanced risks;
- the Company's pricing and capital models may provide materially different indications than actual results;
- loss of or significant restrictions on the use of particular types of underwriting criteria, such as credit scoring, or other data or methodologies, in the pricing and underwriting of the Company's products;
