## Grupo Supervielle Reports 2Q23 Results

Delivered 2Q23 ROAE of $17.6 \%$ in real terms; Consistent strategy execution drives swing in profitability to $9.9 \%$ ROAE in real terms in 1 H 23 from negative $6 \%$ in 1 H 22 .

Buenos Aires, August 23, 2023 - Grupo Supervielle S.A. (NYSE: SUPV; BYMA: SUPV), ("Supervielle" or the "Company") a universal financial services group headquartered in Argentina with a nationwide presence, today reported results for the three and six-months period ended June 30, 2023.

Starting 1Q20, the Company began reporting results applying Hyperinflation Accounting, in accordance with IFRS rule IAS 29 ("IAS 29") as established by the Central Bank.

In 3Q22 IUDU adopted IFRS 9 for the fiscal year beginning on January 1, 2022, and the IFRS 9 transition date was scheduled for January 1, 2021. For comparative purposes, and according to IAS 8, changes in accounting policies were applied retrospectively, therefore reported figures and applicable ratios have been restated.

## Management Commentary

Commenting on second quarter 2023 results, Patricio Supervielle, Grupo Supervielle's Chairman \& CEO, noted: "We delivered positive ROAE improving to $17.6 \%$ in real terms as we continue executing on our strategic plan and progressing on our path to profitability while at the same time navigating a complex macroeconomic and political environment. ROAE also benefited from a lower turnover tax burden starting this quarter.

NIM reached $26.6 \%$ driven mainly by a 20.4\% sequential increase in net financial income primarily due to a combination of higher volumes and spreads. This high NIM continued into July driven by our strong asset and liability management capabilities. We increased the spread of short-term central bank securities portfolio leveraging the $16 \%$ expansion of our peso deposit base. This sequential growth in deposits was aided by public sector deposits, corporates, and the positive impact from the thirteenth salary. This more than offset a contraction in the loan book as we maintained a prudent approach to lending prioritizing high value customers.

Reflecting our focus on asset quality, the NPL ratio declined to a low of $2.5 \%$ this quarter. We maintained stringent credit scoring criteria focusing on loans to payroll, entrepreneurs and middle-market customers with early delinquency improving month over month.

Overall, we reported a solid first half of the year, with ROE in real terms at 9.9\%. During 1H23 and compared with the same period a year ago, Net financial income increased 9\%, loan loss provisions declined 37\% reflecting a healthier loan mix, while personnel and administrative expenses declined $8 \%$ as we made significant progress in streamlining our branch network and capturing significant efficiencies while further enhancing the customer experience. Lower costs together with strong revenues resulted in an improvement in the efficiency ratio to $67 \%$ from $78 \%$ in 1 H 22 .

Today, our branches serve a larger number of clients more efficiently while our digital capabilities have allowed us to maintain a consolidated footprint and expand our reach across the country. This year we have also been focusing on cross-selling products to our existing base of individual customers. Additionally, we see many opportunities ahead to continue serving our customers through the launch of new products and services. Starting June 3, we expanded the timeframe our customers can invest in money market funds through our App to 24/7 from 24/5, helping protect transactional funds against inflation, and positioning us as the first bank to offer this convenient service. This initiative has been well received with 90,000 clients already investing through this platform.
Looking ahead, in our view the recent Primary elections reflect a desire of Argentine citizens for a sustainable economic model with a lower tax burden and tighter monetary and fiscal discipline. After the presidential elections we look forward to a more business friendly environment while position to grow and to further develop our franchise supported by our $15.7 \%$ Tier 1 capital ratio. Our capital is hedged against inflation," concluded Mr. Supervielle.

## Second quarter 2023 Highlights

## PROFITABILITY

Attributable Net Income of AR\$6.3 billion in 2Q23, compared to a net loss of AR $\$ 3.8$ billion in $2 Q 22$ and a net gain of AR $\$ 690.0$ million in 1Q23.

In 1 H 23 , Attributable Net Income was AR $\$ 6.9$ billion compared to a loss of AR $\$ 4.4$ billion in 1 H 22 .

YoY, Net Income performance reflects the result of the execution on the Company's strategic plan implemented in 2022 and 2023 to optimize operations and streamline its branch network.

Nevertheless, Net Income remained impacted by several factors: i) low credit demand from the private sector which remains at historical lows, compounded by inflation of $24 \%$ QoQ and $115 \%$ YoY; and ii) regulatory minimum interest rates on time deposits.

ROAE was $17.6 \%$ in 2 Q23 compared with negative $10.2 \%$ in 2 Q22 and positive $2.0 \%$ in 1Q23. ROAE also benefited from a lower turnover tax burden starting this quarter.

1 H 23 ROAE was $9.9 \%$ compared to $-6.0 \%$ in 1 H 22 .
ROAA was $2.7 \%$ in 2 Q 23 compared to negative $1.4 \%$ in 2Q22 and positive $0.3 \%$ in 1Q23.

1 H 23 ROAA was $1.4 \%$ compared to $-0.8 \%$ in 1 H 22 .
Profit before income tax of AR $\$ 9.0$ billion in 2 Q23 compared to a loss of AR $\$ 4.7$ billion in 2 Q22 and a gain of AR $\$ 2.1$ billion in $1 Q 23$.

Profit before income tax of AR\$ 11.1 billion in 1 H 23 compared to a loss of AR $\$ 5.2$ billion in 1 H 22 .

YoY performance is explained by: i) higher spread and higher volumes in the investment portfolio on the back of higher interest rates, ii) a decrease of $51.6 \%$, or AR $\$ 2.8$ billion, in Loan loss provisions reflecting mainly a lower share of consumer finance loans, iii) a $5.9 \%$, or AR\$ 2.1 billion, decrease in expenses, reflecting the results of the operations optimization, iv) higher revenues from the brokerage and asset management businesses on increased activity and assets under management, and v) a lower turnover tax as in line with the Central Bank claim for the unconstitutionality of the turnover tax on income from

Leliqs and Repos with the national monetary authority, the Bank is not taxing Leliqs in Buenos Aires and Mendoza since April and January this year, respectively. In addition, both Banking Associations ADEBA and ABA and the majority of financial institutions operating in these jurisdictions followed suit. These were partially offset by: i) weak credit demand with loan portfolio increasing below the $105.6 \%$ inflation; and ii) a $10.8 \%$, or AR\$ 734.0 million, increase in the loss from exposure to inflation mainly due to the $19 \%$ increase in net monetary assets excluding income tax credits while inflation increased to $105.6 \%$ YoY.

## Profit (Loss) Before Income Tax (AR\$ Milion)

Revenues (net financial income + net fee income) of $\mathrm{AR} \$ 58.0$ billion in 2Q23, compared to AR $\$ 49.8$ billion in 2 Q22 and AR $\$ 49.9$ billion in 1Q23. The sequential increase was mainly explained by a $20.4 \%$, or AR\$ 8.2 billion, increase in Net Financial Income, while Net Service Fee income decreased $1.2 \%$, or AR\$ 120.5 million. The YoY increase was mainly explained by a $19.4 \%$, or AR $\$ 7.9$ billion, increase in Net Financial Income and a $3.7 \%$, or AR\$ 345.3 million, increase in Net Service Fee income.

## FINANCIAL MARGIN

Net Financial Income of AR $\$ 48.4$ billion in $2 Q 23$ increasing 20.4\% QoQ and 19.4\% YoY. The QoQ performance was explained by higher AR\$ spread and higher volumes in the investment portfolio on the back of higher interest rates reflecting: i) a $34.5 \%$, or AR\$ 19.1 billion, increase in the income from Central Bank securities and repo transactions due to a $12.6 \%$ increase in the average volume and 1,380 bps increase
in the yield of those securities, ii) a $18.3 \%$, or AR\$ 3.7 billion, increase in the yield of government securities, mainly due to a 2,550-bps yield increase and 11.2\% volume increase in average US\$ securities mainly dual bonds, and 2,179-bps yield increase on AR\$ securities while AR\$ volumes decreased 19.2\%, and iii) AR\$605 million increase in interest on loans, mainly due to 860 -bps increase in loan portfolio average yield, while continued weak credit demand with loans growing below inflation level of $23.8 \%$ and average loan volumes declining $11.1 \%$. These were partially offset by a 1,070-bps increase in AR\$ cost of funds in the quarter which resulted from hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits resulting in a $19.0 \%$ increase in interest expenses, or AR $\$ 15.3$ billion.

YoY, Net Financial Income increased 19.4\% driven by a higher AR\$ spread reflecting: i) a $77.4 \%$, or AR\$ 32.5 billion, increase in the income from Central Bank securities and repo transactions as a result of a 3,660bps increase in the yield of those securities while volumes remained flat, ii) a $88.1 \%$, or AR\$ 11.3 billion, increase in the yield of government securities, mainly due to the $7,340 \mathrm{bps}$ yield and $63.5 \%$ volume increases in average US\$ securities mainly dual bonds, and 5,400 -bps yield increase on AR\$ securities while AR $\$$ volumes decreased $37.6 \%$, and iii) AR $\$ 3.7$ billion increase in interest on loans, mainly due to 2,300-bps increase in loan portfolio average yield, while continued weak credit demand with loans growing below inflation level of $115.6 \%$ and average loan volumes declining $26.7 \%$. These were partially offset by a 3,080-bps increase in AR\$ cost of funds which resulted from hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits partially offset by a $16.1 \%$ decrease in average volumes resulting in a $70.8 \%$ increase in interest expenses, or AR\$39.7 billion

Adjusted Net Financial Income (Net Financial Income + Result from exposure to inflation) was AR\$40.9 billion in 2Q23, increasing 21.2\% YoY and 21.3\% QoQ.

1H23 Net Financial Income of AR\$ 88.7 billion, up $9.1 \%$ from AR\$ 81.3 billion in 1 H 22 . Adjusted Net Financial Income was AR $\$ 74.7$ billion in 1 H 23 , up 10.5\% YoY.

Net Interest Margin (NIM) reached 26.7\% compared to $18.8 \%$ in 2 Q22 and $21.9 \%$ in 1Q23. The QoQ and YoY performance reflect the combination of higher volumes and spreads in the Company's investment portfolio on the back of higher interest rates set by the Central Bank, which more than offset lower NIM in the AR\$ loan portfolio.

## ASSET QUALITY

The total NPL ratio was $2.5 \%$ in 2Q23 decreasing 160 bps from $4.1 \%$ in 1 Q 23 . The decrease is mainly explained by: i) the sale of a non-performing loan portfolio, mainly of the consumer finance segment within the Bank's personnel and business segment, and ii) the upgrade of a corporate customer to stage 2 from stage 3. The Bank's NPL also reflects the tightening of its underwriting policies during 2022 and 2023.

Loan loss provisions (LLPs) totaled AR\$3.5 billion in 2Q23, decreasing 41.1\% YoY and 2.8\% QoQ. The YoY performance reflects a lower share of consumer finance loans, the tightening in underwriting policies and a shift to payroll loans.

Net loan loss provisions, which is equivalent to loan loss provisions net of recovered charged-off loans and reversed allowances, amounted to AR $\$ 2.6$ billion in 2Q23 compared to AR\$3.5 billion in 1Q23 and AR\$5.5 billion in 2Q22.

The level of provisioning as of June 30, 2023, reflects IFRS9 expected loss models at the Company.

The QoQ performance reflects the tightening of the Company's credit policies and the contraction of the loan portfolio.

In 1 H 23 , LLP of AR $\$ 7.2$ billion decreasing $36.9 \%$ from AR $\$ 11.4$ billion in 1 H 22 . LLP, net of $\mathrm{AR} \$ 6.1$ billion decreasing $34.6 \%$ from AR\$ 9.4 billion in 1 H 22 .

The Coverage ratio increased to $147.9 \%$ as of June 30, 2023, from 115.9\% as of March 31, 2023, and 141.5\% as of June 30, 2022.

## NON-INTEREST EXPENSES \& EFFICIENCY

Efficiency ratio was $62.5 \%$ in 2Q23, compared to $81.4 \%$ in 2 Q 22 and $71.8 \%$ in 1 Q 23 . The YoY performance was explained by a $22.6 \%$ increase in Revenues together with a $5.9 \%$ decline in total expenses. The ratio includes severance payment.

In 1 H 23 , the efficiency ratio was $66.7 \%$ compared to $77.7 \%$ in 1 H 22 . Total expenses declined $6.9 \%$ or AR\$ AR $\$ 4.8$ billion to AR $\$ 64.6$ billion-

## LIQUIDITY

Loans to deposits ratio was $37.0 \%$ as of June 30, 2023, compared to $46.3 \%$ as of June 30, 2022, and $44.9 \%$ as of March 31, 2023. AR\$ loans to AR\$ deposits ratio was $37.3 \%$ as of June 30, 2023, declining from 46.3\% as of June 30, 2022, and from $45.9 \%$ as of March 31, 2023. US\$ loans to US\$ deposits ratio was $33.1 \%$ as of June 30, 2023, compared to $46.5 \%$ as of June 30, 2022, and $36.3 \%$ as of March 31, 2023.

Total Deposits of AR $\$ 805.9$ billion expanded $39.8 \%$ QoQ and $89.4 \%$ YoY in nominal terms. In real terms, total deposits increased $12.9 \%$ QoQ but decreased $12.1 \%$ YoY. QoQ performance reflects higher public sector deposits, corporate deposits, and the seasonal increase from the payment of the thirteenth salary to retail customers. The leverage ratio (Assets to shareholders' equity) increased 40 bps to $7.1 x$ from $6.7 x$ as of March 31, 2023, and decreased 100 bps from $8.1 x$ as of June 30, 2022, reflecting asset \& liability management flexibility to maximize NIM and profitability.

The QoQ performance of AR\$ deposits in real terms was mainly driven by increases of: i) $18.3 \%$, or AR\$ 29.0 billion, in Time Deposits from retail and corporate customers, ii) $19.0 \%$ or AR\$ 15.7 billion, in saving accounts impacted by the thirteenth salary, and iii)

AR $\$ 58.6$ billion in Public Sector Deposits. Wholesale funding decreased $0.6 \%$, or AR\$ 1.8 billion, reflecting asset \& liability management.

Total Assets increased $9.7 \%$ QoQ and declined $11.4 \%$ YoY to AR $\$ 1,033$ billion as of June 30, 2023. The YoY performance reflects weak credit demand together with asset \& liability management. The QoQ performance mainly reflects higher balances of securities issued by the Central Bank and Repo transactions with the Central Bank leveraging asset \& liability management to maximize NIM and profitability, while QoQ inflation of $23.8 \%$ impacted loans, which decreased $5.9 \%$ in real terms sequentially. Average AR\$ Assets declined 2.5\% QoQ and $15.9 \%$ YoY in real terms.

Common Equity Tier 1 Ratio as of June 30, 2023, was $15.7 \%$, increasing 100 bps when compared to 1 Q23 and 210-bps compared to June 30, 2022.

Tier 1 Capital Ratio reflects that the expansion in Risk weighted assets and deductions were more than offset by the inflation adjustment of capital and the Bank's capital creation in 2Q23. The loan portfolio grew below inflation in the quarter.

## Overview

According to the latest IMF estimates, the world economy is expected to grow $2.8 \%$ in 2023, with advanced and emerging economies expected to grow $1.3 \%$ and $3.9 \%$, respectively. The main factors which could adversely affect these estimates involve the possibility that: i) central banks further tighten their monetary policies which may negatively impact employment and other economic activities; ii) inflation rates continue to increase during 2023 and 2024; and iii) further financial sector stress. In addition, according to IMF estimates, the economies of Argentina's major trading partners are expected to grow during 2023. However, high interest rates, the slowdown in international trade, and a decrease in commodity prices could have a negative impact on these economies.

In 2023, the Argentine economy may be affected by the dynamics of macroeconomic variables within the framework of the IMF Agreement. According to the IMF, the Argentine authorities and IMF staff reached staff-level agreement on a policy package and updated macroeconomic framework to complete the combined fifth and sixth reviews under Argentina's 30 -month EFF arrangement. This agreement is subject to the continued implementation of agreed policy actions and approval by the IMF Executive Board, which is expected to meet in the second half of August. Completion of the fifth and sixth reviews will give Argentina access of about US $\$ 7.5$ billion. The proposed combination of reviews and associated disbursement are intended to support Argentina's policy efforts and near-term balance of payments needs, including obligations to the Fund. The next review is expected to take place in November. Since completion of the fourth review, Argentina's economic situation has become very challenging due to the larger-than-anticipated impact of the drought, which had a significant impact on exports and fiscal revenues. There have also been policy slippages and delays, which have contributed to strong domestic demand and a weaker trade balance. As a result, end-June 2023 performance criteria (PCs) for net international reserves (NIR) accumulation, the primary fiscal balance and monetary financing of the fiscal deficit were not reached. Meanwhile, the introduction of new temporary administrative FX measures, including in recent days, have occasioned nonobservance of the PCs against the introduction of multiple currency practices (MCPs). As such, waivers will be requested, as well as modifications of key targets, on the basis of the agreed corrective actions to strengthen the program.

Inflation accelerated during the second quarter reaching $115.6 \%$ YoY and $23.8 \%$ QoQ. Faced with this escalation in prices, the Central Bank has been raising the reference interest rate for Liquidity notes (LELIQ). During 2Q23 the reference rate for LELIQ rose 1,900 percentage points from 78\% in December to $97 \%$ in June 23. Moreover, while the depreciation of the peso accelerated throughout the quarter, it remained slightly below monthly inflation rates. The nominal exchange rate ended June 30, 2023, at AR $\$ 256.7$, which meant an annual increase of approximately $105.0 \%$ YoY and $22.8 \%$ QoQ.

During July 2023, according to the information published by the INDEC, inflation was $6.3 \%$ accelerating from $6 \%$ recorded in June and accumulating $60.2 \%$ increase year to date.

On August 13, the PASO primary elections were held in Argentina, in which were defined the final candidates from each coalition that will dispute the presidency on October 22. As a result of the primary elections, La Libertad Avanza Party (Javier Milei) obtained the first place with $\sim 30 \%$, JxC (Patricia Bullrich) occupied the second place with $28 \%$ and UxP (Sergio Massa) with $27 \%$ was in third place.

After the primary elections, the FX was depreciated $22 \%$ by the Central Bank to AR $\$ 350$ per dollar and the reference rate for LELIQ increased from $97 \%$ to $118 \%$. According to certain early indicators, the pass-through effect of the exchange rate devaluation would have had a significant impact on inflation in the month of August accelerating from previous months.

According to Central Bank estimates (Market Expectations Survey - REM) as of July 2023 published on August 15, 2023, the Argentine GDP is expected to decrease $2.8 \%$ in 2023. Analysts participating in the REM also expect inflation to rise from $94.8 \%$ in 2022 to $140.7 \%$ in 2023 , declining to $106.7 \%$ in 2024. In addition, the nominal exchange rate is expected to end in AR $\$ 423.22$ per dollar as of December 31, 2023, increasing 1,570 bps from previous survey. Since this survey was conducted in the last days of July, the projections made by the participants of the survey do not take into account the Fx rate devaluation on August 14th.

## Net financial income

## Net Financial Income includes: Net Interest Income -NII-, Net Income from Financial Instruments -NIFFI-, and Exchange Rate Differences on Gold and Foreign Currency

Net Financial Income of AR\$48.4 billion in 2Q23 increasing 20.4\% QoQ and 19.4\% YoY. The QoQ performance is explained by higher AR\$ spread and higher volumes in the investment portfolio on the back of increasd interest rates reflecting: i) a $34.5 \%$, or AR\$ 19.1 billion, increase in the income from Central Bank securities and repo transactions as a result of increases of $12.6 \%$ in the average volume and $1,380 \mathrm{bps}$ in the yield of those securities, ii) an $18.3 \%$, or AR\$ 3.7 billion, increase in the yield of government securities, mainly due to increases of $2,550-$ bps in the yield and $11.2 \%$ in the average volume of US\$ securities mainly dual bonds, and an increase of 2,179bps in the yield of AR\$ securities while AR\$ volumes decreased 19.2\%, and ii) a AR\$605 million increase in interest on loans, mainly due to a 860 -bps increase in loan portfolio average yield, while continued weak credit demand resulted in loans growing below the $23.8 \%$ inflation level and average loan volumes declining $11.1 \%$. These were partially offset by a 1,070-bps increase in AR\$ cost of funds in the quarter which resulted from hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits resulting in a $19.0 \%$ increase in interest expenses, or AR $\$ 15.3$ billion.

YoY, Net Financial Income increased $19.4 \%$ driven by a higher AR\$ spread reflecting: i) a $77.4 \%$, or AR\$ 32.5 billion, increase in the income from Central Bank securities and repo transactions as a result of a 3,660 bps increase in the yield of those securities while volumes remained flat, ii) a $88.1 \%$, or AR $\$ 11.3$ billion, increase in the yield of government securities, mainly due to a 7,340 bps yield increase and $63.5 \%$ volume increase in average US\$ securities mainly dual bonds, and 5,400-bps yield increase on AR\$ securities while AR\$ volumes decreased
$37.6 \%$, and ii) a AR $\$ 3.7$ billion increase in interest on loans, mainly due to a 2,300 -bps increase in the average yield, while continued weak credit demand resulted in loans growing below $115.6 \%$ inflationand average loan volumes declining $26.7 \%$. These were partially offset by a 3,080-bps increase in AR\$ cost of funds in the quarter which resulted from hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits partially offset by a $16.1 \%$ decrease in average volumes resulting in a $70.8 \%$ increase in interest expenses, or AR $\$ 39.7$ billion.

Adjusted Net Financial Income (Net Financial Income + Result from exposure to inflation) was AR $\$ 40.9$ billion in 2Q23, increasing 21.2\% YoY and 21.3\% QoQ.

As of June 30, 2023, the book value that arises from valuing Securities classified as Held to maturity was AR\$334.5 billion, while the fair value of these securities was AR $\$ 336.5$ billion ( $+A R \$ 2$ billion).

The yield on interest-earning assets includes interest income on loans, as well as results from the Company's AR\$ and U.S. dollar denominated investment portfolio. Yield on interest-bearing liabilities includes interest expenses but excludes FX differences and net gains or losses from currency derivatives or the adjustment to FX fluctuation of FX liabilities. The yield on interest-bearing liabilities for 2 Q23 shown on this table lacks the negative impact from the $105.0 \%$ YoY increase in the FX rate as of June 30,2023 , thus presenting an inaccurate rate. The full impact is seen when also considering the Exchange rate differences on gold and foreign currency line item in the income statement.

AR $\$$ cost of funds increased $1,070-b p s$ in the quarter reflecting: i) the increase in interest rates set by the Central Bank; ii) regulatory increases in minimum interest rates on time deposits; and iii) a lower share of no-cost transactional deposits resulting from high inflation. In the quarter, the volume of AR\$ interest bearing liabilities remained flat while the interest paid on those liabilities increased 1,180-bps.

US\$ cost of funds increased 10 bps QoQ.

Net Interest Income was AR $\$ 39.0$ billion, compared to AR $\$ 32.8$ billion in 2Q22 and AR $\$ 30.3$ billion in 1 Q23. The sequential $28.9 \%$ increase in NII is explained by: i) a $34.5 \%$, or AR $\$ 19.1$ billion, increase in the result of Central Bank securities and repo transactions as a result of increases of $12.6 \%$ in the average volume and 1,380 bps in the yield of those securities, ii) higher yields on lower average volume of government securities of the treasury position measured at fair value through other comprehensive income and at amortized cost, and iii) a AR $\$ 605$ million increase in interest on loans, mainly due to a 860 -bps increase in the average yield, while continued weak credit demand resulted in loans growing below the $23.8 \%$ inflation level and average loan volumes declining $11.1 \%$. These were partially offset by a $1,070-b p s$ increase in AR $\$$ cost of funds in the quarter which resulted from hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits resulting in a $19.1 \%$ increase in interest expenses, or AR $\$ 15.3$ billion.

The YoY performance is explained by: i) a $77.4 \%$, or AR\$ 32.5 billion, increase in the income from Central Bank securities and repo transactions as a result of a 3,660 bps increase in the yield of those securities while volumes remained flat, ii) higher yields on lower average volume of government securities of the treasury position measured at fair value through other comprehensive income and at amortized cost, and iii) a AR $\$ 3.7$ billion increase in interest on loans, mainly due to a 2,300-bps increase in the average yield, while continued weak credit demand with loans growing below the $115.6 \%$ inflation level and average loan volumes declining $26.7 \%$. These were partially offset by a 3,080-bps increase in AR\$ cost of funds driven by hikes in interest rates set by the Central Bank together with regulatory increases in minimum interest rates on time deposits partially offset by a $16.1 \%$ decrease in average volumes resulting in a $70.8 \%$ increase in interest expenses, or AR $\$ 39.7$ billion.

Interest income increased $51.8 \%$ YoY to $\operatorname{AR} \$ 135.0$ billion in 2 Q 23 and $21.8 \%$ QoQ. Interest income from investments in Central Bank securities and Repo transactions for 2Q23, 1Q23, 4Q22, 3Q22 and 2Q22 amounted to $A R \$ 74.8$ billion, $A R \$ 55.5$ billion, $A R \$ 55.2$ billion, $A R \$ 52.2$ billion, and $A R \$ 42.1$ billion, respectively.

1. Other" includes interest income from securities issued by the Central Bank and from Repo Transactions, and results from other securities recorded as available for sale.

The YoY performance in interest income mainly reflects: i) a AR $\$ 32.5$ billion increase in results from investments in Central Bank securities and Repo transactions explained by the 3,660 bps increase in the average yield while average volumes remained flat; and ii) higher result from securities of the treasury position measured at fair value through other comprehensive income and at amortized cost. These were partially offset by a $27.5 \%$ decline in average volume of total loans due to weak credit demand, while the average interest rate on total loans increased 2,190 bps.

The QoQ performance in interest income resulted mainly from: i) a $12 \%$ increase in the average volumes of securities issued by the Central Bank and repo transactions together with 1380-bps increase in the yield of those instruments; and ii)a higher result from securities of the treasury position measured at fair value through other comprehensive income and at amortized cost. These were partially offset by an $11.1 \%$ decrease in the average volume of the AR\$ loan portfolio reflecting weak credit demand, while interest earned on AR\$ Loans increased 870-bps.

Interest expenses increased $71.0 \% \mathrm{YoY}$ and $19.1 \%$ QoQ, to AR\$95.9 billion in 2 Q 23.

The YoY performance in interest expenses resulted mainly from the 3.850-bps increase in the interest rate of AR\$ interest bearing liabilities reflecting increases in regulatory minimum interest rates on time deposits and in average market interest rates. These were partially offset by a $12.5 \%$ decrease in the average balance of AR\$ interest bearing liabilities while the volume of AR\$ non-interest-bearing deposits decreased $25.8 \%$ resulting from the impact of high inflation on customers' transactional funds. US\$ interest bearing liabilities decreased $18.7 \%$ while the interest rate of US\$ interest bearing liabilities increased 40-bps.

The QoQ increase in interest expenses mainly reflects a 1,180-bps increase in the interest rate of AR\$ interest bearing liabilities following interest rate hikes implemented by the Central Bank, and a $0.9 \%$ increase in average volume. US\$ interest bearing liabilities decreased $16.8 \%$ while the interest rate of US\$ interest bearing liabilities increased by 20 bps.

Net Income from financial instruments and Exchange rate differences of AR\$9.4 billion compared to AR $\$ 7.8$ billion in 2 Q22 and AR $\$ 10.0$ billion in $1 Q 23$. The QoQ performance reflects the 2.170 bps increase in the yield of AR\$ government securities despite lower volumes of AR\$ government securities recorded for trading purposes, and a higher result on increased volumes of US\$ government securities, mainly dual bonds.

Dual bonds accrue the highest yield between inflation adjusted bonds (CER) and FX depreciation.

Net Interest Margin (NIM) reached $26.7 \%$ compared to $18.8 \%$ in 2 Q 22 and $21.9 \%$ in 1 Q 23 . The YoY and QoQ performance reflect the combination of higher volumes and spreads in the Company 's investment portfolio on the back of higher interest rates set by the Central Bank, which more than offset lower NIM in the AR\$ loan portfolio.

The tables below provide further information on NIM breakdown corresponding to the Loan and Investment portfolios, as well as summary information on average Assets and average Liabilities, interest rates both on assets and liabilities and market rates.

This government bond accrues the highest yield between Inflation adjusted bonds (CER) and FX depreciation. As of June 30, 2023, the Company held an AR $\$ 17.5$ billion balance of dual bonds.

## Cost of risk \& Asset quality

Loan loss provisions (LLPs) totaled AR\$3.5 billion in 2Q23, decreasing 41.1\% YoY and 2.8\% QoQ. This performance reflects a healthier loan mix.

Net loan loss provisions, which is equivalent to loan loss provisions net of recovered charged-off loans and reversed allowances, amounted to AR $\$ 2.6$ billion in $2 Q 23$ compared to $A R \$ 3.5$ billion in $1 Q 23$ and $A R \$ 5.5$ billion in $2 Q 22$. The level of provisioning as of June 30, 2023, reflects IFRS9 expected loss models at the Company.

The QoQ performance reflects the tightening of credit policies, the improvement in early delinquency in the retail customers portfolio, and a contraction in loans to retail and former IUDU customers.

The table below provides further breakdown on loan loss provisions in each customer segment:

* Other includes allowances reversed in Other Income line item, and provision for unused balances of overdrafts and credit cards in Other Expenses line item of the Income Statement

The most significant variables used to estimate the Expected Credit Loss (ECL) in 2023 are presented below:

Argentine Banks started to provision Financial Assets Impairment as included in paragraph 5.5 of IFRS 9 as from the fiscal year starting on January 1, 2020. But through Communications "A" 6778 and 6847 issued on September 5 and December 27, 2019, respectively, the Central Bank introduced a progressive adoption of the impairment model for IFRS 9 in a 5-year period for Group B entities, including IUDÚ. In September 2022, IUDÚ requested authorization from the BCRA for the anticipated application of item 5.5 of IFRS 9 in 2022 . Therefore, adjustments were made to shareholder's equity as of December 31, 2021, and in the income statement for 2022. In September 2022, IUDU adopted IFRS 9 for the fiscal year beginning on January 1, 2022, with the IFRS 9 transition date scheduled for January 1, 2021. For comparative purposes, and according to IAS 8, changes in accounting policies were applied retrospectively to each of the quarters of 2021 and the full year, and to the first and second quarters of 2022 , therefore reported figures and applicable ratios in these quarters have been restated.

In addition, since 2020 the Central Bank established a temporary exclusion from the impairment model of IFRS 9 for government-issued debt securities.

Cost of Risk declined to $4.3 \%$ in 2 Q23, from $5.5 \%$ in 2 Q22 and $4.8 \%$ in 1 Q23. The QoQ performance reflects the tightening of our credit policies, the improvement in early delinquency in the retail customer portfolio, and the Ioan portfolio contraction in retail and former IUDU customers.

Cost of risk, net, which is equivalent to loan loss provisions net of recovered charged-off loans and reversed allowances, was $3.2 \%$ in 2Q23, compared to $4.9 \%$ in 2 Q22 and $4.0 \%$ in 1 Q23.

As of June 30, 2023, the Provisioning ratio on the total loan portfolio was $3.7 \%$ compared to $5.2 \%$ as of June 30, 2022. The YoY decline reflects loan write-offs and the sale in 2Q23 of a non-performing loan portfolio mostly related to consumer loans.

The table below provides an analysis of the allowance for loan losses year to date:

## Credit Quality

The total NPL ratio was $2.5 \%$ in 2Q23 decreasing 160 bps from $4.1 \%$ in 1Q23. The decrease is mainly explained by: i) the sale of non-performing loans from the consumer segment within the Bank's personnel and business segment (mostly former IUDÚ customers among others), and ii) the upgrade of a corporate customer to stage 2 from stage 3.

The Bank's NPL ratio also reflects the tightening in its underwriting policies in 2022 and 2023

In 2Q23, Other Operating Income, net (excluding the turnover tax) amounted to AR\$1.3 billion, compared to AR $\$ 177.5$ million in 2 Q 22 and $A R \$ 319.2$ million in $1 Q 23$. 2 Q 23 recorded higher fees related to cash management service to our customers. Other expenses reflected the decrease of other loan loss provisions related to unused credit card balances.

Turnover tax totaled AR\$5.7 billion in 2Q23 decreasing 8.5\% YoY and 16.9\% QoQ.

Commencing January 2020 and January 2023, the tax authorities of the City of Buenos Aires and the Province of Mendoza, respectively, began to impose a Turnover Tax on the revenues derived from securities and instruments (Leliqs/Notaliqs or Repos) issued by the Central Bank of Argentina (BCRA).

On December 11, 2020, the BCRA initiated declaratory actions of certainty against both tax authorities regarding the unconstitutionality of the measures implemented, as they directly and significantly affect the purposes and functions assigned to the BCRA, substantially altering the execution of national monetary and financial policy. The BCRA also cited that the imposition of this Turnover Tax is in clear contradiction to the provisions of the National Constitution and its Organic Charter. The BCRA has the authority to issue instruments to regulate monetary policy and achieve financial and exchange stability.

Through the enacted laws, provincial governments exceed their powers by imposing taxes on these monetary policy instruments, the regulation, implementation, and/or use of which falls within the jurisdiction of the BCRA. This directly impacts the immunity principle of the national government's policy as these revenues cannot be subject to taxation at the local level due to their immunity or non-taxable status. Both municipalities and provinces lack tax authority over financial instruments issued by the National Government.

In line with the submissions made by the BCRA, the Argentine Banking Association (ABA), the Argentine Bankers' Association (ADEBA), and the majority of financial institutions operating in these provinces have also filed constitutional actions against these regulations. These actions are still pending resolution by the Supreme Court of Justice.

Based on the aforementioned, the Bank believes that the reasons supporting the non-taxability of these types of instruments are strong and based on expert opinions, both internal and from third-party specialists. We estimate the likelihood of a favorable ruling to our position as the majority view. Consequently, the Bank has ceased paying the tax on the revenues generated by Leliqs operations in Mendoza since January 2023, and by Leliqs and Repo transactions in the City of Buenos Aires since April of the current year.

Lastly, on June 30, 2023, Law (CABA) No. 6655 was published, which establishes the reduction of the Turnover Tax rate to $0 \%$ or $2.85 \%$ for BCRA's repo transactions and securities, subject to regulation and contingent on the effective transfer of revenue-sharing funds or agreements reached with the National Government.

## Other comprehensive income, net of tax

Other Comprehensive Income (Loss) amounted to $\operatorname{AR} \$ 121.0$ million in 2 Q 23 , compared to a loss of $\operatorname{AR} \$ 1.5$ billion in 2 Q22 and a loss of AR $\$ 104.4$ million in 1Q23. Other Comprehensive Loss in the quarter mainly reflects mark to market valuation of government securities held by the Company recorded at Fair value through other comprehensive income.

As of June 30, 2023, the Other Comprehensive Income reserve related to financial instruments was negative AR $\$ 166$ million.

Attributable Comprehensive Income (loss) amounted to a gain of AR\$ 6.4 billion in 2Q23 compared to a loss of $A R \$ 5.2$ billion in $2 Q 22$ and a gain of $A R \$ 585.7$ million in $1 Q 23$.

## Income tax

The tax reform passed by Congress in December 2017 and the amendment to Income Tax Law No. 20,628 (the "Income Tax Law") passed in December 2019, allowed the deduction of losses arising from exposures to changes in the purchasing power of the currency, only if inflation as measured by the Consumer Price Index (CPI) issued by the INDEC would exceed the following thresholds applicable for each fiscal year: 55\% in 2018, 30\% in 2019 and $15 \%$ in 2020. For 2021 and subsequent periods, inflation should exceed $100 \%$ in 3 years on a cumulative basis to deduct inflation losses. In 2018, the 55\% threshold was not met, but in 2019 inflation widely exceeded $30 \%$. Therefore, since 2019 the income tax provision considers the losses arising from exposures to changes in the purchasing power of the currency, which significantly lowered the income tax expense compared to previous years.

In June 2021, a tax law was ruled establishing a new income tax rate structure with three segments in relation to the level of accumulated taxable net income which are adjusted annually considering the CPI. The new income tax rate structure is: i) $25 \%$ for accumulated taxable income of up to AR $\$ 7.6$ million; ii) $30 \%$ for taxable income of up to AR\$ 76 million; and iii) $35 \%$ for taxable income greater than AR\$ 76 million. This modification is applicable for fiscal years beginning on January 1, 2021.

Additionally, as income tax is paid by each subsidiary on an individual basis, tax losses in one legal entity cannot be offset by tax gains in another legal entity.

In 2Q23, the Company recorded a tax charge of $A R \$ 2.7$ billion compared to a tax gain of $A R \$ 943.2$ million in 2 Q22, and a tax charge of $A R \$ 1.4$ billion in $1 Q 23$. The income tax line item is the net effect of the income tax provision at the Bank level and other subsidiaries.

Average AR\$ Assets declined $2.5 \%$ QoQ and $15.9 \%$ YoY in real terms.

During 2Q23, Loss before Income tax of AR $\$ 6.3$ billion compared to a loss before income tax of AR\$9.5 billion in 2Q22 and a loss of AR\$7.7 billion in 1 Q23.

The YoY performance is explained by: i) a net gain of AR $\$ 4.9$ billion in the result from the exposure to changes in the purchasing power of the currency allocated to this segment compared to the AR $\$ 3.3$ billion gain recorded in 2 Q22, ii) a $1.8 \%$, or AR\$ 249.1 million, increase in Net Financial Income reflecting the increase in interest rate earned on loans following market interest rate increases partially offset by decline in loan volumes and an increase in minimum regulatory interest rates on time deposits impacting cost of funds, iii) a $51.1 \%$, or AR\$ 1.3 billion, decrease in other expenses. These were partially offset by an AR $\$ 347.2$ million decrease in Net Service Fee Income.

The QoQ performance is explained by: i) a net gain of AR\$4.9 billion in the result from the exposure to changes in the purchasing power of the currency allocated to this segment compared to the AR $\$ 1.5$ billion gain recorded in 1Q23, ii) a $64.0 \%$, or AR\$ 2.2 billion, decrease in other expenses, and iii) an $11.9 \%$, or AR\$ 434.1 million, decrease in Loan Loss Provisions. Loan loss provisions amounted to AR $\$ 3.2$ billion in $2 Q 23$, compared to $A R \$ 3.2$ billion in $2 Q 22$ and AR $\$ 3.6$ billion in 1Q23.

## Consumer Finance

During 2022 the Company consistently executed on the key strategic pillars of its strategy designed to improve ROE while operating in an increasingly adverse macroeconomic environment, with inflation at the highest level in decades and loan demand at all-time lows. In this context, the Company implemented a major restructuring of IUDU with the goal of running a more efficient operation and merged the entire IUDU customer base to Banco Supervielle. At the same time, the Company has slowed down loan origination focusing on improving asset quality in this middle to low-income customer segment.

The transfer of IUDU's customers and back-office to the Bank was completed in 4 Q 22 .

Accordingly, on December 14, 2022, Banco Supervielle S.A. entered into a merger by absorption commitment, with IUDU Compañía Financiera S.A. and Tarjeta Automática S.A., as absorbed companies. This merge will simplify the corporate structure and will complete the integration that began in September 2022. Said decision was approved by the respective Shareholders' meetings but is subject to the approval by the Central Bank of Argentina.

## Insurance segment

Through Seguros Supervielle, the Company offers a wide range of insurance to all its clients. These are marketed through its network of bank branches, digital channels, and its own specialized sales force to serve two major customer segments (Senior Citizens - Entrepreneurs and SMEs).

Through its insurance subsidiary, the Company covers the needs of its individual clients, of which $50 \%$ belong to the identité, mass affluent, and consumer segments, and the remaining 50\% correspond to the senior citizen segment. Understanding that its clients' needs are constantly evolving, the Company adapts and continually creates new products to accompany their journey. Accordingly, the Company has added insurances for pets, bicycles, and an exclusive insurance for cell phones, among others.

In 2019, with the aim of enhancing the value proposition for all corporate clients, the Company created Supervielle Broker. Its purpose is to offer a wide range of products to clients in the Entrepreneur and SMEs, and Medium and Large Companies segments for proper coverage of their risks at competitive prices with the leading insurers in the market.

## Credit Lines and Loans to SMEs at preferential rates. Deferral programs.

To mitigate the economic impact of the Covid-19 health crisis, the government and the Central Bank ruled along 2020 and 2021 different measures related to credit lines. The regulations that have been extended in 2021, 2022 and 2023 are the ones related to mandatory loans to SMEs, as a percentage of deposits from the nonfinancial private sector in pesos.

## - Credit Lines to SMEs at preferential interest rates:

1) In April 2020, the Central Bank promoted loans granted at a $24 \%$ preferential interest rate, to assist SMEs with payroll payments and working capital needs. The Central Bank also allowed financial institutions to deduct a portion of the amount of loans granted from the minimum reserve requirements. The national government by means of Decree 326/2020 created a fund of specific application within the FOGAR (acronym in Spanish for Fondo de Garantías Argentino), with the aim of backing financings provided to SMEs by financial entities to pay salaries. On October 15, 2020, through Communication "A" 7140, the Central Bank established that this Credit Line applied only for the Emergency Work Assistance Program and Production (ATP). On November 5, 2020, through Communication "A" 7157, the Central Bank cancelled the obligation to grant financing to SMEs within the framework of the ATP.

This program was extended until September 30, 2020. Later on, the Zero interest rate program was extended to Culture loans, with a tenor of 24 months and a 12-month grace period. The $30 \%$ interest rate credit line should represent $30 \%$ of total origination under this rule. On January 6, 2021, through Communication "A" 7197, the Central Bank ruled that a $65 \%$ amount of credit lines granted to finance working capital needs from SMEs disbursed since October 16, 2020, could be applied to achieve the abovementioned $30 \%$ of total origination of the $30 \%$ interest rate credit line.
