Net interest yield on Card Member loans (C)	9.5%	9.1%	9.4%	9.3%	9.5%	9.2%	9.3%	9.3%	9.6%

(a) Adjusted net interest income and adjusted average loans are non-GAAP measures. The Company believes adjusted net interest income and adjusted average loans are useful to investors because they are components of net interest yield on Card Member loans.(b) This calculation includes elements of total interest income and total interest expense that are not attributable to the Card Member loan portfolio, and thus is not representative of net interest yield on Card Member loans. The calculation includes interest income and interest expense attributable to investment securities and other interest-bearing deposits as well as to Card Member loans, and interest expense attributable to other activities, including Card Member receivables.(c) Net interest yield on Card Member loans, a non-GAAP measure, is computed by dividing adjusted net interest income by adjusted average loans, computed on an annualized basis. The calculation of net interest yield on Card Member loans includes interest that is deemed uncollectible. For all presentations of net interest yield on Card Member loans, reserves and net write-offs related to uncollectible interest are recorded through provisions for losses — Card Member loans; therefore, such reserves and net write-offs are not included in the net interest yield calculation. The Company believes net interest yield on Card Member loans is useful to investors because it provides a measure of profitability of the Company's Card Member loan portfolio.

Forward Looking Statements

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which are subject to risks and uncertainties. The forward-looking statements, which address the Company's expected business and financial performance and which include management's outlook for 2015, among other matters, contain words such as "believe," "expect," "estimate," "anticipate," "optimistic," "intend," "plan," "aim," "will," "may," "should," "could," "would," "likely," and similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. The Company undertakes no obligation to update or revise any forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements, include, but are not limited to, the following:

- the ability of the Company to achieve flat to modestly down year over year earnings per share for the full year 2015 as well as the Company's earnings expectations for the second quarter of 2015, which will depend on the reasonableness of the underlying base assumptions such as recent discount rate, loan growth, credit and other trends continuing, the Company's tax rate remaining in line with recent performance, the impact of proposed regulation in the European Union and the ability to realize benefits from the Company's 2014 restructuring actions, the behavior of the Company's Card Members and their actual spending patterns, the trajectory of volume decline and card acquisition related to the Costco U.S. relationship, currency and interest rate fluctuations, the timing and size of the investments the Company makes in growth initiatives, as well as the Company's success in implementing its strategies and business initiatives including growing profitable spending through proprietary, cobrand and network products, increasing penetration among corporate clients, expanding the Company's international footprint, growing reloadable prepaid, loyalty coalitions and marketing services, increasing merchant acceptance and controlling expenses;

- the actual amount to be spent by the Company on investments in the business, including on marketing and promotion at levels relatively similar to the elevated amounts in 2014, rewards, Card Member services and operating expenses and in such areas as consumers, small businesses, corporate payments, merchant coverage, international growth, prepaid and online/mobile commerce, as well as the timing of any such investments, which will be based in part on management's assessment of competitive opportunities, contractual obligations with business partners, management's ability to identify attractive investment opportunities and make such investments, which could be impacted by business, regulatory or legal complexities and the Company's performance, the ability to develop and implement technology and other resources to realize efficiencies and the ability to control operating, infrastructure and rewards expenses as business expands or changes, including the changing behavior of Card Members, credit trends and changes in macroeconomic conditions;

Forward Looking Statements

- uncertainty related to the Company's ability to drive growth from discretionary investments, including the ability to attract new customers and capture a higher share of our Card Members' spend and borrowings, which will depend in part on the Company's ability to develop and market value propositions that appeal to Card Members and new customers and on the Company's ability to offer attractive services and rewards programs, as well as increasing competition, brand perceptions and reputation, the behavior of the Company's Card Members and their actual spending patterns, and ineffective or insufficient levels of investments by the Company, including on marketing and promotion expenses, new product development, acquisition efforts, including through digital channels, and attractive services and rewards programs;

- the ability to hold annual operating expense growth to less than 3 percent during 2015 (excluding any potential restructuring charges), which will depend in part on unanticipated increases in significant categories of operating expenses, such as consulting or professional fees, compliance or regulatory-related costs and technology costs, the payment of monetary damages and penalties, disgorgement and restitution, the Company's decision to increase or decrease discretionary operating expenses such as in technology development depending on overall business performance, the Company's ability to achieve the expected benefits of the Company's reengineering plans, the Company's ability to balance expense control and investments in the business, the impact of changes in foreign currency exchange rates on costs and results, the impact of accounting changes and reclassifications, and the level of acquisition activity and related expenses;

- the Company's ability to attract or retain new Card Members such as consumers, small business and middle market Card Members, as well as capture future spend and lend from relationships with Costco Card Members, which will be impacted in part by competition, brand perceptions and reputation, the Company's ability to reduce Card Member attrition and ineffective or insufficient levels of investments by the Company, including on marketing and promotion expenses, new product development, acquisition efforts, including through digital channels, and attractive services and rewards programs;

- the Company's ability to execute against its lending strategy, which may be affected by increasing competition, brand perceptions and reputation, and the behavior of the Company's Card Members and their actual spending patterns, which in turn may be driven by the Company's ability to issue new and enhanced card products, offer attractive services and rewards programs, attract new Card Members, reduce Card Member attrition and capture a greater share of existing Card Members' spending and borrowing;

- the ability of the Company to grow in international markets, which could be impacted by business practices that favor local competitors or prohibit or limit foreign ownership of certain businesses; the Company's ability to partner with additional GNS issuers and the success of GNS partners in acquiring Card Members and/or merchants; political or economic instability, which could affect lending and other commercial activities, among other businesses; the Company's ability to tailor products and services to make them attractive to local customers; and competitors with more scale and experience and more established relationships with relevant customers, regulators and industry participants;

Forward Looking Statements

- the Company's lending write-off rates for 2015 increasing quicker and reserves building higher than expected and the concomitant impact on the Company's provision expense being higher than expected, which will depend in part on changes in the level of the Company's loan balances, delinquency rates of Card Members, unemployment rates, the volume of bankruptcies and recoveries of previously written-off loans;
- uncertainties associated with the impact of any potential sale of the Costco Card Member loan portfolio, including the result of negotiations with Costco and its new cobrand issuer, the ability and willingness of the new issuer to purchase the portfolio and the timing and magnitude of the recognition of any gain by American Express as a result of a sale, which will be impacted by the credit quality and performance of the portfolio;
- the possibility that the Company will not fully execute on its plans for OptBlue, including increasing small merchant acquisition, which will depend in part on the success of OptBlue merchant acquirers in signing merchants to accept American Express, which could be impacted by the pricing set by the merchant acquirers and the value proposition offered to small merchants and the priority given to the Company by OptBlue merchant acquirers;
- the ability of the Company to add new benefits and introduce new products and services, which will depend in part on the Company's ongoing investment in product innovation, the ability of the Company to update its systems and platforms to support new products, services and benefits, the degree of interest of Card Members in the value proposition offered by the Company and the Company's ability to tailor new products and services to make them attractive to Card Members;
- uncertainty relating to the outcome of the lawsuit filed against us by the U.S. Department of Justice and certain state attorneys general, including the success or failure of any appeal and the timing of any future decisions, which could result in the imposition of behavioral remedies against us or us voluntarily making certain changes to our business practices, the effects of which in either case could have a material adverse impact on our business;
- changes affecting the Company's ability or desire to execute its share repurchase program, including repurchasing up to $6.6 billion of common shares through the second quarter of 2016, such as actions by bank regulatory agencies, acquisitions, the Company's quarterly and annual results of operations and capital needs;
- the potential failure of the U.S. Congress to renew legislation regarding the active financing exception to Subpart F of the Internal Revenue Code, the Company's geographic mix of income being weighted more to higher tax jurisdictions than expected and unfavorable tax audits and other unanticipated tax items, all of which could result in a higher effective tax rate for 2015 than expected and have an adverse impact on net income;

Forward Looking Statements

- the ability of the Company to meet its on-average and over-time growth targets for revenues net of interest expense, earnings per share and return on average equity over the longer term, which will depend on factors such as the Company's success in implementing its strategies and business initiatives, the effectiveness of marketing and loyalty programs, the willingness and ability of Card Members to sustain spending and on factors outside management's control including regulatory and competitive pressures on pricing, credit trends, currency and interest rate fluctuations, and changes in general economic conditions, such as GDP growth, consumer confidence, unemployment and the housing market;

- the Company's ability to meet our on-average and over-time objective to return 50 percent of capital generated to shareholders through dividends and share repurchases, which will depend on factors such as achieving the Company's EPS and ROE targets, approval of the Company's capital plans by its regulators, the amount the Company spends on acquisitions, results of operations and capital needs; and

- factors beyond the Company's control such as changes in global economic and business conditions, including consumer and business spending, the availability and cost of capital, unemployment and political conditions, foreign currency rates, fire, power loss, disruptions in telecommunications, severe weather conditions, natural disasters, terrorism, cyber attacks or fraud, which could significantly affect spending on American Express cards, delinquency rates, loan balances and travel-related spending or disrupt the Company's global network systems and ability to process transactions.

A further description of these uncertainties and other risks can be found in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 and the Company's other reports filed with the Securities and Exchange Commission.
