(Mark One)

- ☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended April 30, 2023
OR
☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For transition period from to .

Commission File Number 001-38553.

DOMO, INC.

(Exact Name of Registrant as Specified in its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

27-3687433

(I.R.S. Employer Identification No.)

772 East Utah Valley Drive
American Fork, UT 84003

(Address of principal executive offices, including zip code)

(801) 899-1000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading symbol(s)	Name of each exchange on which registered
Class B Common Stock, par value \$0.001 per share	DOMO	The Nasdaq Global Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☒ Accelerated filer	☐
Non-accelerated filer	☐ Smaller reporting company	☐
	Emerging growth company	☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes ☐ No ☒

As of June 1, 2023, there were approximately 3,263,659 shares of the registrant's Class A common stock and 32,446,941 shares of the registrant's Class B common stock outstanding.

SUMMARY RISK FACTORS

Our business is subject to numerous risks and uncertainties, as described further in the section of this report captioned "[Risk Factors](#)," which may cause us not to realize the full benefits of our strengths or may cause us to be unable to successfully execute all or part of our strategy. Some of the most significant challenges and risks include the following:

- we have a history of losses and may never achieve profitability;
- if we fail to manage our growth effectively, our business and operating results will be adversely affected;
- our ability to raise capital in the future may be limited, and, if we fail to raise capital when needed in the future, we could be prevented from growing or could be forced to delay or eliminate product development efforts or other operations;
- adverse events or perceptions affecting the financial services industry could adversely affect our operating results, financial condition and prospects;
- if we are unable to attract new customers in a manner that is cost-effective, our revenue growth could be slower than we expect, and our business may be harmed;
- if customers do not renew their contracts with us or reduce their use of our platform, our revenue will decline and our operating results and financial condition may be adversely affected;
- if customers do not expand their use of our platform or adopt additional use cases, our growth prospects, operating results and financial condition may be adversely affected;
- third parties could make it difficult or prevent us from accessing their systems;
- we face intense competition, and we may not be able to compete effectively, which could reduce demand for our platform and adversely affect our business, growth, revenue and market share;
- we have recently experienced management and board turnover, which creates uncertainties and could harm our business;
- we are subject to governmental laws, regulation and other legal obligations, particularly those related to privacy, data protection and information security, and any actual or perceived failure to comply with such obligations could impair our efforts to maintain and expand our customer base, causing our growth to be limited and harming our business;
- if our network, application or computer systems are breached or unauthorized access to customer data or other sensitive data is otherwise obtained, our platform may be perceived as insecure and we may lose existing customers or fail to attract new customers, our reputation may be damaged and we may incur significant liabilities;
- third-party claims that we are infringing or otherwise violating the intellectual property rights of others, whether successful or not, could subject us to costly and time-consuming litigation or require us to obtain expensive licenses, and our business could be harmed;
- the success of our business depends in part on our ability to protect and enforce our intellectual property rights;

- the dual class structure of our common stock has the effect of concentrating voting control with Joshua G. James, our founder and chief executive officer, which will limit your ability to influence the outcome of important transactions, including a change in control; and
 - economic uncertainties or downturns could materially adversely affect our business.

1. Overview and Basis of Presentation

Description of Business and Basis of Presentation

Domo, Inc. (the Company) provides a cloud-based platform that digitally connects everyone from the CEO to the frontline employee with all the data, systems and people in an organization, giving them access to real-time data and insights and allowing them to put data to work for everyone so they can multiply their impact on the business. The Company is incorporated in Delaware. The Company's headquarters is located in American Fork, Utah and the Company has subsidiaries in the United Kingdom, Australia, Japan, Hong Kong, Singapore, New Zealand, Canada, and India.

The accompanying unaudited condensed consolidated financial statements, which include the accounts of the Company and its wholly owned subsidiaries, have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). All intercompany balances and transactions have been eliminated in consolidation. The Company's fiscal year ends on January 31.

Unaudited Condensed Consolidated Financial Statements

The accompanying condensed consolidated balance sheet as of April 30, 2023, and the condensed consolidated statements of operations, comprehensive loss, stockholders' deficit, and cash flows for the three months ended April 30, 2022 and 2023 are unaudited. The unaudited condensed consolidated financial statements have been prepared on a basis consistent with the annual consolidated financial statements and, in the opinion of management, reflect all adjustments necessary to state fairly the Company's financial position as of April 30, 2023 and its results of operations and cash flows for the three months ended April 30, 2022 and 2023. The financial data and the other financial information disclosed in the notes to these condensed consolidated financial statements related to the three-month periods are also unaudited. The results of operations for the three months ended April 30, 2023 are not necessarily indicative of the results to be expected for the fiscal year ending January 31, 2024 or for any other future year or interim period.

The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the related notes thereto as of and for the year ended January 31, 2023, included in the Company's Annual Report on Form 10-K.

Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make estimates, judgments and assumptions that affect the amounts reported in the condensed consolidated financial statements and the accompanying notes. The Company bases its estimates on historical experience and on other assumptions that its management believes are reasonable under the circumstances. Actual results could differ from those estimates. The Company's estimates and judgments include the determination of standalone selling prices for the Company's services, which are used to determine revenue recognition for arrangements with multiple performance obligations; the amortization period for deferred contract acquisition costs; valuation of the Company's stock-based compensation and related service period; useful lives of fixed assets; capitalization and estimated useful life of internal-use software; the incremental borrowing rate used to calculate the present value of capitalized leases; evaluation for impairment of long-lived and intangible assets including goodwill; and the allowance for doubtful accounts and expected credit losses.

Foreign Currency

The functional currencies of the Company's foreign subsidiaries are the respective local currencies. The cumulative effect of translation adjustments arising from the use of differing exchange rates from period to period is included in accumulated other comprehensive income within the condensed consolidated balance sheets. Changes in the cumulative foreign translation adjustment are reported in the condensed consolidated statements of stockholders' deficit and the condensed consolidated statements of comprehensive loss. Transactions denominated in currencies other than the functional currency are remeasured at the end of the period and when the related receivable or payable is settled, which may result in transaction gains or losses. Foreign currency transaction gains and losses are included in other expense, net in the condensed

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

1. Overview and Basis of Presentation (Continued)

consolidated statements of operations. All assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the exchange rate on the balance sheet date. Revenue and expenses are translated at the average exchange rate during the period, and equity balances are translated using historical exchange rates.

Segment Information

The Company operates as one operating segment. The Company's chief operating decision maker is its chief executive officer, who reviews financial information presented on a consolidated basis for purposes of making operating decisions, assessing financial performance and allocating resources.

2. Summary of Significant Accounting Policies

Cash, Cash Equivalents, and Restricted Cash

Cash and cash equivalents consist of cash on hand, money market funds and highly liquid investments purchased with an original maturity date of 90 days or less from the date of purchase. The fair value of cash equivalents approximated their carrying value as of January 31, 2023 and April 30, 2023. Restricted cash relates to an outstanding letter of credit established in conjunction with an amendment to an existing lease agreement.

Accounts Receivable

Accounts receivable are recorded at the invoiced amount (net of allowance), do not require collateral, and do not bear interest. The Company's payment terms generally provide that customers pay within 30 days of the invoice date.

The Company maintains an allowance for doubtful accounts and expected credit losses for amounts the Company does not expect to collect. In establishing the required allowance, management considers historical losses, current market conditions, customers' financial condition and credit quality, the age of the receivables, and current payment patterns. Account balances are written off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote.

Contract Acquisition Costs

Contract acquisition costs, net are stated at cost net of accumulated amortization and primarily consist of deferred sales commissions, which are considered incremental and recoverable costs of obtaining a contract with a customer. Contract acquisition costs for initial contracts are deferred and then amortized on a straight-line basis over the period of benefit, which the Company has determined to be approximately four years. The period of benefit is determined by taking into consideration contractual terms, expected customer life, changes in the Company's technology and other factors. Contract acquisition costs for renewal contracts are not commensurate with contract acquisition costs for initial contracts and are recorded as expense when incurred if the period of benefit is one year or less. If the period of benefit is greater than one year, costs are deferred and then amortized on a straight-line basis over the period of benefit, which the Company has determined to be two years. Contract acquisition costs related to professional services and other performance obligations with a period of benefit of one year or less are recorded as expense when incurred. Amortization of contract acquisition costs is included in sales and marketing expenses in the accompanying condensed consolidated statements of operations.

Amortization expense related to contract acquisition costs was \$4.3 million and \$4.6 million for the three months ended April 30, 2022 and 2023, respectively. There was no impairment charge in relation to contract acquisition costs for the periods presented.

Property and Equipment, Net

Property and equipment, net, are stated at cost less accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets or over the related lease terms (if shorter). Repairs and maintenance costs are expensed as incurred.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

2. Summary of Significant Accounting Policies (Continued)

The estimated useful lives of property and equipment are as follows:

Computer equipment and software	2-3 years
Furniture, vehicles and office equipment	3 years
Leasehold improvements	Shorter of remaining lease term or estimated useful life

Leases

At the inception of a contract, the Company determines whether the contract is or contains a lease. Leases with a term greater than one year are recognized on the balance sheet as right-of-use (ROU) assets and lease liabilities. The Company has elected the short-term leases practical expedient which allows any leases with a term of 12 months or less to be considered short-term and thus not have an ROU asset or lease liability recognized on the balance sheet.

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and operating lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at commencement date. As these leases do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. The incremental borrowing rate is the rate incurred to borrow on a collateralized basis over a similar term and amount equal to the lease payments in a similar economic environment. The operating lease ROU asset also includes any lease payments made in advance of lease expense and excludes lease incentives and initial direct costs incurred. Certain lease terms include options to terminate or extend the lease for periods of one to three years. The Company does not include these optional periods in its minimum lease terms or in the determination of the ROU assets and lease liabilities associated with these leases unless the options are reasonably certain to be exercised. Lease expense for minimum lease payments is recognized on a straight-line basis over the lease term. ROU assets are subject to evaluation for impairment or disposal on a basis consistent with other long-lived assets.

The Company has lease agreements with lease and non-lease components which the Company has elected to account for as a single lease component. On the lease commencement date, the Company establishes assets and liabilities for the present value of estimated future costs to retire long-lived assets at the termination or expiration of a lease. Such assets are depreciated over the lease term to operating expense.

Income from subleases is recorded in other expense, net in the accompanying condensed consolidated statements of operations.

Capitalized Internal-Use Software Costs

The Company capitalizes certain costs related to development of its platform incurred during the application development stage. Costs related to preliminary project activities and post-implementation activities are expensed as incurred. Maintenance and training costs are also expensed as incurred. Capitalized costs are included in property and equipment.

Capitalized internal-use software is amortized generally as subscription cost of revenue, with a smaller portion related to operations amortized as research and development within operating expenses. All capitalized internal-use software is amortized on a straight-line basis over its estimated useful life, which is generally three years. Management evaluates the useful lives of these assets on an annual basis and tests for impairment whenever events or changes in circumstances occur that could impact the recoverability of these assets.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price in a business combination over the fair value of net tangible and intangible assets acquired. Goodwill and indefinite-lived intangible assets are not amortized, but rather tested for impairment at least annually on November 1 or more often if and when circumstances indicate that the carrying value may not be recoverable. Finite-lived intangible assets are amortized over their useful lives.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

2. Summary of Significant Accounting Policies (Continued)

Goodwill is tested for impairment based on reporting units. The Company periodically reevaluates the business and has determined that it continues to operate in one segment, which is also considered the sole reporting unit. Therefore, goodwill is tested for impairment at the consolidated level.

The Company reviews its long-lived assets, including property and equipment, finite-lived intangible assets, and ROU assets for impairment whenever an event or change in facts and circumstances indicates that their carrying amounts may not be recoverable. Recoverability of these assets is measured by comparing the carrying amount to the estimated undiscounted future cash flows expected to be generated. If the carrying amount exceeds the undiscounted cash flows, the assets are determined to be impaired and an impairment charge is recognized as the amount by which the carrying amount exceeds fair value.

There was no goodwill acquired and no impairment charges for goodwill during the periods presented.

Revenue Recognition

The Company derives revenue primarily from subscription revenue, which consists of subscription-based agreements and, to a lesser extent, consumption-based agreements for its cloud-based platform. The Company also sells professional services. Revenue is recognized when control of these services is transferred to customers in an amount that reflects the consideration to which the Company expects to be entitled to in exchange for those services, net of sales taxes.

For sales through channel partners, the Company considers the channel partner to be the end customer for the purposes of revenue recognition as the Company's contractual relationships with channel partners do not depend on the sale of the Company's services to their customers and payment from the channel partner is not contingent on receiving payment from their customers. The Company's contractual relationships with channel partners do not allow returns, rebates, or price concessions.

Pricing is generally fixed at contract inception and therefore, the Company's contracts do not contain a significant amount of variable consideration.

Revenue recognition is determined through the following steps:

- Identification of the contract, or contracts, with a customer
- Identification of the performance obligations in the contract
- Determination of the transaction price
- Allocation of the transaction price to the performance obligations in the contract
- Recognition of revenue when, or as, performance obligations are satisfied

Subscription Revenue

Revenue from subscription-based agreements primarily consists of fees paid by customers to access the Company's cloud-based platform, including support services. The majority of the Company's subscription-based agreements have multi-year contractual terms and a smaller percentage have annual contractual terms. Revenue is recognized ratably over the related contractual term beginning on the date that the platform is made available to a customer. Access to the platform represents a series of distinct services as the Company continually provides access to and fulfills its obligation to the end customer over the subscription term. The series of distinct services represents a single performance obligation that is satisfied over time. The Company recognizes revenue ratably because the customer receives and consumes the benefits of the platform throughout the contract period. The Company's contracts are generally non-cancelable. Consumption-based agreements include fees for a committed annual spend based upon an estimated volume of usage. Revenue from consumption-based contracts is also recognized ratably over the related contractual term of the contract. Amounts for the annual commitment will expire if unused at the end of each annual period.

2. Summary of Significant Accounting Policies (Continued)

Professional Services and Other Revenue

Professional services revenue consists of implementation services sold with new subscriptions as well as professional services sold separately. Other revenue includes training and education. Professional services arrangements are billed in advance, and revenue from these arrangements is recognized as the services are provided, generally based on hours incurred. Training and education revenue is also recognized as the services are provided.

Contracts with Multiple Performance Obligations

Most of the Company's contracts with new customers contain multiple performance obligations, generally consisting of subscriptions and professional services. For these contracts, individual performance obligations are accounted for separately if they are distinct. The transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. Standalone selling prices are determined based on historical standalone selling prices, taking into consideration overall pricing objectives, market conditions and other factors, including contract value, customer demographics, platform tier, and the number and types of users within the contract.

Deferred Revenue

The Company's contracts are typically billed annually in advance. Deferred revenue includes amounts collected or billed in excess of revenue recognized. Deferred revenue is recognized as revenue as the related performance obligations are satisfied. Deferred revenue that will be recognized during the succeeding twelve-month period is recorded as a current liability and the remaining portion is recorded as a noncurrent liability.

Cost of Revenue

Cost of subscription revenue consists primarily of third-party hosting services and data center capacity; employee-related costs directly associated with cloud infrastructure and customer support personnel, including salaries, benefits, bonuses and stock-based compensation; amortization expense associated with capitalized software development costs; depreciation expense associated with computer equipment and software; certain fees paid to various third parties for the use of their technology and services; and allocated overhead. Allocated overhead includes items such as information technology infrastructure, rent, and employee benefit costs.

Cost of professional services and other revenue consists primarily of employee-related costs associated with these services, including stock-based compensation; third-party consultant fees; and allocated overhead.

Advertising Costs

Advertising costs are expensed as incurred. Advertising expense was \$3.9 million and \$3.0 million for the three months ended April 30, 2022 and 2023, respectively.

Research and Development

Research and development expenses consist primarily of employee-related costs for the design and development of the Company's platform, contractor costs to supplement staff levels, third-party web services, consulting services, and allocated overhead. Research and development expenses, other than software development costs qualifying for capitalization, are expensed as incurred.

Stock-Based Compensation

The Company has granted stock-based awards, consisting of stock options and restricted stock units, to its employees, certain consultants and certain members of its board of directors. The Company records stock-based compensation based on the grant date fair value of the awards, which include stock options and restricted stock units, and recognizes the fair value of those awards as expense using the straight-line method over the requisite service period of the award.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

2. Summary of Significant Accounting Policies (Continued)

For restricted stock units that contain market conditions, the Company recognizes stock-based compensation based on the estimated grant date fair value of market condition awards using a Monte Carlo simulation, and the awards are expensed over the service period using an accelerated attribution method.

Stock-based compensation expense related to purchase rights issued under the 2018 Employee Stock Purchase Plan (ESPP) is based on the Black-Scholes option-pricing model fair value of the estimated number of awards as of the beginning of the offering period. Stock-based compensation expense is recognized using the straight-line method over the offering period.

Income Taxes

The Company accounts for income taxes in accordance with the liability method of accounting for income taxes. Under this method, the Company recognizes a liability or asset for the deferred income tax consequences of all temporary differences between the tax basis of assets and liabilities and their reported amounts in the condensed consolidated financial statements that will result in taxable or deductible amounts in future years when the reported amounts of the assets and liabilities are recovered or settled. These deferred income tax assets or liabilities are measured using the enacted tax rates that will be in effect when the differences are expected to affect taxable income.

Valuation allowances are provided when it is more-likely-than-not that some or all of the deferred income tax assets may not be realized. In assessing the need for a valuation allowance, the Company has considered its historical levels of income, expectations of future taxable income and ongoing tax planning strategies. Because of the uncertainty of the realization of its deferred tax assets, the Company has a full valuation allowance for domestic net deferred tax assets, including net operating loss carryforwards, and tax credits related primarily to research and development. Realization of its deferred tax assets is dependent primarily upon future U.S. taxable income.

Tax positions are recognized in the condensed consolidated financial statements when it is more-likely-than-not the position will be sustained upon examination by the tax authorities. The Company's policy for recording interest and penalties related to income taxes, including uncertain tax positions, is to record such items as a component of the provision for income taxes.

Concentrations of Credit Risk and Significant Customers

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash, cash equivalents, restricted cash, and accounts receivable. Cash denominated in currencies other than the United States dollar represented 26% and 25% of total cash, cash equivalents, and restricted cash as of January 31, 2023 and April 30, 2023, respectively.

The Company maintains its cash accounts with financial institutions where, at times, deposits exceed federal insured limits. The Company may invest its excess cash in money market funds, certificates of deposit, or in short-term investments consisting of highly-rated debt securities.

No single customer accounted for more than 10% of revenue for the three months ended April 30, 2022 and 2023 or more than 10% of accounts receivable as of January 31, 2023 and April 30, 2023.

The Company is primarily dependent upon third parties in order to meet the uptime and performance requirements of its customers. Any disruption of or interference with the Company's use of these third parties would impact operations.

Net Loss per Share

The Company computes net loss per share using the two-class method required for multiple classes of common stock and participating securities. The rights, including the liquidation and dividend rights, of the Class A common stock and Class B common stock are substantially identical, other than voting rights. Accordingly, the Class A common stock and Class B common stock share equally in the Company's net losses.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

2. Summary of Significant Accounting Policies (Continued)

Basic net loss per share is computed by dividing net loss by the weighted-average number of shares of common stock outstanding during the period. Diluted net loss per share is computed by dividing net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period increased by common shares that could be issued upon conversion or exercise of other outstanding securities to the extent those additional common shares would be dilutive. The dilutive effect of potentially dilutive securities is reflected in diluted net loss per share by application of the treasury stock method. During periods when the Company is in a net loss position, basic net loss per share is the same as diluted net loss per share as the effects of potentially dilutive securities are anti-dilutive.

Recent Accounting Pronouncements

In March 2020, the FASB issued ASU No. 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting*. This ASU is intended to provide optional expedients and exceptions for applying U.S. GAAP to contract modifications and hedging relationships, subject to meeting certain criteria, to ease the potential accounting and financial reporting burden associated with the expected market transition from the London Interbank Offered Rate ("LIBOR") and other interbank offered rates to alternative reference rates. In December 2022, the FASB issued ASU No. 2022-06, *Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848*. This ASU defers the sunset date from December 31, 2022 to December 31, 2024 and is effective immediately. The Company plans to adopt this standard when LIBOR is discontinued and is currently evaluating the impact on its consolidated financial statements and related disclosures.

3. Cash, Cash Equivalents, and Restricted Cash

The amortized cost and estimated fair value of the Company's cash and cash equivalents as of January 31, 2023 and April 30, 2023 were as follows (in thousands):

	January 31, 2023			
	Amortized Cost	Unrealized Gain	Unrealized Loss	Estimated Fair Value
Cash	\$ 38,789	\$ —	\$ —	\$ 38,789
Cash equivalents:				
Money market funds	8,591	—	—	8,591
Certificates of deposit	15,420	—	—	15,420
Restricted cash⁽¹⁾	\$ 3,700	\$ —	\$ —	\$ 3,700
Total cash, cash equivalents, and restricted cash	<u>\$ 66,500</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 66,500</u>

	April 30, 2023			
	Amortized Cost	Unrealized Gain	Unrealized Loss	Estimated Fair Value
Cash	\$ 55,614	\$ —	\$ —	\$ 55,614
Cash equivalents:				
Money market funds	6,674	—	—	6,674
Restricted cash⁽¹⁾	3,700	—	—	3,700
Total cash, cash equivalents, and restricted cash	<u>\$ 65,988</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 65,988</u>

(1) Related to an outstanding letter of credit. See Footnote 12 "Commitments and Contingencies" for further details regarding this letter of credit.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

4. Fair Value Measurements

Assets Measured at Fair Value on a Recurring Basis

Financial instruments recorded at fair value in the financial statements are categorized as follows:

- Level 1: Observable inputs that reflect quoted prices for identical assets or liabilities in active markets.
- Level 2: Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3: Unobservable inputs reflecting management's assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

The following tables summarize the assets measured at fair value on a recurring basis as of January 31, 2023 and April 30, 2023 by level within the fair value hierarchy (in thousands):

January 31, 2023				
	Level 1	Level 2	Level 3	Total
Cash equivalents:				
Money market funds	\$ 8,591	\$ —	\$ —	\$ 8,591
Certificates of deposit	—	15,420	—	15,420
Total cash equivalents	<u>\$ 8,591</u>	<u>\$ 15,420</u>	<u>\$ —</u>	<u>\$ 24,011</u>
April 30, 2023				
	Level 1	Level 2	Level 3	Total
Cash equivalents:				
Money market funds	\$ 6,674	\$ —	\$ —	\$ 6,674
Total cash equivalents	<u>\$ 6,674</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 6,674</u>

During the three months ended April 30, 2023, the Company had no transfers between levels of the fair value hierarchy of its assets and liabilities measured at fair value.

Fair Value of Other Financial Instruments

The carrying amounts of certain financial instruments, including cash held in banks, accounts receivable, accounts payable, accrued liabilities, and other liabilities approximate fair value due to their short-term maturities and are excluded from the fair value tables above.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

5. Property and Equipment

Property and equipment, net consisted of the following (in thousands):

	As of January 31, 2023	As of April 30, 2023
Capitalized internal-use software development costs	\$ 44,399	\$ 46,480
Computer equipment and software	2,038	1,918
Leasehold improvements	3,070	3,281
Furniture, vehicles and office equipment	813	817
	50,320	52,496
Less accumulated depreciation and amortization	(28,945)	(30,336)
	<u>\$ 21,375</u>	<u>\$ 22,160</u>

Depreciation and amortization expense related to property and equipment was \$1.6 million and \$1.5 million for the three months ended April 30, 2022 and 2023, respectively.

The Company capitalized \$1.9 million and \$2.6 million in software development costs during the three months ended April 30, 2022 and 2023, respectively. Amortization of capitalized software development costs was \$1.4 million and \$1.3 million for the three months ended April 30, 2022 and 2023, respectively.

6. Intangible Assets

Intangible assets consisted of the following (in thousands):

	As of January 31, 2023	As of April 30, 2023
Intellectual property excluding patents	\$ 2,458	\$ 2,458
Patents	950	950
	3,408	3,408
Less accumulated amortization	(614)	(634)
	<u>\$ 2,794</u>	<u>\$ 2,774</u>

Amortization expense related to intangible assets was \$20,000 and \$20,000 for the three months ended April 30, 2022 and 2023, respectively. Intellectual property excluding patents is considered an indefinite-lived asset due to the fact that it is renewable in perpetuity. The patents were acquired and are being amortized over a weighted-average remaining useful life of approximately 4.0 years.

Domo, Inc.

7. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following (in thousands):

	As of January 31, 2023	As of April 30, 2023
Accrued expenses	\$ 13,772	\$ 12,665
Accrued payroll and benefits	11,476	12,024
Accrued commissions	5,438	3,337
Accrued bonus	6,708	3,273
Accrued payroll taxes	2,841	2,136
Sales and other taxes payable	1,111	991
Employee stock purchase plan liability	3,071	642
Other accrued liabilities	4,889	4,588
	<u>\$ 49,306</u>	<u>\$ 39,656</u>

8. Leases

The Company leases office space under non-cancelable operating leases with various expiration dates through 2027. These leases require monthly lease payments that may be subject to annual increases throughout the lease term.

Components of lease expense are summarized as follows (in thousands):

	Three Months Ended April 30, 2022	2023
Operating lease expense	\$ 1,711	\$ 1,634
Short-term lease expense	382	265
Total lease expense	<u>\$ 2,093</u>	<u>\$ 1,899</u>

Lease term and discount rate information are summarized as follows:

	As of April 30, 2023
Weighted average remaining lease term (years)	3.8
Weighted average discount rate	10.0%

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

8. Leases (Continued)

Maturities of lease liabilities as of April 30, 2023 are as follows (in thousands):

Year Ending January 31:		
2024 ⁽¹⁾	\$	4,760
2025		5,745
2026		5,203
2027		5,343
2028		1,797
Total lease payments		22,848
Less imputed interest		(3,835)
Present value of lease liabilities	\$	19,013

(1) Net of \$0.4 million of tenant improvements which are expected to be utilized in fiscal 2024.

Cash paid for operating leases was \$0.8 million and \$1.7 million for the three months ended April 30, 2022 and 2023, respectively, and was included in net cash used in operating activities in the condensed consolidated statements of cash flows.

9. Deferred Revenue and Performance Obligations

Deferred Revenue

Significant changes in the Company's deferred revenue balance for the three months ended April 30, 2023 were as follows (in thousands):

Balance as of January 31, 2023	\$	185,882
Revenue recognized that was included in the deferred revenue balance at the beginning of the period		(73,324)
Increase due to billings excluding amounts recognized as revenue during the period		64,165
Balance as of April 30, 2023	\$	176,723

Transaction Price Allocated to Remaining Performance Obligations

Transaction price allocated to remaining performance obligations represents the remaining amount of revenue the Company expects to recognize from existing non-cancelable contracts, whether billed or unbilled. As of April 30, 2023, approximately \$336.5 million of revenue was expected to be recognized from remaining performance obligations for subscription contracts. The Company expects to recognize approximately \$220.5 million of this amount during the twelve months following April 30, 2023, with the balance recognized thereafter. As of April 30, 2023, approximately \$20.2 million of revenue was expected to be recognized from remaining performance obligations for professional services and other contracts, \$17.0 million of which is expected to be recognized during the twelve months following April 30, 2023, and the balance recognized thereafter.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

10. Geographic Information

Revenue by geographic area is determined by the billing address of the customer. The following table sets forth revenue by geographic area (in thousands):

	Three Months Ended April 30,	
	2022	2023
United States	\$ 58,568	\$ 63,000
Japan	6,434	6,070
Other	9,462	10,388
Total	<u>\$ 74,464</u>	<u>\$ 79,458</u>
Percentage of revenue by geographic area:		
United States	79 %	79 %
Japan	9 %	8 %
Other	12 %	13 %

Other than the United States, no other individual country exceeded 10% of total revenue for the three months ended April 30, 2022 and 2023. As of April 30, 2023, substantially all of the Company's property and equipment was located in the United States.

11. Debt

Credit Facility

The Company has a credit facility that permits up to \$100.0 million in term loan borrowings, all of which had been drawn as of April 30, 2023. The credit facility is secured by substantially all of the Company's assets.

In August 2020, the Company entered into an amendment to the credit facility which extended the maturity date for the outstanding loan from October 1, 2022 to April 1, 2025. Per the amendment, the Company is required to comply with a financial covenant requiring the Company to maintain a minimum balance of unrestricted cash and cash equivalents equal to \$10.0 million until the Company's six-month adjusted cash flow is greater than zero. The amendment also revised the maximum debt ratio financial covenant and included an amendment fee of \$5.0 million, which accrues interest at a rate of 9.5% per year. The amendment fee, along with its accrued interest, is to be paid at the earlier of the payment date, maturity date, or the date the loan becomes payable.

The credit facility requires interest-only payments until the maturity date. A portion of the interest that accrues on the outstanding principal of each term loan is payable in cash on a monthly basis, which portion accrues at a floating rate equal to the greater of (1) 7% and (2) three-month LIBOR plus 5.5% per year. In the event that LIBOR is unavailable, interest will accrue at a floating rate equal to the greater of (1) 7% and (2) the U.S. prime rate plus 2.75% per year. LIBOR is expected to be replaced as an index rate in financial transactions by an alternative benchmark rate in the near future. While the credit facility currently provides for a fallback from LIBOR to the U.S. prime rate, it is possible that the Company may amend the credit facility to provide for a methodology to effect a transition from LIBOR to a new benchmark rate. As of April 30, 2023, the interest rate was approximately 10.7%. In addition to the 10.7%, a fixed rate equal to 2.5% per year accrues on the outstanding principal of each term loan and is added to the principal amount of the outstanding term loan on a monthly basis. During the three months ended April 30, 2022 and 2023, \$0.7 million and \$0.7 million of interest was capitalized, respectively.

The credit facility requires a closing fee of \$7.0 million to be paid on the earliest of (1) the date the term loan is prepaid, (2) the term loan maturity date, which is April 1, 2025, and (3) the date the term loan becomes due and payable. Due to the long-term nature of the closing fee, and the amendment fee described above, these fees were recorded at present value as an increase to other liabilities, noncurrent and an increase to debt issuance costs. These liabilities will be accreted to their full value over the term of the loan, with such accretion recorded as interest expense in other expense, net in the condensed

Domo, Inc.

Notes to Condensed Consolidated Financial Statements (Continued)

(unaudited)

11. Debt (Continued)

consolidated statements of operations. Debt issuance costs are presented as an offset to the outstanding principal balance of the term loans on the condensed consolidated balance sheets and are being amortized as interest expense in other expense, net in the condensed consolidated statements of operations over the term of the loan using the effective interest rate method.

The balances in long-term debt consisted of the following (in thousands):

	As of January 31, 2023	As of April 30, 2023
Principal	\$ 113,427	\$ 114,129
Less: unamortized debt issuance costs	(4,820)	(4,355)
Net carrying amount	<u>\$ 108,607</u>	<u>\$ 109,774</u>

The \$100.0 million credit facility contains customary conditions to borrowing, events of default and covenants, including covenants that restrict the Company's ability to dispose of assets, make material changes to the nature, control or location of the business, merge with or acquire other entities, incur indebtedness or encumbrances, make distributions to holders of the Company's capital stock, make certain investments or enter into transactions with affiliates. In addition, the Company is required to comply with a financial covenant based on the ratio of outstanding indebtedness to annualized recurring revenue. Under the facility, the maximum ratio is 0.500 on January 31, 2023 through the maturity date. The credit facility defines annualized recurring revenue as four times the Company's aggregate revenue for the immediately preceding quarter (net of recurring discounts and discounts for periods greater than one year) less the annual contract value of any customer contracts pursuant to which the Company was advised during such quarter would not be renewed at the end of the current term plus the annual contract value of existing customer contract increases during such quarter. This covenant is measured quarterly on a three-month trailing basis. Upon the occurrence of an event of default, such as non-compliance with covenants, any outstanding principal, interest and fees become due immediately. The Company was in compliance with the covenant terms of the credit facility at January 31, 2023 and April 30, 2023.

The Company incurred interest expense of \$3.4 million and \$4.5 million for the three months ended April 30, 2022 and 2023, respectively.

Stock Warrants

In connection with the credit facility described above, the Company issued warrants which were exercisable for an aggregate of 125,000 shares of Class B common stock at an exercise price of \$17.8736 per share. These warrants were net exercised in September 2020, resulting in the issuance of 68,508 shares of Class B common stock.

Upon execution of the August 2020 amendment, the Company issued an additional 100,000 fully vested warrants to purchase Class B common stock with an exercise price of \$0.01. These warrants were exercised in May 2021, resulting in the issuance of 100,000 shares of Class B common stock.

Warrants issued in connection with the credit facility were recorded as an increase to additional paid-in capital with a corresponding increase to debt issuance costs.

See Note 13 "Stockholders' Deficit" for further details regarding stock warrants.

12. Commitments and Contingencies

Litigation

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

12. Commitments and Contingencies (Continued)

The Company is involved in legal proceedings from time to time arising in the normal course of business. Management believes that the outcome of these proceedings will not have a material impact on the Company's financial condition, results of operations, or liquidity.

Warranties and Indemnification

The Company's subscription services are generally warranted to perform materially in accordance with the terms of the applicable customer service order under normal use and circumstances. Additionally, the Company's arrangements generally include provisions for indemnifying customers against liabilities if its subscription services infringe a third party's intellectual property rights. Furthermore, the Company may also incur liabilities if it breaches the security or confidentiality obligations in its arrangements. To date, the Company has not incurred significant costs and has not accrued a liability in the accompanying condensed consolidated financial statements as a result of these obligations.

The Company has entered into service-level agreements with some of its customers defining levels of uptime reliability and performance and permitting those customers to receive credits for prepaid amounts related to unused subscription services if the Company fails to meet certain of the defined service levels. In very limited instances, the Company allows customers to early terminate their agreements if the Company repeatedly or significantly fails to meet those levels. If the Company repeatedly or significantly fails to meet contracted upon service levels, a contract may require a refund of prepaid unused subscription fees. To date, the Company has not experienced any significant failures to meet defined levels of uptime reliability and performance as set forth in its agreements and, as a result, the Company has not accrued any liabilities related to these agreements in the condensed consolidated financial statements.

Other Purchase Commitments

The Company has also entered into certain non-cancelable contractual commitments related to cloud infrastructure services in the ordinary course of business. There have been no material changes in these commitments as disclosed in the Annual Report on Form 10-K.

Letter of Credit

In conjunction with a September 2022 amendment to an existing lease agreement, the Company provided a \$3.7 million letter of credit to secure the Company's obligations to pay the landlord for the cost of improvements in excess of the landlord's contribution. No draws have been made on the letter of credit. The letter of credit expires September 2023 and contains an option for renewal. The amount underlying such letter of credit is reflected as restricted cash under cash, cash equivalents, and restricted cash in the Company's condensed consolidated balance sheets as of April 30, 2023.

13. Stockholders' Deficit

Preferred Stock

The Company's Board of Directors has the authority, without further action by the Company's stockholders, to issue up to 10,000,000 shares of preferred stock in one or more series and to fix the rights, preferences, and privileges thereof, including voting rights. As of January 31, 2023 and April 30, 2023, no shares of preferred stock were issued and outstanding.

Common Stock

The Company has two classes of common stock, Class A and Class B. Each share of Class A common stock is entitled to 40 votes per share and is convertible at any time into one share of Class B common stock. Each share of Class A common stock will convert automatically into one share of Class B common stock upon any transfer, whether or not for value. Each share of Class B common stock is entitled to one vote per share. Holders of Class A common stock and Class B common stock vote together as a single class on all matters (including the election of directors) submitted to a vote of stockholders, unless otherwise required by law or the Company's certificate of incorporation. Subject to preferences that may be applicable to any then-outstanding preferred stock, holders of Class A common stock and Class B common stock are entitled to receive dividends, if any, as may be declared by the Company's board of directors.

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

13. Stockholders' Deficit (Continued)

At January 31, 2023 and April 30, 2023, there were 3,263,659 shares of Class A common stock authorized, issued and outstanding.

At January 31, 2023 and April 30, 2023, there were 500,000,000 shares of Class B common stock authorized. At January 31, 2023 and April 30, 2023, there were 31,572,826 and 32,446,941 shares of Class B common stock issued and outstanding, respectively.

Class B Common Stock Warrants

In connection with a line of credit signed in July 2016, the Company issued warrants to purchase shares of Class B common stock. As of April 30, 2023, there were 3,333 shares of Class B common stock subject to issuance under outstanding warrants, which are exercisable at \$34.35 per share.

14. Equity Incentive Plans

In April 2011, the Company established the 2011 Equity Incentive Plan (2011 Plan), which was amended in September 2011 to provide for the issuance of stock options and other stock-based awards. In June 2018, the Company adopted the 2018 Equity Incentive Plan (2018 Plan). The 2018 Plan provides for the grant of incentive and nonstatutory stock options, restricted stock, RSUs, stock appreciation rights, performance units, and performance shares to employees, consultants, and members of the Company's board of directors.

The number of shares available for issuance under the 2018 Plan includes an annual increase on the first day of each fiscal year equal to the least of: (1) 3,500,000 shares; (2) 5% of the outstanding shares of Class A and Class B common stock as of the last day of the immediately preceding fiscal year; and (3) such other amount as the Company's board of directors may determine no later than the last day of the immediately preceding year. During the three months ended April 30, 2023, the number of shares available for grant under the 2018 Plan was increased by 1,741,824 shares. As of April 30, 2023, there were 4,533,470 shares available for grant under the 2018 Plan.

In connection with the IPO, the 2011 Plan was terminated. With the establishment of the 2018 Plan, the Company no longer grants equity-based awards under the 2011 Plan and any shares that expire, terminate, are forfeited or repurchased by the Company, or are withheld by the Company to cover tax withholding obligations, under the 2011 Plan, will become available for future grant under the 2018 Plan. The Company recognized stock-based compensation expense related to its equity incentive plans as follows (in thousands):

	Three Months Ended April 30,	
	2022	2023
Cost of revenue:

Stock Options

Stock options typically vest over a four-year period and have a term of ten years from the date of grant. There were no stock options granted during the three months ended April 30, 2022 and April 30, 2023.

The following table sets forth the outstanding common stock options and related activity for the three months ended April 30, 2023:

	Shares Subject to Outstanding Options	Weighted- Average Exercise Price per Share	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (in thousands)
Outstanding as of January 31, 2023	876,284	\$ 26.40	1.9	\$ 59
Expired	(11,039)	26.89		
Outstanding as of April 30, 2023	<u>865,245</u>	<u>\$ 26.39</u>	<u>1.4</u>	<u>\$ 62</u>

The aggregate intrinsic value of options exercised was \$1.4 million during the three months ended April 30, 2022, and there were no options exercised during the three months ended April 30, 2023. The intrinsic value represents the excess of the market closing price of the Company's common stock on the date of exercise over the exercise price of each option. The intrinsic value of options as of April 30, 2023 is based on the market closing price of the Company's Class B common stock on that date.

As of April 30, 2023, all outstanding stock options were vested and exercisable and stock-based compensation expense has been recognized related to all outstanding stock options.

Restricted Stock Units

Restricted stock units (RSUs) granted under the Plan primarily vest and settle upon the satisfaction of a service-based condition. The service-based condition for these awards is generally satisfied over three or four years with a cliff vesting period of one or two years and quarterly vesting thereafter. RSUs include performance-based restricted stock units (PSUs), which are subject to a market condition and settle upon the satisfaction of a service-based condition. Disclosures related to RSU activity include the impact of PSUs.

During the three months ended April 30, 2022 the Company granted 71,667 PSUs with both a market and service-based condition. These awards were subsequently modified and related to the service-based condition, which resulted in a \$1.1 million reversal of stock-based compensation expense during the three months ended April 30, 2023. Additionally, 23,889 of these PSUs were canceled during the three months ended April 30, 2023.

The following table sets forth the outstanding RSUs and related activity for the three months ended April 30, 2023:

	Number of Shares	Weighted- Average Grant Date Fair Value
Outstanding as of January 31, 2023	3,894,094	\$ 48.27
Granted	1,418,835	14.10
Vested	(704,314)	44.81
Canceled	(489,825)	43.94
Outstanding as of April 30, 2023	<u>4,118,790</u>	<u>\$ 37.61</u>

As of April 30, 2023, there was \$127.1 million of unrecognized stock-based compensation expense related to outstanding RSUs which is expected to be recognized over a weighted-average period of 2.2 years.

Domo, Inc.

14. Equity Incentive Plans (Continued)

Employee Stock Purchase Plan

In June 2018, the Company's board of directors adopted the ESPP. The number of shares of Class B common stock available for issuance under the ESPP increases on the first day of each fiscal year equal to the least of: (1) 1,050,000 shares of Class B common stock, (2) 1.5% of the outstanding shares of Class A and Class B common stock of the Company on the last day of the immediately preceding fiscal year, and (3) such other amount as the administrator of the ESPP may determine on or before the last day of the immediately preceding year. During the three months ended April 30, 2023, the number of shares available under the ESPP was increased by 522,547 shares. As of April 30, 2023, there were 353,053 shares available under the ESPP.

The ESPP generally provides for consecutive overlapping 12-month offering periods comprising two six-month purchase periods. The offering periods are scheduled to start on the first trading day on or after April 1 and October 1 of each year. The ESPP is intended to qualify as a tax-qualified plan under Section 423 of the Internal Revenue Code and permits participants to elect to purchase shares of Class B common stock through payroll deductions of up to 25% of their eligible compensation. Under the ESPP, a participant may purchase a maximum of 300 shares during each purchase period.

Amounts deducted and accumulated by the participant will be used to purchase shares of Class B common stock at the end of each purchase period. The purchase price of the shares will be 85% of the lower of the fair market value of Class B common stock on the first trading day of each offering period or the fair market value of Class B common stock on the applicable exercise date. If the fair market value of a share of Class B common stock on the exercise date of an offering period is less than it was on the first trading day of that offering period, participants automatically will be withdrawn from that offering period following their purchase of shares on the exercise date and will be re-enrolled in a new offering period. Participants may end their participation at any time during an offering period and will be paid their accrued contributions that have not yet been used to purchase shares of Class B common stock. Participation ends automatically upon termination of employment.

As of April 30, 2023, a total of approximately 363,316 shares were issuable to employees based on estimated shares available and contribution elections made under the ESPP. Shares available were estimated assuming that the plan will be increased by an amount approximating 1.5% of shares outstanding as of January 31, 2024. As of April 30, 2023, total unrecognized stock-based compensation related to the ESPP was \$1.9 million, which is expected to be recognized over a weighted-average period of 0.8 years.

15. Income Taxes

The Company calculated the year-to-date income tax provision by applying the estimated annual effective tax rate to the year-to-date pre-tax income for each applicable jurisdiction and adjusted for discrete tax items in the period. The Company's tax expense was \$0.2 million and \$0.2 million for the three months ended April 30, 2022 and 2023, respectively. The income tax for these periods was primarily attributable to foreign and state taxes.

For the periods presented, the difference between the U.S. statutory rate and the Company's effective tax rate is primarily due to the full valuation allowance on its U.S. tax assets. The effective tax rate is also impacted by earnings realized in foreign jurisdictions.

16. Net Loss Per Share

The Company computes net loss per share using the two-class method required for multiple classes of common stock and participating securities. The rights, including the liquidation and dividend rights, of the Class A common stock and Class B common stock are substantially identical, other than voting rights. Accordingly, the Class A common stock and Class B common stock share equally in the Company's net losses.

The following table sets forth the calculation of basic and diluted net loss per share during the periods presented (in thousands, except per share amounts):

Domo, Inc.
Notes to Condensed Consolidated Financial Statements (Continued)
(unaudited)

16. Net Loss Per Share (Continued)

	Three Months Ended April 30,			
	2022		2023	
	Class A	Class B	Class A	Class B
Numerator:				
Net loss	\$ (3,224)	\$ (29,664)	\$ (2,261)	\$ (22,142)
Denominator:				
Weighted-average number of shares used in computing net loss per share, basic and diluted	3,264	30,031	3,264	31,958
Net loss per share, basic and diluted	\$ (0.99)	\$ (0.99)	\$ (0.69)	\$ (0.69)

Since the Company was in a loss position for all periods presented, basic net loss per share is the same as diluted net loss per share for all periods as the inclusion of all potential common shares outstanding would have been anti-dilutive. The weighted-average impact of potentially dilutive securities that were not included in the diluted per share calculations because they would be anti-dilutive was as follows (in thousands):

	Three Months Ended April 30,	
	2022	2023
Options to purchase common stock	416	4
Restricted stock units	888	68
Employee stock purchase program	72	—
Common stock warrants	1	—
	1,377	72

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements containing words such as "may," "believe," "could," "will," "seek," "depends," "anticipate," "expect," "intend," "plan," "project," "projections," "business outlook," "estimate," or similar expressions constitute forward-looking statements. You should read these statements carefully because they discuss future expectations, contain projections of future results of operations or financial condition or state other "forward-looking" information. These statements relate to our future plans, objectives, expectations, intentions and financial performance and the assumptions that underlie these statements. They include, but are not limited to, statements about:

- our ability to attract new customers and retain and expand our relationships with existing customers;
- our future financial performance, including our expectations regarding our revenue, cost of revenue, gross profit, operating expenses, key metrics, ability to generate cash flow and ability to achieve and maintain future profitability;
- the potential impact on our business transitioning to a consumption-based pricing model;
- the anticipated trends, market opportunity, growth rates and challenges in our business and in the business intelligence software market;
- our plans with respect to amending our loan agreement to effect transition from LIBOR to new benchmark rate;
- the efficacy of our sales and marketing efforts;
- our ability to compete successfully in competitive markets;
- our ability to respond to and capitalize on rapid technological changes;
- our expectations and management of future growth;
- our ability to enter new markets and manage our expansion efforts, particularly internationally;
- our ability to develop new product features;
- our ability to attract and retain key employees and qualified technical and sales personnel;
- our ability to effectively and efficiently protect our brand;
- our ability to timely scale and adapt our infrastructure;
- the effect of general economic and market conditions on our business;
- our ability to protect our customers' data and proprietary information;
- our ability to maintain, protect, and enhance our intellectual property and not infringe upon others' intellectual property; and
- our ability to comply with all governmental laws, regulations and other legal obligations.

Our actual results may differ materially from those contained in or implied by any forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this report, including those factors discussed in Part II, Item 1A (Risk Factors).

In light of the significant uncertainties and risks inherent in these forward-looking statements, you should not regard these statements as a representation or warranty by us or anyone else that we will achieve our objectives or plans in any specified time frame, or at all, or as predictions of future events. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Overview

We founded Domo in 2010 with the vision of digitally connecting everyone within the enterprise with real-time, rich, relevant data and then enabling all employees to collaborate and act on that data. We realized that many organizations were unable to access the massive amounts of data that they were collecting in siloed cloud applications and on-premise databases. Furthermore, even for organizations that were capable of accessing their data, the process for doing so was time-consuming, costly, and often resulted in the data being out-of-date by the time it reached decision makers. The delivery format, including alert functionality, and devices were not adequate for the connected and real-time mobile workforce. Based on these observations, it was apparent that all organizations, regardless of size or industry, were failing to unlock the power of all of their people, data, and systems. To address these challenges, we provide a modern cloud-based data experience platform that digitally connects everyone at an organization — from the CEO to frontline employees — with all the people, data, and systems in an organization, giving them access to real-time data and insights and allowing them to put data to work for everyone so they can multiply their impact on the business.

We typically offer our platform to our customers as a subscription-based service. Subscription fees are based upon the chosen Domo package which includes tier-based platform capabilities, or usage. Business leaders, department heads and managers are the typical initial subscribers to our platform, deploying Domo to solve a business problem or to enable departmental access. Over time, as customers recognize the value of our platform, we engage with CIOs and other executives to facilitate broad enterprise adoption.

We recently began offering our platform as a consumption-based service. Customers have an annual purchase commitment which is paid upfront, and is based on an estimated volume of usage. We believe this model could increase customer adoption and allow us to better land, expand, and retain customers over the long term, and thereby have a positive impact on sales and marketing productivity. We believe this has potential to remove many of the barriers of adoption and better align our pricing to the value delivered to our customers. We expect an increase in the number of consumption-based agreements in future periods. However, we have limited experience with consumption-based agreements and changes in our pricing and subscription models subject us to a number of uncertainties.

As of April 30, 2023, 65% of our customers were under multi-year contracts on a dollar-weighted basis, compared to 65% of customers as of January 31, 2023. The high percentage revenue from multi-year contracts, among both new and existing customers, has enhanced the predictability of our subscription revenue. We typically invoice our customers annually in advance for subscriptions to our platform.

Remaining performance obligations (RPO) represents the remaining amount of revenue we expect to recognize from existing non-cancelable contracts, whether billed or unbilled. As of April 30, 2022 and 2023, total RPO was \$351.5 million and \$356.7 million, respectively, representing year-over-year growth of 1%. The amount of RPO expected to be recognized as revenue in the next twelve months was \$225.0 million and \$237.5 million as of April 30, 2022 and 2023, respectively, representing year-over-year growth of 6%.

We had total revenue of \$74.5 million and \$79.5 million for the three months ended April 30, 2022 and 2023, respectively, reflecting a year-over-year increase of 7%. For the three months ended April 30, 2022 and 2023, no single customer accounted for more than 10% of our total revenue, nor did any single organization when accounting for multiple subsidiaries or divisions which may have been invoiced separately. Revenue from customers with billing addresses in the United States comprised 79% and 79% of our total revenue for the three months ended April 30, 2022 and 2023, respectively.

We expect our revenue growth rate to decline in the near term, due in part to the effects of the macroeconomic environment which has elongated the software sales cycle and increased deal scrutiny. In connection with the slowing growth rate, we've taken steps to better align our sales team and focus on controlling costs, which we expect will result in improved margins, sustained positive cash flow and efficient growth in the long term.

We have incurred significant net losses since our inception, including net losses of \$32.9 million and \$24.4 million for the three months ended April 30, 2022 and 2023, respectively, and had an accumulated deficit of \$1,354.4 million at April 30, 2023. We expect to incur losses for the foreseeable future and may not be able to achieve or sustain profitability.

Impact of Macroeconomic Conditions

Prevailing macroeconomic conditions have impacted, and may continue to impact, our business and those of our customers in a manner that we may not be able to quantify or isolate from other drivers of our performance. Ongoing concerns about the health of the U.S. and global economies may cause certain existing and potential customers to reduce or

delay technology spending or, seek payment or other concessions from us, which may materially and negatively impact our operating results, financial condition and prospects. Furthermore, the United States has been experiencing historically elevated rates of inflation. This inflationary environment may cause us to incur higher operating costs that we may not be able to recoup through the pricing of our platform, and may further contribute to reduced or delayed technology spend by our customers in an effort to mitigate their own rising costs.

Factors Affecting Performance

Continue to Attract New Customers

We believe that our ability to expand our customer base is an important indicator of market penetration, the growth of our business, and future business opportunities. We define a customer at the end of any particular quarter as an entity that generated revenue greater than \$2,500 during that quarter. In situations where an organization has multiple subsidiaries or divisions, each entity that is invoiced at a separate billing address is treated as a separate customer. In cases where customers purchase through a reseller, each end customer is counted separately. We define enterprise customers as companies with over \$1 billion in revenue, and companies with less than \$1 billion in revenue are corporate customers. In order to maintain comparability, companies who become customers with revenue below \$1 billion and subsequently exceed that threshold are considered enterprise customers for all periods presented.

As of April 30, 2023, we had over 2,500 customers. For the three months ended April 30, 2022 and 2023, our enterprise customers accounted for 49% and 47% of our revenue, respectively. In order to accelerate customer growth, we intend to further develop our partner ecosystem by establishing agreements with more software resellers, systems integrators and other partners to provide broader customer and geographic coverage. We believe we are underpenetrated in the overall market and have significant opportunity to expand our customer base over time.

Customer Upsell and Retention

We employ a land, expand, and retain sales model, and our performance depends on our ability to retain customers and expand the use of our platform at existing customers over time. It currently takes multiple years for our customers to fully embrace the power of our platform. We believe that as customers deploy greater volumes and sources of data for multiple use cases, the unique features of our platform can address the needs of everyone within their organization. We are still in the early stages of expanding within many of our customers.

We have invested in platform capabilities and online support resources that allow our customers to expand the use of our platform in a self-guided manner. Our professional services, customer support and customer success functions also support our sales force by helping customers to successfully deploy our platform and implement additional use cases. In addition, we believe our partner ecosystem will become increasingly important over time. We work closely with our customers to drive increased engagement with our platform by identifying new use cases through our customer success teams, as well as in-platform, self-guided experiences. We actively engage with our customers to assess whether they are satisfied and fully realizing the benefits of our platform. While these efforts often require a substantial commitment and upfront costs, we believe our investment in product, customer support, customer success and professional services will create opportunities to expand our customer relationships over time.

Our ability to drive growth and generate incremental revenue depends heavily on our ability to retain our customers and increase their usage of our platform. With that objective in mind, we allocate our customer success and customer support resources to align with maximizing the retention and expansion of our subscription revenue.

An important metric that we use to evaluate our performance in retaining customers is gross retention rate. We calculate our gross retention rate by taking the dollar amount of annual contract value (ACV) that renews in a given period divided by the ACV that was up for renewal in that same period. The ACV of multi-year contracts is also considered in the calculation based on the period in which the annual anniversary of the contract falls. Our gross retention rate was 93% and 88% for the 12 months ended April 30, 2022 and 2023, respectively.

As we continue to enhance our product and develop methods to encourage wider and more strategic adoptions, we expect that customer retention will increase over the long term. Our ability to successfully upsell and the impact of cancellations may vary from period to period. The extent of this variability depends on a number of factors including the size and timing of upsells and cancellations relative to the initial subscriptions.

Sales and Marketing Efficiency

We are focused on increasing the efficiency of our sales force and marketing activities by enhancing account targeting, messaging, field sales operations and sales training in order to accelerate the adoption of our platform. Our sales strategy depends on our ability to continue to attract and retain top talent, to increase our pipeline of business, and to enhance sales productivity. We focus on productivity per quota-carrying sales representative and the time it takes our sales representatives to reach full productivity.

We manage our pipeline by sales representative to ensure sufficient coverage of our sales targets. Our ability to manage our sales productivity and pipeline are important factors to the success of our business. We have taken steps to better align our sales and marketing spending and headcount to efficiently grow and attract new customers.

Sales and marketing expense as a percentage of total revenue was 61% for the three months ended April 30, 2022 compared to 54% for the three months ended April 30, 2023.

Leverage Research and Development Investments for Future Growth

We plan to continue to make investments in areas of our business to continue to expand our platform functionality. This may include investing in machine learning algorithms, predictive analytics, and other artificial intelligence technologies to create alerts, detect anomalies, optimize queries, and suggest areas of interest to help people focus on what matters most. These investments may also include extending the functionality and effectiveness of our platform through improvements to the Domo Appstore and developer toolkits, which enable customers and partners to quickly build and deploy custom applications. The amount of new investments required to achieve our plans is expected to decrease as a percentage of revenue compared to historical years.

Research and development expense as a percentage of total revenue was 31% for the three months ended April 30, 2022 compared to 29% for the three months ended April 30, 2023.

Key Business Metric

Billings

Billings represent our total revenue plus the change in deferred revenue in a period. Billings reflect sales to new customers plus subscription renewals and upsells to existing customers, and represent amounts invoiced for subscription, support and professional services. We typically invoice our customers annually in advance for subscriptions to our platform. Because we generate most of our revenue from customers who are invoiced on an annual basis and have a wide range of annual contract values, we may experience variability due to typical enterprise buying patterns and timing of large initial contracts, renewals and upsells.

The following table sets forth our billings for the three months ended April 30, 2022 and 2023:

	Three Months Ended April 30,	
	2022	2023
Billings (in thousands)	\$ 72,926	\$ 70,299

Components of Results of Operations

Revenue

We derive our revenue primarily from subscription revenue, which consists of subscription-based agreements and, to a lesser extent, consumption-based agreements for our cloud-based platform. We also sell professional services.

Revenue from subscription-based agreements is a function of customers, platform tier, number of users, price per user, and transaction and data volumes. Revenue is recognized ratably over the related contractual term beginning on the date that the platform is made available to a customer. We recognize revenue ratably because the customer receives and consumes the benefits of the platform throughout the contract period. Consumption-based agreements include fees for a committed annual spend based upon an estimated volume of usage. Revenue from consumption-based contracts is also recognized ratably over the related contractual term of the contract. Amounts for the annual commitment will expire if unused at the end of each annual period.

Professional services and other revenue primarily consists of implementation services sold with new subscriptions, as well as professional services sold separately, including training and education. Professional services are generally billed in advance and revenue from these arrangements is recognized as the services are performed. Our professional services engagements typically span from a few weeks to several months.

Cost of Revenue

Cost of subscription revenue consists primarily of third-party hosting services and data center capacity; salaries, benefits, bonuses and stock-based compensation, or employee-related costs, directly associated with cloud infrastructure and customer support personnel; amortization expense associated with capitalized software development costs; depreciation expense associated with computer equipment and software; certain fees paid to various third parties for the use of their technology and services; and allocated overhead. Allocated overhead includes items such as information technology infrastructure, rent, and certain employee benefit costs.

Cost of professional services and other revenue consists primarily of employee-related costs directly associated with these services, third-party consultant fees, and allocated overhead.

Operating Expenses

Sales and Marketing. Sales and marketing expenses consist primarily of employee-related costs directly associated with our sales and marketing staff and commissions. Other sales and marketing costs include digital marketing programs and promotional events to promote our brand, including Domopalooza, our annual user conference, as well as tradeshows, advertising and allocated overhead. Contract acquisition costs, including sales commissions, are deferred and then amortized on a straight-line basis over the period of benefit, which we have determined to be approximately four years for initial contracts. Contract acquisition costs related to renewal contracts and professional services are recorded as expense when incurred if the period of benefit is one year or less. If the period of benefit is greater than one year, costs are deferred and then amortized on a straight-line basis over the period of benefit, which we have determined to be two years.

Research and Development. Research and development expenses consist primarily of employee-related costs for the design and development of our platform, contractor costs to supplement staff levels, third-party web services, consulting services, and allocated overhead. Our cycle of frequent updates has facilitated rapid innovation and the introduction of new product features throughout our history. We capitalize certain software development costs that are attributable to developing new features and adding incremental functionality to our platform, and amortize such costs as costs of subscription revenue over the estimated life of the new feature or incremental functionality, which is generally three years.

General and Administrative. General and administrative expenses consist of employee-related costs for executive, finance, legal, human resources, recruiting and administrative personnel; professional fees for external legal, accounting, recruiting and other consulting services; and allocated overhead costs.

Other Expense, Net

Other expense, net consists primarily of interest expense related to long-term debt. It also includes the effect of exchange rates on foreign currency transaction gains and losses foreign currency gains and losses upon remeasurement of intercompany balances, interest income, and sublease income. The transactional impacts of foreign currency are recorded as foreign currency losses (gains) in the condensed consolidated statements of operations.

Income Taxes

Income taxes consists primarily of income taxes related to foreign and state jurisdictions in which we conduct business. Because of the uncertainty of the realization of the deferred tax assets, we have a full valuation allowance for domestic net deferred tax assets, including net operating loss carryforwards and tax credits related primarily to research and development.

Results of Operations

The following tables set forth selected condensed consolidated statements of operations data and such data as a percentage of total revenue for each of the periods indicated:

	Three Months Ended April 30,

Professional services and other	13	11		
Total	100 %	100 %		

The increase in subscription revenue was primarily due to a \$6.4 million increase from new customers. Our customer count increased 7% from April 30, 2022 to April 30, 2023. For the purpose of this comparison, new customers are defined as those

added since the end of the prior year quarter. The decrease in professional services and other revenue was due to a higher amount of revenue recognized from the delivery of custom apps during the three months ended April 30, 2022.

Cost of Revenue, Gross Profit and Gross Margin

	Three Months Ended April 30,		\$ Change	% Change
	2022	2023		
	(in thousands)			
Cost of revenue:				
Subscription	\$ 10,667	\$ 10,612	\$ (55)	(1)%
Professional services and other	6,994	7,957	963	14
Total cost of revenue	\$ 17,661	\$ 18,569	\$ 908	5
Gross profit	\$ 56,803	\$ 60,889	\$ 4,086	7
Gross margin:				
Subscription	83 %	85 %		
Professional services and other	29	5		
Total gross margin	76	77		

Professional services and other cost of revenue increased primarily due to a \$1.2 million increase in outsourced services.

Subscription gross margin improved due to cost improvements from continued proactive management and optimization of our third-party hosting services. We expect subscription gross margin to remain relatively flat in future periods.

Services gross margin declined primarily due to a higher amount of revenue recognized from the delivery of custom apps during the three months ended April 30, 2022 and a higher volume of hours delivered by partners at a higher average cost per hour during the three months ended April 30, 2023. We expect the gross margin for professional services to fluctuate from period to period due to changes in the proportion of services provided by third-party consultants and their respective rates, seasonality, and timing of projects with higher margins.

Operating Expenses

	Three Months Ended April 30,		\$ Change	% Change
	2022	2023		
	(in thousands)			
Operating expenses:				
Sales and marketing	\$ 45,587	\$ 43,162	\$ (2,425)	(5)%
Research and development	23,191	23,435	244	1
General and administrative	16,660	14,001	(2,659)	(16)
Total operating expenses	\$ 85,438	\$ 80,598	\$ (4,840)	(6)
Percentage of revenue:				
Sales and marketing	61 %	54 %		
Research and development	31	29		
General and administrative	22	19		

Sales and marketing expenses decreased primarily due to a \$2.1 million decrease in marketing expense, of which \$1.5 represented marketing events. We expect sales and marketing expense to increase in the near term as we continue to invest in the growth of our business.

Research and development expenses were relatively flat during the three months ended April 30, 2023. In the near term, we expect research and development expense to increase.

General and administrative expenses decreased primarily due to a \$2.1 million decrease in employee-related costs. This decrease included a \$5.3 million decrease in stock-based compensation, which was partially offset by a \$2.1 million increase

in bonus expense and a \$1.3 million increase in executive severance expense. Professional and legal fees decreased by \$0.8 million. In the near term, we expect general and administrative expense to fluctuate from period to period.

Other Expense, Net

	Three Months Ended April 30,		\$ Change	% Change
	2022	2023		
	(in thousands)			
Other expense, net	\$ (4,065)	\$ (4,495)	\$ (430)	11 %

Other expense, net increased primarily due to a \$1.1 million increase in interest expense, partially offset by increases in interest income and sublease income. We expect interest expense to continue to increase modestly due to an increasing principal balance and anticipated higher market interest rates.

Income Taxes

	Three Months Ended April 30,		\$ Change	% Change
	2022	2023		
	(in thousands)			
Provision for income taxes	\$ 188	\$ 199	\$ 11	6 %

In the long term, we expect income tax expense to increase in conjunction with growth in our international subsidiaries and changes in state tax laws.

Liquidity and Capital Resources

As of April 30, 2023, we had \$66.0 million of cash, cash equivalents, and restricted cash which were held for working capital purposes, of which \$3.7 million was restricted cash. Our cash and cash equivalents consist primarily of cash, money market funds, and certificates of deposit. We also have a \$100 million credit facility, all of which had been drawn as of April 30, 2023.

Since inception, we have financed operations primarily from cash collected from customers for our subscriptions and services, periodic sales of convertible preferred stock, our initial public offering and to a lesser extent, debt financing. Our principal uses of cash have consisted of employee-related costs, marketing programs and events, payments related to hosting our cloud-based platform and purchases of short-term investments.

We believe our existing cash and cash equivalents will be sufficient to meet our projected operating requirements for at least the next 12 months. Over the longer term, we plan to continue investing in, among other things, growth opportunities, product development, and sales and marketing. If available funds are insufficient to fund our future activities or execute on our strategy, we may raise additional capital through equity, equity-linked and debt financing, to the extent such funding sources are available. Alternatively, we may be required to reduce expenses to manage liquidity; however, any such reductions could adversely impact our business and competitive position. Our future capital requirements will depend on many factors, including our growth rate; the level of investments we make in product development, sales and marketing activities and other investments to support the growth of our business; the continuing market acceptance of our platform; and customer retention rates, and may increase materially from those currently planned. If we raise additional funds through the incurrence of indebtedness, such indebtedness likely would have rights that are senior to holders of our equity securities and could contain covenants that restrict operations in the same or similar manner as our credit facility. Any additional equity financing likely would be dilutive to existing stockholders. We cannot assure you that any additional financing will be available to us on acceptable terms, or at all.

Moreover, we may not be able to access a portion of our existing cash and cash equivalents due to conditions adversely affecting the financial institutions with which we do business, including limited liquidity, insolvency or receivership. Any such conditions could imperil our ability to access our existing cash and cash equivalents and could have a material adverse effect on our business and financial condition. For additional information, see the section of this report captioned “Risk Factors—Risks Related to Our Financial Position and Capital Needs—Adverse events or perceptions affecting the financial services industry could adversely affect our operating results, financial condition and prospects.”

Although we are not currently a party to any agreement or letter of intent with respect to potential investments in, or acquisitions of, complementary businesses, services or technologies, we may enter into these types of arrangements in the future, which could also require us to seek additional equity financing, incur indebtedness, or use cash resources. We have no present understandings, commitments or agreements to enter into any such acquisitions. We do not have any special purpose entities and we do not engage in off-balance sheet financing arrangements.

Credit Facility

In August 2020, we entered into an amendment to the credit facility which extended the maturity date for the outstanding loan from October 1, 2022 to April 1, 2025. Per the amendment, we are required to comply with a financial covenant requiring us to maintain a minimum balance of unrestricted cash and cash equivalents equal to \$10.0 million until our six-month adjusted cash flow is greater than zero. The amendment also revised the maximum debt ratio financial covenant and included an amendment fee of \$5.0 million, which accrues interest at a rate of 9.5% per year. The amendment fee, along with its accrued interest, is to be paid at the earlier of the payment date, maturity date, or the date the loan becomes payable.

The credit facility permits us to incur up to \$100 million in term loan borrowings, all of which had been drawn as of April 30, 2023. The term loan maturity date is April 1, 2025 with a closing fee of \$7.0 million, which is in addition to the \$5.0 million amendment fee described above. Each term loan requires that we pay only interest until the maturity date. A portion of the interest that accrues on the outstanding principal of each term loan is payable in cash on a monthly basis, which portion accrues at a floating rate equal to the greater of (1) 7.0% and (2) three-month LIBOR plus 5.5% per year. In the event that LIBOR is unavailable, interest will accrue at a floating rate equal to the greater of (1) 7.0% and (2) the U.S. prime rate plus 2.75% per year. LIBOR is expected to be replaced as an index rate in financial transactions by an alternative benchmark rate in the near future. While the credit facility currently provides for a fallback from LIBOR to the U.S. prime rate, it is possible that we may amend the credit facility to provide for a methodology to effect a transition from LIBOR to a new benchmark rate. It is not possible to predict the effect or timing of any establishment of a successor benchmark rate or its effect on our loan agreement or our business generally. The transition from LIBOR could result in our interest costs increasing and our access to capital could change, which could adversely affect our results of operations and cash flows. As of April 30, 2023, the interest rate was approximately 10.7%. In addition to the 10.7%, a fixed rate equal to 2.5% per year accrues on the outstanding principal of each term loan and is added to the principal amount of the outstanding term loan on a monthly basis.

The credit facility contains customary conditions to borrowing, events of default and covenants, including covenants that restrict our ability to dispose of assets, make material changes to the nature, control or location of our business, merge with or acquire other entities, incur indebtedness or encumbrances, make distributions to holders of our capital stock, make investments or enter into transactions with affiliates. The credit facility is secured by substantially all of our assets. In addition, we are required to comply with a financial covenant based on the ratio of our outstanding indebtedness to our annualized recurring revenue. The maximum ratio is 0.500 on January 31, 2023 through the maturity date. The credit facility defines our annualized recurring revenue as four times our aggregate revenue for the immediately preceding quarter (net of recurring discounts and discounts for periods greater than one year) less the annual contract value of any customer contracts pursuant to which we were advised during such quarter would not be renewed at the end of the current term plus the annual contract value of existing customer contract increases during such quarter. This covenant is measured quarterly on a three-month trailing basis. Upon the occurrence of an event of default, such as non-compliance with covenants, any outstanding principal, interest and fees become due immediately. We were in compliance with the covenant terms of the credit facility at January 31, 2023 and April 30, 2023.

Historical Cash Flow Trends

	Three Months Ended April 30,	
	2022	2023
	(in thousands)	
Net cash provided by operating activities	\$ 781	\$ 828
Net cash used in investing activities	(1,937)	(3,576)
Net cash provided by financing activities	2,287	2,032

Operating Activities

Net cash provided by operating activities consisted primarily of payments received from our customers, cash we invest in our personnel, timing and amounts we use to fund marketing programs and events to expand our customer base, and the costs to provide our cloud-based platform and related outsourced professional services to our customers.

Net cash provided by operating activities during the three months ended April 30, 2022 consisted of cash collected from customers of \$90.4 million exceeding the cash outflows of \$89.6 million. Significant components of cash outflows included \$61.2 million for personnel costs and \$11.6 million for marketing programs and events, third-party costs to provide our platform and outsourced professional services.

Net cash provided by operating activities during the three months ended April 30, 2023 consisted of cash collected from customers of \$93.6 million exceeding the cash outflows of \$92.8 million. Significant components of cash outflows included \$53.8 million for personnel costs and \$18.0 million for marketing programs and events, third-party costs to provide our platform and outsourced professional services.

Investing Activities

Our investing activities consisted primarily of property and equipment purchases, which included capitalized development costs related to internal-use software.

Net cash used in investing activities during the three months ended April 30, 2022 consisted primarily of \$1.5 million of capitalized development costs related to internal-use software and \$0.4 million of purchased property and equipment.

Net cash used in investing activities during the three months ended April 30, 2023 consisted primarily of \$2.1 million of capitalized development costs related to internal-use software and \$1.5 million of purchased property and equipment.

Financing Activities

Our financing activities consisted primarily of proceeds received from stock option exercises and our employee stock purchase plan.

Net cash provided by financing activities for the three months ended April 30, 2022 consisted primarily of \$1.6 million of proceeds from shares issued in connection with employee stock purchase plan and \$0.7 million of proceeds received from stock option exercises.

Net cash provided by financing activities for the three months ended April 30, 2023 consisted of \$2.0 million of proceeds from shares issued in connection with our employee stock purchase plan.

Contractual Obligations and Commitments

Our principal commitments consist of long-term debt, obligations under operating leases for office space, and non-cancelable contracts for cloud infrastructure services. There have been no material changes in our contractual obligations and commitments, as disclosed in our Annual Report on Form 10-K.

Critical Accounting Policies and Estimates

We prepare our condensed consolidated financial statements in accordance with generally accepted accounting principles in the United States, or GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that are inherently uncertain and that affect the reported amounts of assets, liabilities, revenue,

costs and expenses, and related disclosures. To the extent that there are material differences between these estimates and actual results, our financial condition or results of operations would be affected. We base our estimates on past experience and other assumptions that we believe are reasonable under the circumstances, and we evaluate these estimates on an ongoing basis. Critical accounting policies and estimates are those that we consider critical to understanding our historical and future performance, as these policies relate to the more significant areas involving management's judgments and estimates.

There have been no material changes to our critical accounting policies and estimates as previously disclosed in our Annual Report on Form 10-K. See "Note 2—Summary of Significant Accounting Policies" of our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for more information regarding our significant accounting policies.

Recent Accounting Pronouncements

See "Note 2—Summary of Significant Accounting Policies" of our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for more information regarding recent accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to certain market risks in the ordinary course of our business. These risks primarily include interest rate, foreign currency exchange rate, and inflation sensitivities as follows:

Interest Rate Risk

As of April 30, 2023, we had \$66.0 million of cash, cash equivalents, and restricted cash, which were held for working capital purposes, of which \$3.7 million was restricted cash. Our cash and cash equivalents consist primarily of cash, money market funds, and certificates of deposit. We do not enter into investments for trading or speculative purposes. Due to the short-term nature of these instruments, we believe that we do not have any material exposure to changes in the fair value of our investment portfolio as a result of changes in interest rates. Decreases in interest rates, however, would reduce future interest income.

We have a credit facility that permits us to incur up to \$100 million in term loan borrowings, all of which had been drawn as of April 30, 2023. The term loans mature on April 1, 2025. A portion of the interest that accrues on outstanding principal of each term loan is payable in cash on a monthly basis, which portion accrues at a floating rate equal to the greater of (1) 7.0% and (2) three-month LIBOR plus 5.5% per year. In the event that LIBOR is unavailable, interest will accrue at a floating rate equal to the greater of (1) 7.0% and (2) the U.S. prime rate plus 2.75% per year. LIBOR is expected to be replaced as an index rate in financial transactions by an alternative benchmark rate in the near future. While the credit facility currently provides for a fallback from LIBOR to the U.S. prime rate, it is possible that we may amend the credit facility to provide for a methodology to effect a transition from LIBOR to a new benchmark rate. It is not possible to predict the effect or timing of any establishment of a successor benchmark rate or its effect on our loan agreement or our business generally. The transition from LIBOR could result in our interest costs increasing and our access to capital could change, which could adversely affect our results of operations and cash flows. As of April 30, 2023, the interest rate was approximately 10.7%. In addition to the 10.7%, a fixed rate equal to 2.5% per year accrues on the outstanding principal of each term loan and is added to the principal amount of the outstanding term loan on a monthly basis.

Interest rate risk also reflects our exposure to movements in interest rates associated with our borrowings. At April 30, 2023, we had total debt outstanding with a carrying amount of \$109.8 million, which approximates fair value. A hypothetical change in interest rates of 100 basis points after April 30, 2023 would not have a material impact on the fair value of our outstanding debt, even at the borrowing limit, or in the returns on our cash.

Foreign Currency Exchange Risk

Due to our international operations, we have foreign currency risks related to revenue and operating expenses denominated in currencies other than the U.S. dollar, primarily the Japanese Yen, British Pound Sterling, and the Australian Dollar. Our subscriptions and services contracts are primarily denominated in the local currency of the customer making the purchase. In addition, a portion of operating expenses are incurred outside the United States and are denominated in foreign currencies. Changes in the relative value of the U.S. dollar to other currencies may negatively affect revenue and other operating results as expressed in U.S. dollars. We do not believe that an immediate 10% increase or decrease in the relative value of the U.S. dollar to other currencies would have a material effect on operating results.

We have experienced and will continue to experience fluctuations in net loss as a result of transaction gains or losses related to remeasuring certain current asset and current liability balances that are denominated in currencies other than the functional currency of the entities in which they are recorded. We have not engaged in the hedging of foreign currency transactions to date. We are considering the costs and benefits of initiating such a program and may in the future hedge balances and transactions denominated in currencies other than the U.S. dollar as we expand international operations.

Inflation Risk

We do not believe that inflation has had a material effect on our business, financial condition or results of operations to date. For example, our subscription contracts often contain pricing terms that are tied to the Consumer Price Index, and our pricing policy for renewals not tied to CPI is designed to approximate changes in CPI. If our costs were to become subject to significant inflationary pressure, we may not be able to fully offset these higher costs with price increases. Our inability or failure to do so could adversely affect our business, financial condition and results of operations.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our principal executive officer and principal financial officer have concluded that as of such date, our disclosure controls and procedures were effective at a reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Disclosure Controls and Procedures

Our management, including our principal executive officer and principal financial officer, do not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Due to inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

State Securities Class Action

In November 2019, a securities class action complaint captioned *Volonte v. Domo, Inc., et. al*, Case No. 19-04-01778, was filed by a stockholder of the Company in the Fourth Judicial District Court for the County of Utah in the State of Utah against the Company, certain of the Company's current and former officers and directors, and the underwriters of the Company's June 2018 initial public offering alleging violations of Sections 11, 12 and 15 of the Securities Act of 1933 in connection with the Company's initial public offering and sought unspecified damages. On August 19, 2020, the defendants filed a motion to dismiss the *Volonte* complaint. On April 13, 2021, the court granted the motion and dismissed the complaint. On April 25, 2021, the plaintiff filed a motion to amend or alter judgment or for reconsideration. On June 2, 2021, the court denied the plaintiff's motion. On June 14, 2021, the plaintiff filed a notice of appeal. On October 14, 2021, the plaintiff/appellant filed his principal brief in the Utah Court of Appeals (Appellate Case No. 20210399-CA). The appeal was fully briefed as of January 20, 2022, and the court heard oral argument from the parties on May 12, 2022. On March 9, 2023, the court affirmed the district court's dismissal of the complaint. The plaintiff did not file a petition for a writ of certiorari in the Utah Supreme Court to challenge the Court of Appeals' decision and the deadline to do so has expired. The case is now closed.

The Company is involved in other legal proceedings from time to time arising in the normal course of business. Management believes that the outcome of these proceedings will not have a material impact on the Company's financial condition, results of operations, or liquidity. See "Note 12—Commitments and Contingencies" of our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for more information regarding our legal proceedings.

Item 1A. Risk Factors

You should carefully consider the following risk factors, in addition to the other information contained in this report, including the section of this report captioned "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our financial statements and related notes. If any of the events described in the following risk factors or the risks described elsewhere in this report occurs, our business, operating results and financial condition could be seriously harmed. This report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements as a result of factors that are described below and elsewhere in this report.

Risks Related to Our Financial Position and Capital Needs

We have a history of losses, and we may not be able to generate sufficient revenue to achieve or maintain profitability in the future.

We incurred net losses of \$32.9 million and \$24.4 million for the three months ended April 30, 2022 and 2023, respectively, and had an accumulated deficit of \$1,354.4 million at April 30, 2023. We may not be able to generate sufficient revenue to achieve or sustain profitability. We expect to continue to incur losses for the foreseeable future and we expect costs to increase in future periods as we expend substantial financial and other resources on, among other things:

- sales and marketing, including any expansion of our direct sales organization, which will require time before these investments generate sales results;
- technology and data center infrastructure, enhancements to cloud architecture, improved disaster recovery protection, increasing data security, compliance and operations expenses;
- data center costs as customers increase the amount of data that is available to our platform and usage on our platform;
- other software development, including enhancements and modifications related to our platform;
- international expansion in an effort to increase our customer base and sales;

- general and administration, including significantly increasing expenses in accounting and legal related to the increase in the sophistication and resources required for public company compliance and other work arising from the growth and maturity of the company;
- competing with other companies, custom development efforts and open source initiatives that are currently in, or may in the future enter, the markets in which we compete;
- maintaining high customer satisfaction and ensuring quality and timely releases of platform enhancements and applications;
- developing our indirect sales channels and strategic partner network;
- maintaining the quality of our cloud and data center infrastructure to minimize latency when using our platform;
- increasing market awareness of our platform and enhancing our brand;
- maintaining compliance with applicable governmental regulations and other legal obligations, including those related to intellectual property and international sales; and
- attracting and retaining top talent in a competitive market.

These expenditures may not result in additional revenue or the growth of our business. If we fail to continue to grow revenue or to achieve or sustain profitability, the market price of our Class B common stock could be adversely affected.

We have been growing and expect to continue to invest in our growth for the foreseeable future. If we fail to manage this growth effectively, our business and operating results will be adversely affected.

We intend to continue to grow our business. If we cannot adequately train new employees, including our direct sales force, or if new employees are not as productive as quickly as we would like, sales may decrease or customers may lose confidence in the knowledge and capability of our employees. In addition, we may make direct investments in our international business, and increase the number of employees outside the United States. We must successfully manage growth to achieve our objectives. Although our business has experienced significant growth in the past, we cannot provide any assurance that our business will continue to grow at any particular rate, or at all.

Our ability to effectively manage the growth of our business will depend on a number of factors, including our ability to do the following:

- effectively recruit, integrate, train and motivate new employees and make them productive, including our direct sales force, while retaining existing employees, maintaining the beneficial aspects of our corporate culture and effectively executing our business plan;
- attract new customers, and retain and increase usage by existing customers;
- recruit and successfully leverage channel partners and app developers;
- successfully enhance our platform;
- continue to improve our operational, financial and management controls;
- protect and further develop strategic assets, including intellectual property rights; and
- manage market expectations and other challenges associated with operating as a public company.

These activities will require significant financial resources and allocation of valuable management and employee resources, and growth will continue to place significant demands on management and our operational and financial infrastructure.

Our future financial performance and ability to execute our business plan will depend, in part, on our ability to effectively manage any future growth. There are no guarantees we will be able to do so. In particular, any failure to successfully implement systems enhancements and improvements will likely negatively impact our ability to manage our expected growth, ensure uninterrupted operation of key business systems and comply with the rules and regulations that are

applicable to public reporting companies. Moreover, if we do not effectively manage the growth of our business and operations, the quality of our platform could suffer, which could negatively affect our brand, operating results and business.

Our ability to raise capital in the future may be limited, and if we fail to raise capital when needed in the future, we could be prevented from growing or could be forced to delay or eliminate product development efforts or other operations.

Our business and operations may consume resources faster than we anticipate. We have incurred cumulative and recurring losses from operations since inception and had an accumulated deficit of \$1,354.4 million as of April 30, 2023. We have also experienced negative or close to breakeven cash flows from operating activities, including cash provided by operating activities of \$0.8 million and \$0.8 million for the three months ended April 30, 2022 and 2023, respectively. As of April 30, 2023, we had \$66.0 million of cash, cash equivalents, and restricted cash which were held for working capital purposes, of which \$3.7 million was restricted cash. Additionally, no amounts were available to draw under our credit facility.

We may need to raise additional funds to invest in growth opportunities, to continue product development and sales and marketing efforts, and for other purposes. Additional financing may not be available on favorable terms, if at all. If adequate funds are not available on acceptable terms, we may be unable to meet our obligations, invest in future growth opportunities, or continue operations at anticipated levels, which could harm our business and operating results. In addition, current and future debt instruments may impose restrictions on our ability to dispose of property, make changes in our business, engage in mergers or acquisitions, incur additional indebtedness, and make investments and distributions. Furthermore, if we issue additional equity securities, stockholders will experience dilution, and the new equity securities could have rights senior to those of our common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of any such future offerings. As a result, stockholders bear the risk that future securities offerings reduce the market price of our Class B common stock and dilute their interest.

Future operating results and key metrics may fluctuate significantly due to a wide range of factors, which makes our future results difficult to predict.

Our operating results and key metrics could vary significantly from quarter to quarter as a result of various factors, some of which are outside of our control, including:

- the expansion of our customer base;
- the size, duration and terms of our contracts with both existing and new customers;
- the introduction of products and product enhancements by competitors, and changes in pricing for products offered by us or our competitors;
- customers delaying purchasing decisions in anticipation of new products or product enhancements by us or our competitors or otherwise;
- changes in customers' budgets;
- seasonal variations in our sales, which have generally historically been highest in our fourth fiscal quarter and lowest in the first fiscal quarter;
- the timing of satisfying revenue recognition criteria, particularly with regard to large transactions;
- the amount and timing of payment for expenses, including infrastructure costs to deliver our platform, research and development, sales and marketing expenses, employee benefit and stock-based compensation expenses and costs related to Domopalooza, our annual user conference that occurs in our first fiscal quarter;
- costs related to the hiring, training and maintenance of our direct sales force;
- the timing and growth of our business, in particular through the hiring of new employees and international expansion; and
- general economic and political conditions, both domestically and internationally, including the impacts of pandemics or other catastrophic events, the Russian invasion of Ukraine, inflation, and adverse impacts to the

financial service services industry, as well as economic conditions specifically affecting industries in which our customers operate.

Any one of these or other factors discussed elsewhere in this report may result in fluctuations in our operating results, meaning that quarter-to-quarter comparisons may not necessarily be indicative of our future performance.

Because we recognize revenue from subscriptions ratably over the terms of our subscription agreements, near-term changes in sales may not be reflected immediately in our operating results.

We offer our platform primarily through subscription agreements, which typically vary in length between one and three years, and may in many cases be subject to automatic renewal or renewal only at a customer's discretion. We generally invoice our customers in annual installments at the beginning of each year in the subscription period. Amounts that have been invoiced are initially recorded as deferred revenue and are recognized ratably over the subscription period. As a result, most of the revenue that we report in each period is derived from the recognition of deferred revenue relating to subscriptions entered into during previous periods. A decline in new or renewed subscriptions in any one quarter is not likely to have a material impact on results for that quarter. However, declines would negatively affect revenue and deferred revenue balances in future periods, and the effect of significant downturns in sales and market acceptance of our platform, and potential changes in our rate of renewals, may not be fully reflected in our results of operations until future periods. Our subscription model also makes it difficult for us to rapidly increase our total revenue through additional sales in any period, as revenue from new customers is recognized over the applicable subscription term. We may be unable to adjust our cost structure to reflect the changes in revenue. In addition, a significant majority of our costs are expensed as incurred, while revenue is generally recognized over the life of the customer agreement. As a result, increased growth in the number of our customers could result in our recognition of more costs than revenue in the earlier periods of the terms of our agreements.

The length, cost and uncertainty associated with sales cycles for enterprise customers may result in fluctuations in our operating results and our failure to achieve the expectations of investors.

Our sales efforts to enterprise customers, which we define as companies with over \$1 billion in revenue, face long sales cycles, complex customer requirements, substantial upfront sales costs, and a relatively low and difficult to predict volume of sales on a quarter-by-quarter basis. This makes it difficult to predict with certainty our sales and related operating performance in any given period. Our sales cycle for new enterprise customers varies from approximately six months to multiple years. Customers often undertake a prolonged evaluation of our platform, including assessing their own readiness, scoping the professional services involved, and comparing our platform to products offered by competitors and their ability to solve the problem internally. Events may occur during this period that affect the size or timing of a purchase or even cause cancellations, which may lead to greater unpredictability in our business and operating results. Moreover, customers often begin to use our platform on a limited basis with no guarantee that they will expand their use of our platform widely enough across their organization to justify the costs of our sales efforts. We may also face unexpected implementation challenges with enterprise customers or more complicated installations of our platform. It may be difficult to deploy our platform if the customer has unexpected database, hardware or software technology issues.

Adherence to our financial plan in part depends on managing the mix of customers, the rate at which customers increase their use of our platform within their organizations, the number of use cases they employ, and the timing and amount of upsells, all of which affect annual contract value. Our financial performance and the predictability of our quarterly financial results may be harmed by failures to secure the higher value enterprise agreements in a timely manner or at all, or changes in the volume of transactions overall, compared to our forecasts, and depends in large part on the successful execution of our direct sales team. The predictability of billings may be adversely impacted by fluctuations in the proportion of contracts that are not billed annually in advance.

Additionally, our quarterly sales cycles are generally more heavily weighted toward the end of the quarter with an increased volume of sales in the last few weeks and days of the quarter. This impacts the timing of recognized revenue and billings, cash collections and delivery of professional services. Furthermore, the concentration of contract negotiations in the last few weeks and days of the quarter could require us to expend more in the form of compensation for additional sales, legal and finance employees and contractors. Compression of sales activity to the end of the quarter also greatly increases the likelihood that sales cycles will extend beyond the quarter in which they are forecasted to close for some sizeable transactions, which will harm forecasting accuracy and adversely impact billings and new customer acquisition and renewal metrics for the quarter in which they are forecasted to close.

Increased sales to customers outside the United States or paid for in currency other than the U.S. dollar exposes us to potential currency exchange losses.

As our international sales and operations increase, so too will the number and significance of transactions, including intercompany transactions, occurring in currencies other than the U.S. dollar. In addition, our international subsidiaries may accumulate assets and liabilities that are denominated in currencies other than the U.S. dollar, which is the functional reporting currency of these entities. Accordingly, changes in the value of foreign currencies relative to the U.S. dollar can affect our revenue and operating results due to foreign currency gains and losses that are reflected in our earnings. We do not currently maintain a program to hedge transactional exposures in foreign currencies. However, in the future, we may use derivative instruments, such as foreign currency forward and option contracts, to hedge certain exposures to fluctuations in foreign currency exchange rates. The use of such hedging activities may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place. Moreover, the use of hedging instruments may introduce additional risks if we are unable to structure effective hedges with such instruments.

Our credit facility contains restrictive covenants that may limit our operating flexibility.

Our credit facility contains restrictive covenants that limit our ability to transfer or dispose of assets, merge with other companies or consummate certain changes of control, acquire other companies, open new offices that contain a material amount of assets, pay dividends, incur additional indebtedness and liens and enter into new businesses. We therefore may not be able to engage in any of the foregoing transactions unless we obtain the consent of the lender or terminate the credit facility, which may limit our operating flexibility. In addition, our credit facility is secured by all of our assets, including our intellectual property, and requires us to satisfy certain financial covenants. There is no guarantee that we will be able to generate sufficient cash flow or sales to meet these financial covenants or pay the principal and interest on any such debt. Furthermore, there is no guarantee that future working capital, borrowings or equity financing will be available to repay or refinance any such debt. Any inability to make scheduled payments or meet the financial covenants on our credit facility would adversely affect our business.

We may be subject to additional obligations to collect and remit sales tax and other taxes, and we may be subject to tax liability for past transactions, which could harm our business.

We do not collect sales and use, value added and similar taxes in all jurisdictions in which we have sales, based on our belief that such taxes are not applicable in certain jurisdictions. State, local and foreign jurisdictions have differing rules and regulations governing sales, use, value added and other taxes, and these rules and regulations are subject to varying interpretations that may change over time. In particular, the applicability of such taxes on subscriptions to our platform in various jurisdictions is unclear. Further, these jurisdictions' rules regarding tax nexus are complex and vary significantly. As a result, we could face the possibility of audits that could result in tax assessments, including associated interest and penalties. A successful assertion that we should be collecting additional sales, use, value added or other taxes in those jurisdictions where we have not historically done so could result in substantial tax liabilities and related penalties for past transactions, discourage customers from purchasing our application or otherwise harm our business and operating results. In addition, we are required to withhold and timely remit payroll-related taxes for which we are also subject to the possibility of audits that could result in tax assessments, including associated interest and penalties.

Changes in tax laws or regulations that are applied adversely to us or our customers could increase the costs of our platform and adversely impact our business.

New income, sales, use or other tax laws, statutes, rules, regulations or ordinances could be enacted at any time, which could affect the tax treatment of our (and our subsidiaries') domestic and foreign financial results. Any new taxes could adversely affect our domestic and international business operations, and our business and financial performance. Further, existing tax laws, statutes, rules, regulations or ordinances could be interpreted, changed, modified or applied adversely to us. Specifically, taxation of cloud-based software is constantly evolving as many state and local jurisdictions consider the taxability of software services provided remotely. These events could require us or our customers to pay additional tax amounts on a prospective or retroactive basis, as well as require us or our customers to pay fines or penalties and interest for past amounts deemed to be due. If we raise our prices to offset the costs of these changes, existing and potential future customers may elect not to continue to use or purchase subscriptions to our platform in the future. Additionally, new, changed, modified or newly interpreted or applied tax laws could increase our customers' and our compliance, operating and other costs, as well as the costs of our platform. Any or all of these events could harm our business and operating results.

We are a multinational organization faced with increasingly complex tax issues in many jurisdictions, and we could be obligated to pay additional taxes in various jurisdictions.

As a multinational organization, we are subject to taxation in several jurisdictions around the world with increasingly complex tax laws, the application of which can be uncertain, and significant judgment and estimates are required in determining our provision for income taxes. Our tax expense may be impacted if our intercompany transactions, which are required to be computed on an arm's-length basis, are challenged and successfully disputed by tax authorities. Our policies governing transfer pricing may be determined to be inadequate and could result in additional tax assessments. The amount of taxes we pay in these jurisdictions could increase substantially as a result of changes in the applicable tax principles, including increased tax rates, new tax laws or revised interpretations of existing tax laws and precedents, which could harm our liquidity and operating results. In addition, the authorities in these jurisdictions could review our tax returns and impose additional tax, interest and penalties, and the authorities could claim that various withholding requirements or other taxes apply to us or our subsidiaries or assert that benefits of tax treaties are not available to us or our subsidiaries, any of which could adversely affect our operating results.

Our ability to use our net operating losses to offset future taxable income may be subject to certain limitations.

As of January 31, 2023, we had NOL carryforwards for federal and state income tax purposes of approximately \$1,166.2 million and \$1,344.7 million, respectively, which may be available to offset taxable income in the future, and which expire in various years beginning in 2032 for federal purposes if not utilized. The state NOLs will expire depending upon the various rules in the states in which we operate. A lack of future taxable income could adversely affect our ability to utilize these NOLs before they expire. In general, under Section 382 of the Internal Revenue Code of 1986, as amended, or the Code, a corporation that undergoes an "ownership change" (as defined under Section 382 of the Code and applicable Treasury Regulations) is subject to limitations on its ability to utilize its pre-change NOLs to offset our future taxable income. An ownership change under Section 382 of the Code could affect our ability to utilize the NOLs to offset our income. Furthermore, our ability to utilize NOLs of companies that we have acquired or may acquire in the future may be subject to limitations. There is also a risk that due to regulatory changes, such as suspensions on the use of NOLs or other unforeseen reasons, our existing NOLs could expire or otherwise be unavailable to reduce future income tax liabilities, including for state tax purposes. For these reasons, we may not be able to utilize a material portion of the NOLs, even if we attain profitability, which could potentially result in increased future tax liability to us and could adversely affect our operating results and financial condition.

Adverse events or perceptions affecting the financial services industry could adversely affect our operating results, financial condition and prospects.

Limited liquidity, defaults, non-performance or other adverse developments affecting financial institutions or parties with which we do business, or perceptions regarding these or similar risks, have in the past and may in the future lead to market-wide liquidity problems. Such developments, and their effects on the broader financial system, could result in a variety of material and adverse impacts on our business operations and financial conditions, including, but not limited to:

- delayed access to deposits or other financial assets or the uninsured loss of deposits or other financial assets;
- loss of access to revolving existing credit facilities or other working capital sources or the inability to refund, roll over or extend the maturity of, or enter into new credit facilities or other working capital resources;
- potential or actual breach of obligations, including U.S. federal and state wage laws and contracts that may require us to maintain letters or credit or other credit support arrangements; and
- termination of cash management arrangements or delays in accessing or actual loss of funds subject to cash management arrangements.

For example, on March 10, 2023, Silicon Valley Bank, or SVB, was closed and placed in receivership and subsequently, additional financial institutions have been placed into receivership. Prior to SVB's closure, we had approximately \$12.4 million in deposit accounts with SVB and an additional \$18.3 million subject to SVB sweep account arrangements (with amounts held in custodial accounts with third-party financial institutions). As a result of U.S. government intervention, we subsequently regained access to our accounts at SVB, and Silicon Valley Bridge Bank has assumed SVB's obligations to honor our standby letter of credit. However, there remains significant uncertainty surrounding the impact of these bank closures on the broader financial system. Moreover, there is no guarantee that the U.S. government will intervene to provide access to uninsured funds in the future in the event of the failure of other financial institutions, or that they would do so in a

timely fashion. In such an event, parties with which we have commercial agreements, including customers and suppliers, may be unable to satisfy their obligations to, or enter into new commercial arrangements with us.

Concerns regarding the U.S. or international financial systems could impact the availability and cost of financing, thereby making it more difficult for us to acquire financing on acceptable terms or at all. In addition, instability in the financial services industry could spur a deterioration in the macroeconomic environment and dampen demand for our products.

Any of these risks could materially impact our operating results, liquidity, financial condition and prospects.

Risks Related to Our Relationships with Customers and Third Parties

If we are unable to attract new customers in a manner that is cost-effective, our revenue growth could be slower than we expect and our business may be harmed.

To increase our revenue, we must add new customers. Demand for our platform is affected by a number of factors, many of which are beyond our control, such as continued market acceptance of our platform for existing and new use cases, the timing of development and release of new applications and features, technological change, growth or contraction in our addressable market, and accessibility across mobile devices, operating systems, and applications, and macroeconomic changes, including the impact of public health epidemics or pandemics, on the demand for technology solutions like ours. In addition, if competitors introduce lower cost or differentiated products or services that are perceived to compete with our features, our ability to sell our features based on factors such as pricing, technology and functionality could be impaired. As a result, we may be unable to attract new customers at rates or on terms that would be favorable or comparable to prior periods, which could negatively affect the growth of our revenue.

Even if we do attract customers, the cost of new customer acquisition may prove so high as to prevent us from achieving or sustaining profitability. We recognize subscription revenue ratably over the term of the subscription period. In general, customer acquisition costs and other upfront costs associated with new customers are much higher in the first year than the aggregate revenue we recognize from those new customers in the first year. As a result, the profitability of a customer to our business in any particular period depends in part upon how long a customer has been a subscriber and the degree to which it has expanded its usage of our platform. Additionally, we intend to continue to hire additional sales personnel to grow our domestic and international operations. If our sales and marketing efforts do not result in substantial increases in revenue, our business, results of operations, and financial condition may be adversely affected.

If customers do not renew their contracts with us or reduce their use of our platform, our revenue will decline and our operating results and financial condition may be adversely affected.

The initial terms of our customer contracts typically vary in length between one and three years, and our customers have no obligation to renew their subscriptions after the expiration of their initial subscription periods. In some cases, the contracts automatically renew (with each party having the option to elect not to renew), but in circumstances where that is not the case, our customers may unilaterally elect not to renew, may seek to renew for lower subscription amounts or for shorter contract lengths, or may choose to renew for the same or fewer applications over time. A majority of our annual recurring revenue is up for renewal during the fiscal year ending January 31, 2024. Our renewal rates may decline or fluctuate as a result of a number of factors, including leadership changes within our customers resulting in loss of sponsorship, limited customer resources, pricing changes by us or competitors, customer satisfaction with our platform and related applications, the acquisition of customers by other companies, procurement or budgetary decisions, and deteriorating general economic conditions, including as a result of public health epidemics or pandemics. To the extent our customer base continues to grow, renewals and additional subscriptions by renewing customers will become an increasingly important part of our results. If our customers do not renew their subscriptions, or decrease the amount they spend with us, revenue will decline and our business will be harmed.

If customers do not expand their use of our platform or adopt additional use cases our growth prospects, operating results and financial condition may be adversely affected.

Our future success depends on our ability to increase the deployment of our platform within and across our existing customers and future customers. Many of our customers initially deploy our platform to specific groups or departments within their organization or for a limited number of use cases. Our growth prospects depend on our ability to persuade customers to expand their use of our platform to additional groups, departments and use cases across their organization.

Historically, we have made significant investments in research and development to build our platform and to offer enterprise customers the features and functionality that they require.

If our future operating results are significantly below the expectations of investors, it could harm the market price of our Class B common stock.

The loss of one or more of our key customers, or a failure to renew our subscription agreements with one or more of our key customers, could negatively affect our ability to market our platform.

We rely on our reputation and recommendations from key customers in order to promote subscriptions to our platform. The loss of, or failure to renew by, any of our key customers could have a significant effect on our revenue, reputation and our ability to obtain new customers. In addition, acquisitions of our customers could lead to cancellation of such customers' contracts, thereby reducing the number of our existing and potential customers.

If we are unable to develop and maintain successful relationships with channel partners, our business, operating results, and financial condition could be adversely affected.

To date, we have been primarily dependent on our direct sales force to sell subscriptions to our platform. Although we have developed relationships with some channel partners, such as referral partners, resellers, and integration partners, these channels have resulted in limited revenue historically. We believe that continued growth in our business is dependent upon identifying, developing, and maintaining strategic relationships with additional channel partners that can drive substantial revenue. If we fail to identify additional channel partners in a timely and cost-effective manner, or at all, or are unable to assist our current and future channel partners in independently selling and deploying our products, our business, results of operations, and financial condition could be adversely affected. Typically, agreements with channel partners are non-exclusive, meaning our channel partners may offer customers the products of several different companies, including products that compete with our platform. They may also cease marketing our platform with limited or no notice and with little or no penalty. Additionally, customer retention and expansion attributable to customers acquired through our channel partners may differ significantly from customers acquired through our direct sales efforts. If our channel partners do not effectively market and sell our products, or fail to meet the needs of our customers, our reputation and ability to grow our business may also be adversely affected.

Sales by channel partners are more likely than direct sales to involve collectability concerns. In particular, sales by our channel partners into developing markets, and accordingly, variations in the mix between revenue attributable to sales by channel partners and revenue attributable to direct sales, may result in fluctuations in our operating results.

We rely upon data centers and other systems and technologies provided by third parties, and technology systems and electronic networks supplied and managed by third parties, to operate our business and interruptions or performance problems with these systems, technologies and networks may adversely affect our business and operating results.

We rely on data centers and other technologies and services provided by third parties in order to manage our cloud-based infrastructure and operate our business. If any of these services becomes unavailable or otherwise is unable to serve our requirements due to extended outages, interruptions, facility closure, or because it is no longer available on commercially reasonable terms, expenses could increase, our ability to manage finances could be interrupted and our operations otherwise could be disrupted or otherwise impacted until appropriate substitute services, if available, are identified, obtained, and implemented.

We do not control, or in some cases have limited control over, the operation of the data center facilities we use, and they are vulnerable to damage or interruption from earthquakes, floods, fires, power loss, telecommunications failures and similar events. They may also be subject to break-ins, sabotage, intentional acts of vandalism and similar misconduct, to adverse events caused by operator error, and to interruptions, data loss or corruption, and other performance problems due to various factors, including introductions of new capabilities, technology errors, infrastructure changes, distributed denial of service attacks, or other security related incidents. For instance, in December 2017, researchers identified significant CPU architecture vulnerabilities commonly known as "Spectre" and "Meltdown" that have required software updates and patches, including for providers of public cloud services, to mitigate such vulnerabilities and such updates and patches have required servers to be offline and potentially slow their performance. We may not be able to rapidly switch to new data centers or move customers from one data center to another in the event of any adverse event. Despite precautions taken at these facilities, the occurrence of a natural disaster, an act of terrorism or other act of malfeasance, a decision to close the facilities without adequate notice or other unanticipated problems at these facilities could result in lengthy interruptions in our service and the loss or corruption of, or unauthorized access to or acquisition of, customer data.

In addition, if we do not accurately predict our infrastructure capacity requirements, customers could experience service shortfalls. The provisioning of additional cloud hosting capacity and data center infrastructure requires lead time. As we continue to add data centers, restructure our data management plans, and increase capacity in existing and future data centers, we may be required to move or transfer our data and customers' data. Despite precautions taken during such processes and procedures, any unsuccessful data transfers may impair customers' use of our platform, and we may experience costs or downtime in connection with the transfer of data to other facilities, which may lead to, among other things, customer dissatisfaction and non-renewals. The owners of our data center facilities have no obligation to renew their agreements with us on commercially reasonable terms, or at all. If we are unable to renew these agreements on commercially reasonable terms, we may be required to transfer to new data center facilities, and we may incur significant costs and possible service interruption in connection with doing so.

Our ability to provide services and solutions to customers also depends on our ability to communicate with customers through the public internet and electronic networks that are owned and operated by third parties. In addition, in order to provide services on-demand and promptly, our computer equipment and network servers must be functional 24 hours per day, which requires access to telecommunications facilities managed by third parties and the availability of electricity, which we do not control. A severe disruption of one or more of these networks or facilities, including as a result of utility or third-party system interruptions, could impair our ability to process information and provide services to our customers.

Any unavailability of, or failure to meet our requirements by, third-party data centers or other third-party technologies or services, or any disruption of the internet or the third-party networks or facilities that we rely upon, could impede our ability to provide services to customers, harm our reputation, result in a loss of customers, cause us to issue refunds or service credits to customers, subject us to potential liabilities, result in contract terminations, and adversely affect our renewal rates. Any of these circumstances could adversely affect our business and operating results.

Contractual disputes with our customers could be costly, time-consuming and harm our reputation.

Our business is contract intensive and we are party to contracts with our customers all over the world. Our contracts can contain a variety of terms, including service levels, security obligations, indemnification and regulatory requirements. Contract terms may not always be standardized across our customers and can be subject to differing interpretations, which could result in disputes with our customers from time to time. If our customers notify us of an alleged contract breach or otherwise dispute any provision under our contracts, the resolution of such disputes in a manner adverse to our interests could negatively affect our operating results.

Additionally, if customers fail to pay us under the terms of our agreements, we may be adversely affected both from the inability to collect amounts due and the cost of enforcing the terms of our contracts, including litigation. The risk of such negative effects increases with the term length of our customer arrangements. Furthermore, some of our customers may seek bankruptcy protection or other similar relief and fail to pay amounts due to us, or pay those amounts more slowly, either of which could adversely affect our operating results, financial position and cash flow.

Risks Related to Our Products and Solutions

We face intense competition, and we may not be able to compete effectively, which could reduce demand for our platform and adversely affect our business, growth, revenue and market share.

The market for our platform is intensely and increasingly competitive and subject to rapidly changing technology and evolving standards. In addition, many companies in our target market are offering, or may soon offer, products and services that may compete with our platform. Furthermore, many potential customers have made significant investments in legacy software systems and may be unwilling to invest in new solutions.

Our current primary competitors generally fall into the following categories:

- large software companies, including suppliers of traditional business intelligence products that provide one or more capabilities that are competitive with our products, such as Microsoft Corporation, Oracle Corporation, SAP AG and IBM;
- business analytics software companies, such as Tableau Software, Inc., Qlik Technologies, Looker Data Sciences, Inc., Sisense, Inc., and Tibco Software, Inc.; and
- SaaS-based products or cloud-based analytics providers such as salesforce.com, Inc. and Infor, Inc.

We expect competition to increase as other established and emerging companies enter the markets in which we compete, as customer requirements evolve and as new products and technologies are introduced. For example, salesforce.com, inc. acquired Tableau Software, Inc. in August 2019 and Alphabet Inc. acquired Looker Data Sciences, Inc. in February 2020.

Many competitors, particularly the large software companies named above, have longer operating histories, significantly greater financial, technical, research and development, marketing, distribution, professional services or other resources and greater name recognition than we do. In addition, many competitors have strong relationships with current and potential customers, channel partners and development partners and extensive knowledge of markets in which we compete. As a result, they may be able to respond more quickly to new or emerging technologies and changes in customer requirements, for example by devoting greater resources to the development, promotion and sale of their products than we do.

Moreover, many of these competitors may bundle their data management and analytics products into larger deals or maintenance renewals, often at significant discounts or at no charge. Increased competition may lead to price cuts, alternative pricing structures or the introduction of products available for free or a nominal price, fewer customer orders, reduced gross margins, longer sales cycles and loss of market share. We may not be able to compete successfully against current and future competitors, and our business, operating results and financial condition will be harmed if we fail to meet these competitive pressures. Even if we are successful in acquiring and retaining customers, those customers may continue to use our competitors' products in addition to our products.

Our ability to compete successfully depends on a number of factors, both within and outside of our control. Some of these factors include ease and speed of platform deployment and use, accessibility across mobile devices, operating systems, and applications, discovery and visualization capabilities, analytical and statistical capabilities, performance and scalability, the quality of our data security infrastructure, the quality and reliability of our customer service and support, total cost of ownership, return on investment and brand recognition. Any failure by us to compete successfully in any one of these or other areas may reduce the demand for our platform, as well as adversely affect our business, operating results and financial condition.

Moreover, current and future competitors may also make strategic acquisitions or establish cooperative relationships among themselves or with others. By doing so, these competitors may increase their ability to meet the needs of customers. These relationships may limit our ability to sell or certify our platform through specific distributors, technology providers, database companies and distribution channels and allow competitors to rapidly gain significant market share. These developments could limit our ability to obtain revenue from existing and new customers. If we are unable to compete successfully against competitors, our business, operating results and financial condition would be harmed.

We continue to evolve our subscription and pricing models and changes could adversely affect our operating results.

Our pricing and subscription models have evolved over time, and will continue to evolve in the future. We have started to introduce consumption-based pricing, which is pricing based upon the use of our platform, for certain of our customers. We have limited experience with determining the optimal pricing for our consumption-based contracts. Changes in our pricing and subscription models subject us to a number of uncertainties, including our ability to plan for and model future growth and make accurate projections regarding our future performance. Changes to our pricing and subscription models may also expose to unexpected or unintended effects, including increased user dissatisfaction, reputational harm and difficulty obtaining or retaining customers. Moreover, large customers, which are the focus of our direct sales efforts, may demand greater price discounts. In an inflationary environment, our costs may increase and we may not be able to adjust our pricing models accordingly, which could adversely impact our financial performance.

As we expand internationally, we also must determine the appropriate price to enable us to compete effectively internationally. In addition, if the mix of features we sell changes, then we may need to, or choose to, revise our pricing. As a result, in the future we may be required to reduce our prices or offer shorter contract durations, which could adversely affect our revenue, gross margin, profitability, financial condition and cash flow.

In addition, our competitors may offer different subscription or pricing models, which may be more attractive to potential customers. We may be required to adjust our subscription or pricing models in response to these changes, which could adversely affect our financial performance.

If we fail to adapt and respond effectively to rapidly changing technology, evolving industry standards and changing customer needs or requirements, our solutions may become less competitive.

Our success depends on our customers' willingness to adopt and use our platform, including on their smartphone or mobile device, as well as our ability to adapt and enhance our platform. To attract new customers and increase revenue from existing customers, we need to continue to enhance and improve our platform, to meet customer needs at prices that customers are willing to pay. Such efforts will require adding new features, expanding related applications and responding to technological advancements, which will increase our research and development costs. If we are unable to develop solutions that address customers' needs, or enhance and improve our platform in a timely manner, we may not be able to increase or maintain market acceptance of our platform.

Further, we may make changes to our platform that customers do not find useful. We may also discontinue certain features, begin to charge for certain features that are currently free or increase fees for any features or usage of our platform. We may also face unexpected problems or challenges in connection with new applications or feature introductions. Enhancements and changes to our platform could fail to attain sufficient market acceptance for many reasons, including:

- failure to predict market demand accurately in terms of platform functionality and capability or to supply features that meets this demand in a timely fashion;
- inability to operate effectively with the technologies, systems or applications of existing or potential customers;
- defects, errors or failures;
- negative publicity about their performance or effectiveness;
- delays in releasing new enhancements and additional features to our platform to the market;
- the introduction or anticipated introduction of competing products;
- an ineffective sales force;
- poor business conditions for our end-customers, causing them to delay purchases;
- challenges with customer adoption and use of our platform on mobile devices or problems encountered in developing or supporting enhancements to our mobile applications; and
- the reluctance of customers to purchase subscriptions to software incorporating open source software.

Because our platform is designed to operate on and with a variety of systems, we will need to continuously modify and enhance our platform to keep pace with changes in technology, and we may fail to do so.

In addition, issues in the use of artificial intelligence in our platform may result in reputational harm or liability. Domo's suite of data science leverages machine learning algorithms, predictive analytics, and other artificial intelligence technologies to identify trends, anomalies and correlations, provide alerts and initiate business processes. Artificial intelligence presents risks and challenges that could affect its adoption, and therefore our business. Artificial intelligence algorithms may be flawed. Datasets may be insufficient or contain biased information. Inappropriate or controversial data practices by us or others could impair the acceptance of artificial intelligence solutions. These deficiencies could undermine the decisions, predictions, or analysis artificial intelligence applications produce, subjecting us to competitive harm, legal liability, and brand or reputational harm.

Our platform also provides real-time write-back capabilities to customer environments, including to IoT products and services. The development of the internet of things, or IoT, presents security, privacy and execution risks. Many IoT devices have limited interfaces and ability to be updated or patched. IoT solutions may collect large amounts of data, and our handling of IoT data may not satisfy customers or regulatory requirements. IoT scenarios may increasingly affect personal health and safety. If IoT solutions that include our technologies do not work as intended, violate the law, or harm individuals or businesses, we may be subject to legal claims or enforcement actions. These risks, if realized, may increase our costs, damage our reputation or brand, or negatively impact our business and operating results.

Moreover, many competitors expend a considerably greater amount of funds on their research and development programs, and those that do not may be acquired by larger companies that would allocate greater resources to competitors' research and development programs. If we fail to maintain adequate research and development resources or compete

effectively with the research and development programs of competitors, our business could be harmed. Our ability to grow is also subject to the risk of future disruptive technologies. If new technologies emerge that are able to deliver business intelligence solutions at lower prices, more efficiently, more conveniently or more securely, such technologies could adversely affect our ability to compete.

We may not timely and effectively scale our existing technology, including our computing architecture, to meet the performance and other requirements placed on our systems, which could increase expenditures unexpectedly and create risk of outages and other performance and quality of service issues for our customers.

Our future growth and renewal rates depend on our ability to meet customers' expectations with respect to the speed, reliability and other performance attributes of our platform, and to meet the expanding needs of customers as their use of our platform grows. The number of users, the amount and complexity of data ingested, created, transferred, processed and stored by us, the number of locations where our platform is being accessed, and the number of processes and systems managed by us on behalf of these customers, among other factors, separately and combined, can have an effect on the performance of our platform. In order to ensure that we meet the performance and other requirements of customers, we continue to make significant investments to develop and implement new technologies in our platform and infrastructure operations. These technologies, which include database, application and server advancements, revised network and hosting strategies, and automation, are often advanced, complex, and sometimes broad in scope and untested through industry-wide usage. We may not be successful in developing or implementing these technologies. To the extent that we do not develop offerings and scale our operations in a manner that maintains performance as our customers expand their use, our business and operating results may be harmed.

We may not accurately assess the capital and operational expenditures required to successfully fulfill our objectives and our financial performance may be harmed as a result. Further, we may make mistakes in the technical execution of these efforts to improve our platform, which may affect our customers. Issues that may arise include performance, data loss or corruption, outages, and other issues that could give rise to customer satisfaction issues, loss of business, and harm to our reputation. If any of these were to occur there would be a negative and potentially significant impact to our financial performance. Lastly, our ability to generate new applications, and improve our current solutions may be limited if and to the extent resources are necessarily allocated to address issues related to the performance of existing solutions.

If we fail to meet our service level commitments, our business, results of operations and financial condition could be adversely affected.

Our subscription agreements with many of our customers, including most of our top customers, provide certain service level commitments. If we are unable to meet the stated service level commitments or suffer extended periods of downtime that exceed the periods allowed under our subscription agreements, we may be obligated to provide these customers with service credits, or we could face subscription terminations, which could significantly impact our revenue. Any extended service outages could also adversely affect our reputation, which would also impact our future revenue and operating results.

Our customers depend on our customer support organization to resolve technical issues relating to our platform. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. Increased customer demand for these services, without corresponding revenue, could increase costs and adversely affect our operating results. In addition, our sales process is highly dependent on the ease of use of our services, on our reputation and on positive recommendations from our existing customers. Any failure to maintain high-quality customer support, or a market perception that we do not maintain high-quality support, could adversely affect our reputation and our ability to sell our services to existing and prospective customers.

If our or our customers' access to data becomes limited, our business, results of operations and financial condition may be adversely affected.

The success of our platform is dependent in large part on our customers' ability to access data maintained on third party software and service platforms. Generally, we do not have agreements in place with these third parties that guarantee access to their platforms, and any agreements that we do have in place with these third parties are typically terminable for convenience by the third party. If these third parties restrict or prevent our ability to integrate our platform with their software or platform, including but not limited to, by limiting the functionality of our data connectors, our ability to access the data maintained on their systems or the speed at which such data is delivered, customers' ability to access their relevant data in a timely manner may be limited, and our business and operating results may be adversely affected.

Our business depends on continued and unimpeded access to the internet and mobile networks.

Our customers who access our platform and services through mobile devices, such as smartphones, laptops and tablet computers, must have a high-speed internet connection to use our services. Currently, this access is provided by telecommunications companies and internet access service providers that have significant and increasing market power in the broadband and internet access marketplace. In the absence of government regulation, these providers could take measures that affect their customers' ability to use our products and services, such as degrading the quality of the data packets we transmit over their lines, giving our packets low priority, giving other packets higher priority than ours, blocking our packets entirely, or attempting to charge their customers more for using our platform and services. To the extent that internet service providers implement usage-based pricing, including meaningful bandwidth caps, or otherwise try to monetize access to their networks, we could incur greater operating expenses and customer acquisition and retention could be negatively impacted. Furthermore, to the extent network operators were to create tiers of internet access service and either charge us for or prohibit our services from being available to our customers through these tiers, our business could be negatively impacted.

On February 26, 2015, the Federal Communications Commission, or the FCC, reclassified broadband internet access services in the United States as a telecommunications service subject to some elements of common carrier regulation, including the obligation to provide service on just and reasonable terms, and adopted specific net neutrality rules prohibiting the blocking, throttling or "paid prioritization" of content or services. However, in December 2017, the FCC once again classified broadband internet access service as an unregulated information service and repealed the specific rules against blocking, throttling or "paid prioritization" of content or services. It retained a rule requiring internet service providers to disclose their practices to consumers, entrepreneurs and the FCC. A number of parties have already stated they would appeal this order and it is possible Congress may adopt legislation restoring some net neutrality requirements. The elimination of net neutrality rules and any changes to the rules could affect the market for broadband internet access service in a way that impacts our business, for example, if internet access providers begin to limit the bandwidth and speed for the transmission of data from independent software vendors.

Incorrect or improper implementation or use of our platform could result in customer dissatisfaction and negatively affect our business, results of operations, financial condition, and growth prospects.

Our platform is deployed in a wide variety of technology environments. Increasingly, our platform has been deployed in large scale, complex technology environments, and we believe our future success will depend on our ability to increase sales of our platform for use in such deployments. We must often assist our customers in achieving successful implementations of our platform, which we do through our professional services organization. The time required to implement our platform can vary. For complex deployments, implementation can take multiple months. If our customers are unable to implement our platform successfully, or unable to do so in a timely manner, customer perceptions of our platform may be harmed, our reputation and brand may suffer, and customers may choose to cease usage of our platform or not expand their use of our platform. Our customers and third-party partners may need training in the proper use of and the variety of benefits that can be derived from our platform to maximize its benefits. If our platform is not effectively implemented or used correctly or as intended, or if we fail to adequately train customers on how to efficiently and effectively use our platform, our customers may not be able to achieve satisfactory outcomes. This could result in negative publicity and legal claims against us, which may cause us to generate fewer sales to new customers and reductions in renewals or expansions of the use of our platform with existing customers, any of which would harm our business and results of operations.

Our use of "open source" software could negatively affect our ability to offer our platform and subject us to possible litigation.

Our platform uses "open source" software that we, in some cases, have obtained from third parties. Open source software is generally freely accessible, usable and modifiable, and is made available to the general public on an "as-is" basis under the terms of a non-negotiable license. Use and distribution of open source software may entail greater risks than use of third-party commercial software. Open source licensors generally do not provide warranties or other contractual protections regarding infringement claims or other claims relating to violation of intellectual property rights or the quality of the software. In addition, certain open source licenses, like the GNU Affero General Public License, or AGPL, may require us to offer for no cost the components of our platform that incorporate the open source software, to make available source code for modifications or derivative works we create by incorporating or using the open source software, or to license our modifications or derivative works under the terms of the particular open source license. If we are required, under the terms of an open source license, to release our proprietary source code to the public, competitors could create similar products with lower development effort and time, which ultimately could result in a loss of sales for us.

We may also face claims alleging noncompliance with open source license terms or infringement, misappropriation or other violation of open source technology. These claims could result in litigation or require us to purchase a costly license, devote additional research and development resources to re-engineer our platform, discontinue the sale of our products if re-engineering could not be accomplished on a timely or cost-effective basis, or make generally available our proprietary code in source code form, any of which would have a negative effect on our business and operating results, including being enjoined from the offering of the components of our platform that contained the open source software. We could also be subject to lawsuits by parties claiming ownership of what we believe to be open source software. Litigation could be costly for us to defend, have a negative effect on our operating results and financial condition and require us to devote additional research and development resources to re-engineer our platform.

Although we monitor our use of open source software and try to ensure that none is used in a manner that would subject our platform to unintended conditions, few courts have interpreted open source licenses, and there is a risk that these licenses could be construed in a way that could impose unanticipated conditions or restrictions on our ability to commercialize our platform. We cannot guarantee that we have incorporated open source software in our platform in a manner that will not subject us to liability, or in a manner that is consistent with our current policies and procedures.

Risks Related to Our Personnel and Operations

If we fail to effectively develop and expand our sales and marketing capabilities, our ability to increase our customer base and increase acceptance of our platform could be harmed.

To increase the number of customers and increase the market acceptance of our platform, we will need to expand our sales and marketing operations, including our domestic and international sales force. We will continue to dedicate significant resources to sales and marketing programs. We believe that there is significant competition for direct sales personnel with the sales skills and technical knowledge that we require. Our ability to achieve significant revenue growth in the future will depend, in large part, on our success in recruiting, training and retaining a sufficient number of direct sales personnel and sales leadership. New hires require significant training and time before they achieve full productivity, particularly in new sales territories. Recent hires and planned hires may not become as productive as quickly as we would like, changes in sales leadership could adversely affect our existing sales personnel, and we may be unable to hire or retain sufficient numbers of qualified individuals in the future in the markets where we do business. The effectiveness of our sales and marketing has also varied over time and, together with the effectiveness of any partners or resellers we may engage, may vary in the future. Our business and operating results may be harmed if our efforts do not generate a correspondingly significant increase in revenue. We may not achieve revenue growth from expanding our sales force if we are unable to hire, develop and retain talented sales personnel, if our new sales personnel are unable to achieve desired productivity levels in a reasonable period of time, or if our sales and marketing programs are not effective. In particular, we may in the future need to adjust our go-to-market cost structure and target metrics, particularly as they relate to how we structure, effect, and compensate our direct sales personnel to become more efficient and effective at selling under a consumption-based business model. Any adjustments in compensation structure could negatively affect the productivity of our direct sales personnel, and there is no assurance that we will be able to successfully implement the adjustments in a timely or cost-effective manner, or that we will be able to realize all or any of the expected benefits from such adjustments.

We may be subject to litigation in the future, which will require significant management attention, could result in significant legal expenses and may result in unfavorable outcomes, all or any of which could adversely affect our operating results, harm our reputation or otherwise negatively impact our business.

We may in the future become subject to litigation or claims arising in or outside the ordinary course of business that could negatively affect our business operations and financial condition, including securities class actions and shareholder derivative actions, both of which are typically expensive to defend. For example, a securities class action complaint was filed against us and certain of our current and former directors and officers in November 2019, asserting violations of federal securities laws and seeking unspecified damages. For more information about this matter, which has been dismissed, see Part II, Item 1 (Legal Proceedings) of this report.

The outcome of any litigation, regardless of its merits, is inherently uncertain. Any claims and lawsuits, and the disposition of such claims and lawsuits, could be time-consuming and expensive to resolve, divert management attention and resources, and lead to attempts on the part of other parties to pursue similar claims. Any adverse determination related to litigation could adversely affect our operating results, harm our reputation or otherwise negatively impact our business. In addition, depending on the nature and timing of any such dispute, a resolution of a legal matter could materially affect our future operating results, our cash flows or both.

We have recently experienced management and board turnover, which creates uncertainties and could harm our business.

In March 2023, we announced John Mellor's resignation and the re-appointment of Joshua G. James as our chief executive officer. In December 2022, we announced the resignation of Bruce Felt as our chief financial officer and, in March 2023, the appointment of David Jolley to replace Mr. Felt. In January 2023, we announced the resignation of Catherine Wong as our chief operating officer and executive vice president of engineering and the appointment of Daren Thayne to succeed Ms. Wong as executive vice president of engineering. Mr. Thayne assumed the responsibilities of Ms. Wong in addition to his previous responsibilities. In addition, we recently have experienced significant changes in the composition of our board of directors, and more could occur in the future. In February 2023, we announced the resignation of Laurence "Jay" Brown, Jr., Dana Evan and Joy Driscoll Durling as our directors. In March 2023, we announced the appointment of Dan Strong and Renée Soto to our board of directors to fill the open vacancies. Changes to strategic or operating goals, which can often times occur with the appointment of new executives and directors, can create uncertainty, may negatively impact our ability to execute quickly and effectively, and may ultimately be unsuccessful. In addition, executive leadership and director transition periods are often difficult as the new executives and directors gain more detailed knowledge of our operations, and friction can result from changes in strategy and management style. Management and board turnover inherently causes some loss of institutional knowledge, which can negatively affect strategy and execution. In addition, to the extent we experience additional management turnover, competition for top management is high and it may take months to find a candidate that meets our requirements. If we are unable to attract and retain qualified management personnel, our business could suffer.

If we are unable to attract, integrate and retain additional qualified personnel, including top technical talent, our business could be adversely affected.

Future success depends in part on our ability to identify, attract, integrate and retain highly skilled technical, managerial, sales and other personnel. We face intense competition for qualified individuals from numerous other companies, including other software and technology companies, many of whom have greater financial and other resources than we do. These companies also may provide more diverse opportunities and better chances for career advancement. Some of these characteristics may be more appealing to high-quality candidates than those we have to offer. In addition, new hires often require significant training and, in many cases, take significant time before they achieve full productivity. We may incur significant costs to attract and retain qualified personnel, including significant expenditures related to salaries and benefits and compensation expenses related to equity awards, and we may lose new employees to competitors or other companies before we realize the benefit of our investment in recruiting and training them. Moreover, new employees may not be or become as productive as we expect, as we may face challenges in adequately or appropriately integrating them into our workforce and culture. As we move into new geographies, we will need to attract and recruit skilled personnel in those areas and may face additional challenges in attracting, integrating and retaining international employees. If we are unable to attract, integrate and retain suitably qualified individuals who are capable of meeting our growing technical, operational and managerial requirements, on a timely basis or at all, our business will be adversely affected.

Volatility or lack of positive performance in our stock price may also affect our ability to attract and retain our key employees. Employees may be more likely to leave us if the shares they own or the shares underlying their vested options have significantly appreciated in value relative to the original purchase prices of the shares or the exercise prices of the options, or, conversely, if the exercise prices of the options that they hold are significantly above the market price of our common stock. If we are unable to appropriately incentivize and retain our employees through equity compensation, or if we need to increase our compensation expenses in order to appropriately incentivize and retain our employees, our business, operating results, financial condition and cash flows would be adversely affected and the ownership of existing shareholders would be diluted.

If we fail to offer high-quality professional services and support, our business and reputation may suffer.

High-quality professional services and support, including training, implementation and consulting services, are important for the successful marketing, sale and use of our platform and for the renewal of subscriptions by existing customers. Professional services may be provided by us or by a third-party partner. The importance of high-quality professional services and support will increase as we expand our business and pursue new customers. If we or our third-party partners do not provide effective ongoing support, our ability to retain and expand use of our platform and related applications to existing customers may suffer, and our reputation with existing or potential customers may be harmed.

We continue to pursue strategies to reduce the amount of professional services required for a customer to begin to use and gain value from our platform, lower the overall costs of professional service fees to our customers, and improve the gross margin of our professional services business. If we are unable to successfully accomplish these objectives, our operating results, including our profit margins, may be harmed.

Before the COVID-19 pandemic, a significant portion of field sales and professional services were conducted in person. Currently, as a result of the work and travel restrictions related to the ongoing COVID-19 pandemic, a large portion of our sales and professional services activities are being conducted remotely. As of the date of this report, we do not yet know the extent of this shift on our ability to attract, serve, retain or upsell customers. Furthermore, existing and potential customers may choose to reduce or delay technology spending in response to the coronavirus pandemic or other public health emergencies, or attempt to renegotiate contracts and obtain concessions, which may materially and negatively impact our operating results, financial condition and prospects.

Catastrophic events may disrupt our business and impair our ability to provide our platform to customers, resulting in costs for remediation, customer dissatisfaction, and other business or financial losses.

Our operations depend, in part, on our ability to protect our facilities against damage or interruption from natural disasters, power or telecommunications failures, criminal acts and similar events. Despite precautions taken at our facilities, the occurrence of a natural disaster, epidemic or pandemic (such as the COVID-19 pandemic), an act of terrorism, vandalism or sabotage, spikes in usage volume or other unanticipated problems at a facility could result in lengthy interruptions in the availability of our platform. Even with current and planned disaster recovery arrangements, our business could be harmed. Also, in the event of damage or interruption, our insurance policies may not adequately compensate us for any losses that we may incur. These factors in turn could further reduce revenue, subject us to liability and cause us to issue credits or cause customers to fail to renew their subscriptions, any of which could harm our business.

Our long-term growth depends in part on being able to expand internationally on a profitable basis.

Historically, we have generated a substantial majority of our revenue from customers inside the United States. For example, approximately 79%, and 79% of our total revenue for the three months ended April 30, 2022 and 2023, respectively, was derived from sales within the United States. We have begun to expand internationally and plan to continue to expand our international operations as part of our growth strategy. Expanding our international operations will subject us to a variety of risks and challenges, including:

- the need to make significant investments in people, solutions and infrastructure, typically well in advance of revenue generation;
- the need to localize and adapt our application for specific countries, including translation into foreign languages and associated expenses;
- potential changes in public or customer sentiment regarding cloud-based services or the ability of non-local enterprises to provide adequate data protection, particularly in the European Union, or the E.U.;
- technical or latency issues in delivering our platform;
- dependence on certain third parties, including resellers with whom we do not have extensive experience;
- the lack of reference customers and other marketing assets in regional markets that are new or developing for us, as well as other adaptations in our market generation efforts that we may be slow to identify and implement;
- unexpected changes in regulatory requirements, taxes or trade laws;
- differing labor regulations, especially in the E.U., where labor laws are generally more advantageous to employees as compared to the United States, including deemed hourly wage and overtime regulations in these locations;
- challenges inherent in efficiently managing an increased number of employees over large geographic distances, including the need to implement appropriate systems, policies, benefits and compliance programs;
- difficulties in maintaining our company culture with a dispersed and distant workforce;
- difficulties in managing a business in new markets with diverse cultures, languages, customs, legal systems, alternative dispute systems and regulatory systems;
- currency exchange rate fluctuations and the resulting effect on our revenue and expenses, and the cost and risk of entering into hedging transactions if we choose to do so in the future;

- limitations on our ability to reinvest earnings from operations in one country to fund the capital needs of our operations in other countries;
- limited or insufficient intellectual property protection, or the risk that our products may conflict with, infringe or otherwise violate foreign intellectual property;
- political instability, terrorist activities or military conflicts, including Russia's invasion of Ukraine;
- requirements to comply with foreign privacy, information security, and data protection laws and regulations and the risks and costs of non-compliance;
- likelihood of potential or actual violations of domestic and international anticorruption laws, such as the U.S. Foreign Corrupt Practices Act, or the FCPA, and the U.K. Bribery Act, or of U.S. and international export control and sanctions regulations, which likelihood may increase with an increase of sales or operations in foreign jurisdictions and operations in certain industries;
- requirements to comply with U.S. export control and economic sanctions laws and regulations and other restrictions on international trade;
- likelihood that the United States and other governments and their agencies impose sanctions and embargoes on certain countries, their governments and designated parties, which may prohibit the export of certain technology, products, and services to such persons;
- adverse tax burdens and foreign exchange controls that could make it difficult to repatriate earnings and cash should we desire to do so; and
- our ability to recruit and engage local channel and implementation partners.

Any of these risks could adversely affect our international operations, reduce our international revenue or increase our operating costs, adversely affecting our business, operating results and financial condition and growth prospects. Our limited experience operating our business in certain geographies outside of the United States increases the risk that recent and any potential future expansion efforts will not be successful. If substantial time and resources invested to expand our international operations do not result in a successful outcome, our operating results and business will suffer.

In addition, compliance with laws and regulations applicable to our international operations increases the cost of doing business in foreign jurisdictions. We may be unable to keep current with changes in government requirements as they change from time to time. Failure to comply with these regulations could have adverse effects on our business. In addition, in many foreign countries it is common for others to engage in business practices that are prohibited by our internal policies and procedures or U.S. laws and regulations applicable to us. There can be no assurance that all of our employees, contractors, and agents will comply with the formal policies we will implement, or applicable laws and regulations. Violations of laws or key control policies by our employees, contractors, channel partners or agents could result in delays in revenue recognition, financial reporting misstatements, fines, penalties, or the prohibition of the importation or exportation of our software and services and could have a material adverse effect on our business and operating results.

Some of our business partners also have international operations and are subject to the risks described above. Even if we are able to successfully manage the risks of international operations, our business may be adversely affected if our business partners are not able to successfully manage these risks.

Future changes in the regulations and laws of the United States, or those of the international markets in which we do business, could harm our business.

We are subject to general business regulations and laws, as well as regulations and laws specifically governing the internet and software, in the United States as well as the international markets in which we do business. These regulations and laws may cover employment, taxation, privacy, data security, data protection, pricing, content, copyrights and other intellectual property, mobile communications, electronic contracts and other communications, consumer protection, unencumbered internet access to our services, the design and operation of websites, and the characteristics and quality of software and services. It is possible changes to these regulations and laws, as well as compliance challenges related to the complexity of multiple, conflicting and changing sets of applicable regulations and laws, may impact our sales, operations, and future growth.

Future acquisitions could disrupt our business and adversely affect our operating results, financial condition and cash flows.

We may make acquisitions that could be material to our business, operating results, financial condition and cash flows. Our ability as an organization to successfully acquire and integrate technologies or businesses is unproven. Acquisitions involve many risks, including the following:

- an acquisition may negatively affect our operating results, financial condition or cash flows because it may require us to incur charges or assume substantial debt or other liabilities, may cause adverse tax consequences or unfavorable accounting treatment, may expose us to claims and disputes by third parties, including intellectual property claims and disputes, or may not generate sufficient financial return to offset additional costs and expenses related to the acquisition;
- we may encounter difficulties or unforeseen expenditures in integrating the business, technologies, products, personnel or operations of any company that we acquire, particularly if key personnel of the acquired company decide not to work for us;
- an acquisition may disrupt our ongoing business, divert resources, increase our expenses and distract our management;
- an acquisition may result in a delay or reduction of customer purchases for both us and the company we acquired due to customer uncertainty about continuity and effectiveness of service from either company;
- we may encounter difficulties in, or may be unable to, successfully sell any acquired products;
- an acquisition may involve the entry into geographic or business markets in which we have little or no prior experience or where competitors have stronger market positions;
- the potential strain on our financial and managerial controls and reporting systems and procedures;
- potential known and unknown liabilities associated with an acquired company;
- if we incur debt to fund such acquisitions, such debt may subject us to material restrictions on our ability to conduct our business as well as financial maintenance covenants;
- the risk of impairment charges related to potential write-downs of acquired assets or goodwill in future acquisitions;
- to the extent that we issue a significant amount of equity or convertible debt securities in connection with future acquisitions, existing stockholders may be diluted and earnings per share may decrease; and
- managing the varying intellectual property protection strategies and other activities of an acquired company.

We may not succeed in addressing these or other risks or any other problems encountered in connection with the integration of any acquired business. The inability to integrate successfully the business, technologies, products, personnel or operations of any acquired business, or any significant delay in achieving integration, could have a material adverse effect on our business, operating results, financial condition and cash flows.

Governmental export or import controls could limit our ability to compete in foreign markets and subject us to liability if we violate them.

Our software is subject to U.S. export controls, and we incorporate encryption technology into our platform. These products and the underlying technology may be exported only with the required export authorizations, including by license, a license exception or other appropriate government authorizations. U.S. export controls may require submission of a product classification and annual or semi-annual reports. Governmental regulation of encryption technology and regulation of imports or exports of encryption products, or our failure to obtain required import or export authorization for our platform, when applicable, could harm our international sales and adversely affect our revenue. Compliance with applicable regulatory requirements regarding the export of our platform, including with respect to new releases of our platform, may create delays in the introduction of our product releases in international markets, prevent customers with international operations from deploying our platform or, in some cases, prevent the export of our platform to some countries altogether. Furthermore, U.S. export control laws and economic sanctions prohibit the shipment of certain products and services to countries, governments and persons targeted by U.S. sanctions. If we fail to comply with export and import regulations and such economic sanctions,

we may be fined or other penalties could be imposed, including a denial of certain export privileges. Moreover, any new export or import restrictions, new legislation or shifting approaches in the enforcement or scope of existing regulations, or in the countries, persons or technologies targeted by such regulations, could result in decreased use of our platform by, or in our decreased ability to export or sell subscriptions to our platform to, existing or potential customers with international operations. Any decreased use of our platform or limitation on our ability to export or sell subscriptions to our platform would likely adversely affect our business, financial condition and operating results.

Failure to comply with anti-bribery, anti-corruption, and anti-money laundering laws could subject us to penalties and other adverse consequences.

We are subject to the FCPA, the U.K. Bribery Act and other anti-corruption, anti-bribery and anti-money laundering laws in various jurisdictions both domestic and abroad. Anti-corruption, anti-bribery, and anti-money laundering laws have been enforced aggressively in recent years and are interpreted broadly and generally prohibit companies and their directors, officers, employees and agents from promising, authorizing, making or offering improper payments or other benefits to government officials and others in the private sector. Such laws apply to our agents/third parties, and we leverage third parties, including channel partners, to sell subscriptions to our platform and conduct our business abroad. We and our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities and may be held liable for the corrupt or other illegal activities of these third-party business partners and intermediaries, our employees, representatives, contractors, channel partners, and agents, even if we do not explicitly authorize such activities. While we have policies and procedures to address compliance with such laws, we cannot assure you that all of our employees and agents will not take actions in violation of our policies and applicable law, for which we may be ultimately held responsible. Any violation of the FCPA or other applicable anti-bribery, anti-corruption laws, and anti-money laundering laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, severe criminal or civil sanctions, a significant diversion of management's resources and attention or suspension or debarment from U.S. government contracts, all of which may have a material adverse effect on our reputation, business, operating results and prospects.

Risks Related to Privacy and Cybersecurity

We are subject to governmental laws, regulation and other legal obligations, particularly those related to privacy, data protection and information security, and any actual or perceived failure to comply with such obligations could impair our efforts to maintain and expand our customer base, causing our growth to be limited and harming our business.

We receive, store, and otherwise process personal information and other data from and about customers and other individuals in addition to our employees and service providers. Our handling of data is subject to a variety of laws and regulations, including regulation by various government agencies, such as the U.S. Federal Trade Commission, or FTC, and various state, local, and foreign agencies. Our data handling also is subject to contractual obligations and may be alleged or deemed to be subject to industry standards, including certain industry standards that we undertake to comply with.

In the United States, various laws and regulations apply to the collection, disclosure, and other processing of certain types of data, including with respect to security measures used to protect such data. Additionally, the FTC and many state attorneys general are interpreting federal and state consumer protection laws as imposing standards for the collection, use, dissemination, security, and other processing of data. The laws and regulations relating to privacy and data security are evolving, can be subject to significant change, and may result in ever-increasing regulatory and public scrutiny and escalating levels of enforcement and sanctions. For example, California in 2018 enacted the California Consumer Privacy Act, or CCPA, which went into effect on January 1, 2020. The CCPA requires covered companies to, among other things, provide disclosures to California consumers and afford such consumers new abilities to opt-out of certain sales of personal information. Additionally, the California Privacy Rights Act, or CPRA, was approved by California voters in the November 3, 2020 election. The CPRA amends and expands the CCPA in numerous respects, including by expanding the CCPA's private right of action. The CPRA created additional obligations relating to consumer data beginning on January 1, 2022, with enforcement anticipated to commence July 1, 2023. Following enactment of the CCPA, many other states have adopted or considered comprehensive privacy legislation. For example, Virginia, Colorado, Utah, and Connecticut have adopted such legislation that has or will become effective in 2023, and Iowa and Indiana have adopted such legislation that will become effective in 2025 and 2026, respectively. Broad federal privacy legislation has also been proposed. These and other new and evolving laws and regulations relating to privacy in the U.S. could increase our potential liability and adversely affect our business. Aspects of these laws and regulations and their interpretation and enforcement remain uncertain. We cannot fully predict the impact of these or other new and evolving laws and regulations relating to privacy and information security on our business or operations, but they may require us to modify our data processing practices and policies and to incur substantial costs and expenses in an effort to comply.

In addition, several foreign countries and governmental bodies, including the E.U., as well as the United Kingdom, Australia, and Japan, where we maintain offices, have laws and regulations dealing with the handling and processing of personal data obtained from their residents, which in certain cases are more restrictive than those in the United States. Laws and regulations in these jurisdictions apply broadly to the collection, use, storage, security, disclosure, and other processing of various types of data, including data that identifies or may be used to identify an individual. Such laws and regulations may be modified or subject to new or different interpretations, and new laws and regulations may be enacted in the future. Within the E.U., in May 2018, a far-reaching regulation governing data and privacy practices called the General Data Protection Regulation, or GDPR, became effective. The GDPR includes stringent operational requirements for processors and controllers of personal data and imposes significant penalties for non-compliance of up to the greater of €20 million or 4% of global annual revenues. Complying with the GDPR, the CCPA, and other data protection laws and regulations may cause us to incur substantial operational costs or require us to modify our data handling practices. Actual or alleged non-compliance could result in proceedings against us by governmental entities or others (including a private right of action for affected individuals in certain instances) and substantial penalties, fines, and other liabilities, and may otherwise adversely impact our business, financial condition, and operating results.

Further, the United Kingdom has enacted a Data Protection Act and a version of the GDPR referred to as the UK GDPR that, collectively, substantially implement the GDPR in the United Kingdom and provide for penalties of up to the greater of £17.5 million and 4% of total annual revenue. Uncertainty remains, however, regarding aspects of data protection in the United Kingdom in the medium to long term, and the United Kingdom is contemplating new data protection legislation. On June 28, 2021, the European Commission announced a decision of “adequacy” concluding that the United Kingdom ensures an equivalent level of data protection to the GDPR, which provides some relief regarding the legality of continued personal data flows from the European Economic Area to the United Kingdom. This adequacy determination must be renewed after four years, however, and may be modified or revoked in the interim. Further, United Kingdom data protection law imposes restrictions on personal data transfers to the U.S., similar to those imposed by the GDPR, and the United Kingdom’s Information Commissioner’s Office issued new standard contractual clauses, effective March 21, 2022, that are required to be implemented.

We have certified under the E.U.-U.S. Privacy Shield and the Swiss-U.S. Privacy Shield with respect to our transfer of certain personal data from the E.U. and Switzerland to the United States. The E.U.-U.S. Privacy Shield framework and the use of E.U. Standard Contractual Clauses, or the SCCs, to protect data exports between the E.U. and the U.S. have been subject to legal challenges in the E.U., and on July 16, 2020, the Court of Justice of the European Union, or CJEU, Europe’s highest court, held in the “Schrems II” case that the E.U.-U.S. Privacy Shield was invalid, and imposed additional obligations in connection with the use of the SCCs. The Swiss data protection and information commissioner concluded that the Swiss-U.S. Privacy Shield was invalid on similar grounds in September 2020. The European Commission issued new SCCs on June 4, 2021, addressing aspects of the CJEU’s opinion in the Schrems II case, which were required to be implemented. The European Commission and United States agreed in principle in March 2022 to a new EU-U.S. Data Privacy Framework, or DPF, which would permit transfers of personal data from the E.U. to the U.S., by participating entities. President Biden issued an executive order in October 2022 providing for safeguards on imported E.U. personal data, on which basis the European Commission adopted a draft opinion in December 2022, concluding that the U.S. ensures an adequate level of protection for personal data imported from the E.U. This opinion has not yet been formally adopted in the EU. The DPF may be further modified, and it remains unclear whether the DPF will be implemented, whether it will be appropriate for us to rely on if implemented, and whether the European Commission’s adequacy opinion will be formally adopted. We and many other companies may need to implement different or additional measures to establish or maintain legitimate means for the transfer and receipt of personal data from the E.U., Switzerland, and the United Kingdom to the U.S., and we may, in addition to other impacts, be required to engage in additional contractual negotiations and experience additional costs associated with increased compliance burdens, and we and our customers face the potential for regulators to apply different standards to the transfer of personal data from the E.U., Switzerland and the United Kingdom to the U.S., and to block or require additional measures taken with respect to certain data flows from the E.U., Switzerland, and the United Kingdom to the U.S. We and our customers may face a risk of enforcement actions by data protection authorities in the E.U. and other jurisdictions relating to personal data transfers. Any such enforcement actions could result in substantial costs and diversion of resources, distract management and technical personnel and negatively affect our business, operating results, and financial condition. We may be at risk of experiencing reluctance or refusal of European or multi-national customers to use our solutions and being subject to regulatory action or incurring penalties. Any of these developments may have an adverse effect on our business.

Additionally, we may be or become subject to data localization laws mandating that data collected in a foreign country be processed only within that country. These or other laws relating to privacy or data protection could require us to expand

data storage facilities in foreign jurisdictions or to obtain new local data storage in such countries. The expenditures this would require, as well as costs of compliance generally, could harm our financial condition. The regulatory environment applicable to the collection, use, and other processing of personal data of residents of the E.U., United Kingdom, Switzerland, and other foreign jurisdictions, and our actions taken in response, may cause us to be required to undertake additional contractual negotiations and otherwise to assume additional liabilities or incur additional costs, and could result in our business, operating results, and financial condition being harmed.

We enter into business associate agreements with our customers who require them in order to comply with the Health Insurance Portability and Accountability Act, or HIPAA, and the Health Information Technology for Economic and Clinical Health Act, and therefore we are directly subject to certain provisions of HIPAA applicable to business associates. We may collect and process protected health information as part of our designated service, which may subject us to a number of data protection, security, privacy, and other government- and industry-specific requirements. In addition, if we are unable to comply with our obligations relating to the protection and processing of protected health information, we could be found to have breached our contracts with customers with whom we have a business associate relationship. Noncompliance with laws and regulations relating to privacy and security of personal information, including HIPAA, or with contractual obligations, including under any business associate agreement, may lead to significant fines, civil and criminal penalties, and other liabilities. The U.S. Department of Health and Human Services, or HHS, audits the compliance of business associates and enforces HIPAA privacy and security standards. HHS enforcement activity has increased in recent years and HHS has signaled its intent to continue this trend. In addition to HHS, state attorneys general are authorized to bring civil actions seeking either injunctions or damages to the extent violations implicate the privacy of state residents.

Federal, state, and foreign laws, regulations, and other actual or asserted obligations relating to privacy, data protection, or information security may be interpreted and applied in manners that are, or are alleged to be, inconsistent with our practices. Any failure or perceived failure by us to comply with federal, state, or foreign laws, regulations, policies, legal or contractual obligations, industry standards, regulatory guidance or other actual or asserted obligations relating to privacy, data protection, information security, marketing, or consumer communications may result in governmental investigations and enforcement actions, claims, demands, and litigation by private entities, fines, penalties, and other liabilities, harm to our reputation and adverse publicity, and could cause our customers and partners to lose trust in us, which could materially affect our business, operating results, and financial condition. We expect that there will continue to be new laws, regulations, industry standards and other actual and asserted obligations relating to privacy, data protection, marketing, consumer communications, and information security proposed and enacted or otherwise implemented in the United States, the E.U., and other jurisdictions, and we cannot fully predict the impact such future laws, regulations, standards, and obligations may have on our business. Future laws, regulations, standards, and other actual or asserted obligations, or any changed interpretation of existing laws or regulations could impair our ability to develop and market new features and maintain and grow our customer base and increase revenue. Future restrictions on the collection, use, sharing, disclosure, or other processing of data could require us to incur additional costs or modify our platform, possibly in a material manner, which we may be unable to achieve in a commercially reasonable manner or at all, and which could limit our ability to develop new features.

If our network, application, or computer systems are breached or unauthorized access to customer data or other sensitive data is otherwise obtained, our platform may be perceived as insecure and we may lose existing customers or fail to attract new customers, our reputation may be damaged and we may incur significant liabilities, including regulatory fines for violation of compliance requirements.

As a provider of cloud services, our operations involve the storage and transmission of our customers' sensitive and proprietary information, and we also collect, store, transmit, and otherwise process large amounts of sensitive corporate, personal, and other information relating to our business and operations, including intellectual property, proprietary business information, and other confidential information. Cyber-attacks and other malicious internet-based activity continue to increase generally, and cloud-based platform providers of software and services have been targeted. Many of our employees work remotely at least part of the time, which may pose additional data security risks. Within cloud service delivery organizations, there is an increased threat from both targeted and non-targeted activities. These activities may originate from threat actor groups with various motivations, including cyber espionage, financial or ideological motivations. We may also face numerous types of attacks, including financial attacks in the form of ransomware/cyber extortion, fraud, and misappropriation of resources (such as, for instance, cryptocurrency mining operations using Domo resources). Attackers may, in addition to other motivations, seek to render unavailable, destroy, modify, or access without authorization the various types of data we store or otherwise process, including our own data, our customers' data generally, or data of specific customers.

We engage third-party service providers to store and otherwise process some of our and our customers' data, including personal, confidential, sensitive, and other information relating to individuals. Our service providers may also be the targets of cyberattacks and other malicious activity. While we have established a formal third party security risk assessment process to address security risks for our company relating to our key third party service providers, our ability to monitor our service providers' security measures is limited, and, in any event, third parties may be able to circumvent those security measures or our own security measures, resulting in unavailability of or unauthorized access to, misuse, acquisition, disclosure, loss, alteration, destruction, or other processing of our and our customers' data, including confidential, sensitive, and other information about individuals. We also use and rely on several open source libraries and packages, and certain libraries and packages generated by artificial intelligence, while developing our product and if such libraries or packages are vulnerable and are exploited, our ability to address such vulnerabilities in a timely manner may be limited and may result in disruptions to our platform or operations and in unavailability of or unauthorized access to, misuse, acquisition, disclosure, loss, alteration, destruction, or other processing of our and our customers' data, including confidential, sensitive, and other information about individuals.

Additionally, there have been and may continue to be significant supply chain cyber-attacks generally, and our third-party service providers may be targeted or impacted by such attacks. We cannot guarantee that our systems and networks or those of our vendors or service providers have not been compromised or that they do not contain exploitable defects or bugs that could result in a breach of or disruption to our systems and networks or the systems and networks of third parties that support us and our services. Our ability to monitor our third-party service providers' data security is limited, and, in any event, third parties may be able to circumvent those security measures, resulting in unavailability of, unauthorized access to, misuse, disclosure, loss, unavailability, destruction, or other processing of our and our customers' data, including sensitive and personal information. We and our service providers may also face difficulties or delays in identifying, remediating, and otherwise responding to cyberattacks and other security breaches and incidents. Because the techniques used and vulnerabilities exploited to obtain unauthorized access or to sabotage systems change frequently and generally are not identified until they are launched against a target, we may be unable to anticipate these techniques or vulnerabilities or implement adequate preventative measures. We may also experience security breaches and incidents that remain undetected for an extended period.

Enterprise use of Generative Artificial Intelligence (GenAI) technologies may result in access and processing of sensitive information, intellectual property, source code, trade secrets, and other data, through direct user input or the API, including customer or private information and confidential information. Sending confidential and private data outside of our own servers could trigger legal and compliance exposure, as well as risks of information exposure. Such exposure can result from contractual (e.g. with customers) or regulatory obligations (e.g. CCPA, GDPR, HIPAA). Furthermore, if the GenAI platform's own systems and infrastructure are not secure, potential data breaches may occur and lead to the exposure of sensitive information such as customer data, financial information, and proprietary business information. Threat actors could also use GenAI for malicious purposes, increasing the frequency of their attacks and the complexity level some are currently capable of, e.g. phishing attacks, fraud, social engineering, and other possible malicious use such as with writing malware. Code generated by GenAI could potentially be used and deployed without a proper security audit or code review to find vulnerable or malicious components. This could cause widespread deployment of vulnerable code within the organization systems.

In addition, insider threats pose significant risks to our business, potentially compromising the confidentiality, integrity, and availability of customer data and the overall reputation of the organization. As employees or trusted individuals have authorized access to sensitive systems and customer information, malicious insiders may intentionally abuse their privileges, leading to data breaches, intellectual property theft, or unauthorized access. Additionally, accidental insiders may inadvertently expose critical information due to negligence or lack of awareness.

If any security breach or security incident impacting our platform, our networks or systems, or any systems or networks of our service providers, occurs, whether as a result of third-party action, insider attacks, employee or service provider error or malfeasance, phishing or smishing attacks, ransomware or other malware, social engineering, or otherwise, such an event could result in unauthorized access to or use of our platform, disruptions to our platform or other aspects of our operations, the loss, alteration or unavailability of, or unauthorized access to or acquisition or other processing of, data or intellectual property of ourselves or our customers. Additionally, any such event, or any perception that any such event has occurred, may result in a loss of business, severe reputational or brand damage adversely affecting customer, partner, or investor confidence, regulatory investigations, demands, and orders, litigation or other claims, demands, or proceedings by governmental authorities or private parties, indemnity obligations, damages for contract breach, penalties for violation of applicable laws, regulations, or contractual obligations, and significant costs for remediation that may include liability for stolen assets or information and repair of system damage that may have been caused, incentives offered to customers or other

business partners in an effort to maintain business relationships after a breach or other incident, and other liabilities, as well as harm to our sales efforts and expansion into existing and new markets.

We could be required to expend significant capital and other resources to alleviate problems caused by such actual or perceived security breaches or other incidents and to remediate our systems, we could be exposed to a risk of loss, litigation or regulatory action and possible liability, and our ability to operate our business may be impaired. Additionally, actual, potential, or anticipated attacks may cause us to incur increasing costs, including costs to deploy additional personnel and protection technologies, train employees and engage third-party experts and consultants.

Due to political and macroeconomic uncertainty and military actions associated with Russia's invasion of Ukraine, we and our third-party service providers may be vulnerable to a heightened risk of cybersecurity attacks, phishing attacks, viruses, malware, ransomware, hacking or similar breaches and incidents from nation-state and affiliated actors, including attacks that could materially disrupt our systems, operations, and platform. In addition, if the security measures of our customers are compromised, even without any actual compromise of our platform or systems, or any networks or systems of our service providers, we may face negative publicity or reputational harm if customers or others incorrectly attribute the blame for such security breaches or other incidents to us, our platform, our systems or networks, or those of our service providers. Similarly, we may face reputational harm if any security breach or incident is caused by or otherwise attributed to our employees, vendors, or service providers as a result of inadvertent error, malfeasance, an insider attack, or otherwise. If customers or partners believe that our platform does not provide adequate security for the storage of personal or other sensitive information or its transmission over the internet, our business will be harmed. Customers' concerns about security or privacy may deter them from using our platform for activities that involve personal or other sensitive information.

Our insurance covering certain security and privacy damages and claim expenses may not be sufficient to compensate for all liability. Although we maintain insurance for liabilities incurred as a result of certain matters relating to privacy and information security, we cannot be certain that our coverage will be adequate for liabilities actually incurred, that insurance will continue to be available to us on economically reasonable terms, or at all, or that any insurer will not deny coverage as to any future claim. The successful assertion of one or more large claims against us that exceed available insurance coverage, or the occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, including our financial condition, operating results, and reputation.

Additionally, with data security a critical competitive factor in our industry, we make public statements in our privacy policies, on our website, and elsewhere describing the security of our platform. Should any of these statements be untrue, become untrue, or be perceived to be untrue, even if through circumstances beyond our reasonable control, we may face claims, including claims of unfair or deceptive trade practices, and related investigations, enforcement actions or other proceedings, brought by the FTC, state, local, or foreign regulators, and private litigants, which may result in fines, penalties, and other liabilities, and which may have a material adverse effect on our business, including our financial condition, operating results, and reputation.

Real or perceived errors, failures, or bugs in our platform could adversely affect our operating results and growth prospects.

We update our platform on a frequent basis. Despite efforts to test our updates, errors, failures or bugs may not be found in our platform until after it is deployed to our customers. We have discovered and expect we will continue to discover errors, failures and bugs in our platform and anticipate that certain of these errors, failures and bugs will only be discovered and remediated after deployment to customers. Real or perceived errors, failures or bugs in our platform could result in negative publicity, government inquiries, loss of or delay in market acceptance of our platform, loss of competitive position, or claims by customers for losses sustained by them. In such an event, we may be required, or may choose, for customer relations or other reasons, to expend additional resources in order to help correct the problem.

We implement bug fixes and upgrades as part of our regular system maintenance, which may lead to system downtime. Even if we are able to implement the bug fixes and upgrades in a timely manner, any history of inaccuracies in the data we collect for our customers, or the loss, damage, unauthorized access to or acquisition of, or inadvertent release or exposure of confidential or other sensitive data could cause our reputation to be harmed and result in claims against us, and customers may elect not to purchase or renew their agreements with us or we may incur increased insurance costs. The costs associated with any material defects or errors in our software or other performance problems may be substantial and could harm our operating results.

Interruptions or performance problems associated with our technology and infrastructure may adversely affect our business and operating results.

Our continued growth depends in part on the ability of existing and potential customers to access our platform at any time. We have experienced, and may in the future experience, disruptions, outages, and other performance problems due to a variety of factors, including infrastructure changes, introductions of new capabilities, human or technology errors, distributed denial of service attacks, or other security related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times and as our platform becomes more complex and user traffic increases. If our platform is unavailable or if users are unable to access our platform within a reasonable amount of time, or at all, our business will be harmed.

We also rely on SaaS and other technologies from third parties in order to operate critical functions of our business. To the extent that our third-party service providers experience outages, disruptions, or other performance problems, or to the extent we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business and operating results may be adversely affected. In addition, if our agreements with third-party software or services vendors are not renewed or the third-party software or services become obsolete, fail to function properly, are incompatible with future versions of our products or services, are defective or otherwise fail to address our needs, there is no assurance that we would be able to replace the functionality provided by the third-party software or services with software or services from alternative providers.

We have taken steps to increase redundancy in our platform and infrastructure and have plans in place to mitigate events that could disrupt our platform's service. However, there can be no assurance that these efforts would protect against interruptions or performance problems.

Risks Related to Our Intellectual Property

Our business is highly dependent upon our brand recognition and reputation, and the failure to maintain or enhance our brand recognition or reputation would likely adversely affect our business and operating results.

We believe that maintaining and enhancing the Domo brand identity and our reputation are critical to our relationships with customers and channel partners and to our ability to attract new customers and channel partners. We also believe that the importance of our brand recognition and reputation will continue to increase as competition in our market continues to develop. Our success in this area will depend on a wide range of factors, some of which are beyond our control, including the following:

- the efficacy of our marketing efforts;
- our ability to maintain a high-quality, innovative and error- and bug-free platform;
- our ability to obtain new customers and retain and increase usage by existing customers;
- our ability to maintain high customer satisfaction;
- the quality and perceived value of our platform;
- our ability to obtain, maintain and enforce trademarks and other indicia of origin that are valuable to our brand;
- our ability to successfully differentiate our platform from competitors' products;
- actions of competitors and other third parties;
- our ability to provide customer support and professional services;
- any actual or perceived security breach or data loss, or misuse or perceived misuse of our platform;
- positive or negative publicity;
- interruptions, delays or attacks on our platform;

- challenges with customer adoption and use of our platform on mobile devices or problems encountered in developing or supporting enhancements to our mobile applications; and
- litigation or regulatory related developments.

If our brand promotion activities are not successful, our operating results and growth may be harmed.

Independent industry analysts often provide reviews of our platform, as well as competitors' products, and perception of our platform in the marketplace may be significantly influenced by these reviews. If these reviews are negative, or less positive as compared to those of competitors' products and services, our brand may be adversely affected.

Furthermore, negative publicity, whether or not justified, relating to events or activities attributed to us, our current or former employees, partners or others associated with any of these parties, may tarnish our reputation and reduce the value of our brand. Damage to our reputation and loss of brand equity may reduce demand for our platform, make it difficult for us to attract and retain employees, and have an adverse effect on our business, operating results and financial condition. Moreover, any attempts to rebuild our reputation and restore the value of our brand may be costly and time consuming, and such efforts may not ultimately be successful.

Third-party claims that we are infringing or otherwise violating the intellectual property rights of others, whether successful or not, could subject us to costly and time-consuming litigation or require us to obtain expensive licenses, and our business could be harmed.

The technology industry is characterized by the existence of a large number of patents, copyrights, trademarks, trade secrets and other intellectual property rights. Companies in the technology industry must often defend against litigation claims based on allegations of infringement or other violations of intellectual property rights. Third parties, including our competitors, may own patents or other intellectual property rights that cover aspects of our technology or business methods and may assert patent or other intellectual property rights against us and others in the industry. Moreover, in recent years, individuals and groups that are non-practicing entities, commonly referred to as "patent trolls," have purchased patents and other intellectual property assets for the purpose of making claims of infringement or other violation of intellectual property rights in order to extract settlements. From time to time, we have received and may receive in the future threatening letters, notices or "invitations to license," or may be the subject of claims that our technology and business operations infringe or otherwise violate the intellectual property rights of others. Responding to such claims, regardless of their merit, can be time consuming, costly to defend in litigation, divert management's attention and resources, damage our reputation and brand and cause us to incur significant expenses. Claims of intellectual property infringement or other violations of intellectual property rights might require us to stop using technology found to infringe or violate a third party's rights, redesign our platform, which could require significant effort and expense and cause delays of releases, enter into costly settlement or license agreements or pay costly damage awards, or face a temporary or permanent injunction prohibiting us from marketing or selling our platform. If we cannot or do not license the infringed or otherwise violated technology on commercially reasonable terms or at all, or substitute similar technology from another source, we could be forced to limit or stop selling our platform, we may not be able to meet our obligations to customers under our customer contracts, revenue and operating results could be adversely impacted, and we may be unable to compete effectively. Even if we are successful in defending against allegations of intellectual property infringement, litigation may be costly and may divert the time and other resources of our management. Additionally, customers may not purchase our platform if they are concerned that they may infringe or otherwise violate third-party intellectual property rights. The occurrence of any of these events may harm our business.

Indemnity provisions in various agreements potentially expose us to substantial liability for intellectual property infringement and other losses.

Our agreements with customers and other third parties may include indemnification provisions under which we agree to indemnify them for losses suffered or incurred as a result of claims of intellectual property infringement or other violations of intellectual property rights, damages caused by us to property or persons, or other liabilities relating to or arising from our software, services or other contractual obligations. Large indemnity payments could harm our business, results of operations and financial condition. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other existing customers and new customers and harm our business and results of operations.

The success of our business depends in part on our ability to protect and enforce our intellectual property rights.

Our success is dependent, in part, upon protecting our proprietary technology. As of April 30, 2023, we had 119 issued U.S. patents covering our technology and two patent applications pending for examination in the United States. Our issued patents, and any patents issued in the future, may not provide us with any competitive advantages or may be challenged by third parties, and our patent applications may never be granted. Additionally, the process of obtaining patent protection is expensive and time-consuming, and we may not be able to prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner. Even if issued, there can be no assurance that these patents will adequately protect our intellectual property, as the legal standards relating to the validity, enforceability and scope of protection of patent and other intellectual property rights are uncertain.

Any patents that are issued may subsequently be invalidated or otherwise limited, allowing other companies to develop offerings that compete with ours, which could adversely affect our competitive business position, business prospects and financial condition. In addition, issuance of a patent does not guarantee that we have a right to practice the patented invention. Patent applications in the United States are typically not published until 18 months after filing or, in some cases, not at all, and publications of discoveries in industry-related literature lag behind actual discoveries. We cannot be certain that we were the first to use the inventions claimed in our issued patents or pending patent applications or otherwise used in our platform, that we were the first to file for protection in our patent applications, or that third parties do not have blocking patents that could be used to prevent us from marketing or practicing our patented technology. Effective patent, trademark, copyright and trade secret protection may not be available to us in every country in which our platform is available. The laws of some foreign countries may not be as protective of intellectual property rights as those in the United States (in particular, some foreign jurisdictions do not permit patent protection for software), and mechanisms for enforcement of intellectual property rights may be inadequate. Additional uncertainty may result from changes to intellectual property legislation enacted in the United States, including the America Invents Act, and other national governments and from interpretations of the intellectual property laws of the United States and other countries by applicable courts and agencies. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property.

Although we generally enter into confidentiality and invention assignment agreements with our employees and consultants that have access to material confidential information and enter into confidentiality agreements with our customers and the parties with whom we have strategic relationships and business alliances, no assurance can be given that these agreements will be effective in controlling access to and distribution of our platform and propriety information or prevent reverse engineering. Further, these agreements may not prevent competitors from independently developing technologies that are substantially equivalent or superior to our platform, and we may be unable to prevent this competition.

Unauthorized use of our intellectual property may have already occurred or may occur in the future. We may be required to spend significant resources to monitor and protect our intellectual property rights. Litigation may be necessary in the future to enforce our intellectual property rights. Such litigation could be costly, time consuming and distracting to management and could result in the impairment or loss of portions of our intellectual property. Furthermore, efforts to enforce our intellectual property rights may be met with defenses, counterclaims and countersuits attacking the validity and enforceability of our intellectual property rights. We may not prevail in any lawsuits that we initiate. Any litigation, whether or not resolved in our favor, could subject us to substantial costs, divert resources and the attention of management and technical personnel from our business and adversely affect our business. Our inability to protect our proprietary technology against unauthorized copying or use, as well as any costly litigation, could delay further sales or the implementation of our platform, impair the functionality of our platform, delay introductions of new features or enhancements, result in our substituting inferior or more costly technologies into our platform, or injure our reputation.

We may initiate claims or litigation against third parties for infringement or other violation of our proprietary rights or to establish the validity of our proprietary rights. Litigation also puts our patents at risk of being invalidated or interpreted narrowly and our patent applications at risk of not issuing. Additionally, we may provoke third parties to assert counterclaims against us. We may not prevail in any lawsuits that we initiate, and the damages or other remedies awarded, if any, may not be commercially viable. Any litigation, whether or not it is resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel, which may adversely affect our business, operating results, financial condition and cash flows.

Risks Related to Our Corporate Governance

The dual class structure of our common stock has the effect of concentrating voting control with Joshua G. James, our founder and chief executive officer, which will limit your ability to influence the outcome of important transactions, including a change in control.

Our Class A common stock has 40 votes per share, and our Class B common stock has one vote per share. Joshua G. James, our founder and chief executive officer, beneficially owns all of our outstanding shares of Class A common stock through Cocolalla, LLC, of which he is the managing member, and as of April 30, 2023, beneficially controlled approximately 80% of the voting power of our outstanding capital stock and therefore is able to control all matters submitted to our stockholders for approval. Mr. James may have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests. This concentrated control may have the effect of delaying, preventing or deterring a change in control of our company, could deprive our stockholders of an opportunity to receive a premium for their capital stock as part of a sale of our company and might ultimately affect the market price of our Class B common stock.

Future transfers by the holder of Class A common stock will generally result in those shares converting into shares of Class B common stock, subject to limited exceptions, such as certain transfers effected for estate planning or charitable purposes. Mr. James has informed us he and Cocolalla, LLC have entered into arrangements under which he has pledged all of such shares to secure a loan with a financial institution. If these shares were to be sold or otherwise transferred upon default of the underlying loan, the market price of our Class B common stock could decline or be volatile. For additional information, see the section of this report captioned “—Other Risks Related to Ownership of Our Class B Common Stock—Future sales of our Class B common stock in the public market could cause our stock price to fall.”

We are a "controlled company" within the meaning of Nasdaq rules, and as a result may choose to rely on exemptions from certain corporate governance requirements.

We qualify as a “controlled company” under the corporate governance rules of The Nasdaq Stock Market because our founder and chief executive officer, and entities beneficially owned by him, control more than fifty percent of the voting power of our outstanding common stock. Although, as of the date of this report, the composition of our board of directors and its committees currently complies with applicable corporate governance rules of The Nasdaq Stock Market, we have previously, and may in the future rely, on the foregoing exemptions provided to controlled companies under the corporate governance rules of The Nasdaq Stock Market. If we, in the future, rely on these “controlled company” exemptions, we may not have a majority of independent directors on our board of directors, an entirely independent nominating and corporate governance committee, an entirely independent compensation committee or perform annual performance evaluations of the nominating and corporate governance and compensation committees unless and until such time as we are required to do so. Accordingly, you may not have the same protections afforded to stockholders of companies that are subject to all of these corporate governance requirements. If we cease to be a “controlled company” and our shares continue to be listed on The Nasdaq Global Market, we will be required to comply with these provisions within the applicable transition periods.

We cannot predict the impact our dual class structure may have on our stock price or our business.

We cannot predict whether our dual class structure, combined with the concentrated control of our stockholders who held our capital stock prior to the completion of our initial public offering, including our executive officers, employees and directors and their affiliates, will result in a lower or more volatile market price of our Class B common stock or in adverse publicity or other adverse consequences. For example, certain index providers have announced restrictions on including companies with multiple-class share structures in certain of their indexes. In July 2017, FTSE Russell announced that it plans to require new constituents of its indexes to have greater than 5% of the company's voting rights in the hands of public stockholders, and S&P Dow Jones announced that it will no longer admit companies with multiple-class share structures to certain of its indexes. Because of our dual class structure, we will likely be excluded from these indexes and we cannot assure you that other stock indexes will not take similar actions. Given the sustained flow of investment funds into passive strategies that seek to track certain indexes, exclusion from stock indexes would likely preclude investment by many of these funds and could make our Class B common stock less attractive to other investors. As a result, the market price of our Class B common stock could be adversely affected.

Risks Related to Our Financial Reporting and Disclosure

Our reported financial results may be harmed by changes in the accounting principles generally accepted in the United States.

Generally accepted accounting principles in the United States are subject to interpretation by the Financial Accounting Standards Board, the Securities and Exchange Commission, or SEC, and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported financial results, and may even affect the reporting of transactions completed before the announcement or effectiveness of a change. Other companies in our industry may apply these accounting principles differently than we do, adversely affecting the comparability of our financial statements.

We have incurred and will continue to incur increased costs by being a public company, including costs to maintain adequate internal control over our financial and management systems.

As a public company, we have incurred and will continue to incur significant legal, accounting and other expenses that we did not incur as a private company, including costs associated with public company reporting requirements.

We have also incurred and will continue to incur costs associated with corporate governance requirements, including requirements of the SEC and The Nasdaq Stock Market. We expect these rules and regulations to increase our legal and financial compliance costs and to make some activities more time-consuming and costly. We also expect these rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, we may have more difficulty attracting and retaining qualified individuals to serve on our board of directors or as executive officers. We are currently evaluating and monitoring developments with respect to these rules, and we cannot predict or estimate the additional costs we may incur or the timing of such costs.

The Sarbanes-Oxley Act requires, among other things, that we assess the effectiveness of our internal control over financial reporting annually and the effectiveness of our disclosure controls and procedures quarterly. In particular, Section 404 of the Sarbanes-Oxley Act, or Section 404, requires us to perform system and process evaluation and testing of our internal controls over financial reporting to allow management to report on, and our independent registered public accounting firm potentially to attest to, the effectiveness of our internal controls over financial reporting. Our compliance with applicable provisions of Section 404 will require that we incur substantial accounting expense and expend significant management time on compliance-related issues as we implement additional corporate governance practices and comply with reporting requirements. Moreover, if we are not able to comply with the requirements of Section 404 applicable to us in a timely manner, or if we or our independent registered public accounting firm identifies deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our stock could decline and we could be subject to sanctions or investigations by the SEC or other regulatory authorities, which would require additional financial and management resources.

Other Risks Related to Ownership of Our Class B Common Stock

The market price of our Class B common stock may be volatile, and the value of your investment could decline significantly.

The trading price of our Class B common stock may be highly volatile and could be subject to wide fluctuations in response to various factors, some of which are beyond our control. The following factors, in addition to other risks described in this report, may have a significant effect on our Class B common stock price:

- actual or anticipated fluctuations in revenue and other operating results, including as a result of the addition or loss of any number of customers;
- announcements by us or competitors of significant technical innovations, acquisitions, strategic partnerships, joint ventures or capital commitments;
- the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;

- failure of securities analysts to initiate or maintain coverage of us, changes in ratings, key metrics and financial estimates and the publication of other news by any securities analysts who follow our company, or our failure to meet these analyst estimates or the expectations of investors;
- changes in operating performance and stock market valuations of cloud-based software or other technology companies, or those in our industry in particular;
- the size of our public float;
- price and volume fluctuations in the trading of our Class B common stock and in the overall stock market, including as a result of trends in the economy as a whole or in the technology industry;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business or industry, including those relating to data privacy and data security;
- lawsuits threatened or filed against us for claims relating to intellectual property, employment issues or otherwise;
- actual or perceived data breach or data loss, misuse or perceived misuse of our platform;
- changes in our board of directors or management;
- short sales, hedging and other derivative transactions involving our Class B common stock;
- sales of large blocks of our common stock including sales by our executive officers, directors and significant stockholders; and
- other events or factors, including those resulting from war, incidents of terrorism, public health epidemics or pandemics, bank failures, changes in general economic, industry and market conditions and trends, natural disasters or responses to any of these events or factors that may affect our operations.

In addition, the stock market in general, and the market for technology companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect our stock price, regardless of our actual operating performance. In addition, in the past, securities class action litigation has often been instituted against companies whose stock prices have declined, especially following periods of volatility in the overall market. For example, see Part II, Item 1 (Legal Proceedings) of this report for a description of a securities class action lawsuit previously filed against us and certain of our current and former officers and directors. Additional securities class action litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

If securities or industry analysts do not publish research reports about our business, or if they issue an adverse opinion about our business, our stock price and trading volume could decline.

The trading market for our Class B common stock is influenced by the research and reports that industry or securities analysts publish about us or our business. If one or more of the analysts who cover us issues an adverse opinion about our company, our stock price would likely decline. If one or more of these analysts ceases coverage of us or fails to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Future sales of our Class B common stock in the public market could cause our stock price to fall.

Our stock price could decline as a result of sales of a large number of shares or the perception that these sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

We register the offer and sale of all shares of common stock that we may issue under our equity compensation plans; as a result, these shares can generally be freely sold in the public market upon issuance, subject to compliance with applicable securities laws. Additionally, "sell-to-cover" transactions are utilized in connection with the vesting and settlement of restricted stock units so that shares of our common stock are sold on behalf of our employees in an amount sufficient to cover the tax withholding obligations associated with these awards. As a result of these transactions, a significant number of shares of our stock may be sold over a limited time period in connection with significant vesting events.

Further, we have been advised that Mr. James has pledged the shares of Class A common stock and Class B common stock beneficially owned by him to secure a loan with a financial institution, which loan has or will have various requirements to repay all or a portion of the loan upon the occurrence of various events, including when the price of the Class B common stock goes below certain specified levels. Mr. James has indicated that (1) he has substantial assets other than shares of our common stock and (2) if repayment of the loan is triggered there is a cure period to sell assets or restructure the loan. Although Mr. James has indicated his intention to sell other assets if necessary, shares of our common stock may need to be sold to meet these repayment requirements. Upon a default under such loan following any applicable cure period, the lender could sell the pledged shares into the market without limitation on volume or manner of sale. Sales of such shares to reduce the loan balance or by the lender upon foreclosure are likely to adversely affect our stock price. Mr. James has also indicated to us that he may in the future from time to time refinance such indebtedness, enter into derivative transactions based on the value of our Class B common stock, dispose of shares of common stock, otherwise monetize shares of his common stock and/or engage in other transactions relating to shares of our common stock and/or other securities of the company. Any of these activities may adversely affect the price of our common stock. Mr. James has also indicated that he intends to (1) continue to beneficially own a majority of the Class A common stock that he currently beneficially owns and (2) continue to control at least a majority of the voting power of our company.

In addition, in the future, we may issue additional shares of Class B common stock or other equity or debt securities convertible into common stock in connection with a financing, acquisition, litigation settlement, employee arrangement or otherwise. Any such issuance could result in substantial dilution to our existing stockholders and could cause our stock price to decline.

Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of us difficult, limit attempts by our stockholders to replace or remove our current management and limit our stock price.

Provisions of our certificate of incorporation and bylaws may delay or discourage transactions involving an actual or potential change in our control or change in our management, including transactions in which stockholders might otherwise receive a premium for their shares, or transactions that our stockholders might otherwise deem to be in their best interests. These provisions include the following:

- our dual-class common stock structure, which provides our holders of Class A common stock with the ability to significantly influence the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the shares of our outstanding Class A common stock and Class B common stock;
- when the outstanding shares of Class A common stock represent less than a majority of the total combined voting power of our Class A and Class B common stock, or the voting threshold date, our board of directors will be classified into three classes of directors with staggered three-year terms, and directors will only be able to be removed from office for cause;
- our amended and restated bylaws provide that, following the voting threshold date, approval of stockholders holding two-thirds of our outstanding voting power voting as a single class will be required for stockholders to amend or adopt any provision of our bylaws;
- our stockholders are able to take action by written consent for any matter until the voting threshold date;
- following the voting threshold date, vacancies on our board of directors will be able to be filled only by our board of directors and not by stockholders;
- only the chairman of our board of directors, chief executive officer, a majority of our board of directors or, until the voting threshold date, a stockholder (or group of stockholders) holding at least 50% of the combined voting power of our Class A and Class B common stock are authorized to call a special meeting of stockholders;
- certain litigation against us can only be brought in Delaware;
- our amended and restated certificate of incorporation authorizes undesignated preferred stock, the terms of which may be established and shares of which may be issued, without the approval of the holders of common stock; and
- advance notice procedures apply for stockholders to nominate candidates for election as directors or to bring matters before an annual meeting of stockholders.

In addition, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in any of a broad range of

business combinations with any “interested” stockholder for a period of three years following the date on which the stockholder became an “interested” stockholder.

Our amended and restated bylaws designate a state or federal court located within the State of Delaware as the exclusive forum for substantially all disputes between us and our stockholders, which could limit our stockholders’ ability to choose the judicial forum for disputes with us or our directors, officers, or employees.

Our amended and restated bylaws provide that, unless we consent in writing to the selection of an alternative forum, the sole and exclusive forum for (1) any derivative action or proceeding brought on our behalf, (2) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, or other employees to us or our stockholders, (3) any action arising pursuant to any provision of the Delaware General Corporation Law, or the certificate of incorporation or the amended and restated bylaws or (4) any other action asserting a claim that is governed by the internal affairs doctrine shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, the federal district court for the District of Delaware), in all cases subject to the court having jurisdiction over indispensable parties named as defendants.

Any person or entity purchasing or otherwise acquiring any interest in any of our securities shall be deemed to have notice of and consented to this provision. This exclusive-forum provision may limit a stockholder’s ability to bring a claim in a judicial forum of its choosing for disputes with us or our directors, officers, or other employees, which may discourage lawsuits against us and our directors, officers, and other employees. If a court were to find this exclusive-forum provision in our amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving the dispute in other jurisdictions, which could harm our results of operations.

General Risk Factors

Economic uncertainties or downturns could materially adversely affect our business.

Current or future economic uncertainties or downturns could adversely affect our business and operating results. Negative general macroeconomic conditions in both in the United States and abroad, including conditions resulting from changes in gross domestic product growth, financial and credit market fluctuations, rising inflation, a recession, political deadlock, natural catastrophes, pandemics, military conflict (including the Russian invasion of Ukraine) and terrorist attacks, whether in the United States, Europe, the Asia Pacific region or elsewhere, could cause a decrease in business investments, including corporate spending on business intelligence software in general and negatively affect the rate of growth of our business.

General worldwide economic conditions may experience significant downturns and may be unstable. These conditions make it extremely difficult for our customers and us to forecast and plan future business activities accurately, and they could cause customers to reevaluate their decisions to subscribe to our platform, which could delay and lengthen our sales cycles or result in cancellations of planned purchases. Furthermore, during challenging economic times customers may tighten their budgets and face issues in gaining timely access to sufficient credit, which could result in an impairment of their ability to make timely payments to us. In turn, we may be required to increase our allowance for doubtful accounts, which would adversely affect our financial results.

For example, during 2021, the United States experienced an inflation rate of over 7%, according to data from the U.S. Department of Labor, significantly higher than recent norms. If inflation rates remain elevated or increase further, our expenses and operating costs are likely to increase. Inflation may also result in higher interest rates and otherwise adversely impact the macroeconomic environment, which in turn could adversely impact our customers and their ability or willingness to spend on our platform. Additionally, in recent periods the U.S. has experienced a labor shortage, which has contributed to an environment of escalating wages and salaries, which may also adversely affect our expenses and operating costs.

To the extent subscriptions to our platform are perceived by customers and potential customers to be discretionary, our revenue may be disproportionately affected by delays or reductions in general information technology spending. Also, customers may choose to develop in-house software as an alternative to using our platform. Moreover, competitors may respond to market conditions by lowering prices and attempting to lure away our customers. In addition, the increased pace of consolidation in certain industries may result in reduced overall spending on our platform.

We cannot predict the timing, strength or duration of any economic slowdown, instability or recovery, generally or within any particular industry. If the economic conditions of the general economy or industries in which we operate do not improve, or worsen from present levels, our business, operating results, financial condition and cash flows could be adversely affected.

**CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES EXCHANGE ACT OF 1934,
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Joshua G. James, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Domo, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
