Non-IFRS Measures

To supplement its financial statements, the Company uses select non-IFRS financial measures. Non-IFRS measures used by the Company to analyze performance include underwriting ratios such as loss ratio, expense ratio and combined ratio as well as other performance measures such as operating income and return on operating income. The Company believes that these non-IFRS financial measures provide meaningful supplemental information regarding its performance and may be useful to investors because they allow for greater transparency with respect to key metrics used by management in its financial and operational decision making. Non-IFRS measures do not have standardized meanings and are unlikely to be comparable to any similar measures presented by other companies. See “Non-IFRS Financial Measures” at the end of this document for a reconciliation to net income. These measures are defined in the Company’s glossary which is posted on the Company’s website at www.investor.genworthmicanada.ca and can be accessed by clicking on the “Glossary of Terms” link in the Investor Resources subsection on the left navigation bar.
